Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

MULTISPECTRAL IMAGE ACQUISITION

11428 02	An electrically tunable focusing and filtering infrared liquid-crystal device for light-field imaging and spectral imaging [11428-1]
11428 03	Autofocusing imaging based on electrically controlled liquid-crystal microlens array [11428-2]
11428 04	MIMO radar three-dimensional imaging via joint time-space observation [11428-4]
11428 05	ISAR image visualization for aerospace targets [11428-8]
11428 06	Coherent ISAR imaging based on phase matching processing of complex range profile for procession space target [11428-10]
11428 07	Infrared and terahertz integration detection based on optical antennas [11428-11]
11428 08	Research on compressed light-field and infrared reflection characteristics of patterned metallic micro-nano-structure arrays [11428-13]
11428 09	Generation of vortex lightbeams [11428-14]
11428 0A	Modeling and simulation of DBRs based on a MEMS-FP array with a robust responsibility at different angles [11428-15]
11428 0B	A convolution neural network for reconstructing microgrid polarimeter imagery [11428-16]
11428 0C	Modeling and simulation of light reflection and transmission characteristics of electrically modulated infrared nano-apexes [11428-19]
11428 0D	Modeling and simulation of electro-modulation reflection and transmission characteristics of infrared optical antenna [11428-20]
11428 0E	Focusing behaviors of optical nanotip antenna array based on surface plasmons [11428-21]
11428 0F	Remote multi-object detection based on bounding box field [11428-25]

MULTISPECTRAL IMAGE PROCESSING AND ANALYSIS

- 11428 OG **A restoration method for the turbulent degraded images based on the salient edge selection and the L0 norm constraint [11428-103]**
- 11428 OH **Spectral group attention networks for hyperspectral image classification [11428-104]**
- 11428 OI **An accurate de-stripping method based on cubic Hermite spline interpolation and gradient information of stripes [11428-105]**
- 11428 OJ **A novel self-relearning approach for Landsat image change detection [11428-106]**
- 11428 OK **Research on target salient region unmixing method [11428-107]**
- 11428 OL **A new temporal high-pass adaptive filter nonuniformity correction based on rolling guidance filter [11428-112]**
- 11428 OM **An improved contrast fusion approach in gradient domain for low light level image enhancement [11428-113]**
- 11428 OO **SRNet: a cascade network to speckle reduction of SAR image [11428-116]**
- 11428 OQ **Hyperspectral face recognition based on SLRC for single sample problem [11428-118]**
- 11428 OR **Far-infrared pedestrian sequence segmentation based on time domain semantics [11428-119]**
- 11428 OT **Infrared spectrum image inversion method for augmenting data sets [11428-121]**
- 11428 OU **Similarity evaluation technology of spectral imaging simulation based on analytic hierarchy process model [11428-122]**

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Introduction

Welcome to proceedings from the SPIE 11th International Symposium on Multispectral Image Processing and Pattern Recognition (MIPPR 2019) held 2–3 November 2019 in Wuhan, China.

MIPPR is a flagship biennial symposium which focuses mainly on the latest research in multispectral image processing and pattern recognition. The symposium has a broad charter. Multispectral is interpreted not just multiple-wavelength in a narrow sense but also multi-sensor, multi-modal, and multimedia. It covers many disciplines such as sensing, image processing, computer vision, pattern recognition and involves the development of efficient processing algorithms and their optimization and implementation. The wide range of applications considered in this symposium include automatic target recognition, autonomous navigation, medical image processing, remote sensing, geographic information systems and many others.

The symposium provides a forum for scientists, professors, engineers, and graduate students from universities, industries, and government laboratories to meet and exchange ideas and discuss theories, techniques, algorithms, and applications in multispectral image processing and pattern recognition. As expected, there were ample discussions both inside and outside the lecture halls helping to make MIPPR 2019 an exciting meeting.

In response to the call for papers, we received 258 submissions. Based on the reviews provided by an excellent program committee we accepted 199 papers covering many aspects of multispectral image processing and pattern recognition. To ensure a high-quality conference, all abstracts and proceedings of SPIE papers are reviewed by the peers for technical merit and English expression. The proceedings from MIPPR 2019 consist of five volumes which will be included on the SPIE Digital Library.

- *MIPPR 2019: Multispectral Image Acquisition, Processing, and Analysis* (SPIE Volume 11428)
- *MIPPR 2019: Automatic Target Recognition and Navigation* (SPIE Volume 11429)
- *MIPPR 2019: Pattern Recognition and Computer Vision* (SPIE Volume 11430)
- *MIPPR 2019: Parallel Processing of Images and Optimization Techniques; and Medical Imaging* (SPIE Volume 11431)
- *MIPPR 2019: Remote Sensing Image Processing, Geographic Information Systems, and Other Applications* (SPIE Volume 11432).

The realization of a conference depends upon the hard work of many dedicated people. We would like to thank all the members of the organizing committee to

put together this symposium for the benefit of all the researchers. They are responsible for making this conference a success. We hope the papers and the research results presented at this conference will inspire new research in all the areas related with multispectral image processing and pattern recognition.

Bir Bhanu
