Volume 11657

Proceedings of SPIE, 1605-7422, V. 11657

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Biomedical Applications of Light Scattering XI, edited by Adam Wax,
Vadim Backman, Proc. of SPIE Vol. 11657, 1165701 · © 2021 SPIE
CCC code: 1605-7422/21/\$21 · doi: 10.1117/12.2596744

Proc. of SPIE Vol. 11657 1165701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biomedical Applications of Light Scattering XI*, edited by Adam Wax, Vadim Backman, Proceedings of SPIE Vol. 11657 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

THICK TISSUE SCATTERING

- 11657 06 Epi-illumination quantitative phase imaging (QPI) and 3D refractive index (RI) tomography in thick scattering samples with quantitative oblique back-illumination microscopy (Invited Paper) [11657-13]
- 11657 07 Simulating medical applications of tissue optical property and shape imaging using open-source ray tracing software [11657-14]

VASCULAR ANALYSIS

- 11657 0M Calibration free, time-resolved diffuse optical spectroscopy using combined Monte-Carlo and diffusion theory [11657-22]

RAMAN SCATTERING

- 11657 0N Raman spectroscopy analysis of conformation changes in amino acids [11657-9]
- 11657 0O Detection of L-Asparagine by surface-enhanced Raman scattering [11657-10]
