Proc. of SPIE Vol. 11384 1138401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committees</i>
xi	<i>Introduction</i>

SESSION 1 SIGNAL DENOISING AND INTERFERENCE SUPPRESSION

11384 02	Adaptive time-varying clutter suppression algorithm based on TAVFF using IR-UWB radar [11384-9]
11384 03	PRI sinusoidal modulation feature extraction and pulse sorting based on EMD [11384-20]
11384 04	Multi-target multi-Bernoulli filtering based on propagator method for DOA tracking [11384-25]
11384 05	Lifting wavelet denoising based on pulsar wavelet basis [11384-31]
11384 06	Multiple modules speech enhancement in mixed noise and low SNR environments [11384-37]
11384 07	The influences and modification on the fidelity of vessel radiated noise power spectrum by main-beam width of measurement array [11384-38]
11384 08	Noise analysis of MEMS gyroscope under force rebalance closed loop detection [11384-46]
11384 09	DRFM interrupted sampling repeater jamming suppression algorithm based on clustering [11384-52]
11384 0A	A novel method of suppressing multipath interference based on Brewster effect [11384-55]

SESSION 2 SIGNAL ANALYSIS AND PROCESSING

11384 0B	Self-similarity analysis of sea clutter under the existence of different moving target [11384-6]
11384 0C	Online recovery of time-varying signals based on sparse Bayesian learning [11384-16]
11384 0D	Note segmentation based on prior knowledge of music score [11384-18]
11384 0E	Feature extraction and classification of UAV's acoustic signal using 4-microphones array in a real noisy environment [11384-23]

11384 OF	A rotor feature extraction method with clutter suppression and high precision [11384-28]
11384 OG	Frame-level speech enhancement based on Wasserstein GAN [11384-34]
11384 OH	Acoustic spectrum and signature analysis on underwater radiated noise of a passenger ship target based on the measured data [11384-39]
11384 OI	SIRS prediction method based on PPG signal [11384-47]
11384 OJ	Implementation of channel simulation and GMSK modulation signal transmission system based on GNU Radio [11384-50]
11384 OK	Using machine learning techniques to classify cricket sound [11384-53]
11384 OL	Multiple target DOA estimation with single snapshot in sonar array [11384-56]

SESSION 3 RADAR SYSTEM AND SIGNAL ANALYSIS

11384 OM	High-precision coherent compensation of multi-radar signals based on GTD model [11384-3]
11384 ON	Main lobe jamming suppression algorithm based on blocking matrix pre-processing and covariance matrix reconstruction [11384-4]
11384 OO	A robust adaptive amplitude iteration CFAR detector in nonhomogeneous clutter environment [11384-7]
11384 OP	Hand gesture recognition based on range Doppler angle trajectory and LSTM network using an MIMO radar [11384-8]
11384 OQ	Hand gesture recognition based on convolutional neural network using a bistatic radar system [11384-10]
11384 OR	Low-resolution ground surveillance radar target classification based on 1D-CNN [11384-12]
11384 OS	Model based joint target tracking and classification with RCS measurement [11384-24]
11384 OT	Simulation research on classification and identification of typical active jamming against LFM radar [11384-32]

SESSION 4 COMMUNICATION AND INFORMATION SYSTEM

11384 OU	Advanced compressed sensing approach to synthesis of sparse antenna arrays [11384-11]
11384 OV	Cross domain sentiment classification of Thai reviews using co-train model [11384-33]

- 11384 OW **Indoor trajectory tracking algorithm based on Kalman filter and geomagnetic intensity** [11384-40]
- 11384 OX **Research of real-time high-precision positioning technology for space-based Internet of Things loads based on RLS** [11384-42]
- 11384 OY **NIWPT: NLOS identification based on channel state information** [11384-49]
- 11384 OZ **Optimization of the OSVOS model** [11384-51]
- 11384 IO **Fall detection method using Wi-Fi channel state information** [11384-54]

SESSION 5 IMAGE PROCESSING

- 11384 I1 **Polynomial rotation-polynomial Fourier transform of ultrafast maneuvering targets detection** [11384-2]
- 11384 I2 **Tree-structured Bayesian compressive sensing based image watermarking** [11384-5]
- 11384 I3 **Design and simulation of Terahertz near field SAR real-time imaging system** [11384-13]
- 11384 I4 **Zero-attracting affine projection M-estimate algorithm for sparse system identification in impulsive interference** [11384-14]
- 11384 I5 **An opinion-unaware blind quality assessment algorithm for multiply distorted images** [11384-21]
- 11384 I6 **Design of wideband real-time SAR imaging system** [11384-22]
- 11384 I7 **Text matching based on reconstructed color interaction image** [11384-27]
- 11384 I8 **Feature extraction methods based on ECG RR intervals for diabetes detection** [11384-29]
- 11384 I9 **Velocity estimation and compensation of high-speed target from under-sampled data** [11384-30]
- 11384 IA **Face recognition based on most value averaging LBP and gray level co-occurrence matrix** [11384-48]

SESSION 6 MODERN ELECTRONIC SYSTEMS AND SENSING TECHNOLOGY

- 11384 IB **Non-dispersive infrared methane sensor with semi-elliptical gas cell** [11384-15]
- 11384 IC **Fault detection and diagnosis of relative position detection sensor for high speed maglev train based on kernel principal component analysis** [11384-17]

- 11384 1D **Detection of methylated cytosine on single strand DNA based on immune-functionalized and glutaraldehyde modified liquid exfoliated graphene field effect transistor [11384-19]**
- 11384 1E **Influence of the ratio of gate length to source-drain distance on the sensitivity of the AlGaN/GaN HEMT based chemical sensors and biosensors [11384-35]**
- 11384 1F **AlGaN/GaN open-gate high electron mobility transistors for glucose detection [11384-41]**
- 11384 1G **Improving detection limit of non-dispersive infrared gas sensor system by wavelet denoising algorithm [11384-44]**
- 11384 1H **Tunnel magnetoresistive sensor design and applications for current measurement [11384-45]**

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committees

Advisory Chairs

Robert Minasian, IEEE & OSA Fellow, The University of Sydney (Australia)
Ho Pui, Aaron Ho, SPIE Fellow, The Chinese University of Hong Kong,
(Hong Kong, China)

Conference General Chair

Supeng Leng, University of Electronic Science and Technology of China
(China)

Conference Co-chairs

Kezhi Mao, Nanyang Technological University (Singapore)
Letian Huang, University of Electronic Science and Technology of China
(China)

Organizing Chairs

Haiquan Zhao, Southwest Jiaotong University (China)
Yifei Pu, Sichuan University (China)
Jeff Kilby, AUT University (New Zealand)

Programme Chairs

Shaoshuai Gao, University of Chinese Academy of Sciences (China)
Kunbao Cai, Chongqing University (China)
Waleed Habib Abdulla, The University of Auckland (New Zealand)

Technical Committee

Guanghui Wang, The University of Kansas (USA)
Bill Moran, RMIT University (Australia)
Ying Huang, National University of Defense Technology (China)
S. Hyder Ali, RMK Engineering College (India)
Vijay R. Rathod, St. Xavier's Technical Institute (India)
Thaweesak Yingthawornsuk, King Mongkut's University of Technology
Thonburi (Thailand)
Hadj Hamma Tadjine, IAV GmbH, Development Center (Germany)
Norasmadi Abdul Rahim, Universiti Malaysia Perlis (Malaysia)
Ajay Anil Gurjar, Sipna's College of Engineering & Technology (India)
Basavaraj M. Angadi, Basaveshwar Engineering College (India)

Bhupendra Gupta, PDPM Indian Institute of Information Technology (India)
Chitapong Wechtaisong, Nakhon Ratchasima Rajabhat University (Thailand)
O. P. Verma, Delhi Technological University (India)
Seyed Reza Shahamiri, Manukau Institute of Technology (New Zealand)
Zhan Song, Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences (China)
Iman T. Ardekani, Unitec Institute of Technology (New Zealand)
Vinh Truong Hoang, Ho Chi Minh City Open University (Vietnam)
Wirawan, Institut Teknologi Sepuluh Nopember (Indonesia)
Nadia Abd-Alsabour, Cairo University (Egypt)
Du Maohua, Naval University of Engineering (China)
Piotr Łuka, Police Academy in Szczytno (Poland)
Jianyun Chen, The National University of Defense Technology (China)
Xiumei Li, Hangzhou Normal University (China)
Zhaocheng Yang, Shenzhen University (China)
Yibin Rui, Nanjing University of Science and Technology (China)
Junmei Sun, Hangzhou Normal University (China)
Shuanghui Zhang, National University of Defense Technology (China)
Ningbo Liu, Naval Aviation University (China)
Ronghui Zhan, National University of Defense Technology (China)
Tian Lan, University of Science and Technology of China (China)

Session Chairs

- 1 Signal Acquisition and Analysis
Kunbao Cai, Chongqing University (China)
- 2 Electronics and Communication Engineering
Robert Minasian, The University of Sydney (Australia)
- 3 Signal Detection and Processing
Ningbo Liu, Naval Aviation University (China)
- 4 Advanced Electronic Technology and Sensor Applications
Ho Pui, Aaron Ho, The Chinese University of Hong Kong, (Hong Kong, China)
- 5 Image Processing Technology and Method
Kezhi Mao, Nanyang Technological University (Singapore)

Introduction

The Eleventh International Conference on Signal Processing Systems (ICSPS 2019), was held in Chengdu, China, 15-17 November 2019.

ICSPS 2019 is co-organized by the University of Electronic Science and Technology of China, China and International Association of Computer Science and Information Technology, Singapore, and assisted by Southwest Jiaotong University, China. The key goal of this conference was to bring academic scientists, engineers, and industry researchers together to exchange and share their expertise, experience and research results, and discuss the challenges and future directions in their specialized areas of research in these fields. The professors from Australia, Canada, China and Hong Kong delivered the keynote speeches, and invited speech about state-of-the-art research in their areas of expertise. In addition, five parallel sessions and one oral session were successfully held with the efforts of all the session chairs and presenters.

This volume includes 52 selected papers submitted to the conference from universities, research institutes and industries. Each contributed paper has been through a rigorous blind peer-review process. They were reviewed by at least two experts who are qualified within the field of signal processing systems. These papers will provide the readers an overview on many recent advances in the fields related to Signal Processing Systems.

We would like to thank all the authors who have contributed to this volume and to the members of the organizing committee, reviewers, speakers, chairpersons, sponsors and the conference participants for their support of ICSPS 2019.

We truly believe that the participants had fruitful discussions and enjoyed the opportunity for future collaborations.

Kezhi Mao
