Event: Applied Optics and Photonics China (AOPC 2020), 2020, Beijing, China

PROCEEDINGS OF SPIE

AOPC 2020: Infrared Device and Infrared Technology

Haimei Gong

Jin Lu

Editors

30 November – 2 December 2020

Beijing, China

Sponsored by

Chinese Society for Optical Engineering (CSOE) (China)

Technical Sponsor

SPIE

Organized by

Chinese Society for Optical Engineering (CSOE) (China) • Academy of Opto-Electronics of Electronics Technology of China (China) • Science and Technology on Low-light-level Night Vision Laboratory (China) • Science and Technology on Electro-Optical Information Security Control (China)

SPIE

Volume 11563

Proceedings of SPIE 0277-786X, V. 11563

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

AOPC 2020: Infrared Device and Infrared Technology, edited by Haimei Gong,
Jin Lu, Proceedings of SPIE Vol. 11563, 1156301 · © 2020 SPIE
CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2586223

Proc. of SPIE Vol. 11563 1156301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *AOPC 2020: Infrared Device and Infrared Technology*, edited by Haimeí Gong, Jin Lu, Proceedings of SPIE Vol. 11563 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

INFRARED DEVICE AND INFRARED TECHNOLOGY

11563 02	Fabrication of highly-uniform indium ball bumps for small unit-cell infrared focal plane arrays [11563-1]
11563 03	Salient object detection via multi-spectral co-connectivity and collaborative graph ranking [11563-2]
11563 04	Simulation analysis of object's coupled radiation and heat transfer in space environment [11563-3]
11563 05	Calibration of a HgCdTe detectors at long-infrared wavelengths with the high-accuracy cryogenic radiometer [11563-4]
11563 06	Optimal design of the charge layer doping concentration and thickness of InP/InGaAs SPAD detectors [11563-5]
11563 07	Novel infrared focal plane array technology [11563-7]
11563 08	Development of a new indium bump fabrication method for large-area HgCdTe detector [11563-9]
11563 09	Gamma radiation effects on ZnS/CdTe-passivated HgCdTe detectors with different ZnS thickness [11563-10]
11563 0A	Effect of solar stray light on imaging quality of infrared detection system [11563-11]
11563 0B	Reutilization of CdZnTe substrate technology for HgCdTe IRFPA detector [11563-12]
11563 0C	Study on the surface treatment process of $\text{Hg}_{1-x}\text{Cd}_x\text{Te}$ detector [11563-13]
11563 0D	Analysis on reliability of cooling head in large-array infrared focal plane detector [11563-14]
11563 0E	A new way to make high performance and low dark current $\text{Hg}_{1-x}\text{Cd}_x\text{Te}$ infrared focal plane arrays [11563-15]
11563 0F	A deep learning-based attribute adaptive infrared maritime ship target detection method [11563-16]
11563 0G	The comparison of two kinds of InSb etching technology [11563-17]
11563 0H	Analysis of underfill technology for large-scale IRFPA devices [11563-18]

11563 OI	Infrared detection technology of the dim point target in complex background [11563-19]
11563 OJ	Observing near-infrared/ultraviolet responses within GaN/AlN superlattice for dual-band detection [11563-20]
11563 OK	Advances and trends of type-II superlattice infrared detectors [11563-22]
11563 OL	Research on polarization control of tunable VCSEL with a top wave-like mirror structure [11563-23]
11563 OM	Improving and achieving evaluation method for time-delay-integration image sensor based on EMVA1288 standard [11563-24]
11563 ON	Optical-digital joint optimization of infrared search and track systems [11563-25]
11563 OO	Acceleration of convolution layer in FPGA of infrared target detection algorithm [11563-26]
11563 OP	Polarization suppression of solar flare on sea surface based on shortwave infrared [11563-28]
11563 OQ	Research on snapshot infrared computational spectral imaging technology [11563-30]
11563 OR	Rapid determination of spectral directional emissivity of infrared stealth materials at high temperature with laser heating [11563-32]
