Front Matter: Volume 11559

, "Front Matter: Volume 11559," Proc. SPIE 11559, Infrared, Millimeter-Wave, and Terahertz Technologies VII, 1155901 (10 November 2020); doi: 10.1117/12.2586001

SPIE.

Event: SPIE/COS Photonics Asia, 2020, Online Only

PROCEEDINGS OF SPIE

Infrared, Millimeter-Wave, and Terahertz Technologies VII

Cunlin Zhang
Xi-Cheng Zhang
Masahiko Tani
Editors

12–16 October 2020
Online Only, China

Sponsored by
SPIE
COS—Chinese Optical Society

Cooperating Organizations

Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China) • Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China) • Beijing University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of Science and Technology (China) • University of Shanghai for Science and Technology (China) • Capital Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong University (China) • China Jiliang University (China) • Shanghai Institute of Optics and Fine Mechanics, CAS (China) • Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China) • Institute of Semiconductors, CAS (China) • Institute of Optics and Electronics, CAS (China) • Institute of Physics, CAS (China) • Shanghai Institute of Technical Physics, CAS (China) • China Instrument and Control Society (China) • Japan Optical Society (Japan) • Korea Optical Society (Korea, Republic of) • Australia Optical Society (Australia) • Singapore Optical Society (Singapore) • European Optical Society

Volume 11559

Proceedings of SPIE 0277-786X, V. 11559

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Infrared, Millimeter-Wave, and Terahertz Technologies VII, edited by Cunlin Zhang,
Xi-Cheng Zhang, Masahiko Tani, Proc. of SPIE Vol. 11559, 1155901 · © 2020 SPIE
CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2586001

Proc. of SPIE Vol. 11559 1155901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Infrared, Millimeter-Wave, and Terahertz Technologies VII*, edited by Cunlin Zhang, Xi-Cheng Zhang, Masahiko Tani, Proceedings of SPIE Vol. 11559 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SESSION 1 NOVEL THz GENERATION AND DETECTION

- 11559 07 **Efficient tunable terahertz generation via noncollinear phase matching in ZnGeP₂ crystal**
[11559-6]

SESSION 2 SPECTROSCOPY AND IMAGING

- 11559 08 **Optically driven terahertz wave polarization control by unaligned carbon nanotubes (Invited Paper)** [11559-7]
- 11559 0A **Interpretation of THz intensities of molecular crystals: the role of mixing between intermolecular and intramolecular vibrations (Invited Paper)** [11559-9]
- 11559 0B **Zero biased W band detector based on InGaAs Schottky diode** [11559-10]
- 11559 0C **Application of terahertz technology in the identification of traditional Chinese medicine**
[11559-12]

SESSION 3 TESTING AND CALIBRATION

- 11559 0E **Infrared detectors based on laser-reduced graphene oxide /PEDOT:PSS/perovskite hybrid (Invited Paper)** [11559-15]
- 11559 0F **Large-dynamic-range RCS measurements at high terahertz frequency range** [11559-16]
- 11559 0H **Thermal property analysis characterization of the bronze casting moulds** [11559-18]
- 11559 0I **High-precision thermography based on JMAP inference for human face temperature**
[11559-19]
- 11559 0J **Tunable 2µm dual-wavelength PPLN optical parametric oscillator intracavity pumped by passive Q-switched Nd:YLF lasers** [11559-20]

POSTER SESSION

- 11559 0K **Hybrid tunable chiral metasurfaces for amplitude and wavefront control of circularly polarized terahertz wave** [11559-13]

11559 OL	Methodology on precision imaging optimized in-vivo system [11559-21]
11559 OM	External field calibration method for low-temperature section of infrared radiation measuring equipment [11559-22]
11559 ON	THz research on high-frequency waves under different ionization modes [11559-23]
11559 OO	Simulation of THz-TDS echo filtering algorithm based on deep learning [11559-24]
11559 OP	A novel terahertz modulator based on nested square rings and vanadium oxide phase-change materials [11559-25]
11559 OQ	Characterizations of montmorillonite using terahertz time-domain spectroscopy [11559-26]
11559 OT	Ultra-broadband long-wavelength infrared metamaterial absorber based on hybrid structure of holes and pillars [11559-29]
11559 OW	Method for identifying different Chinese-medicine-based sources based on terahertz time-domain spectroscopy technology [11559-32]
11559 OX	High-resolution terahertz Doppler velocimetry based on frequency difference multiplication [11559-33]
11559 OY	Rapid prediction of potato leaf moisture content [11559-34]
11559 OZ	Analysis of response of THz spectroscopy to insect foreign bodies hidden in tea products [11559-35]
11559 10	The optical system design of broadband infrared imaging spectrometer [11559-36]
11559 12	Scene-based non-uniformity correction for high-throughput LWIR imaging spectrometer using optical defocus method [11559-38]
11559 15	Terahertz absorption characteristics of solutions at different pH values [11559-41]
11559 16	Properties of split ring resonators metamaterials terahertz sensor on flexible substrates [11559-42]
11559 18	Study of thin bismuth-based films using terahertz time-domain polarimetry [11559-44]
11559 19	Diagnosis of blast-induced traumatic brain injury in rat based on terahertz spectroscopy of serum [11559-45]
11559 1A	Propagation characteristics of terahertz wave in inhomogeneous dusty plasma sheath considering scattering process [11559-46]
11559 1B	An interference elimination method for CW-THz reflection imaging [11559-47]

- 11559 1C **Recovering THz signal from water vapor degradation based on support-vector-machine algorithm [11559-48]**
- 11559 1E **Generation of polarization controllable strong THz source from air plasma excited by three-color laser field [11559-50]**
- 11559 1F **Observation of tunable resonance mode by changing the conductivity in terahertz metamaterial [11559-51]**
- 11559 1G **Study on terahertz transmission spectrum of single and double split ring resonators integrated with MoS₂ [11559-52]**
- 11559 1H **Varied terahertz transmission responses observed from split ring resonator based on polyethylene terephthalate [11559-53]**
