Front Matter: Volume 11761

, "Front Matter: Volume 11761," Proc. SPIE 11761, Fourth International Conference on Photonics and Optical Engineering, 1176101 (15 January 2021); doi: 10.1117/12.2592064

SPIE.

Event: Fourth International Conference on Photonics and Optical Engineering, 2020, Xi'an, China

PROCEEDINGS OF SPIE

Fourth International Conference on Photonics and Optical Engineering

Jiangbo She

Editor

15–16 October 2020

Xi'an, China

Organized by

Xi'an Institute of Optics and Precision Mechanics, CAS (China)
State Key Laboratory of Transient Optics and Photonics (China)
Xi'an Technological University (China)
Shaanxi Normal University (China)
Xi'an University of Technology (China)

Cooperating Organizations

Nanyang Technological University (Singapore)
Centre for Optical and Laser Engineering (Singapore)
Xi'an University of Posts and Telecommunications (China)
Nanjing University of Science and Technology (China)
Acta Photonica Sinica (China)
OSA & SPIE student Chapter of XIOPM (China)
Ultrafast Science (China)

Sponsored by

SPIE
Chinese Optical Society (China)
Shaanxi Optical Society (China)
Optics and Photonics Society of Singapore (Singapore)
High-speed Photography and Photonics Committee of Chinese Optical Society (China)

Published by

SPIE

Volume 11761

Proceedings of SPIE 0277-786X, V. 11761

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Fourth International Conference on Photonics and Optical Engineering, edited by Jiangbo She,
Proc. of SPIE Vol. 11761, 1176101 · © 2021 SPIE · CCC code:
0277-786X/21/\$21 · doi: 10.1117/12.2592064

Proc. of SPIE Vol. 11761 1176101-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourth International Conference on Photonics and Optical Engineering*, edited by Jiangbo She, Proceedings of SPIE Vol. 11761 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

FOURTH INTERNATIONAL CONFERENCE ON PHOTONICS AND OPTICAL ENGINEERING

11761 02	Refractometric optical sensors with optoelectronic interrogation (Invited Paper) [11761-59]
11761 03	Optical technology for future telescopes (Invited Paper) [11761-93]
11761 04	Controllable optical quality factor in a two-ring-two-bus structure [11761-19]
11761 05	Two-step preparation and properties of polyimide/zirconium composite free-supporting membrane [11761-80]
11761 06	Color deep learning profilometry for single-shot 3D shape measurement [11761-29]
11761 07	Deep space point source background infrared radiation signal simulation by IRAS star catalog [11761-28]
11761 08	Study on characteristics of composite light scattering of square pore periodic structure with defect particles [11761-24]
11761 09	Iterative reconstruction for linear imaging spectropolarimetry without polarimetric calibration [11761-103]
11761 0A	Mie-scattering Lidar system with a solar-blind wavelength for atmospheric boundary layer [11761-36]
11761 0B	Optical glass grinding wheel modeling and grinding simulation technology [11761-34]
11761 0C	Ptychographic attack on the double random amplitude-phase optical encoding system [11761-69]
11761 0D	THz spectral analysis of barbituric acid and its dihydrate [11761-77]
11761 0E	Generation mechanism and suppression technique of laser scatter bright stripe on mirror surface [11761-31]
11761 0F	Polarization measurement of 2.1μm high power GaSb-based lasers [11761-37]
11761 0G	Diode-pumped room temperature continuous-wave operation Tm: YAP thin-disk laser [11761-65]
11761 0H	Simulation of temperature compensation for geometrical stability in large ring laser [11761-85]
11761 0I	The gamut expansion of laser display [11761-74]

11761 OJ	Multi-functional laser precision processing system [11761-32]
11761 OK	Absorber for measuring the transmission of a polycapillary focusing optical lens [11761-16]
11761 OL	Analysis on effect of filling glue between the frame and lens with small aperture [11761-20]
11761 OM	Modeling and simulation analysis of a non-line-of-sight infrared laser imaging system [11761-25]
11761 ON	A novel conditioning method for pad profile accuracy in full aperture polishing [11761-46]
11761 OO	A new type of unitized design for the structure of a space camera using topology optimization [11761-49]
11761 OP	Epidermal layer recognition of optical coherence tomography skin images [11761-66]
11761 OQ	Graphene-coated terahertz photonic crystal fiber for refractive index sensor applications [11761-68]
11761 OR	Applications and development of micro- or nano-metric multi degree of freedom adjusting displacement scaling mechanisms for primary mirror [11761-71]
11761 OS	An optimized depth-resolved dispersion compensation method in optical coherent tomography signal processing [11761-76]
11761 OT	Optimization analysis of ultra-precision flying-tool cutting machine for optical elements [11761-92]
11761 OU	GaAs material photorefractive response time measurement based on spectral probe [11761-94]
11761 OV	A simplified imaging model of bi-telecentric lenses under Scheimpflug condition and its calibration [11761-41]
11761 OW	Spectrum aliasing minimization for Fourier ptychographic microscopy based on annular illumination optimization [11761-42]
11761 OX	Design of a non-contact human body temperature measurement system [11761-35]
11761 OY	Monte Carlo simulation of laser illumination system using return photon counts [11761-95]
11761 OZ	Polarized image enhancement based on biological vision [11761-73]
11761 IO	High-frequency enhanced based on high-resolution synthetic spectrum quantitative phase imaging [11761-43]
11761 II	Pixel super resolution imaging method based on coded aperture modulation [11761-44]

- 11761 12 **Synthetic aperture optical system design for low-altitude detection** [11761-106]
- 11761 13 **Research on inversion algorithm of arbitrary phase-shifting wind imaging interferometer**
[11761-78]
- 11761 14 **Image super-resolution using convolutional neural network with symmetric skip connections**
[11761-45]
- 11761 16 **Hyperspectral image classification using 3D-2D CNN with multi-scale information extraction
and fusion module** [11761-79]
- 11761 17 **Non-destructive detection method based on two-channel coplanar capacitive sensor**
[11761-75]
- 11761 18 **Deep learning-based fringe pattern transformation method for phase calculation** [11761-58]
- 11761 19 **Reconstructing targets based on the enhancement of speckle patterns with the hybrid input-
output algorithm** [11761-60]
- 11761 1A **Laser beam stability control based on differential compensation system** [11761-72]
- 11761 1B **Eccentric fiber Bragg gratings via radiation of femtosecond laser pulses** [11761-21]
- 11761 1C **Phase space retrieval by iterative three-dimensional intensity projections** [11761-62]
- 11761 1D **An improved reliability-guided phase unwrapping algorithm for digital holographic
microscopic** [11761-67]
- 11761 1E **Design of polarization beam splitter with broadband and wide angle in near infrared** [11761-15]
- 11761 1F **Generation of cylindrical vector vortex beams based on common-path vector optical
generators** [11761-81]
- 11761 1G **Structural impact localization method based on sensor array scanning** [11761-87]
- 11761 1H **A fiber Bragg grating accelerometer based on corrugated diaphragm** [11761-13]
- 11761 1I **An auto-focusing reflection-type lens-less digital holographic microscope** [11761-97]
- 11761 1J **Research on process of optical elements coating planar layer** [11761-5]
- 11761 1K **Optical system design of polarization imaging spectrometer based on aperture division**
[11761-84]
- 11761 1L **Standard mirror mounting deformation analysis of large diameter optical interference
measurement system** [11761-96]
- 11761 1M **High-efficiency infrared image super-resolution algorithm based on a cascaded deep network**
[11761-100]

- 11761 1N **Software design for image stitching, depth of field expansion and auto-focusing operation on intelligent microscopy system based on software-driven hardware [11761-101]**
- 11761 1O **Hyperspectral image change detection using two-branch Unet network with feature fusion [11761-82]**
- 11761 1P **Optimization design of porous aerostatic bearing for full aperture rapid planar polishing machine [11761-89]**
- 11761 1Q **Numerical simulation of stimulated radiation on reacting flowfield in DF supersonic chemical laser [11761-26]**
- 11761 1R **Research of robotic spherical polishing end effector based on finite element simulation [11761-17]**
- 11761 1S **Quantitative weak phase approximation analysis of quantitative phase imaging based on asymmetric illumination [11761-104]**
- 11761 1T **End-to-end single-shot composite fringe projection profilometry based on deep learning [11761-105]**
- 11761 1U **Estimating the blood glucose of serum optical spectrum using support vector regression [11761-39]**
- 11761 1V **Distributed Bragg reflector lasers emitting around 2.3 μ m [11761-54]**
- 11761 1W **High sensitive locating through scattering medium with phase-space-prior [11761-47]**
- 11761 1X **Super-resolution lensless microscopy using multi-wavelength multiplexing [11761-50]**
- 11761 1Y **Research on optimization technology of high precision milling equipment for planar optical elements [11761-91]**
- 11761 1Z **Testing of annular hyperboloid mirror for Cassegrain system [11761-22]**
- 11761 20 **The design and fabrication of freeform lenses for generating complex illumination patterns on curved surfaces [11761-40]**
- 11761 21 **Simulation of non-line-of-sight imaging system based on the light-cone transform [11761-63]**
- 11761 22 **An openCL-based speckle matching on the monocular 3D sensor using speckle projection [11761-99]**
- 11761 23 **Research on ion beam polishing efficiency with changing different beam diameters [11761-23]**
