Volume 11704

Proceedings of SPIE 0277-786X, V. 11704

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Vertical-Cavity Surface-Emitting Lasers XXV, edited by Chun Lei,
Kent D. Choquette, Proc. of SPIE Vol. 11704, 1170401 · © 2021
SPIE · CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2596582

Proc. of SPIE Vol. 11704 1170401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Vertical-Cavity Surface-Emitting Lasers XXV*, edited by Chun Lei, Kent D. Choquette, Proceedings of SPIE Vol. 11704 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

940NM VCSEL MANUFACTURING

- 11704 05 **New wavelength tuning strategy for realizing VCSEL wafers with highly uniform wavelength**
[11704-2]

HIGH POWER VCSELS

- 11704 09 **More power! VCSELS near 1 million amps per square centimeter (Invited Paper)** [11704-6]
11704 0C **High performance large aperture NIR single-mode VCSELS** [11704-9]

VERTICAL EXTERNAL CAVITY SURFACE EMITTING LASERS AT MANY WAVELENGTHS

- 11704 0H **Microscopic charge carrier dynamics within non-normal incidence VECSEL cavities** [11704-14]

NOVEL VCSEL STRUCTURES AND APPLICATIONS

- 11704 0K **Can nonlinear optoelectronic CMOS VCSEL replace semiconductor diode-based VCSEL? Comparison of performance, integration, cost of manufacturing, and applications** [11704-17]
11704 0L **Computational methods for VCSEL array characterization and control** [11704-18]
11704 0M **Beam propagation study of on-wafer multiple-defect photonic crystal VCSEL arrays** [11704-19]

VCSEL-BASED COMMUNICATION

- 11704 0P **Narrow spectrum VCSEL development for high performance 100G transceivers and increased transmission distance over multimode fiber** [11704-22]
11704 0Q **19-element 2D honeycomb VCSEL array** [11704-23]
11704 0R **Impact of Δn_{eff} of 850nm VCSEL cavity on low noise for 100G eSR4 transmission and its potential for $\geq 400\text{G}$ datacenter optical interconnects** [11704-24]
11704 0T **Investigations on polarization dynamics of birefringent spin-VCSELS** [11704-26]
