**Volume 11595**

Part One of Two Parts

Proceedings of SPIE, 1605-7422, V. 11595

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Medical Imaging 2021: Physics of Medical Imaging, edited by Hilde Bosmans, Wei Zhao,  
Lifeng Yu, Proceedings of SPIE Vol. 11595, 1159501 · © 2021 SPIE  
CCC code: 1605-7422/21/\$21 · doi: 10.1117/12.2595450

Proc. of SPIE Vol. 11595 1159501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](https://spiedigitallibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

## Part One

---

### CT: OPTIMIZATION AND IMAGE QUALITY

---

- 11595 04 **Multi-factorial optimization of imaging parameters for quantifying coronary stenosis in cardiac CT** [11595-1]
- 11595 05 **A method for optimizing the x-ray tube current in ROI imaging using a simulation framework for radiation dose and image quality calculation for arbitrary fluence distributions** [11595-2]
- 11595 06 **A framework to simulate CT images with tube current modulation** [11595-3]
- 11595 07 **A web-based software platform for efficient and quantitative CT image quality assessment and protocol optimization** [11595-4]
- 11595 08 **A Bayesian approach for CT perfusion parameters estimation with imperfect measurement** [11595-5]
- 11595 09 **End-to-end modeling for predicting and estimating radiomics: application to gray level co-occurrence matrices in CT** [11595-13]

---

### PHOTON COUNTING: DETECTORS AND SYSTEMS

---

- 11595 0B **Accurate characterization of metal implants and human materials using novel proton counting detector for Monte Carlo dose calculation in proton therapy** [11595-7]
- 11595 0C **Compton coincidence in silicon photon-counting CT detectors** [11595-8]
- 11595 0D **High resolution, full field-of-view, whole body photon-counting detector CT: system assessment and initial experience** [11595-9]
- 11595 0E **Characterization of a GaAs photon counting detector for mammography** [11595-10]

---

### MACHINE LEARNING IN IMAGING PHYSICS

---

- 11595 0G **A novel physics-based data augmentation approach for improved robust deep learning in medical imaging: lung nodule CAD false positive reduction in low-dose CT environments** [11595-14]
- 11595 0H **Deep neural networks-based denoising models for CT imaging and their efficacy** [11595-16]

- 11595 OI **Training a low-dose CT denoising network with only low-dose CT dataset: comparison of DDLN and Noise2Void** [11595-17]
- 11595 OJ **A constrained Bregman framework for unsupervised convolutional denoising of multi-channel x-ray CT data** [11595-18]
- 11595 OK **A CT denoising neural network with image properties parameterization and control** [11595-19]
- 11595 OL **Scatter distribution estimated and corrected by using convolutional neural network for multi-slice CT system** [11595-20]
- 11595 OM **Estimating Compton scatter distributions with a regressional neural network for use in a real-time staff dose management system for fluoroscopic procedures** [11595-21]

---

#### PHANTOMS AND LESION INSERTION

- 11595 ON **COPD quantifications via CT imaging: ascertaining the effects of acquisition protocol using virtual imaging trial** [11595-15]
- 11595 OO **Generative adversarial networks and radiomics supervision for lung lesion synthesis (Robert F. Wagner All-Conference Best Student Paper Award)** [11595-22]
- 11595 OP **The creation of a breast cancer voxel model database for virtual clinical trials in digital breast tomosynthesis** [11595-23]
- 11595 OQ **Computer model of mechanical imaging acquisition for virtual clinical trials** [11595-24]
- 11595 OR **3D printed cardiac phantom for cardiac CT imaging performance evaluation and examination strategy verification** [11595-25]
- 11595 OS **Deep-learning lesion and noise insertion for virtual clinical trial in chest CT** [11595-26]

---

#### IMAGE GUIDED INTERVENTION

- 11595 OT **Evaluation of methods to derive blood flow velocity from 1000 fps high-speed angiographic sequences (HSA) using optical flow (OF) and computational fluid dynamics (CFD)** [11595-27]
- 11595 OU **A hybrid photon counting and flat panel detector system for periprocedural hemorrhage monitoring in the angio suite** [11595-28]
- 11595 OV **A novel approach to calculating dual energy in the angiography suite** [11595-29]
- 11595 OW **Deformable image-based motion compensation for interventional cone-beam CT with a learned autofocus metric** [11595-30]
- 11595 OX **Cone-beam CT for neurosurgical guidance: high-fidelity artifacts correction for soft-tissue contrast resolution** [11595-31]

---

## MOLECULAR IMAGING AND MRI

---

- 11595 0Z **Positron emission tomography attenuation correction with dual energy CT electron density maps in the presence of iodinated contrast media** [11595-33]
- 11595 10 **Back-end readout electronic design and initial results: a head-and-neck dedicated PET system based on CZT** [11595-34]
- 11595 11 **Non-contact respiratory triggering for clinical MRI using frequency modulated continuous wave radar** [11595-35]
- 11595 12 **A physics and learning-based transmission-less attenuation compensation method for SPECT** [11595-36]
- 11595 13 **Wavelet improved GAN for MRI reconstruction** [11595-37]
- 11595 14 **Correcting motion artifacts in MRI scans using a deep neural network with automatic motion timing detection** [11595-38]
- 11595 15 **Monte Carlo simulation of an amorphous selenium-based multi-layer photon-counting detector for SPECT applications** [11595-39]

---

## DETECTOR PHYSICS

---

- 11595 16 **Improved optical quantum efficiency and temporal performance of a flat-panel imager with avalanche gain** [11595-40]
- 11595 17 **Theoretical investigation of detector MTF of polycrystalline mercuric iodide x-ray converters incorporating Frisch grid structures for digital breast tomosynthesis** [11595-41]
- 11595 19 **Spatial-frequency-dependent pulse height spectroscopy of x-ray scintillators using single x-ray imaging** [11595-43]
- 11595 1A **A method to determine spectral performance of image post-processing algorithms** [11595-44]

---

## SPECTRAL CT

---

- 11595 1B **Accurate physical density assessments from clinical spectral results** [11595-45]
- 11595 1C **Quantitative dual-energy imaging in the presence of metal implants using locally constrained model-based decomposition** [11595-46]
- 11595 1D **Dual-contrast decomposition of dual-energy CT using convolutional neural networks** [11595-47]
- 11595 1E **Generation of virtual non-contrast (VNC) image from dual energy CT scans using deep learning** [11595-48]

- 11595 1F **Investigation of the linearized spectral contribution in the simultaneous estimation of spectra and basis images in multispectral CT reconstruction** [11595-49]
- 11595 1G **Neural MLAA for PET-enabled dual-energy CT imaging** [11595-50]

---

#### BREAST TOMOSYNTHESIS

---

- 11595 1H **Strategies of improving lesion detection in wide-angle digital breast tomosynthesis (DBT) with angular dose distribution and detector design** [11595-51]
- 11595 1I **Virtual clinical trial platforms for digital breast tomosynthesis: a local solution compared to the VICTRE platform** [11595-52]
- 11595 1J **Development of magnification tomosynthesis for superior resolution in diagnostic mammography** [11595-53]
- 11595 1K **Digital breast tomosynthesis denoising using deep convolutional neural network: effects of dose level of training target images** [11595-54]
- 11595 1L **Signal-to-noise ratio and contrast-to-noise ratio measurements for next generation tomosynthesis** [11595-55]

---

#### PHASE CONTRAST AND FLUORESCENCE IMAGING

---

- 11595 1M **Incorporating dark-field information in mesh-based x-ray phase imaging** [11595-56]
- 11595 1N **Evaluation of edge-illumination and propagation-based x-ray phase contrast imaging methods for high resolution imaging application** [11595-57]

---

#### CT: RECONSTRUCTION

---

- 11595 1Q **DeepInterior: new pathway to address the interior tomographic reconstruction problem in CT via direct backprojecting divergent beam projection data** [11595-60]
- 11595 1R **Manifold reconstruction of differences: a model-based iterative statistical estimation algorithm with a data-driven prior** [11595-61]
- 11595 1S **Medical image reconstruction using compressible latent space invertible networks** [11595-62]
- 11595 1T **tN-net: a spatiotemporal plus prior image-based convolutional neural network for 4D-CBCT reconstructions enhancement** [11595-63]
- 11595 1U **Deep learning in image reconstruction: vulnerability under adversarial attacks and potential defense strategies** [11595-64]

---

## PHOTON COUNTING CT

---

- 11595 1X **Non-linear partial volume artifact reduction in spectral CT one step direct inversion reconstruction** [11595-67]
- 11595 1Y **Stability of a spectral calibration model with non-linear intensity correction for photon-counting detectors** [11595-68]
- 11595 1Z **Analytical model for pulse pileup in photon counting detectors with seminonparalyzable behavior** [11595-69]
- 11595 20 **Deep learning based spectral distortion correction and decomposition for photon counting CT using calibration provided by an energy integrated detector** [11595-70]

---

## X-RAY IMAGING: DOSIMETRY, SCATTER, AND MOTION

---

- 11595 21 **iPhantom: an automated framework in generating personalized computational phantoms for organ-based radiation dosimetry** [11595-71]
- 11595 22 **Comparison of skin dose calculated by the dose tracking system (DTS) with a beam angular correction factor and that calculated by Monte-Carlo** [11595-72]
- 11595 23 **The effect of underlying bone on the beam angular correction in calculating the skin dose of the head in neuro-interventional imaging** [11595-73]
- 11595 24 **Preliminary in-vivo imaging evaluation of patient-specific scatter-corrected digital chest tomosynthesis** [11595-74]
- 11595 25 **Image-domain cardiac motion compensation in multidirectional digital chest tomosynthesis** [11595-75]

---

## DUAL-ENERGY: OPTIMIZATION AND CLINICAL APPLICATION

---

- 11595 26 **Theoretical optimization of dual-energy x-ray imaging of chronic obstructive pulmonary disease (COPD)** [11595-76]
- 11595 27 **Single-shot quantitative x-ray imaging from simultaneous scatter and dual energy measurements: a simulation study** [11595-77]
- 11595 28 **Dual energy chest x-ray for improved COVID-19 detection using a dual-layer flat-panel detector: simulation and phantom studies** [11595-78]
- 11595 29 **Assessment of reproducibility of volumetric breast density measurement using dual energy digital breast tomosynthesis** [11595-79]
- 11595 2A **Effects of x-ray scatter in quantitative dual-energy imaging using dual-layer flat panel detectors** [11595-80]

11595 2B **Establishing a quality control protocol for dual-energy based contrast-enhanced digital mammography** [11595-81]

---

**POSTERS: ALGORITHM DEVELOPMENT**

---

11595 2C **Classification of round lesions in dual-energy FFDM using a convolutional neural network: simulation study** [11595-82]

11595 2D **Statistically adaptive filtering for low signal correction in x-ray computed tomography** [11595-83]

11595 2E **Accurate reconstruction of cross-section images from limited-angular-range data in human-limb imaging** [11595-84]

11595 2F **Investigation of image reconstruction for digital breast tomosynthesis imaging by use of directional TV constraint** [11595-85]

11595 2G **Improving presentation consistency of radiographic images using deep learning** [11595-86]

11595 2H **A feasibility study of data redundancy based on-line geometric calibration without dedicated phantom on Varian OBI CBCT system** [11595-87]

11595 2I **Effects of smartphone sensor characteristics on dermatoscopic images: a simulation study** [11595-88]

11595 2J **Quantifying the importance of spatial anatomical context in cadaveric, non-contrast enhanced organ segmentation** [11595-89]

11595 2K **A calibration method for conformal x-ray transmission imaging system** [11595-90]

11595 2L **A hybrid domain approach to reduce streak artifacts of sparse view CT image via convolutional neural network** [11595-91]

## **Part Two**

---

**POSTERS: COMPUTED TOMOGRAPHY**

---

11595 2M **Optimization of CT angiography using physiologically-informed computational plaques, dynamic XCAT phantoms, and physics-based CT simulation** [11595-100]

11595 2N **Synthesizing high-resolution CT from low-resolution CT using self-learning** [11595-101]

11595 2O **GAN-based sinogram completion for slow triple kVp switching CT** [11595-102]

11595 2P **Estimation of in vivo noise in clinical CT images: comparison and validation of three different methods against ensemble noise gold-standard** [11595-103]

11595 2Q **Ultra-high-resolution CT and multi-resolution visualization of calcified coronary artery plaques: an ex vivo human study** [11595-104]

- 11595 2R **Convolutional neural network based metal artifact reduction method in dental CT image** [11595-105]
- 11595 2S **Quantitative stability with patient size, dose, and kVp in spectral detector CT for pediatric imaging** [11595-106]
- 11595 2T **Assessing the condition of spectral channelization (energy binning) in photon-counting CT: a singular value decomposition based approach** [11595-107]
- 11595 2U **Parameter-free Bayesian reconstruction for dual energy computed tomography** [11595-108]
- 11595 2V **Limited-angle CT reconstruction via data-driven deep neural network** [11595-109]
- 11595 2W **Rotating projection based localizer radiograph: attenuation calculation optimization and patient automatic centering with parallel-beam projection scheme** [11595-110]
- 11595 2X **3D VSHARP®, a general-purpose CBCT scatter correction tool that uses the linear Boltzmann transport equation** [11595-111]
- 11595 2Y **Dose-length-product determination on cone beam computed tomography through experimental measurements and dose-area-product conversion** [11595-112]
- 11595 2Z **Sphere phantom approach to measure MTF of computed tomography system using convolutional autoencoder network** [11595-113]
- 11595 30 **Automated patient-specific and organ-based image quality metrics on dual-energy CT datasets for large scale studies** [11595-114]
- 11595 31 **Evaluation of a new low dose CBCT imaging protocol for measuring circumferential bone levels around dental implants** [11595-115]
- 11595 32 **Stationary head CT scanner using CNT x-ray source arrays** [11595-116]
- 11595 33 **The impact of CT-data segmentation variation on the morphology of osteological structure** [11595-117]
- 11595 34 **Correlation of respiratory changes in lung density on dynamic chest radiographs with changes in the CT value: a computational phantom study** [11595-118]

---

**POSTERS: X-RAY IMAGING**

- 11595 35 **Mobile x-ray tomography system with intelligent sensing for 3D chest imaging** [11595-167]
- 11595 36 **Stationary head CT with linear CNT x-ray source arrays: image quality assessment through simulation** [11595-168]
- 11595 38 **Investigation of the need for an x-ray scatter-reduction grid during neurointerventional procedures** [11595-170]

- 11595 39 **X-ray tube based on carbon nanotube field emitter for low dose mini C-arm fluoroscopy** [11595-171]
- 11595 3B **Stent enhancement using marker response network and focus conversion learning in x-ray fluoroscopy sequences** [11595-173]
- 11595 3C **Characterization of compact alumina vacuum sealed x-ray tube for medical imaging: interpretation with simulation program** [11595-174]
- 11595 3D **Theoretical comparison of the detective quantum efficiency of halide lead perovskite, cesium iodide and selenium x-ray imaging detectors** [11595-175]
- 11595 3E **Thickness uniformity and stability of amorphous selenium films on flexible substrates for indirect conversion x-ray detection** [11595-176]
- 11595 3F **Development of a novel algorithm to improve image quality in chest digital tomosynthesis using convolutional neural network with super-resolution** [11595-177]
- 11595 3G **Stationary multi x-ray source system with carbon nanotube emitters for digital tomosynthesis** [11595-178]
- 11595 3H **Estimation of lung volume changes from frontal and lateral views of dynamic chest radiography using a convolutional neural network model: a computational phantom study** [11595-179]
- 11595 3I **An automatic approach to lung region segmentation in chest x-ray images using adapted U-Net architecture** [11595-180]
- 11595 3J **Development of microfocus x-ray source based on CNT emitter for intraoperative specimen radiographic system** [11595-181]
- 11595 3K **An analysis of radiomics features in lung lesions in COVID-19** [11595-182]
- 11595 3L **A parametric fitting technique for rapid determination of a skin-dose correction factor for angle of beam incidence during image-guided endovascular procedures** [11595-183]

---

**POSTERS: IMAGE RECONSTRUCTION**

---

- 11595 3M **Novel reconstruction algorithms that facilitate real time 4D tomosynthesis** [11595-119]
- 11595 3N **MLEM reconstruction with specific initial image for cone-beam x-ray luminescence computed tomography** [11595-120]
- 11595 3O **Quantitative texture analysis of normal and abnormal lung tissue for low dose CT reconstruction using the tissue-specific texture prior** [11595-121]
- 11595 3P **Estimation of statistical weights for model-based iterative CT reconstruction** [11595-122]
- 11595 3Q **Deep learning-based sinogram extension method for interior computed tomography** [11595-123]

- 11595 3R **Quantitative cone-beam x-ray luminescence computed tomography with 3D TV denoising based on Split Bregman method** [11595-124]
- 11595 3S **3D image reconstruction for symmetric-geometry CT with linearly distributed source and detector in a stationary configuration** [11595-125]
- 11595 3T **Deep-learning based joint estimation of dual-tracer PET image activity maps and clustering of time activity curves** [11595-126]
- 11595 3U **A new method and system for fast and accurate 3D projections in medical imaging and iterative reconstruction** [11595-127]
- 11595 3V **Model-based reconstruction algorithm for x-ray induced acoustic tomography** [11595-128]

---

**POSTERS: MACHINE LEARNING APPLIED TO IMAGING PHYSICS**

- 11595 3W **A deep learning approach to correctly identify the sequence of coincidences in cross-strip CZT detectors** [11595-137]
- 11595 3X **Learning a projection operator onto the null space of a linear imaging operator** [11595-138]
- 11595 3Y **A probabilistic conditional adversarial neural network to reduce imaging variation in radiography (Cum Laude Poster Award)** [11595-139]
- 11595 3Z **Self-supervised learning for CT deconvolution** [11595-140]
- 11595 40 **Generation of contrast-enhanced CT with residual cycle-consistent generative adversarial network (Res-CycleGAN)** [11595-141]
- 11595 42 **Investigation of the efficacy of a data-driven CT artifact correction scheme for sparse and truncated projection data for intracranial hemorrhage diagnosis** [11595-143]
- 11595 43 **Estimation of patient eye-lens dose during neuro-interventional procedures using a dense neural network (DNN)** [11595-144]
- 11595 44 **Low-dose CT denoising via CNN with an observer loss function** [11595-145]
- 11595 45 **CNN-based CT denoising with an accurate image domain noise insertion technique** [11595-146]
- 11595 46 **A deep learning post-processing to enhance the maximum likelihood estimate of three material decomposition in photon counting spectral CT** [11595-147]
- 11595 47 **Synthetic dual energy CT imaging from single energy CT using deep attention neural network** [11595-148]
- 11595 48 **Image reconstruction from projections of digital breast tomosynthesis using deep learning** [11595-149]

- 11595 49 **Transfer learning-based synthetic CT generation for MR-only proton therapy planning in children with pelvic sarcomas** [11595-150]
- 11595 4A **PET image resolution uniformity improvements using deep learning** [11595-151]
- 11595 4B **Enhanced PET/MRI reconstruction via dichromatic interpolation of domain-translated zero-dose PET** [11595-152]
- 11595 4C **A topological approach for the pattern analysis on chest x-ray images of COVID-19 patients** [11595-153]
- 11595 4D **Deep learning based similarity-consistency abnormality detection (SCAD) model for classification of MRI patterns of multiple myeloma (MM) infiltration** [11595-154]
- 11595 4E **Using a convolutional neural network for human recognition in a staff dose management software for fluoroscopic interventional procedures** [11595-155]
- 11595 4F **Improving proton CT beyond iterative methods with a convolutional neural network** [11595-156]

---

**POSTERS: PHOTON COUNTING AND PHASE CONTRAST IMAGING**

---

- 11595 4G **Low-dose photon-counting CT with penalized-likelihood basis-image reconstruction: image quality evaluation** [11595-157]
- 11595 4H **Maximum A Posteriori material decomposition for spectral photon-counting CT: application to human blood iron level estimation** [11595-158]
- 11595 4I **Multivariate SNR in spectral computed tomography** [11595-159]
- 11595 4J **Theoretical comparison of energy-resolved and temporal-subtraction angiography** [11595-160]
- 11595 4K **An experimental evaluation of material separability in photon-counting CT** [11595-161]
- 11595 4M **Towards x-ray phase contrast tomography in clinical conditions: simulation and phase retrieval development** [11595-163]
- 11595 4N **Tracking cells in the brain of small animals using synchrotron multi-spectral phase contrast imaging** [11595-164]
- 11595 4O **Challenges of employing a high resolution x-ray detector in a coded-aperture x-ray phase-contrast imaging system** [11595-165]
- 11595 4P **Quantitative phase retrieval simulation for mesh-based x-ray phase imaging systems** [11595-166]

---

**POSTERS: BREAST IMAGING**

---

- 11595 4Q **Assessment of a tumour growth model for virtual clinical trials of breast cancer screening** [11595-92]
- 11595 4R **Iterative method to achieve noise variance stabilization in single raw digital breast tomosynthesis** [11595-93]
- 11595 4S **Computational model of tumor growth for in silico trials** [11595-94]
- 11595 4T **Accuracy and precision of a structured light scanning system for acquiring 3D information of the breast under compression** [11595-95]
- 11595 4U **Clinical study for evaluation of an inflatable air cushion to reduce patient discomfort during tomosynthesis compression** [11595-96]
- 11595 4V **Next generation tomosynthesis image acquisition optimization for dedicated PET-DBT attenuation corrections** [11595-97]
- 11595 4W **Analysis of digital breast tomosynthesis acquisition geometries in sampling Fourier space** [11595-98]
- 11595 4X **Realism of mammography tissue patches simulated using Perlin noise: a forced choice reading study** [11595-99]

---

**POSTERS: IMAGING METHOD**

---

- 11595 4Y **Estimation of the dynamic volume of each lung via rapid limited-slice dynamic MRI** [11595-129]
- 11595 4Z **Internal layer illumination method and apparatus for medical imaging by multiple beam interference** [11595-130]
- 11595 50 **Electrode displacement elastography for differentiating metastatic liver cancer microwave ablation procedures** [11595-131]
- 11595 51 **Proton imaging with machine learning** [11595-132]
- 11595 52 **Ring artifact and non-uniformity correction method for improving XACT imaging** [11595-133]
- 11595 53 **Thermal interpretation procedure for the adjunct detection of thyroid pathologies** [11595-134]
- 11595 54 **Realistic head modeling of electromagnetic brain activity: an integrated Brainstorm-DUNEuro pipeline from MRI data to the FEM solutions** [11595-135]
- 11595 55 **Modified sensitivity, noise equivalent count rate performance, and scatter fraction measurements of asymmetrical and dedicated brain positron emission tomographs** [11595-136]
