Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

FOURTEENTH SCHOOL ON ACOUSTO-OPTICS AND APPLICATIONS

11210 02	Tribute to the memory of professor Vitaly Voloshinov [11210-32]
11210 03	Acousto-optics as a field of current interest in research and application [11210-19]
11210 04	Broadband immersion laser ultrasonic tomography of graphite-epoxy composite [11210-5]
11210 05	Interaction of two coherent light beams with ultrasonic wave [11210-7]
11210 06	Physical properties of α-BaB₂O₄ and β-BaB₂O₄ crystals promising for applications in acousto-optic devices [11210-14]
11210 07	Multi-electrode array for spectral bandwidth control [11210-27]
11210 08	Acousto-optic programmable filters and the sampling theorem [11210-2]
11210 09	Effects of electric matching circuit parameters on the acousto-optic mode locker functioning [11210-21]
11210 0A	Adaptive change of AOTF instrumental function with frequency modulation of ultrasonic wave [11210-6]
11210 0B	Acousto-optical modulator based on NaBi(MoO₄)₂ crystal [11210-30]
11210 0C	Photosynthetic energy storage efficiency in biofilms determined by photoacoustics [11210-16]
11210 0D	Endoscopic spectral imagers based on acousto-optic filtration of light [11210-24]
11210 0E	Anisotropic acousto-optic interaction in KRS-5 cubic crystal possessing induced optical anisotropy [11210-13]
11210 0F	Acousto-optic spectrometer ISEM for ExoMars-2020 space mission: ground measurements and calibrations [11210-9]

11210 OG	Applications of collinear acousto-optic diffraction for optical frequency combs generation [11210-8]
11210 OH	Semiautomatic acousto-optical tunable filter calibration from spectrometry in the visible range with deep learning [11210-31]
11210 OI	Sensitivity characterization of in-fiber acousto-optic interaction [11210-26]
11210 OJ	All-fiber dual-wavelength narrowband acousto-optic tunable bandpass filter based on vector mode coupling [11210-3]
11210 OK	Application of layered structures for mid-infrared acousto-optics [11210-22]
11210 OL	Anisotropic light diffraction in spatially periodical acoustic field [11210-18]
11210 OM	Analysis of wide-angle acousto-optic interaction geometry in single crystal mercury bromide [11210-12]
11210 ON	A novel configuration for effective acousto-optic diffraction by IDT-radiated bulk waves in lithium tantalate [11210-20]
11210 OO	Investigation of close to collinear anisotropic acousto-optic interaction in a biaxial crystal of alpha-iodic acid [11210-29]
11210 OP	Review of acousto-optical devices in advanced microscopy: from 3D scanning via super-resolution to encoded multi-beams [11210-1]
11210 OQ	High-frequency ($f_{RF} > 1$ GHz) acousto-optic modulation using a doubly resonant cavity in a MEMS foundry platform [11210-28]
11210 OR	Design, implementation, and characterization of a fast acousto-optical multi-focal laser system [11210-23]
11210 OS	New AOTF-based instrumental concepts for atmospheric science [11210-25]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Conference Chairs

Ireneusz Grulkowski, Nicolaus Copernicus University (Poland)
Bogumił B. J. Linde, University of Gdańsk (Poland)
Antoni Śliwiński, University of Gdańsk (Poland)

Scientific Committee

Laszlo Adler, Ohio State University (United States)
Adriano Alippi, University of Rome 'La Sapienza' (Italy)
Vladimir I. Balakshy, Lomonosov Moscow State University
(Russian Federation)
Erik Blomme, Katholieke Universiteit Leuven (Belgium)
Daumantas Čiplys, Vilnius University (Lithuania)
Sergey V. Egerev, N. N. Andreev Acoustics Institute (Russian Federation)
Vitalyi Gushev, Université du Maine (France)
Jean-Claude Kastelik, Université Polytechnique des Hauts-de-France,
CNRS, Université de Lille (France)
Sergey V. Kulakov, Saint-Petersburg State University of Aerospace
Instrumentation (Russian Federation)
Piotr Kwiek, University of Gdańsk (Poland)
Vincent Laude, CNRS FEMTO-ST Institute (France)
Oswald Leroy, Katholieke Universiteit Leuven (Belgium)
Bogumił B.J. Linde, University of Gdańsk (Poland)
Leonid N. Magdich, Research Institute 'Polus' (Russian Federation)
Vladimir Ya. Molchanov, National University of Science and Technology
MISIS (Russian Federation)
Bogusław Mróz, Adam Mickiewicz University (Poland)
Stanisław J. Pogorzelski, University of Gdańsk (Poland)
Ting-Chung Poon, Virginia Tech (United States)
Antoni Śliwiński, University of Gdańsk (Poland)
Bernhard R. Tiftmann, Penn State University (United States)
Vitaly B. Voloshinov, Lomonosov Moscow State University
(Russian Federation)
Konstantin B. Yushkov, National University of Science and Technology
MISIS (Russian Federation)

Local Organizing Committee

Justyna Cembrzyńska, Aleksander Jabłoński Foundation (Poland)
Grzegorz Gondek, Nicolaus Copernicus University (Poland)
Agnieszka Górka-Pukownik, Aleksander Jabłoński Foundation (Poland)
Ireneusz Grulkowski, Nicolaus Copernicus University (Poland)

Alfonso Jimenez-Villar, Nicolaus Copernicus University (Poland)
Bogumił B.J. Linde, University of Gdańsk (Poland)
Ewa Mączyńska, Nicolaus Copernicus University (Poland)
Daniel Rumiński, Nicolaus Copernicus University (Poland)
Krzysztof Szulżycki, Nicolaus Copernicus University (Poland)

Session Chairs

- 1 Photoacoustic Imaging and Spectroscopy
Ireneusz Grulkowski, Nicolaus Copernicus University (Poland)
- 2 Fundamentals of Acousto-Optic Interaction I
Vladimir I. Balakshy, Lomonosov Moscow State University
(Russian Federation)
- 3 Acousto-Optic Instrumentation
Bogumił B. J. Linde, University of Gdańsk (Poland)
- 4 Light and Sound in Biology and Medicine
Peter Saggau, Baylor College of Medicine (United States)
- 5 Acousto-Optic Materials and Structures
Vladimir Ya. Molchanov, National University of Science and Technology
MISIS (Russian Federation)
- 6 Acousto-Optics for Spectroscopy, Metrology and Imaging
Martina Delgado-Pinar, University of Valencia (Spain)
- 7 Acousto-Optics in Waveguides / Photonic Structures
Jean-Claude Kastelik, Université Polytechnique des Hauts-de-France,
CNRS, Université de Lille (France)
- 8 Fundamentals of Acousto-Optic Interaction II
Vitaly B. Voloshinov, Lomonosov Moscow State University
(Russian Federation)
- 9 Acousto-Optic Devices
Stanisław J. Pogorzelski, University of Gdańsk (Poland)
- 10 Novel Applications of Acoustics / Optics
Martí Duocastella, Istituto Italiano di Tecnologia (Italy)

Introduction

The tradition of the Schools on Acousto-Optics and Applications (SAOA) conference dates back to the 1980s when international meetings were organized by the Institute of Experimental Physics of the University of Gdańsk in different places in the Pomeranian region (Jurata, Wieżyca, Gdańsk, Sopot). The last two editions of the conference were organized together with Vilnius University in Druskininkai, Lithuania (2014), and with the National University of Science and Technology MISIS in Moscow, Russia (2017). This issue contains selected papers presented at the 14th School on Acousto-Optics and Applications, which was held on 24-27 June, 2019, in Toruń, Poland.

The 14th SAOA attracted 53 senior and young scientists, engineers, and specialists from all over the world to disseminate their results, exchange ideas, and forge new connections or strengthen and consolidate ongoing collaborations. The participants came from 15 countries and four continents. The program of the 14th SAOA featured keynote lectures (X.L. Dean-Ben, M. Duocastella, P. Saggau), invited talks (P. Kwiek, V.B. Voloshinov, V.I. Balakshy) and regular oral presentations. The conference focused on all physical aspects of light and sound interaction and provided an insight into recent technology developments of both pure and applied acousto-optics. In particular, the following topics were included in the program:

- theoretical and experimental studies of light diffraction by ultrasonic waves,
- acousto-optic devices and instruments,
- new materials and structures for acousto-optics signal processing,
- acousto-optic imaging and tomography,
- ultrafast and femtosecond acousto-optics,
- photoacoustic imaging and spectroscopy,
- optoacoustics and thermoacoustics,
- novel applications in acousto-optics.

A special session on novel acousto-optic materials and structures was dedicated to the memory of Prof. Lyudmila Kulakova who passed away on October 2018. The participants also had a chance to enjoy social events such as a visit to the Astronomical Observatory of the Nicolaus Copernicus University which houses the biggest radio telescope in Central Europe.

We acknowledge the organizers, Nicolaus Copernicus University and University of Gdańsk, as well as partners of the conference including Aleksander Jabłoński Foundation, Committee on Acoustics of the Polish Academy of Sciences, and SPIE Student Chapter at the Nicolaus Copernicus University, which participates in the SPIE Visiting Lecturer Program. We also express our sincere thanks to the organizations that provided financial support: Institute of Experimental Physics at

the University of Gdańsk, Polish Ministry of Science and Higher Education, The Optical Society (OSA), International Commission on Acoustics (ICA), and SPIE – The International Society for Optics and Photonics.

This proceedings volume is dedicated to the memory of Professor Vitaly Borisovich Voloshinov from Lomonosov Moscow State University who passed away suddenly three months after the conference. Prof. Voloshinov significantly contributed to Schools on Acousto-Optics and Applications for many years by serving a member of Scientific and Organizing Committee, by chairing sessions and integrating acousto-optic community through international cooperation. This issue includes 26 papers presented at the 14th SAOA. The topics covered here span from traditional acousto-optic research to novel applications of optics and acoustics (ultrasonics) with special attention to modern imaging technologies (microscopy) and spectroscopy.
