SPIE

Volume 11132

Proceedings of SPIE 0277-786X, V. 11132

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Polarization Science and Remote Sensing IX, edited by Julia M. Craven, Joseph A. Shaw, Frans Snik, Proc. of SPIE
Vol. 11132, 1113201 · © 2019 SPIE · CCC code: 0277-786X/19/\$21 · doi: 10.1117/12.2551654

Proc. of SPIE Vol. 11132 1113201-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

POLARIZATION IN REMOTE SENSING I

11132 03	Material identification from remote sensing of polarized self-emission [11132-3]
11132 04	Simultaneous determination of 3-dimensional velocity components using a single vector beam [11132-4]
11132 05	Polarization to estimate leaf surface reflectance [11132-5]
11132 06	Polarization enhancement of passive SWIR cloud thermodynamic phase remote sensing [11132-6]

POLARIZATION IN REMOTE SENSING II

11132 08	Expected performance and error analysis for SPEXone, a multi-angle channeled spectropolarimeter for the NASA PACE mission (Invited Paper) [11132-8]
11132 09	Achieving a spectropolarimetric precision better than 0.1% in the near-infrared with WIRC+Pol [11132-9]
11132 0A	A snapshot full-Stokes spectropolarimeter for detecting life on Earth [11132-10]
11132 0B	NEOPol: Polish polarimeter for NEO observations [11132-11]

POLARIZATION PHENOMENOLOGY OF NATURAL AND ARTIFICIAL SCENES

11132 0C	Temporal evolution of sky polarization during solar eclipse totality [11132-12]
11132 0E	The rainbow beam experiment: direct visualization of dipole scattering and optical rotatory dispersion [11132-14]

POLARIZATION METROLOGY AND INSTRUMENTATION I

11132 0H	Practical design issues for snapshot Mueller matrix spectropolarimetry [11132-17]
----------	--

- 11132 0I **Improving performance of PEM-based partial Mueller matrix polarimeters** [11132-18]
- 11132 0J **Measurement of scattered light polarization on surfaces using focused illumination** [11132-19]
- 11132 0K **Spatio-temporal hybrid color-polarization channeled sensors** [11132-21]

POLARIZATION METROLOGY AND INSTRUMENTATION II

- 11132 0L **The power of polymers and liquid crystals for polarization control (Invited Paper)** [11132-22]
- 11132 0M **Performance assessment of microgrid polarization cameras** [11132-23]
- 11132 0N **Phase-shifting interferometry in fiber-based channeled spectropolarimetry** [11132-24]
- 11132 0O **Estimation of the correlation distance of one-dimensional random rough surfaces from polarization sensitive bistatic measurements** [11132-25]

POLARIZATION METROLOGY AND INSTRUMENTATION III

- 11132 0P **Dynamic calibration of a channeled spectropolarimeter for extended temperature stability** [11132-26]
- 11132 0Q **Simulation of the polarimetric response of microscopic semitransparent specimens immersed in water** [11132-27]

POLARIZATION OPTICAL SYSTEMS AND COMPONENTS

- 11132 0U **Oblique incidence performance of achromatic retarders in polarization optics** [11132-31]
- 11132 0V **Direct correlation spectrometer using polarized light** [11132-32]
- 11132 0X **Polarization-dependent diffractive optical elements based on photoalignment of liquid crystals** [11132-34]

POSTER SESSION

- 11132 0Z **Classification of polarimetric SAR data based on subspace projection segmentation** [11132-36]
- 11132 10 **Improved speckle filtering of polarimetric SAR by target signature preserving** [11132-37]
- 11132 13 **Retardance parameters measurements by employing a rotating polarizer-analyzer polarimeter** [11132-40]

- 11132 14 **Differentiation of collagenous changes in scleroderma from unstained thin skin tissue sections using Mueller polarimetric image analysis [11132-41]**
- 11132 15 **Improvement of Lidar data classification algorithm using the machine learning technique [11132-42]**

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Program Track Chair

Allen H.-L. Huang, University of Wisconsin-Madison (United States)

Conference Chairs

Julia M. Craven, Sandia National Laboratories (United States)

Joseph A. Shaw, Montana State University (United States)

Frans Snik, Leiden University (Netherlands)

Conference Program Committee

Bruce E. Bernacki, Pacific Northwest National Laboratory
(United States)

David B. Chenault, Polaris Sensor Technologies, Inc. (United States)

Russell A. Chipman, Wyant College of Optical Sciences
(United States)

Aristide C. Dogariu, CREOL, The College of Optics and Photonics,
University of Central Florida (United States)

Dennis H. Goldstein, Polaris Sensor Technologies Inc. (United States)

Michael Kudenov, North Carolina State University (United States)

Charles F. LaCasse, Sandia National Laboratories (United States)

Kazuhiko Oka, Hirosaki University (Japan)

Yoav Y. Schechner, Technion-Israel Institute of Technology (Israel)

Jean-Marc Thériault, Defence Research and Development Canada,
Valcartier (Canada)

J. Scott Tyo, UNSW Canberra (Australia)

Session Chairs

- 1 Polarization Display and Visualization
Joseph A. Shaw, Montana State University (United States)
- 2 Polarization in Remote Sensing I
Julia M. Craven, Sandia National Laboratories (United States)
- 3 Polarization in Remote Sensing II
Charles F. LaCasse, Sandia National Laboratories (United States)

Polarization Photo Show

Joseph A. Shaw, Montana State University (United States)

- 4 Polarization Phenomenology of Natural and Artificial Scenes
Frans Snik, Leiden Observatory (Netherlands)
- 5 Polarization Analysis of Optical Systems
J. Scott Tyo, UNSW Canberra (Australia)
- 6 Polarization Metrology and Instrumentation I
Julia M. Craven, Sandia National Laboratories (United States)
- 7 Polarization Metrology and Instrumentation II
Michael W. Kudenov, North Carolina State University (United States)
- 8 Polarization Metrology and Instrumentation III
Frans Snik, Leiden Observatory (Netherlands)
- 9 Polarization Optical Systems and Components
Russell A. Chipman, Wyant College of Optical Sciences
(United States)
