Volume 11338

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 11338

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

AOPC 2019: Optical Sensing and Imaging Technology, edited by John Greivenkamp, Jun Tanida,
Yadong Jiang, HaiMei Gong, Jin Lu, Dong Liu, Proc. of SPIE Vol. 11338, 1133801 · © 2019 SPIE
CCC code: 0277-786X/19/\$21 · doi: 10.1117/12.2564827

Proc. of SPIE Vol. 11338 1133801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi	<i>Authors</i>
xvii	<i>Conference Committees</i>
xix	<i>Introduction</i>

Part One

OPTICAL SENSING AND IMAGING TECHNOLOGY

11338 02	Effects of solar radio flux on payload pointing variation for the Earth observation spacecraft [11338-1]
11338 03	Research on dynamic range lifting technology of CMOS camera based on CMV20000 [11338-3]
11338 04	Super miniaturization multiple field of view MWIR optical system [11338-4]
11338 05	An establishment method of overdrive lookup table [11338-6]
11338 06	The study of the electric field in nBn InAsSb/AlAsSb medium wavelength infrared detectors [11338-9]
11338 07	Development of photoelectric parameter test system for anti-glare PLZT goggles [11338-11]
11338 08	An optical machine structure design of a kind of gene biochip imaging system [11338-12]
11338 09	Vehicle target discrimination algorithm for wide-angle SAR based on loose iterative MDS [11338-16]
11338 0A	One method on refraction star-map simulation [11338-18]
11338 0B	Dark current simulation of InAs/GaSb ii type super-lattice nBn detectors with equivalent material method [11338-19]
11338 0C	Numerical simulation of film cooling effect and aero-optical effect of optical window [11338-20]
11338 0D	Research on the response calibration technology of ultraviolet focal plane array devices [11338-21]
11338 0E	Measurement and analysis of the absorptance of cryogenic radiometer cavity [11338-22]

11338 0F	One-shot optical sectioning structured illumination microscopy [11338-23]
11338 0G	Study on recognition method of ethylene gas based on absorption characteristics of infrared spectrum [11338-24]
11338 0H	Temperature-compensated refractive index sensing with high sensitivity using hybrid fiber grating [11338-25]
11338 0I	Binocular vision 6-DOF pose measurement method based on docking ring [11338-26]
11338 0J	Target-enhanced fusion method based on YCbCr space [11338-27]
11338 0K	Research on single pixel modeling and projected infrared images similarity of MOS resistor array [11338-28]
11338 0L	Improved distance preserving level set evolution for tongue image segmentation [11338-29]
11338 0M	Based on subset interpolation Lagrange polynomials surface reconstruction in non-uniform meshes [11338-30]
11338 0N	Performance improvement of photoacoustic spectroscopy gas detection system [11338-31]
11338 0O	Multipoint strain sensing system based on fiber loop ringdown and frequency-shifted interferometry [11338-32]
11338 0P	An experimental evaluation method for the performance of multiple probes on coordinate measuring system [11338-33]
11338 0Q	A review on the retroreflection reduction techniques [11338-34]
11338 0S	Research on laser one-dimensional range profile denoising and deconvolution [11338-36]
11338 0T	Study on measuring method of radial geometrical deformation of the fixture fringe of casing [11338-38]
11338 0U	Model for efficient upconversion detection at mid-infrared [11338-40]
11338 0V	Study on errors propagation in synchronous atmospheric correction for HJ-2 satellites [11338-42]
11338 0W	Laser Doppler velocimeter with differential detection for anti-jamming [11338-43]
11338 0X	Monte Carlo simulation for scanning white light interference measuring data of fracture surface [11338-44]
11338 0Y	A design of area array infrared panoramic imaging system based on position closed loop [11338-45]

- 11338 0Z **Tongue segmentation algorithm for traditional Chinese medicine based on convolutional neural network** [11338-46]
- 11338 10 **Manipulate and detect the rotation speed of particles simultaneously using perfect vortex** [11338-47]
- 11338 11 **An improved algorithm for corner extraction of checkerboard in camera calibration** [11338-48]
- 11338 12 **Weak scratch enhancement algorithm based on frequency domain characteristics** [11338-49]
- 11338 13 **Analysis of plume at visible band and atmosphere background** [11338-50]
- 11338 14 **Reactive sputtering and thermal oxidation effect on transmittance of TiO₂ thin films** [11338-51]
- 11338 15 **Space-based optical imaging dynamic simulation for spatial target** [11338-52]
- 11338 16 **Wavelet-based denoising analysis for polarized scanning atmospheric corrector** [11338-53]
- 11338 17 **Design of a detection of the guidance simulation system based on PSD and improved optical autocollimating** [11338-54]
- 11338 18 **Scintillation characteristics of non-uniformly sinc-correlated blue-green laser beam in oceanic turbulence** [11338-55]
- 11338 19 **Non-uniform Fourier spectrum sampling for improving performance of imaging** [11338-56]
- 11338 1A **Light-scattering characteristics of turbidity-causing particles in JiaLingJiang River, Chongqing** [11338-58]
- 11338 1B **Complementary learners for visual tracking** [11338-59]
- 11338 1C **Design of two-dimensional laser radar system** [11338-60]
- 11338 1D **Systematic error analysis of line-structured light calibration** [11338-62]
- 11338 1E **Removal of the self-radiation stray light of uncooled thermal infrared imaging spectrometers** [11338-63]
- 11338 1F **A novel method on suitable size selection of artificial circular targets in optical non-contact measurement** [11338-64]
- 11338 1G **Effect of working conditions on bulk resistance of micro-channel plate** [11338-65]
- 11338 1H **Structural dynamics analysis of dual-channel multi-spectral remote sensing camera** [11338-66]
- 11338 1I **Wide field of view and high resolution infrared polarimetric surveillance system** [11338-67]

- 11338 1J **Miniature adjustable-focus camera module integrated with MEMS-tunable lenses for underwater applications** [11338-68]
- 11338 1K **3D reconstruction from structured light field by Fourier transformation profilometry** [11338-69]
- 11338 1L **Optimization of InGaAs/InGaAsP quantum well solar cells with anti-reflection coating** [11338-70]
- 11338 1M **An assembly method for large-aperture laser beam reduction system** [11338-71]
- 11338 1N **Super-resolution and high dynamic range reconstruction from multi-exposure images using Bayesian approach** [11338-72]
- 11338 1O **Experimental demonstration of laser-machined high-Q microrod resonator for thermal sensing** [11338-74]
- 11338 1P **Image enhancement based on local luminance statistics and nonlinear functions** [11338-75]
- 11338 1Q **High dynamic range in infrared image using super-framing framework** [11338-76]
- 11338 1R **Study on feature extraction algorithm of mobile robot vision SLAM under dynamic illumination** [11338-78]
- 11338 1S **The hierarchical pairing method to estimate kinetic characteristics of fused silica exit surface damage particle ejection** [11338-79]

Part Two

- 11338 1U **High accuracy alignment of infrared remote sensing camera based on homologous pixel registration** [11338-81]
- 11338 1V **Research on starlight level broad spectrum full color imaging technology** [11338-82]
- 11338 1X **Polarization analysis of wide-viewing-angle retroreflector based on 3D coherency polarization calculus** [11338-85]
- 11338 1Y **Three-dimensional shape measurement of specular objects based on infrared phase-measuring deflectometry** [11338-86]
- 11338 1Z **Auto-focus algorithm based on improved SML evaluation function** [11338-87]
- 11338 20 **Inner wall roughness of microchannel-plate-based x-ray optics in etching process** [11338-88]
- 11338 21 **Small target detection based on infrared patch-tensor model with structured sparse regularization** [11338-89]
- 11338 22 **Research on multi-grating angle measuring sensor system** [11338-90]

- 11338 23 **Design of combined simulation device with visible light star simulator and ultraviolet earth simulator [11338-91]**
- 11338 24 **Design of video-rate image acquisition system for confocal laser endoscopy [11338-93]**
- 11338 25 **Infrared small target detection algorithm based on multi-directional derivative and local contrast [11338-94]**
- 11338 26 **Ocean atmospheric horizontal visibility measuring by a self-designed Mie-scattering Lidar [11338-95]**
- 11338 27 **Modified quadratic approximation of two-point spherical wave structure function in atmospheric turbulence [11338-96]**
- 11338 28 **Novel ellipsometry based on the manipulation of vectorial optical field and digital image processing [11338-97]**
- 11338 29 **Hyperspectral anomaly detection based on collaborative representation of dictionary subspace [11338-101]**
- 11338 2A **Infrared polarization image fusion via multi-scale sparse representation and pulse coupled neural network [11338-103]**
- 11338 2B **Effect of chopped carbon fiber coating film on infrared and millimeter-wave imaging [11338-105]**
- 11338 2C **Real-time restoration algorithm for sparse aperture image [11338-106]**
- 11338 2D **Research of background-oriented schlieren based on two-dimensional de Bruijn sequence color coding technology [11338-107]**
- 11338 2E **Research on continuous rotating scanning medium-wave infrared tracking imaging system [11338-108]**
- 11338 2F **Multispectral correlation imaging based on laser active illumination [11338-109]**
- 11338 2G **Computational ghost imaging based on Walsh matrix replication [11338-110]**
- 11338 2H **Far-field pseudo-thermal correlation imaging [11338-112]**
- 11338 2I **Design of high resolution panoramic annular lens system [11338-113]**
- 11338 2J **Dim small targets detection based on statistical block low-rank background modeling [11338-114]**

- 11338 2K **A review of the Young's modulus and coefficient of thermal expansion of several typical opto-mechanical structural materials at low temperature [11338-115]**
- 11338 2L **Attitude measurement method based on 2DPSD and monocular vision [11338-116]**
- 11338 2N **Inversion method of actual machined surface parameters in absolute distance measurement without cooperation target laser [11338-124]**
- 11338 2O **Polarimetric underwater image recovery based on circularly polarized illumination and histogram stretching [11338-125]**
- 11338 2P **Design of imaging evaluation system for infrared thermal imager [11338-126]**
- 11338 2Q **Total and spectral radiance measurements of blackbody radiation sources based on an absolute cryogenic radiometer [11338-127]**
- 11338 2R **Mechanism of crack propagation in chemical treatment process of microchannel plate [11338-129]**
- 11338 2S **An urgent parallel processing system for multi-source small-size remote sensing images [11338-132]**
- 11338 2T **Exponential decomposition for waveform LiDAR processing [11338-136]**
- 11338 2U **Application of fluoride crystal glass in designing a long-wave infrared athermalized zoom optical system [11338-138]**
- 11338 2V **Study on binocular 3D sensor vision system for 3D teeth model measurement [11338-139]**
- 11338 2W **Algorithm of phase compensation for the endoscope with three-dimensional measurement [11338-140]**
- 11338 2X **A blue-white light imaging method for enhancing the capillaries in mucous tissues in vivo [11338-141]**
- 11338 2Y **A large, uniform, laser-based spectrally tunable irradiance field for optical sensors calibration [11338-142]**
- 11338 2Z **Application of three-dimensional measurement technology in industrial design [11338-143]**
- 11338 30 **Dynamic speckle analysis at low contrast of recorded patterns [11338-144]**
- 11338 31 **Long-range single photon three-dimensional imaging with superconducting nanowire single-photon detector [11338-148]**
- 11338 32 **Process analysis of a floating dust case in Kashi based on comprehensive observation and simulation [11338-149]**

11338 33	Laser echo detection technology based on G-APDs [11338-150]
11338 34	An impact study of NDVI on the BPDF model under different atmosphere and multi-angles conditions [11338-151]
11338 35	Single photon imaging Lidar using three Geiger-mode avalanche diodes [11338-152]
11338 37	Statistical characteristics and inheritance analysis of signals between WB-HPM pulse and field-to-cable coupling [11338-155]
11338 38	Design of tracking fast-moving target depending on rotating mirror [11338-157]
11338 39	Research on feature extraction and matching algorithm based on speckle structured light binocular vision system [11338-158]
11338 3A	Multi-focus image fusion based on guided filter and mixed focus measure [11338-162]
11338 3B	Integral design of optical systems with a free-form surface based on theoretical calculation and optical design software [11338-163]
11338 3C	An optical apparatus for machine vision inspecting both top and bottom surfaces of the TEC components [11338-164]
11338 3D	Real-time dynamic measurement of geometric parameters of catenary [11338-165]
11338 3E	KCCA-based radiation normalization method for hyperspectral remote sensing Images [11338-166]
11338 3F	Dynamically scanned spot projections with digital holograms for reduced measurement uncertainty in laser triangulation systems [11338-167]
11338 3G	The principle and state research on gas identification method for long-wave infrared hyperspectral imaging [11338-168]
11338 3H	Optimization of model wavefront-sensorless adaptive optics system based on eigenmodes of deformable mirror [11338-170]
11338 3I	Research on ground testing for star sensor [11338-176]
11338 3J	Analysis of correction capability of 97-element deformable mirror based on SPGD [11338-177]
11338 3K	Standard transfer chain design of space-borne whiskbroom solar reflection spectrum radiation benchmark [11338-178]
11338 3L	Simulation study of tungsten disulfide nanosheets -Au fiber surface plasmon resonance sensor [11338-179]
11338 3M	Dynamic speckle analysis with two-wavelength acquisition [11338-181]

11338 3N	Design of cemented compact two channel panoramic annular optical system [11338-180]
11338 3O	An improved method of light stripe extraction [11338-182]
11338 3P	Investigation of the mechanism for nanofluidic memristor by applying fluorescent characterization [11338-183]
11338 3Q	Analysis of the vergence correction method in video see-through mixed reality systems [11338-184]
11338 3R	The low-small-slow target detection using multi-source decision fusion [11338-185]
11338 3S	Design and simulation of array waveguide grating in deep-ultraviolet band [11338-186]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committees

Conference Chairs

Guangjun Zhang, Southeast University (China)
Byoungcho Lee, Seoul National University (Korea, Republic of)
John Greivenkamp, The University of Arizona (United States)

Conference Review Committee

Desheng Jiang, Wuhan University of Technology (China)
Dianyuan Fan, Shenzhen University (China)
Huilin Jiang, Changchun University of Science and Technology (China)
Junhao Chu, Shanghai Institute of Technical Physics, Chinese Academy of Sciences (China)
Jianyu Wang, Chinese Academy of Sciences, Shanghai Branch (China)
Jianquan Yao, Tianjin University (China)
Jiancheng Fang, Beihang University (China)
Jiubin Tan, Harbin Institute of Technology (China)
Lin Li, University of Manchester (United Kingdom)
Lijun Wang, Changchun Institute of Optics, Fine Mechanics and Physics, Chinese Academy of Sciences (China)
Min Gu, University of Shanghai for Science and Technology (China)
Qionghai Dai, Tsinghua University (China)
Shibin Jiang, AdValue Photonics, Inc. (United States)
Shenggang Liu, University of Electronic Science and Technology of China (China)
Shouhuan Zhou, North China Research Institute of Electro-Optics (China)
Toyohiko Yatagai, Utsunomiya University (Japan)
Wenqing Liu, Anhui Institute of Optics and Fine Mechanics, Chinese Academy of Sciences (China)
Wei Wang, Beijing Institute of Aerospace Control Device of CASC (China)
Yueguang Lv, Chinese Academy of Engineering (China)
Zuyan Xu, The Technical Institute of Physics and Chemistry of the Chinese Academy of Sciences (China)

Conference Program Committee

Chaoyang Lu, University of Science and Technology of China (China)
Daoxin Dai, Zhejiang University (China)
Dong Liu, Zhejiang University (China)
Haimei Gong, Shanghai Institute of Technical Physics, Chinese Academy of Sciences (China)
Hongbo Sun, Tsinghua University (China)
Jin Lu, Tianjin Jinhang Institute of Technical Physics (China)
Jinxue Wang, SPIE

Jin Yu, Shanghai Jiao Tong University (China)
Jian Zhang, Shanghai Institute of Ceramics, Chinese Academy of Sciences (China)
Min Gu, University of Shanghai for Science and Technology (China)
Min Qiu, Westlake University (China)
Michelle Sander, Boston University (United States)
Mengxia Xie, Beijing Normal University (China)
Pu Zhou, National University of Defense Technology (China)
Sven Hofling, Universität Würzburg (Germany)
Shibin Jiang, AdValue Photonics, Inc. (United States)
Suijian Xue, National Astronomical Observatories, Chinese Academy of Sciences (China)
Takunori Taira, RIKEN SPring-8 Center (Japan)
Vincenzo Palleschi, Institute of Chemistry of Organic Metallic Compounds (Italy)
Wenxue Li, East China Normal University (China)
Xiaocong Yuan, Shenzhen University (China)
Xuejun Zhang, Changchun Institute of Optics, Fine Mechanics and Physics, Chinese Academy of Sciences (China)
Yadong Jiang, University of Electronic Science and Technology of China (China)
Yongtian Wang, Beijing Institute of Technology (China)
Yuegang Fu, Changchun University of Science and Technology (China)
Zhiping Zhou, Peking University (China)
Zhe Wang, Tsinghua University (China)
Ziyang Zhang, Westlake University (China)

Session Chairs

- 1 Advanced Optical Imaging Technology
John E. Greivenkamp, The University of Arizona (United States)
- 2 Laser Technology and Applications
Dong Liu, Zhejiang University (China)
- 3 Advanced Detector Manufacturing Technology I
Haimei Gong, Shanghai Institute of Technical Physics, Chinese Academy of Sciences (China)
- 4 Advanced Detector Manufacturing Technology II
Jun Tanida, Osaka University (Japan)
- 5 Phase Imaging and Applications
Jin Lu, Tianjin Jinhang Institute of Technical Physics (China)
- 6 Remote/Phase Imaging and Applications
Jin Lu, Tianjin Jinhang Institute of Technical Physics (China)

Introduction

AOPC 2019, the Annual Conference of Chinese Society of Optical Engineering (CSOE), was one of the largest academic and industrialization activities in the field of optical and optoelectronic technology in China. The Organizing Committee intended to build a potential platform together with academic exchanges, industry exhibitions, and cooperation negotiations in one. There were 11 technical conferences and 38 conference sessions, and we sincerely hope that the research and development of optoelectronic technology were promoted, and that international cooperation in industry and in the optical and optoelectronic fields were enhanced.

AOPC 2019 was sponsored by SPIE and the Chinese Society for Optical Engineering; the Optical Society of Korea (OSK), Optics and Photonics Society of Singapore (OPSS), European Optical Society (EOS), Optical Society of Japan (OSJ) were the technical co-sponsors. There were also 48 Cooperative Organizations that supported the conference.

We received over 930 total contributions from more than 15 countries, including United States, United Kingdom, Germany, France, Spain, Australia, Canada, Mexico, Brazil, Japan, the Republic of Korea, Thailand, Singapore, the Russian Federation, China, and so on. There were 554 contributions published in SPIE Proceedings.

After careful discussion, we suggested four keynote speeches which were presented by famous scientists from Germany, Australia, Japan, and China. There were 110 excellent invited talks, 45 of them are from overseas, their inclusion represented a first-class level in the field of optics and photonics technology. On behalf of the Organizing Committee of AOPC, I express the thanks to all the invited speakers and authors for their contributions and supports to the conference.

Finally, on behalf of the Chairmen and the Organizing Committee of AOPC, I would like to heartily thank for our sponsors and Cooperating Organizations for all they have done for the conference, to all of the participants and friends for their interests and efforts in helping us to make the conference success. Also, thanks to the Program Committee for their effective work and valuable advice; especially the AOPC 2019 Secretariat and SPIE for their tireless effort and outstanding services in preparing the conference and publishing the Proceedings.

We are glad that AOPC 2019 had great success! Hope to see you next year!

Guofan Jin
