Proc. of SPIE Vol. 11335 1133501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

DISPLAY TECHNOLOGY AND OPTICAL STORAGE

11335 02	Holographic display based on partially coherent light [11335-1]
11335 03	CGH based on partially coherent light [11335-2]
11335 04	Resolution analysis of focused plenoptic camera with four types focal lengths [11335-4]
11335 05	Real-time double-depth-image-based rendering for autostereoscopic display systems [11335-5]
11335 06	Small water surface target visual stealth effect evaluation method [11335-6]
11335 07	Slightly off-axis flipping digital holography using polarization technology [11335-7]
11335 08	Aggregation-induced emission of tetraphenylethene photoresist film and their application in optical data storage [11335-8]
11335 09	A fault injection system for space imaging application [11335-9]
11335 0A	Magnification of diffraction patterns using plane wave illumination [11335-10]
11335 0B	High performance electrochromic device based on multifunctional hydrogel [11335-11]
11335 0C	Multi-wavelength diffractive lens design for color imaging [11335-15]
11335 0D	An accurate volume hologram model for optical design: simulating a multi-color holographic display using ray tracing [11335-16]
11335 0E	Color holographic display system based on effective utilization of SLM [11335-19]
11335 0F	Efficient DIBR method based on depth offset mapping for 3D image rendering [11335-20]
11335 0G	Fabrication of diffractive axilens for multiplane holographic projection [11335-21]

11335 OH	Research on active SLM device structure of deep sub-wavelength F-P resonance [11335-24]
11335 OI	Achromatic and distortion-suppressed floating image display system using SCD [11335-25]
11335 OJ	Reconstruction of 3D structural semantic points based on multiple camera views [11335-27]
11335 OK	Image processing for simulating the reconstructed images of holographic stereogram based on synthetic parallax images [11335-29]
11335 OL	Effects of pickup mode and parameters of integral imaging based on C4D [11335-30]
11335 OM	Research of combination detection and fusion method based on radar and infrared channels [11335-31]
11335 ON	The effect of slit aperture width on the performance of integral imaging based on parallax barrier [11335-37]
11335 OO	Calibration of fabrication error for autostereoscopic three-dimensional display [11335-38]
11335 OP	Polymetric lenticular lens array design, ultra-precision machining and inspection technology for naked-eye 3D display [11335-39]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Mengxia Xie, Beijing Normal University (China)
Pu Zhou, National University of Defense Technology (China)
Sven Hofling, Universität Würzburg (Germany)
Shibin Jiang, AdValue Photonics, Inc. (United States)
Suijian Xue, National Astronomical Observatories, Chinese Academy of Sciences (China)
Takunori Taira, RIKEN SPring-8 Center (Japan)
Vincenzo Pallechi, Institute of Chemistry of Organic Metallic Compounds (Italy)
Wenxue Li, East China Normal University (China)
Xiaocong Yuan, Shenzhen University (China)
Xuejun Zhang, Changchun Institute of Optics, Fine Mechanics and Physics, Chinese Academy of Sciences (China)
Yadong Jiang, University of Electronic Science and Technology of China (China)
Yongtian Wang, Beijing Institute of Technology (China)
Yuegang Fu, Changchun University of Science and Technology (China)
Zhiping Zhou, Peking University (China)
Zhe Wang, Tsinghua University (China)
Ziyang Zhang, Westlake University (China)

Session Chairs

- 1 Optical Data Storage and Holography
Byoungcho Lee, Seoul National University (Korea, Republic of)
- 2 Holographic Technology
Yongtian Wang, Beijing Institute of Technology (China)
- 3 Display and Application
Xinzhu Sang, Beijing University of Posts and Telecommunications (China)
- 4 Light Field Display
Hongen Liao, Tsinghua University (China)
- 5 Advanced Material for Display
Xiaodi Tan, Fujian Normal University (China)

Introduction

AOPC 2019, the Annual Conference of Chinese Society of Optical Engineering (CSOE), was one of the largest academic and industrialization activities in the field of optical and optoelectronic technology in China. The Organizing Committee intended to build a potential platform together with academic exchanges, industry exhibitions, and cooperation negotiations in one. There were 11 technical conferences and 38 conference sessions, and we sincerely hope that the research and development of optoelectronic technology were promoted, and that international cooperation in industry and in the optical and optoelectronic fields were enhanced.

AOPC 2019 was sponsored by SPIE and the Chinese Society for Optical Engineering; the Optical Society of Korea (OSK), Optics and Photonics Society of Singapore (OPSS), European Optical Society (EOS), Optical Society of Japan (OSJ) were the technical co-sponsors. There were also 48 Cooperative Organizations that supported the conference.

We received over 930 total contributions from more than 15 countries, including United States, United Kingdom, Germany, France, Spain, Australia, Canada, Mexico, Brazil, Japan, the Republic of Korea, Thailand, Singapore, the Russian Federation, China, and so on. There were 554 contributions published in SPIE Proceedings.

After careful discussion, we suggested four keynote speeches which were presented by famous scientists from Germany, Australia, Japan, and China. There were 110 excellent invited talks, 45 of them are from overseas, their inclusion represented a first-class level in the field of optics and photonics technology. On behalf of the Organizing Committee of AOPC, I express the thanks to all the invited speakers and authors for their contributions and supports to the conference.

Finally, on behalf of the Chairmen and the Organizing Committee of AOPC, I would like to heartily thank for our sponsors and Cooperating Organizations for all they have done for the conference, to all of the participants and friends for their interests and efforts in helping us to make the conference success. Also, thanks to the Program Committee for their effective work and valuable advice; especially the AOPC 2019 Secretariat and SPIE for their tireless effort and outstanding services in preparing the conference and publishing the Proceedings.

We are glad that AOPC 2019 had great success! Hope to see you next year!

Guofan Jin
