Volume 11660

Proceedings of SPIE, 1605-7422, V. 11660

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Reporters, Markers, Dyes, Nanoparticles, and Molecular Probes for Biomedical Applications XIII,
edited by Samuel Achilefu, Ramesh Raghavachari, Proc. of SPIE Vol. 11660, 1166001
© 2021 SPIE · CCC code: 1605-7422/21/\$21 · doi: 10.1117/12.2596765

Proc. of SPIE Vol. 11660 1166001-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

NEAR INFRARED BASED APPLICATIONS

- 11660 06 Cholesterol-enriched erythrocyte-derived optical nanoparticles for NIR fluorescence imaging of intraperitoneal ovarian tumors in mice [11660-11]

NANOTECHNOLOGY BASED APPLICATIONS

- 11660 0C Facile synthesis of fluorescent carbon quantum dots and their potential application in cancer theranostics [11660-6]

SPECTROSCOPY BASED APPLICATIONS

- 11660 0E Saliva diagnosis of autistic spectrum disorder by FT-IR spectroscopy [11660-12]

POSTER SESSION

- 11660 0I PhotochemCAD spectra viewer for web-based visualization of absorption and fluorescence spectra [11660-16]
