SPIE

Volume 11820

Proceedings of SPIE 0277-786X, V. 11820

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Astronomical Optics: Design, Manufacture, and Test of Space and Ground Systems III, edited by Tony B. Hull,
Daewook Kim, Pascal Hallibert, Fanny Keller, Proc. of SPIE Vol. 11820, 1182001 · © 2021 SPIE
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2606428

Proc. of SPIE Vol. 11820 1182001-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Astronomical Optics: Design, Manufacture, and Test of Space and Ground Systems III*, edited by Tony B. Hull, Daewook Kim, Pascal Hallibert, Fanny Keller, Proc. of SPIE 11820, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

OPTICAL AND MECHANICAL COMPONENT TECHNOLOGY

- 11820 05 **Advanced AlF₃-passivated Aluminum mirrors for UV astronomy** [11820-1]
- 11820 06 **Volume phase holographic gratings for the Raman spectrometer for MMX (RAX)** [11820-3]

ULTRA STABLE OPTICS MATERIALS

- 11820 07 **Telescope mirror substrate trades: is the landscape between low- and high-thermal expansion substrates changed by the entry of Kyocera Cordierite CO720?** [11820-5]
- 11820 08 **Characterization of dimensional stability for materials used in ultra-stable structures** [11820-7]
- 11820 09 **Status of the serial production of 949 ZERODUR® ELT M1 segment blanks** [11820-8]

THERMAL AND STRUCTURAL CONTROL TECHNOLOGY

- 11820 0A **Predictive Thermal Control (PTC) technology to enable thermally stable telescopes: year four status** [11820-11]
- 11820 0B **ALLVAR alloy athermalization: a novel and cost-effective alternative for small to moderate sized space telescopes** [11820-13]
- 11820 0C **Technology maturation of key component-level technologies for ultra-stable optical systems** [11820-10]
- 11820 0D **Development of a thermal vacuum chamber, performance tests plan, and contamination control procedures for the Star-Planet Activity Research CubeSat (SPARCS)** [11820-12]

FUTURE TELESCOPES

- 11820 0E **Technical and scientific performance of the prototype Schwarzschild-Couder telescope for CTA** [11820-17]
- 11820 0F **Orbiting configurable artificial star multi-wavelength laser payload** [11820-15]
- 11820 0G **Design drivers for the PolStar telescope and UV spectropolarimeter instrument** [11820-16]

11820 OH **Cosmic evolution through UV surveys (CETUS): point spread function analysis of three mirror anastigmat telescope** [11820-38]

METROLOGY AND CHARACTERIZATION

11820 OI **Ground testing of the LISA telescope** [11820-20]

11820 OK **Ultrasound characterization of contact bonded bulk infrared optics** [11820-24]

11820 OL **Design, fabrication, and testing of an optical truss interferometer for the LISA telescope**
[11820-25]

11820 OM **Design and characterization of the damage induced by irradiation in optical coatings for space applications** [11820-23]

11820 ON **Optical test method for checking optomechanical design in early instrument models: Application to the RAX Spectrometer aboard JAXA's MMX Mission** [11820-21]

OASIS: INFLATABLE TERAHERTZ SPACE TELESCOPE

11820 OO **Orbiting Astronomical Satellite for Investigating Stellar Systems (OASIS): following the water trail from the interstellar medium to oceans** [11820-26]

11820 OP **All reflective THz telescope design with an inflatable primary antenna for Orbiting Astronomical Satellite for Investigating Stellar Systems (OASIS) mission** [11820-27]

11820 OQ **Parametric design study of the Orbiting Astronomical Satellite for Investigating Stellar Systems (OASIS) space telescope** [11820-28]

11820 OR **Stressed deformable reflector design and pneumatic membrane antenna for cryogenic thermal vacuum chamber testing** [11820-29]

11820 OS **OASIS architecture: key features** [11820-30]

11820 OU **Analytical and finite element analysis tool for nonlinear membrane antenna modeling for astronomical applications** [11820-32]

11820 OV **Mid-to-high frequency characterization of inflatable membrane optics** [11820-33]

11820 OW **Deflectometry-based thermal vacuum testing for a pneumatic terahertz antenna** [11820-34]

POSTER SESSION

11820 OX **Quantifying passive athermalization performance of high-resolution spaceborne optical assemblies** [11820-35]

- 11820 OY **A design study for adaptive primary mirrors in 1-2 meter class telescopes** [11820-37]
- 11820 OZ **The PLANetary extreme ultraviolet spectrometer project** [11820-36]
- 11820 10 **A wideband spectrometer for space-borne telescopes II** [11820-18]
- 11820 11 **Optical design adopting tilted filters for reduction of stray light in planetary exploration cameras and other optics** [11820-19]
