Volume 11856

Proceedings of SPIE 0277-786X, V. 11856

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Remote Sensing for Agriculture, Ecosystems, and Hydrology XXIII, edited by
Christopher M. U. Neale, Antonino Maltese, Proc. of SPIE Vol. 11856,
1185601 · © 2021 SPIE · 0277-786X · doi: 10.1117/12.2615051

Proc. of SPIE Vol. 11856 1185601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

AGRICULTURE: BIG DATA AND POLICY

- 11856 03 **MORERA: latest Earth observation system to translate big data to agriculture** [11856-1]
- 11856 04 **Supporting the common agricultural policy with Sentinel-2 data and deep recurrent networks**
[11856-2]

MAPPING WITH SENTINEL-2

- 11856 06 **Land cover mapping at national scale with Sentinel-2 and LUCAS: a case study in Portugal**
[11856-5]
- 11856 07 **A case of study of land surface phenology for CAP management: using Sentinel-2 data to
obtain phenometrics for winter cereals in Andalusia, Spain** [11856-6]
- 11856 08 **Characterising the spring and autumn land surface phenology of Macaronesian species using
Sentinel-2 data: the case of Canary Island** [11856-7]

NITROGEN, CHLOROPHYLL, AND CHG MONITORING

- 11856 09 **Estimation of chlorophyll content in radish leaves using hyperspectral remote sensing data and
machine learning algorithms** [11856-8]

ADVANCES IN INTERPRETATION AND MAPPING

- 11856 0E **Deep learning for sub-pixel palm tree classification using spaceborne Sentinel-2 imagery**
[11856-14]
- 11856 0F **Google Earth Engine for land surface albedo estimation: comparison among different
algorithms** [11856-16]
- 11856 0G **On the sensitivity of snow bidirectional reflectance to variations in grain characteristics**
[11856-17]

ENERGY BALANCE AND EVAPOTRANSPIRATION

- 11856 0H **Comparative analysis of evapotranspiration using the SEBAL model and the evaporimeter pan
method in the Huancane basin of Puno, Peru** [11856-18]

- 11856 OI Remote sensing and GIS based approaches to estimate evapotranspiration in the arid and semi-arid regions [11856-19]
- 11856 OK Development of GIS models via optical programming and python scripts to implement four empirical methods of reference and actual evapotranspiration (ET_o, ET_a) incorporating MODIS LST inputs [11856-21]

VEGETATION MONITORING AND MAPPING

- 11856 OL Multi-sensor data acquisition for assessing the condition of vegetation [11856-23]
- 11856 OM Satellite imagery and climate variables suggest variations in the phenology of olive groves in Southern Spain [11856-24]
- 11856 ON Use of satellite remote sensing and climate data to predict the potential habitat distribution of *Prosopis cineraria* in the UAE [11856-25]
- 11856 OR Recurrence techniques for the analysis of vegetation indices and climate anomalies: a study case in semiarid grasslands [11856-29]

YIELD RETRIEVAL AND WATER PRODUCTIVITY

- 11856 OS Estimation of olive groves cover crops net primary productivity using remote sensing data [11856-32]

WATER MONITORING APPLICATIONS

- 11856 OU Evaluating the effects of distinct water saturation states on the light penetration depths of sand-textured soils [11856-34]
- 11856 OV Improving water bodies detection from Sentinel-1 in South Africa using drainage and terrain data [11856-35]
- 11856 OW Coupling physically-based modeling and deep learning for long-term global freshwater availability monitoring and prediction [11856-36]

UAV AND AIRBORNE SENSING

- 11856 OX Estimation of leaf area index at the late growth stage of crops using unmanned aerial vehicle hyperspectral images [11856-54]
- 11856 OY UAV-based scoring for iron chlorosis in soybean [11856-55]

- 11856 0Z **Application of UAV and spectrometric survey results to determine agrochemical parameters of zonal soils used in agriculture (East of European Russia) [11856-39]**
- 11856 10 **Using radiative transfer models for mapping soil moisture content under grassland with UAS-borne hyperspectral data [11856-41]**

CLIMATE, DROUGHT, AND SOIL WATER CONTENT

- 11856 11 **Analysis of agronomic drought context based on satellite remote sensing over Western Mediterranean region [11856-42]**
- 11856 12 **ALOS-2 and Sentinel-1 use for retrieving soil moisture over cereal fields in semi-arid area: the Kairouan plain – central Tunisia [11856-43]**
- 11856 13 **Root-zone soil moisture from process-based and remote sensing features in ANN [11856-44]**
- 11856 14 **Detecting changes in vegetation and climate that serve as early warning signal on land degradation using remote sensing: a review [11856-45]**

POSTER SESSION

- 11856 15 **Monitoring crop coefficient values with Sentinel-2 images to minimize irrigation water losses [11856-22]**
- 11856 16 **Estimation of holm oak flowering intensity in dehesa farms using high-resolution aerial images [11856-40]**
- 11856 19 **Unauthorized landfills of solid household and industrial wastes detection in the Arctic and subarctic territories using remote sensing technologies [11856-49]**
- 11856 1A **Spectral signature profiles of winter wheat in different growth stages under various environmental conditions [11856-51]**
- 11856 1C **Reflectance composites from multispectral satellite imagery for crop monitoring [11856-53]**
