Volume 11564

Proceedings of SPIE 0277-786X, V. 11564

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

AOPC 2020: Optoelectronics and Nanophotonics; and Quantum Information Technology, edited by Jianyu Wang, Zhiping Zhou, Chaoyang Lu, Lixing You, Changjun Min, Haiqing Song, Guixin Li, Proceedings of SPIE Vol. 11564, 1156401 © 2020 SPIE · CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2586231

Proc. of SPIE Vol. 11564 1156401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

OPTOELECTRONICS AND NANOPHOTONICS; AND QUANTUM INFORMATION TECHNOLOGY

11564 02	Design of tunable terahertz metamaterial absorber [11564-3]
11564 03	Transmission characteristics of one-dimensional photonic crystal with dielectric defect layer in near-infrared band [11564-4]
11564 04	An optical filter based on micro-ring resonator and Bragg grating [11564-5]
11564 05	Effects of composition-graded AlGaIn/GaN/AlGaIn electron blocking layer on photoelectric performance in InGaIn laser diodes [11564-6]
11564 06	Optical properties of photonic crystals on textiles [11564-7]
11564 07	A promising low noise and high gain InGaAs/Si avalanche photodiode [11564-8]
11564 08	Enhanced optomechanical interaction assisted by piezomechanics on the SOI platform [11564-9]
11564 09	Effect of free carrier on high repetition rate pulse trains in silicon nanowire waveguides [11564-10]
11564 0A	All-optical analog to electromagnetically induced transparency with coupled nanobeam cavities and Mach-Zehnder interferometer [11564-16]
11564 0B	Modal confinement in patterned hybrid plasmonic waveguides [11564-17]
11564 0C	Engineering silicon waveguide nonlinear loss for integrated microwave photonics links [11564-20]
11564 0D	Research on flexible structure of a space flight prototype Doppler asymmetric spatial heterodyne interferometer [11564-21]
11564 0E	Lens design for high numerical aperture achromatic diffraction imaging [11564-24]
11564 0F	Progress in research and application of laser assisted turning technique [11564-25]
11564 0G	Study on characteristics of GaIn epilayers grown on Al₂O₃ by using surface photovoltage [11564-26]
11564 0H	Colors display with spatial light modulator based on sub-wavelength metal grating [11564-35]
11564 0I	Low-contrast grating induced high-Q modes of laser cavity [11564-38]

11564 OJ	Effect of cell temperature on the bias magnetic sensitivity of an atomic spin co-magnetometer [11564-100]
11564 OK	An improved phase compensation noise model for the continuous-variable quantum key distribution with real local oscillators [11564-102]
11564 OL	A zero-field atomic gradiometer with elliptically polarized laser-pumped used for biomagnetic measurement [11564-104]
11564 OM	Performance analysis of Gaussian entangled quantum illumination target detection [11564-105]
11564 ON	Study on quantum adiabatic approximate solution of max-cut with different vertices [11564-107]
11564 OO	An adaptive internal model controller for estimating the parameter of the free-induction-decay signal in nuclear magnetic resonance gyroscope [11564-109]
11564 OP	Temperature-dependent low bulk resistance of silicate glass microchannel plate for cryogenic quantum computing [11564-110]
11564 OQ	Design of power amplifier for spin manipulation system based on nitrogen-vacancy centers [11564-113]
11564 OR	Impact of the laser uniformity on the magnetic sensing with nitrogen-vacancy centers in diamond [11564-114]
11564 OS	An integrated device for nitrogen-vacancy centers synchronization detection system [11564-120]
