The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

11323 1F **Excitation selectivity in model tin-oxo resist: a computational chemistry perspective** [11323-46]

EUV MASK INSPECTION AND PELLICLE

11323 1G **The EUV CNT pellicle: balancing material properties to optimize performance** [11323-47]

11323 1I **Illumination control in lensless imaging for EUV mask inspection and review** [11323-49]

11323 1J **Optical defect inspection solution for EUV stochastics detection** [11323-50]

NEW CONCEPTS IN EUV

11323 1L **Simulation investigation of enabling technologies for EUV single exposure of Via patterns in 3nm logic technology** [11323-52]

11323 1N **Projecting EUV photo-speeds for future logic nodes** [11323-54]

POSTER SESSION

11323 1Q **Novel high-contrast phase-shifting masks for EUV interference lithography** [11323-57]

11323 1W **Application of alternative developer solutions for EUV lithography** [11323-63]

11323 1Z **Additional real-time diagnostics on the EBL2 EUV exposure facility** [11323-66]

11323 2I **Spectral purity performance of high-power EUV systems** [11323-68]

11323 24 **Compact modeling to predict and correct stochastic hotspots in EUVL** [11323-71]

11323 25 **A plausible approach for actinic patterned mask inspection using coherent interferometric imaging** [11323-72]

11323 26 **Impact of EUV resist thickness on local critical dimension uniformities for <30 nm CD via patterning** [11323-73]

11323 28 **Update of development progress of the high power LPP-EUV light source using a magnetic field** [11323-75]

11323 29 **Analysis of trade-off relationships between resolution, line edge roughness, and sensitivity in extreme ultraviolet lithography using machine learning** [11323-76]

11323 2A	CLEAN TRACK solutions for defectivity and CD control towards 5 nm and smaller nodes [11323-77]
11323 2D	Realization of thermally stable transmissive optical elements for the EUV wavelength range [11323-80]
11323 2E	Impact of flare on source mask optimization in EUVL for 7nm technology node [11323-81]
11323 2H	EUV OPC methodology for beyond 20nm memory cell by simulation data [11323-84]
11323 2J	Compressive sensing method for EUV source optimization using different bases [11323-86]

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.
