Volume 11713

Proceedings of SPIE 0277-786X, V. 11713

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Next-Generation Optical Communication: Components, Sub-Systems, and Systems X,
edited by Guifang Li, Kazuhide Nakajima, Proc. of SPIE Vol. 11713, 1171301
© 2021 SPIE · CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2596740

Proc. of SPIE Vol. 11713 1171301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Next-Generation Optical Communication: Components, Sub-Systems, and Systems X*, edited by Guifang Li, Kazuhide Nakajima, Proceedings of SPIE Vol. 11713 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

LONG-HAUL/SDM TRANSMISSION

- 11713 06 **Applicability of standard 125 μm -cladding multi-core fiber for wide-band and long-haul transmission (Best Technical Paper) [11713-2]**
- 11713 07 **Large capacity and wideband transmission over SDM fibers (Invited Paper) [11713-3]**
- 11713 08 **Fabrication of heat-induced long-period gratings for mode conversion in few-mode fibers [11713-4]**
- 11713 0A **Towards low loss hollow core optical fibers (Invited Paper) [11713-6]**

SHORT-REACH TRANSMISSION

- 11713 0C **Optical data transmission at 44 terabits/s with a Kerr soliton crystal microcomb [11713-8]**
- 11713 0E **Simplified 3 channel PAM4 Nyquist TDM transmitter [11713-10]**
- 11713 0F **High-speed real-time transmissions supporting LTE/5G mobile fronthaul networks using discrete multitone format (Invited Paper) [11713-11]**
- 11713 0H **Indoor and outdoor geo-localization and navigation by visible light communication [11713-13]**
- 11713 0I **Crossroad management through visible light communication in cooperative vehicular systems [11713-14]**

ADVANCED DEVICES AND AI

- 11713 0J **Recent advances in integrated silicon photonics engine for coherent optical communications (Invited Paper) [11713-15]**
- 11713 0K **RF and microwave photonic, fractional differentiation, integration, and Hilbert transforms based on Kerr micro-combs [11713-16]**
- 11713 0L **Deep learning based digital backpropagation enabling SNR gain at low complexity (Invited Paper) [11713-17]**
- 11713 0N **Bandpass filter with flat-top transmission using multistage Fabry-Perot with unequal cavity lengths [11713-19]**

POSTER SESSION

- 11713 0O **Sum rate utilization of 4×4 multiple-input multiple-output (MIMO) visible light communication (VLC)** [11713-20]
- 11713 0P **Sampling of a periodic pulse train by a modulator in a ring resonator** [11713-21]
- 11713 0Q **Machine-learning-aided abstraction of photonic integrated circuits in software-defined optical transport** [11713-22]
