Volume 11417

Proceedings of SPIE 0277-786X, V. 11417

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Cyber Sensing 2020, edited by Igor V. Ternovskiy, Peter Chin, Proc. of SPIE Vol. 11417, 1141701
© 2020 SPIE · CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2572776

Proc. of SPIE Vol. 11417 1141701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Cyber Sensing 2020*, edited by Igor V. Ternovskiy, Peter Chin, Proceedings of SPIE Vol. 11417 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SESSION 1

- 11417 04 **Experience with the CASPER system during RADICS field trials [11417-3]**

SESSION 2

- 11417 05 **Remote attestation of host-based defense via optical channel [11417-4]**

SESSION 3

- 11417 09 **A novel clustering technique using backscattering side channel for counterfeit IC detection [11417-10]**
- 11417 0A **Identifying class of previously unseen programs using RF side channels [11417-11]**
- 11417 0B **A robust principal component analysis approach to DoS-related network anomaly detection [11417-12]**

SESSION 4

- 11417 0C **Automated clustering of EM side-channel emissions to detect anomalous device behavior [11417-13]**
- 11417 0D **Program profiling based on Markov models and EM emanations [11417-14]**

SESSION 5

- 11417 0H **Cybersecurity impact of the growth of data in sports [11417-18]**
- 11417 0J **A new tool for detecting tampering of big data programs [11417-20]**
