Volume 11607

Proceedings of SPIE 0277-786X, V. 11607

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optics Frontiers Online 2020: Distributed Optical Fiber Sensing Technology and Applications,
edited by Jiaqi Yan, Proc. of SPIE Vol. 11607, 1160701 · © 2021 SPIE
CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2590301

Proc. of SPIE Vol. 11607 1160701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optics Frontiers Online 2020: Distributed Optical Fiber Sensing Technology and Applications*, edited by Jiaqi Yan, Proceedings of SPIE Vol. 11607 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

OPTICS FRONTIERS ONLINE 2020: DISTRIBUTED OPTICAL FIBER SENSING TECHNOLOGY AND APPLICATIONS

11607 02	Research on the simultaneous distributed measurement of temperature and strain based on Brillouin scattering effect in communication optical fiber [11607-4]
11607 03	Identifying vehicle vibrations on a highway based on multipath information fusion in ϕ-OTDR systems [11607-7]
11607 04	An approach for vibration positioning and recognition in OFDR [11607-8]
11607 05	A novel Sagnac distributed optical fiber vibration sensor based on time delay estimation algorithm [11607-9]
11607 06	A sensor for incoherent light based on the bi-periodic sensitivity characteristic of laser [11607-10]
11607 07	Distributed optical fiber pressure sensor based on Brillouin scattering [11607-13]
11607 08	Simultaneous temperature and vibration sensing based on hybrid BOTDR and Φ-OTDR (Invited Paper) [11607-14]
11607 09	Research on composite interferometric distributed optical fiber vibration sensing technology [11607-15]
11607 0A	Study on the performance of passive digital phase demodulation algorithm based on 3×3 coupler and the hardware implementation [11607-16]
11607 0B	Fast Brillouin optical time-domain analysis using compressed sensing [11607-19]
11607 0C	Brillouin scattering in micro-nano fiber [11607-20]
11607 0D	A novel demodulation technique for identical weak fiber Bragg grating array sensing with improved performance [11607-22]
11607 0E	A fiber ultraviolet sensor applied to partial discharge detection [11607-23]
11607 0F	Research on type sensing of optical fiber connector using microwave photonic interference [11607-24]
11607 0G	Application of distribution fiber optic sensing technology in submarine optical cable safety monitoring [11607-25]
11607 0H	Field trial of DAS system for seismic data acquisition in lagoon [11607-26]

11607 0I	Test of offshore wind generator pile foundation based on distributed Brillouin optical fiber sensing [11607-27]
11607 0J	Distributed optical fiber vibration sensor for the identification of pipeline leakage using relevant vector machine [11607-28]
11607 0K	Security pre-warning system of underground pipelines based on BOTDR [11607-30]
11607 0L	Influence of probe pulse characteristics on SNR of Brillouin optical time domain reflectometer [11607-32]
11607 0M	A new phase demodulation method for ϕ-OTDR based on coherent detection [11607-33]
11607 0N	Optical fiber based pressure sensors developed for monitoring vehicle loads of asphalt pavements [11607-36]
11607 0O	Acoustic sensor measurement system based on phase-shift fiber Bragg grating [11607-38]
