, "Front Matter: Volume 11849," Proc. SPIE 11849, Fourth International Symposium on High Power Laser Science and Engineering (HPLSE 2021), 1184901 (6 June 2021); doi: 10.1117/12.2601255

SPIE.

Event: Fourth International Symposium on High Power Laser Science and Engineering (HPLSE 2021), 2021, Suzhou, China

PROCEEDINGS OF SPIE

Fourth International Symposium on High Power Laser Science and Engineering (HPLSE 2021)

Jianqiang Zhu
Editor

12–26 April 2021
Suzhou, China

Organized by
Shanghai Institute of Optics and Fine Mechanics, Chinese Academy of Sciences (China)

Co-organized by
Chinese Laser Press (China)
China Academy of Engineering Physics (China)
Collaborative Innovation Center of IFSA (China)

Technical Cosponsor and Publisher
SPIE

Volume 11849

Proceedings of SPIE 0277-786X, V. 11849

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Fourth International Symposium on High Power Laser Science and Engineering (HPLSE 2021)
edited by Jianqiang Zhu, Proc. of SPIE Vol. 11849, 1184901 · © 2021 SPIE
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2601255

Proc. of SPIE Vol. 11849 1184901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourth International Symposium on High Power Laser Science and Engineering (HPLSE 2021)*, edited by Jianqiang Zhu, Proc. of SPIE 11849, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

FOURTH INTERNATIONAL SYMPOSIUM ON HIGH POWER LASER SCIENCE AND ENGINEERING (HPLSE 2021)

11849 02	Research on target alignment fiducials of high power laser facility [11849-6]
11849 03	Optimization of disposable debris shield in high-energy PW laser focusing system [11849-72]
11849 04	Higher-order Kerr effect including the uncertainties of their nonlinear coefficients [11849-78]
11849 05	Research of amplified spontaneous emission and thermo-optic effects in a diode pumped 100J/10Hz multi-slab Nd:glass laser amplifier [11849-2]
11849 06	Application research of spherical-aberration self-compensation in multi-pass laser amplifier [11849-3]
11849 07	Optimization of x-ray emission from triple-foil target irradiated with counter-propagate laser [11849-4]
11849 08	A quantitative method of Foucault test and its instrument realization in optical testing [11849-7]
11849 09	In-situ measurement of the plasma density by laser Thomson scattering [11849-8]
11849 0A	Miniature image preservation in stack structure [11849-10]
11849 0B	High-efficiency amplification of non-principal plane of yttrium calcium oxyborate [11849-12]
11849 0C	All-fiber gas Raman laser at 1 μm [11849-14]
11849 0D	The study of frequency domain optical parametric amplification technology [11849-15]
11849 0E	Quantizing the coherent polarization beam combination from temporal, spatial, and spectral domains [11849-18]
11849 0F	Fabrication of high-power hollow-core fiber end-cap [11849-19]
11849 0G	4.26 μm CW fiber laser based on HBr-filled hollow-core fiber [11849-20]
11849 0H	Investigation of coupling efficiency of the fiber side-pumping combiner [11849-22]
11849 0I	High power laser coupling from solid-core fibers to anti-resonant hollow-core fibers by fiber tapering technology [11849-23]

- 11849 OJ **Modes recognition in high-power fiber laser by convolutional neural networks** [11849-25]
- 11849 OK **Fabrication of fiber Bragg gratings with precisely adjustable and controllable parameters based on 213nm solid-state laser** [11849-26]
- 11849 OL **Broadband microwave photonic channelized receiver based on optical frequency comb injection locking technology** [11849-27]
- 11849 OM **A four-pass MOPA laser with tunable pulse width from sub-nanosecond to nanosecond** [11849-28]
- 11849 ON **Demonstration of SRS filtering at the output of 2kW fiber laser by CTFBG** [11849-29]
- 11849 OO **Raman suppression in kW-level narrow-linewidth one-stage MOPA fiber laser by CTFBG** [11849-30]
- 11849 OP **All-fiber Fabry-Perot cavity fabricated by fs laser line-by-line scanning technique** [11849-33]
- 11849 OQ **Tight focusing characteristics of laser vector field formed by off-axis parabolic mirror in high energy laser system** [11849-34]
- 11849 OR **Coaxial laser metal deposition system based on single mode laser** [11849-35]
- 11849 OS **Mitigation of simulated Raman scattering in fiber laser oscillator using long period fiber grating** [11849-38]
- 11849 OT **165 W, 1 MHz diode-pumped Nd:YAG Innoslab picosecond amplifier** [11849-39]
- 11849 OU **Theoretical study on the amplified spontaneous emission in an end-pumped cesium vapor laser** [11849-42]
- 11849 OV **Numerical simulation for the thermal recovery of N51-type phosphate laser glass for high power laser applications** [11849-43]
- 11849 OW **Progress of research on high energy laser component** [11849-44]
- 11849 OX **Weak reflectivity measurement of output-coupling FBG based on Fabry-Perot cavity inscribed by femtosecond laser** [11849-47]
- 11849 OY **Precise measurement for reflectivity of weak reflection FBG by Fabry Perot scale grating** [11849-49]
- 11849 OZ **Analysis and mitigation of final optics damage caused by continuous phase plate** [11849-50]
- 11849 IO **Theoretical and experimental study of diode-pumped Nd:LuAG disk lasers** [11849-51]
- 11849 II **The effect of stress on the frequency conversion efficiency of the large aperture frequency converter** [11849-54]

- 11849 12 **Modulating linearly polarized light into a full Poincaré beam by stress-engineered optical element [11849-55]**
- 11849 13 **Optical properties and potential of LB4 for THz wave generation [11849-56]**
- 11849 14 **Experimental study on removal of antireflection sol-gel SiO₂ coating of fused silica assisted by ion beam etching [11849-58]**
- 11849 15 **Influence of energy density on the microstructure and mechanical properties of GH5188 superalloy formed by laser melting deposition [11849-62]**
- 11849 16 **Study of conductively cooling technology for spaceborne high energy all-solid-state 2μm lasers [11849-63]**
- 11849 17 **Water-cooled deformable mirrors for high power beam correction [11849-66]**
- 11849 18 **Research on monitoring tower crane subtle deformation characteristics based on LiDAR data [11849-67]**
- 11849 19 **Load-controlled polarization of large-aperture optics in high-power laser amplifier [11849-70]**
- 11849 1A **Research on the joint design of continuous phase plate and lens array for beam smoothing [11849-76]**
