Proceedings of SPIE 0277-786X, V. 11128

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Infrared Remote Sensing and Instrumentation XXVII, edited by Marija Strojnik, Gabriele E. Arnold, Proc. of SPIE
Vol. 11128, 1112801 · © 2019 SPIE · CCC code: 0277-786X/19/\$18 · doi: 10.1117/12.2551560

Proc. of SPIE Vol. 11128 1112801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

PLANETS, MOONS AND MINOR BODIES I

11128 02	Spaceborne VIR spectroscopy of small planetary bodies and inherent clues to their composition: a review and discussions of future requirements (Invited Paper) [11128-1]

PLANETS, MOONS AND MINOR BODIES II

11128 03	Compact calibration source for thermal infrared Fourier-transform spectrometer [11128-5]
11128 04	The VenSpec suite on the ESA EnVision mission to Venus (Invited Paper) [11128-6]
11128 05	Image inverting interferometer for extra-solar planet detection [11128-7]

INFRARED AND ENABLING TECHNOLOGY

11128 06	Alternative spectral windows for photonic services distribution (Invited Paper) [11128-8]
11128 08	Resonant tunneling diode photon number resolving single-photon detectors [11128-10]
11128 09	Threshold wavelength extension with dark current reduction in infrared detectors (Invited Paper) [11128-11]

INFRARED AND ENABLING INSTRUMENTS

11128 0C	A low-cost interferometric fiber optic gyro for autonomous driving [11128-14]

INTERFEROMETRY FOR SPACE EXPLORATION: FOURIER TRANSFORM AND SIMULATIONS

- 11128 OF **Feasibility of planet detection in two-planet solar system with rotationally-shearing interferometer (Invited Paper)** [11128-44]
- 11128 OG **Interferometer with single-axis robot: design, alignment and performance (Invited Paper)** [11128-45]
- 11128 OH **Two-coordinate pointing and tracking system for an infrared Fourier-transform spectrometer** [11128-46]

NASA LIDAR

- 11128 OJ **Optical system design and integration of the Global Ecosystem Dynamics Investigation Lidar** [11128-18]
- 11128 OL **The Global Ecosystem Dynamics Investigation (GEDI) Lidar laser transmitter** [11128-20]

SPECIAL REPORTS ON QUANTUM REMOTE SENSING

- 11128 OM **Developing causal interpretations for high and low level light used in quantum remote sensing (Invited Paper)** [11128-21]
- 11128 ON **Generating 2D maps from Fock to Poissonian states on variant maps using random sequences (Invited Paper)** [11128-22]

QUANTUM REMOTE SENSING

- 11128 OQ **Efficient stimulation technology for the tight oil reservoir** [11128-24]
- 11128 OR **Quantum remote sensing secure direct communication** [11128-25]
- 11128 OS **Research on quantum remote sensing science and technology** [11128-26]

POSTER SESSION

- 11128 OT **The newly improved set-up at the Planetary Spectroscopy Laboratory (PSL)** [11128-2]
- 11128 OU **The mercury radiometer and thermal infrared imaging spectrometer (MERTIS) onboard Bepi Colombo: first inflight calibration results (Invited Paper)** [11128-3]
- 11128 OV **SIMBIO-SYS Near Earth Commissioning Phase: a step forward toward Mercury** [11128-4]

- 11128 0W   **Scope of using ballistic photons for applications in biological tissue [11128-27]**
- 11128 0X   **Characterization of modified agave fructans used as drug carriers to the colon by spectroscopy techniques [11128-28]**
- 11128 0Y   **Risley prism scanner for biological tissue inspection with ballistic photons [11128-29]**
- 11128 0Z   **Design, manufacturing and testing of a CPV + T based on a Cassegrain: trough configuration [11128-30]**
- 11128 11   **Experimental study of inner structure in Infrared supercontinuum generation pumped by multi-pulse dynamics [11128-32]**
- 11128 12   **Numerical study of a spherical to plane wave diffuser for shock wave in solids [11128-33]**
- 11128 13   **3D shape measurement by two-steps temporal phase unwrapping: hybrid method [11128-34]**
- 11128 15   **Ex-vivo characterization of human healthy colon and colorectal cancer by multispectral Mueller polarimetric imaging and its polar decomposition [11128-37]**
- 11128 16   **Rotationally-shearing interferometer: preliminary results with a simulator solar system [11128-38]**
- 11128 19   **One-dimensional Eigenvalue distributions of random sequences for FFT non-stationary randomness [11128-41]**
- 11128 1A   **Processing algorithms for quantum remote sensing image data [11128-42]**

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair

Allen H.-L. Huang, University of Wisconsin-Madison (United States)

Conference Chairs

Marija Strojnik, Centro de Investigaciones en Óptica, A.C. (Mexico)
Gabriele E. Arnold, Deutsches Zentrum für Luft- und Raumfahrt e.V.
(Germany)

Conference Program Committee

Gerald T. Fraser, National Institute of Standards and Technology
(United States)
Guillermo García-Torales, Universidad de Guadalajara (Mexico)
Sarath D. Gunapala, Jet Propulsion Laboratory (United States)
Sven Höfling, Julius-Maximilians-Universität Würzburg (Germany)

Session Chairs

Welcoming Remarks

Marija Strojnik, Centro de Investigaciones en Óptica, A.C. (Mexico)

1 Planets, Moons and Minor Bodies I

Ian Coddington, National Institute of Standards and
(United States)

Guillermo García Torales, Universidad de Guadalajara (Mexico)

2 Planets, Moons and Minor Bodies II

Gabriele E. Arnold, Deutsches Zentrum für Luft- und Raumfahrt e.V.
(Germany)

Marija Strojnik, Centro de Investigaciones en Óptica, A.C. (Mexico)

3 Infrared and Enabling Technology

Guillermo García Torales, Universidad de Guadalajara (Mexico)
Josef Vojtech, CESNET z.s.p.o. (Czech Republic)

4 Infrared and Enabling Instruments

Samuel D. Butler, Air Force Institute of Technology (United States)
Marija Strojnik, Centro de Investigaciones en Óptica, A.C. (Mexico)

- 5 Interferometry for Space Exploration: Fourier Transform and Simulations
Marija Strojnik, Centro de Investigaciones en Óptica, A.C. (Mexico)

(Germany)
- 6 NASA LiDAR
Marija Strojnik, Centro de Investigaciones en Óptica, A.C. (Mexico)
- 7 Special Reports on Quantum Remote Sensing
Siwen Bi, Institute of Remote Sensing and Digital Earth, CAS (China)
- 8 Quantum Remote Sensing
Siwen Bi, Institute of Remote Sensing and Digital Earth, CAS (China)

Introduction

This year the annual conference on Infrared Remote Sensing and Instrumentation was held 10–15 August 2019 in San Diego, California, as part of the annual SPIE Optics & Photonics symposium. SPIE is a technical society dedicated to the advancement of science and engineering through the use of light, more specifically photonics and optics. We completed the 27th in this series of conferences, which is one of the longest running conferences at the annual meeting. The next meeting will be held again in San Diego in August 2020. We are quite proud that every year, SPIE takes our most successful session and develops it into a new conference, some within the remote sensing track, some in astronomy, and others in nanotechnology, dealing with such important issues as emissivity, surface finish, and coatings, and others dealing with sensors, detectors, and engineering.

On behalf of the conference participants, and especially on our own behalf, we wish to express our most profound appreciation to the authors-presenters and the lively audience who had more questions than we were able to accommodate during the sessions. The atmosphere at this conference proved once again that a face-to-face discussion between the presenter and curious listeners is needed for a true exchange of information, including, occasionally, a difference of opinion. Such lively discussion makes personal participation mandatory.

Approximately 42 papers were presented during the conference, with truly international scientific participation. A few presentations were cancelled with advanced warning allowing us to modify the schedule, but not the scheduled presentation times. The great majority of presenters (31) found the necessary time to write their research accomplishments in a technical paper and submit their work for inclusion in the proceedings. On behalf of the readers of the proceedings, we thank the authors for their dedication. Their papers may be downloaded from the SPIE Digital Library. The SPIE Digital Library continues to expand and offer more benefits to SPIE members and readers by making research accomplishments published in the proceedings and journals available worldwide.

Within the last ten years or so, an advisory note has been inserted in the SPIE Call for Papers that the chairs and members of the technical committee review all papers. Many SPIE participants used to assume that this was just *pro-forma*, so our conferences would look good. The truth is that each paper has been read carefully by at least one chair, for as long as we have been involved in these activities. The engineer/scientist who is interested in many subjects, and enjoys to some degree interpersonal interaction, is usually attracted to the conference organization. Such a researcher enjoys reading about new technology, engineering, and science and about the new projects that their colleagues have undertaken. The papers at our conference have historically been of the highest quality. We believe that one more

review of the final submitted work can make the paper even better.

The conference this year was organized into eight oral sessions and one poster session with the presentations thematically grouped within the sessions. We started with two sessions on Planets, Moons, and Minor Bodies, chaired by the conference chair. The third session was titled Infrared and Enabling Technology. It was chaired by Dr. Josef Vojtech, CESNET z.s.p.o. from Prague in Czech Republic. The fourth session was Infrared and Enabling Instruments. It was moderated by Dr. Samuel Butler from the Air Force Institute of Technology in United States. Session five, Interferometry for Space Exploration: Fourier Transform and Simulations, was chaired jointly by both conference chairs. Dr. Marija Strojnik, Centro de Investigaciones en Óptica, A.C., in Leon, Mexico, chaired session six, on NASA LiDAR experiments. The final two sessions were dedicated to Quantum Remote Sensing. Dr. Siwen Bi, of Institute of Remote Sensing and Digital Earth, CAS, in China, chaired both sessions, except for the presentation delivered by session organizer where the Chair stepped in to assist with moderation.

Special thanks are extended to the SPIE staff for providing friendly guidance and organizational support to meet all the deadlines. Organizing a technical conference and publishing proceedings in the form of an e-book involves hard work of a team of dedicated and knowledgeable people. We thank them for their efficient assistance, patience, and constant support.
