Event: Applied Optics and Photonics China (AOPC 2020), 2020, Beijing, China

PROCEEDINGS OF SPIE

AOPC 2020: Telescopes, Space Optics, and Instrumentation

Suijian Xue
Ziyang Zhang
Editors

30 November – 2 December 2020
Beijing, China

Sponsored by
Chinese Society for Optical Engineering (CSOE) (China)

Technical Sponsor
SPIE

Organized by
Chinese Society for Optical Engineering (CSOE) (China) • Academy of Opto-Electronics of Electronics Technology of China (China) • Science and Technology on Low-light-level Night Vision Laboratory (China) • Science and Technology on Electro-Optical Information Security Control (China)

SPIE

Volume 11570

Proceedings of SPIE 0277-786X, V. 11570

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

AOPC 2020: Telescopes, Space Optics, and Instrumentation, edited by Suijian Xue,
Ziyang Zhang, Proc. of SPIE Vol. 11570, 1157001 · © 2020 SPIE
CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2586089

Proc. of SPIE Vol. 11570 1157001-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

TELESCOPES, SPACE OPTICS, AND INSTRUMENTATION

11570 02	Design and improvement of a type of filter wheel in remote sensing [11570-1]
11570 03	Analysis of influence of anomaly zone in south Atlantic on star sensors [11570-2]
11570 04	Optical design of space debris detection system with wide field of view [11570-4]
11570 05	Digital TDI star camera calibration based on real space [11570-5]
11570 06	Stray light suppression of common aperture optical antenna for laser communication system [11570-6]
11570 07	Design and splicing of autocollimation target for space camera [11570-7]
11570 08	Research on safety self-perceptual optical payload of space vehicle [11570-8]
11570 09	Design of ropes driven sunshade deployment mechanism [11570-9]
11570 0A	Application of reverse optimization method in computer-aided alignment [11570-10]
11570 0B	Outgassing test of contamination sensitive unit for space optical instruments [11570-11]
11570 0C	Automatic on-orbit adjusting TDI stages of intelligent space camera based on sun zenith angles [11570-12]
11570 0D	A multi-channel joint restoration algorithm based on imaging Shack-Hartmann wave-front sensor [11570-13]
11570 0E	A star map identification algorithm based on radial and cyclic features [11570-14]
11570 0F	Research on influencing factors of natural frequency of shafting [11570-15]
11570 0G	Imaging system based on CMOS for distributed reconfigurable remote sensing satellite system [11570-17]
11570 0H	Design of a compact freeform optical system via the surface contribution analysis method [11570-18]
11570 0I	Influence of structure defects of microchannel-plate-based x-ray optics on imaging performance [11570-19]

11570 OJ	A novel quality inspection method for components with small diameter and deep aperture [11570-20]
11570 OK	Research on focal length measurement of telephoto lens based on Polaris observation [11570-21]
11570 OL	Research on sky light simulation method on the surface of Mars [11570-22]
11570 OM	Polarization aberrations in an unobscured off-axis astronomical telescope and their effects on PSF ellipticity [11570-23]
11570 ON	Research on collaborative design of space remote sensor based on Teamcenter [11570-24]
11570 OO	Optical design of miniature projection lighting system [11570-28]
11570 OP	Moving ships target detection algorithms for GAOFEN-4 sequence images [11570-33]
11570 OQ	Design of flexure support for high-precision base plates on hard x-ray imager [11570-34]
11570 OR	Alignment for active secondary mirror of space telescope using model-based wavefront sensorless adaptive optics [11570-37]
11570 OS	Optimized design for the supporting structure of a large aperture mirror [11570-39]
11570 OT	Topology optimization design of large aperture mirror for the VT system of SVOM [11570-40]
11570 OU	Compact catadioptric optical system with long focal length large relative aperture and large field of view [11570-45]
11570 OV	The athermalization design of an airborne all-day star sensor optical system [11570-46]
11570 OW	A sparse aperture imaging system with optimal rotating pupil [11570-47]
11570 OX	Design and test of flexible support structure for large aperture lightweight mirror [11570-49]
11570 OY	Micro-vibration test and analysis of refrigeration for visible and infrared integrated space camera [11570-57]
11570 OZ	Optical design method of three-mirror anastigmatic (TMA) telescopes with curved image surface for astronomy applications [11570-58]
