Event: SPIE Advanced Lithography, 2021, Online Only

PROCEEDINGS OF SPIE

Extreme Ultraviolet (EUV) Lithography XII

**Nelson M. Felix
Anna Lio**
Editors

**22–26 February 2021
Online Only, United States**

Sponsored by
SPIE

Cosponsored by
ASML US, Inc. (United States)

Published by
SPIE

Volume 11609

Proceedings of SPIE 0277-786X, V. 11609

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Extreme Ultraviolet (EUV) Lithography XII, edited by Nelson M. Felix,
Anna Lio, Proc. of SPIE Vol. 11609, 1160901 · © 2021 SPIE
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2595815

Proc. of SPIE Vol. 11609 1160901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Extreme Ultraviolet (EUV) Lithography XII*, edited by Nelson M. Felix, Anna Lio, Proceedings of SPIE Vol. 11609 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

LOW- AND HIGH-NA EUV SCANNER ROADMAPS AND CONSIDERATIONS

- 11609 06 **EUV dark field lithography: extreme resolution by blocking 0th order** [11609-4]
- 11609 07 **Effect of high NA “half-field” printing on overlay error** [11609-5]

EUV MASKS

- 11609 0B **Measuring EUV mask 3D effects with hyperspectral Zernike phase contrast** [11609-10]
- 11609 0C **Statistical analysis of the impact of 2D reticle variability on wafer variability in advanced EUV nodes using large-scale Monte Carlo simulations** [11609-11]
- 11609 0D **Optical design of EUV attenuated PSM for contact-hole applications** [11609-12]

RESIST CHEMISTRY: JOINT SESSIONS WITH CONFERENCES 11609 AND 11612

- 11609 0H **Chemically-amplified backbone scission (CABS) resist for EUV lithography** [11609-16]
- 11609 0I **Design considerations for chemically amplified EUV resist materials** [11609-17]
- 11609 0J **Progress in EUV resist screening towards the deployment of high-NA lithography** [11609-18]

EUV MASK INSPECTION AND REPAIR

- 11609 0L **Laser-assisted discharge produced plasma (LDP) EUV source for actinic patterned mask inspection (APMI) (Invited Paper)** [11609-20]
- 11609 0M **Lensless EUV mask inspection for anamorphic patterns** [11609-21]
- 11609 0N **Particle removal tool to repair particle defects on EUV reticles** [11609-22]

EUV PATTERNING: JOINT SESSION WITH CONFERENCES 11609 AND 11615

- 11609 0O **Plasma etch solutions for EUV patterning: defect challenges (Invited Paper)** [11609-24]
- 11609 0Q **28nm pitch single exposure patterning readiness by metal oxide resist on 0.33NA EUV lithography** [11609-26]
- 11609 0R **Metal layer single EUV expose at pitch 28 nm: how bright field and NTD resist advantages align** [11609-27]

EUV PATTERNING FIDELITY

- 11609 0T **Extending 0.33 NA EUVL to 28 nm pitch using alternative mask and controlled aberrations** [11609-29]
- 11609 0U **EUV single exposure via patterning at aggressive pitch** [11609-30]
- 11609 0V **Optimization of the EUV contact layer process for 7nm FPGA production** [11609-31]
- 11609 0W **Alternative developer solution/process for EUV lithography: ethyltrimethylammonium hydroxide (ETMAH)** [11609-32]
- 11609 0X **Regression analysis of photodecomposable quencher concentration effects on chemical gradient in chemically amplified extreme ultraviolet resist processes** [11609-33]

EUV PELLICLE

- 11609 0Y **CNT EUV pellicle tunability and performance in a scanner-like environment (Invited Paper)** [11609-34]
- 11609 0Z **CNT pellicles: imaging results of the first full-field EUV exposures** [11609-35]
- 11609 10 **Enabling non-actinic EUV mask inspection using CNT pellicle** [11609-36]
- 11609 11 **EUV scattering from CNT pellicles: measurement and control** [11609-37]

EUV STOCHASTICS I

- 11609 13 **Measuring and analyzing contact hole variations in EUV lithography** [11609-39]
- 11609 14 **Modeling stochastic effects of exposure/diffusion and dissolution on missing contacts** [11609-40]

- 11609 16 **Stochastic defect criticality prediction enabled by physical stochastic modeling and massive metrology** [11609-42]
- 11609 17 **Gaussian random field EUV stochastic models, their generalizations and lithographically meaningful stochastic metrics** [11609-43]

EUV SOURCE

- 11609 19 **Challenge of >300W high power LPP-EUV source with long collector mirror lifetime-III for semiconductor HVM** [11609-48]

EUV STOCHASTICS II

- 11609 1C **3D modeling of EUV photoresist using the multivariate Poisson propagation model** [11609-45]

POSTER SESSION

- 11609 1F **Morphology change and release of tin and lead micro-particles from substrates in hydrogen plasma** [11609-51]
- 11609 1G **The development progress of the high power LPP-EUV light source using a magnetic field** [11609-52]
- 11609 1I **Defect repairs for the extreme ultraviolet mask** [11609-56]
- 11609 1K **Line width roughness variation and printing failures caused by stochastic effect at extreme-ultraviolet exposure** [11609-58]
- 11609 1L **Novel processing technologies for advanced EUV patterning materials using metal oxide resist (MOR)** [11609-59]
- 11609 1N **NXE:3400 OPC process monitoring: model validity vs process variability** [11609-61]
