Volume 11599

Proceedings of SPIE, 1605-7422, V. 11599

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Medical Imaging 2021: Image Perception, Observer Performance, and Technology Assessment,
edited by Frank W. Samuelson, Sian Taylor-Phillips, Proc. of SPIE Vol. 11599, 1159901
© 2021 SPIE · CCC code: 1605-7422/21/\$21 · doi: 10.1117/12.2595462

Proc. of SPIE Vol. 11599 1159901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

MODALITY-SPECIFIC ASSESSMENT METHODS

- 11599 04 **Task-based assessment of binned and list-mode SPECT systems** [11599-1]
- 11599 05 **Observer study-based evaluation of a stochastic and physics-based method to generate oncological PET images** [11599-2]
- 11599 06 **Spatiotemporal characteristics of medical extended-reality systems** [11599-3]
- 11599 07 **Grayscale contrast enhancement based on grayscale-based contrast-to-noise ratio** [11599-4]
- 11599 08 **Towards the objective assessment of fluoroscopy systems: development of a framework to aid the design of tasks and metrics** [11599-5]
- 11599 09 **Limitation of acyclic oriented graphs matching as cell tracking accuracy measure when evaluating mitosis** [11599-6]

MODEL OBSERVERS I

- 11599 0A **Advancing the AmbientGAN for learning stochastic object models** [11599-7]
- 11599 0B **CNN based anthropomorphic model observer for defect localization** [11599-8]
- 11599 0C **Understanding CNN based anthropomorphic model observer using classification images** [11599-9]
- 11599 0D **A hybrid channelized Hotelling observer for estimating the ideal linear observer for total-variation-based image reconstruction** [11599-10]
- 11599 0E **Implementation of CNN-based multi-slice model observer for 3D cone beam CT** [11599-11]

MODEL OBSERVERS II

- 11599 0F **Supervised learning-based ideal observer approximation for joint detection and estimation tasks** [11599-12]
- 11599 0G **GAN generated model observer for one class detection in SPECT imaging** [11599-13]

11599 OH **Modeling human observer detection in undersampled magnetic resonance imaging (MRI)**
[11599-14]

11599 OI **Observer models utilizing compressed textures** [11599-15]

ARTIFICIAL INTELLIGENCE

11599 OJ **Effect of CAD system with a vessel suppression function on clinical lung nodule detection in chest CT scans** [11599-17]

11599 OK **An end-to-end deep learning model can detect the gist of the abnormal in prior mammograms as perceived by experienced radiologists** [11599-18]

11599 OL **Task-based performance evaluation of deep neural network-based image denoising**
[11599-19]

11599 OM **Towards a quantitative analysis of class activation mapping for deep learning-based computer-aided diagnosis** [11599-20]

11599 ON **Assessing regularization in tomographic imaging via hallucinations in the null space** [11599-21]

11599 OO **Comparison of diagnostic performances, case-based repeatability, and operating sensitivity and specificity in classification of breast lesions using DCE-MRI** [11599-22]

OBSERVER PERFORMANCE EVALUATION AND ROC

11599 OP **The perceptual influence of 2D synthesized images on 3D search** [11599-16]

11599 OQ **Test set participation may impact positively on clinical mammographic performance**
[11599-23]

11599 OR **Effect of time awake and hours slept at night on radiologists' interpretations of mammogram images** [11599-24]

11599 OS **Blink identification with eye tracking: a software processing program** [11599-25]

11599 OT **Employing eye tracking to identify the onset of fatigue in Digital Breast Tomosynthesis (DBT) readers for a national breast cancer screening programme** [11599-26]

11599 OU **A retrospective comparative study of reading performances between radiologists from two countries in the assessment of 3D mammography** [11599-27]

POSTERS

- 11599 0X **Task-based evaluation of deep image super-resolution in medical imaging (Cum Laude Poster Award) [11599-30]**
- 11599 0Y **Learning observer design for object detection under complex background and variant locations: an application in IQ assessment with spectrum shaping technique for ultra-low dose lung imaging [11599-31]**
- 11599 0Z **Class classification using two alternate force choice against an ensemble of normal examples [11599-32]**
