Real-time object detection based on R-FCN network under structured scene of high-speed railway [11519-89]

**IMAGE TRANSFORMATION AND ANALYSIS**

Multi-feature learning for low-light image enhancement [11519-2]

Generative adversarial network for bidirectional mappings between synthetic and real facial image [11519-4]

An automatic segmentation method based on geometrical features in hemispherical images for forest management [11519-7]

Feature guidance GAN for high quality image restoration [11519-9]

Global thresholding based on improved histogram for chalk area segmentation in rice quality evaluation [11519-18]

Surface normal data guided depth map restoration with edge-preserving smoothing regularization [11519-33]

Generative image inpainting with residual attention learning [11519-48]

Image salt and pepper noise adaptive based on fuzzy median filtering [11519-50]

An attention based method for video semantic segmentation [11519-71]

**PATTERN RECOGNITION**

FPGA-based skin disease identification system using SIFT algorithm and K-NN [11519-16]

Research on book call number recognition under complex color background [11519-22]

Periocular recognition in the wild with learned label smoothing regularization [11519-41]

Recognition of mechanical sphygmomanometer dial value based on Hough transform [11519-70]

A novel incremental person re-recognition method with constant update speed [11519-76]
Scattering coefficient profile extraction based on Monte Carlo simulation of lateral scattering Lidar [11519-8]

Research on fault diagnosis of aeroengine endoscopic detection based on CBR and RBR [11519-15]

Refined terrain modeling of slopes based on UAV images and precision analysis of the model [11519-23]

Target localization based on arbitrary angle bounding box for remote sensing image [11519-58]

A real time fusion system of infrared and low level light images based on FPGA [11519-64]

Improvement of surface penetrating radar imaging by suppressing clutter using nonlinear gain control [11519-74]

Processing of three-wavelength interference pattern for single-shot quantitative phase imaging [11519-86]

Improved optical design of AOTF-based stereoscopic system for 3D imaging spectroscopy [11519-87]

Deep learning based system to electric distribution network inspection [11519-88]

Efficient registration of aerial video to geo-referenced images [11519-3]

Privacy aware crowd-counting using thermal cameras [11519-14]

A fast intra mode decision algorithm based on the sum of region-directional dispersion for virtual reality 360-degree video [11519-25]

A novel image classification algorithm using CNN on a small computation platform [11519-27]

Fast intra-mode decision algorithm for virtual reality 360-degree video based on decision tree and texture direction [11519-28]

Image-to-image translation-based face deocclusion [11519-35]

Reduction of computing resources in convolutional neural network for knee MRI of ACL tears by feature-based method [11519-66]

The gait analysis system based on the first-person video for applications on home health care [11519-79]
Global deformation model for 3D facial combination [11519-84]

DIGITAL IMAGE PROCESSING TECHNOLOGY AND METHOD

Laser speckle denoising with deep convolutional network [11519-20]
Multi-scale contextual attention-based HDR reconstruction of dynamic scenes [11519-24]
Speckle noise reduction in digital holography using random overlapping masks and 3D block matching filtering [11519-30]
Object 6D pose estimation with non-local attention [11519-36]
Unsupervised variational auto-encoder hash algorithm based on multi-channel feature fusion [11519-47]
Image compressed sensing recovery via adaptive dictionary learning [11519-49]
Illumination normalization of face image [11519-57]
Implementing real time image processing algorithm on FPGA [11519-60]
Multi-sensor images registration based on SIFT and extended phase correlation [11519-67]
A semi-supervised trace lasso norm regularized image classification method [11519-73]
A scale-adaptive real-time target tracking algorithm based on KCF [11519-75]

IMAGE PROCESSING AND APPLICATION

A rotation invariance spatial transformation network for remote sensing image retrieval [11519-10]
Determination of pupillary distance using YOLO algorithm [11519-11]
IC chip marking inspection using FIR system [11519-34]
Previous observation regularized tracker [11519-37]
Robust deep supervised hashing for image retrieval [11519-42]
MetaAMC: meta learning and AutoML for model compression [11519-44]

vi
Accurate volume measurement of road potholes based on 3D point clouds [11519-56]

Sparse subspace clustering with one-way selective orthogonal matching pursuit [11519-59]

Multi RBF-kernel support vector regression for clinical cognitive scores prediction in schizophrenia [11519-65]

A 3D seam extraction and tracking method based on binocular structured light sensor [11519-72]

An efficient deep face matching method for ID and selfie photos: SIRFace [11519-77]
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Conference Chairs

Xudong Jiang, Nanyang Technological University (Singapore)

Conference Co-chair

Hiroshi Fujita, Gifu University (Japan)

Advisory Chair

Keisuke Goda, University of Tokyo (Japan)

Program Committee Chairs

Christine Fernandez-Maloigne, Université de Poitiers (France)
Giovanni Pau, UCLA Samueli School of Engineering (United States)

Steering Committee

Yuri Rzhanov, University of New Hampshire (United States)
Konstantin Rumyantsev, Southern Federal University (Russian Federation)
Yi Xie, Wuhan University (China)

Publicity Chairs

András Horváth, Pázmány Péter Catholic University (Hungary)
Krzysztof Koszela, Poznan University of Life Sciences (Poland)

Introduction

This volume includes the papers accepted for presentation at the Twelfth International Conference on Digital Image Processing (ICDIP 2020), which was held virtually 19-22, May 2020 due to the worldwide eruption of COVID-19.

ICDIP 2020 was sponsored by the International Association of Computer Science & Information Technology (Singapore) and technically supported by University of Leeds (United Kingdom), Tufts University (United States), Gifu University (Japan), University of New Hampshire (United States), Université de Bordeaux (France), Poznan University of Technology (Poland), Poznan University of Life Sciences (Poland), and Polish Society for IT Applications in Agriculture, Forestry and Food (Poland). The key goal of the conference was to bring academic scientists, engineers, and industry researchers together to exchange and share their expertise, experience, and research results, and discuss the challenges and future direction of their specialized areas of research in the field of digital image processing. Professors from the United Kingdom, United States, Singapore, Hong Kong, Japan, and France delivered the keynote invited presentations about state-of-the-art research in their areas of expertise. In addition, nine parallel sessions were successfully conducted through the efforts of the session chairs and presenters.

This proceedings volume includes 70 selected papers which were submitted to the conference from universities, research institutes, and industries. All contributed papers have gone through a rigorous blind peer-review process. They were reviewed by at least two experts who are qualified in the field of digital image processing. The papers will provide the readers an overview of many recent advances in the fields related to digital image processing.

We would like to thank all the authors who contributed to this volume and to the members of the organizing committee, reviewers, speakers, chairpersons, partners, and conference participants for their support of ICDIP 2020.

We truly believe that the participants had fruitful discussions and enjoyed the opportunity for future collaborations.
