Volume 11735

Proceedings of SPIE 0277-786X, V. 11735

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Pattern Recognition and Tracking XXXII, edited by Mohammad S. Alam,
Proceedings of SPIE Vol. 11735, 1173501 · © 2021 SPIE
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2598633

Proc. of SPIE Vol. 11735 1173501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Pattern Recognition and Tracking XXXII*, edited by Mohammad S. Alam, Proc. of SPIE 11735, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

NOVEL TRACKING TECHNIQUES

- 11735 02 **Dynamic fire and smoke detection and classification for flashover prediction (Invited Paper)**
[11735-1]
- 11735 04 **All optical logic for optical pattern recognition and networking applications** [11735-3]
- 11735 06 **Phase conjugate Michelson interferometer for optical logic** [11735-5]

DEEP LEARNING

- 11735 08 **Deep learning based UAV type classification (Invited Paper)** [11735-7]
- 11735 0A **Adversarial attacks against image-based malware detection using autoencoders** [11735-9]
- 11735 0B **Deep neural network based approach for robust aerial surveillance** [11735-10]
- 11735 0C **Understanding deep learning decision for satellite image classification** [11735-25]

ADVANCED NEURAL NETWORKS

- 11735 0E **A convolutional fully connected structure with hard sample memory pool for land use classification** [11735-12]
- 11735 0F **Expelled kidney stones classification using feature fusion** [11735-13]
- 11735 0H **Ptychographic coherent diffractive imaging, digital holography and structured light techniques for topographical 3D imaging** [11735-15]

ARTIFICIAL INTELLIGENCE

- 11735 0I **Concept learning based on human interaction and explainable AI** [11735-16]
- 11735 0J **Securing smart cities using artificial intelligence: intrusion and abnormal behavior detection system** [11735-17]

- 11735 OK **Implementation of a behavioral analysis method of crowd movement in the service of video surveillance** [11735-18]
- 11735 OL **Recurrent residual U-Net with EfficientNet encoder for medical image segmentation** [11735-19]
- 11735 OM **MSNet: multi-scale network for crowd counting** [11735-27]

BIOMETRIC RECOGNITION

- 11735 ON **Modeling disease agents transmission dynamics in dementia on heterogeneous spatially embedded networks** [11735-20]
- 11735 OP **A study of person re-identification design characteristics for aerial data** [11735-22]
- 11735 OQ **A human body morphology detector: a distinctive filter to differentiate the image-based process depending on whether the person is a child or an adult** [11735-23]
- 11735 OR **Coherent superposition based single-channel color image encryption using gamma distribution and biometric phase keys** [11735-24]
- 11735 OS **Pneumonia classification with capsule network by using x-ray images** [11735-26]
