SPIE

Volume 11628

Proceedings of SPIE, 1605-7422, V. 11628

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Mechanisms and Techniques in Photodynamic Therapy and Photobiomodulation, edited by David H. Kessel, Praveen Arany, Tayyaba Hasan, James D. Carroll, Ann Liebert, Proc. of SPIE Vol. 11628, 1162801
© 2021 SPIE · CCC code: 1605-7422/21/\$21 · doi: 10.1117/12.2596808

Proc. of SPIE Vol. 11628 1162801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](https://spiedigitallibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Mechanisms and Techniques in Photodynamic Therapy and Photobiomodulation*, edited by David H. Kessel, Praveen Arany, Tayyaba Hasan, James D. Carroll, Ann Liebert, Proc. of SPIE 11628, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

PHOTODYNAMIC THERAPY I

- 11628 06 **Determination of the distribution of drug concentration and tissue optical properties for ALA-mediated photodynamic therapy** [11628-3]
- 11628 07 **Determinants of PDT efficacy** [11628-4]
- 11628 08 **A comparison of two probes to determine rectum optical properties** [11628-5]

MECHANISMS OF PHOTOBIMODULATION I

- 11628 0A **Wavelength dependency of the critical flicker-fusion frequency: therapeutic 40 Hz light source in Alzheimer's disease** [11628-22]
- 11628 0C **Blue LED light photobiomodulation in cultured human fibroblasts and keratinocytes cell line** [11628-24]
- 11628 0D **Comparing of efficiency of photobiomodulation of red and infrared spectrum for the correction of radiation-induced oral mucositis** [11628-25]

PHOTODYNAMIC THERAPY II

- 11628 0F **Towards high-throughput light-activated drug discovery using automated plate illuminator** [11628-7]

MECHANISMS OF PHOTOBIMODULATION II

- 11628 0J **A response of HeLa Kyoto tumor cells on a combination of photobiomodulation and ionizing radiation** [11628-26]
- 11628 0K **Quality of life (QoL) after laser therapy for the management of fibromyalgia: a systematic review** [11628-27]
- 11628 0O **Analysis of photobiomodulation therapy conditions used to treat neurodegenerative brain diseases** [11628-31]

PHOTODYNAMIC THERAPY III

- 11628 OQ **Configurable cloud based medical laser platform with real-time treatment monitoring**
[11628-12]
- 11628 OR **Cherenkov imaging for total skin electron therapy: an evaluation of dose uniformity** [11628-13]
- 11628 OS **Monte Carlo (MC) study of dose distribution and Cherenkov imaging in total skin electron
therapy (TSET) with TOPAS** [11628-14]

PHOTODYNAMIC THERAPY IV

- 11628 OX **Estimation of fluorescence probing depth dependence on the distance between source and
detector using Monte Carlo modeling** [11628-19]
- 11628 OY **Gold nanoparticles-mediated laser ablation therapy monitored with optical fibers sensing
network in real time** [11628-20]
