Proc. of SPIE Vol. 11306 1130601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>
xi	<i>Introduction</i>

SESSION 1 MATERIALS AND PROCESSES

11306 02	Holographic wave front printing for fabrication of reflection holograms with arbitrary recording wave fronts (Best Student Paper Award) [11306-1]
11306 03	Ensuring reliable single-frequency laser performance for holography and other interferometric techniques in production environments [11306-2]
11306 04	Dispersion compensation for full-color virtual-imaging systems with a holographic off-axis mirror [11306-3]
11306 05	Unexplained complex colour shifts within single and dual wavelength holograms [11306-4]

SESSION 2 APPLICATIONS

11306 06	Holographic micro-mirror arrays as projection screens for transparent display applications [11306-5]
11306 08	Digital holography for evaluation of the refractive index distribution externally induced in semiconductors [11306-7]
11306 09	Depth measurement using engineering point spread function with coded aperture [11306-8]
11306 0A	In-depth particle localization with common-path digital holographic microscopy [11306-9]
11306 0B	Open-source 3D-printed digital inline holographic microscope for low-cost cellular imaging [11306-10]
11306 0C	Expanding possibilities how to apply Bayfol HX® film into recording stacks and optical parts [11306-11]

SESSION 3 EXHIBITIONS

11306 OG **Memory and holographic space** [11306-14]

SESSION 4 DIGITAL HOLOGRAPHY

11306 OH **Acceleration of phase-only hologram generation by sub-image preiteration** [11306-15]

11306 OI **Effect of rotational shear on imaging properties of bimodal incoherent digital holography system** [11306-16]

11306 OJ **Designing diffractive arbitrary shaped top-hat beam in non-paraxial systems** [11306-17]

11306 OK **Generalized phase-shifting color holography** [11306-18]

11306 OL **High-resolution binary hologram printing methods** [11306-19]

11306 OM **Simplified content generation for holographic printer using computer-generated integral imaging** [11306-21]

POSTER SESSION

11306 ON **Holographic image reconstruction by magneto-optical light modulation device array** [11306-22]

11306 OO **Real-time holographic gratings recorded in Norland Optical Adhesive 65 and yellow eosin** [11306-23]

11306 OP **Measuring photoelastic dispersion coefficients in material samples with digital holography** [11306-24]

11306 OQ **Overlapping waves with random amplitude and phase** [11306-25]

11306 OR **Study on table-top optical system enlarging viewing-zone for displaying holographic aerial image** [11306-26]

11306 OS **Fast calculation by auto-optimized method in CGH video generation using GPU** [11306-27]

11306 OT **Copper-doped polymeric material for holographic recording** [11306-28]

11306 OU **Single exposition holography for multi-depth objects** [11306-29]

- 11306 0V **Asymmetric public key cryptosystem using digital holographic encryption method** [11306-30]
- 11306 0W **Fast increase of quality of optically reconstructed images in digital holography** [11306-31]
- 11306 0X **Generation speed enhancement for full color computer generated holography using multiple wave-front recording planes** [11306-32]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Sailing He, KTH Royal Institute of Technology (Sweden) and Zhejiang University (China)

Yasuhiro Koike, Keio University (Japan)

Symposium Co-chairs

Connie J. Chang-Hasnain, University of California, Berkeley (United States)

Graham T. Reed, Optoelectronics Research Centre, University of Southampton (United Kingdom)

Program Track Chair

Liang-Chy Chien, Kent State University (United States)

Conference Chair

Hans I. Bjelkhagen, Glyndwr University (United Kingdom) and Hansholo Consulting Ltd. (United Kingdom)

Conference Program Committee

Maria Isabel Azevedo, Universidade de Aveiro (Portugal)

David Brotherton-Ratcliffe, Geola Technologies Ltd. (United Kingdom)

Gerald L. Heidt, Wasatch Photonics, Inc. (United States)

Michael A. Klug, Magic Leap, Inc. (United States)

Alkiviadis Lembessis, The Hellenic Institute of Holography (Greece)

Deanna McMillen, EOTech, Inc. (United States)

Martina L. Mrongovius, RMIT University (Australia) and Center for the Holographic Arts (United States) and Academy of Media Arts, Cologne KHM (Germany)

Hiroshi Yoshikawa, Nihon University (Japan)

Session Chairs

1 Materials and Processes

Hans I. Bjelkhagen, Glyndwr University (United Kingdom) and Hansholo Consulting Ltd. (United Kingdom)

- 2 Applications
Hans I. Bjelkhagen, Glyndwr University (United Kingdom) and
Hansholo Consulting Ltd. (United Kingdom)
- 3 Exhibitions
Seung-Hyun Lee, Kwangwoon University (Korea, Republic of)
- 4 Digital Holography
Seung-Hyun Lee, Kwangwoon University (Korea, Republic of)

Introduction

Welcome to the proceedings of Photonics West OPTO 2020 conference on Practical Holography XXXIV: Materials and Applications, presented on 5th February 2020.

This is an important international event in the field of holographic applications and recording materials. The conference provides a venue for all aspects of holography: art, display, metrology, scientific, security, storage, materials and processes, CGHs and HOEs. The conference also brings together participants from all over the world.

The holography conference was chaired by Hans Bjelkhagen, from Glyndŵr University, and attracted about 50 participants. This year's conference featured long-time participants and new members of the practical holography community who shared many novel and interesting contributions in various holographic fields during one day of oral presentations and a poster session in the evening. The oral presentations were divided into four main sessions: Materials and Processes, Applications, Exhibitions and Digital Holography.

Jack Mills, Covestro LLC - USA, described how to apply Bayfol HX[®] photopolymer film into recording stacks and optical parts. PhD student Johannes Hofmann at Karlsruher Institut für Technologie in Germany gave a paper on holographic wave front printing for fabrication of reflection holograms with arbitrary recording wave fronts. This paper was awarded 'Best Student Paper' an award provided by HÜBNER.

Maria Isabel Azevedo, from the Universidade de Aveiro, Portugal, described how public engagement in science and technology can be accomplished using holography. Hosung Jeon, from Kyungpook National University, South Korea, described high-resolution binary hologram printing methods. Optical adhesives, such as Norland 65, are used to glue optical components. Arturo Olivares-Pérez, from the University Autonoma Metropolitana in Mexico had been able to sensitize Norland 65 using Eosin Yellow so that it was possible to record hologram gratings in this optical adhesive.

The SPIE holography technical evening event was held on Tuesday, 4 February, at the InterContinental Hotel. It focused on new developments, applications, holography events, and demonstrations. During the Tuesday evening event, a short presentation took place, by Ian Lancaster, from Reconnaissance, United Kingdom. He described the future of holograms in document security. Hans Bjelkhagen, gave information on the new Geola Facility for holography being built on David Brotherton-Ratcliffe's Forrest House Estate near London. It will be equipped with a digital color hologram printer and a darkroom for processing large glass plates.

A proposal for the 12th International Symposium on Display Holography (ISDH 2021) was presented by Seung Hyun Lee of KwangWoon University, Seoul, South Korea. It will take place between 28 June and 3 July, 2021.

COBOLT-HÜBNER, Sweden, and UNIK LASERS, Scotland, described their lasers suitable for holography. Both companies are going to make integrated systems containing RGB lasers for color holography emitting "white" laser beams. Bernard Kress, Microsoft, described Hololens 2. During Photonics West workshops on and demonstrations of AR, VR, MR equipment took place. The participants were able to test the latest head gear such as Magi Leap and Hololens 2.

The conference chair would like to thank the authors, the session chairs and the program committee members for their contributions to the conference. I look forward to seeing you at next year's conference in San Francisco.

Hans I. Bjelkhagen
