Front Matter: Volume 11857

, "Front Matter: Volume 11857," Proc. SPIE 11857, Remote Sensing of the Ocean, Sea Ice, Coastal Waters, and Large Water Regions 2021, 1185701 (15 October 2021); doi: 10.1117/12.2615056

Event: SPIE Remote Sensing, 2021, Online Only

PROCEEDINGS OF SPIE

Remote Sensing of the Ocean, Sea Ice, Coastal Waters, and Large Water Regions 2021

Charles R. Bostater Jr.
Xavier Neyt
Editors

13–17 September 2021
Online Only, Spain

Sponsored by
SPIE

Cooperating Organisations
European Optical Society
EARSeL—European Association of Remote Sensing Laboratories (Germany)
ISPRS—International Society for Photogrammetry and Remote Sensing
CENSIS (United Kingdom)
SEDOPTICA

Supporting Organisation

Volume 11857

Proceedings of SPIE 0277-786X, V. 11857

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Remote Sensing of the Ocean, Sea Ice, Coastal Waters, and Large Water Regions 2021,
edited by Charles R. Bostater Jr., Xavier Neyt, Proc. of SPIE Vol. 11857, 1185701
© 2021 SPIE · CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2615056

Proc. of SPIE Vol. 11857 1185701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](https://spiedigitallibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Remote Sensing of the Ocean, Sea Ice, Coastal Waters, and Large Water Regions 2021*, edited by Charles R. Bostater Jr., Xavier Neyt, Proc. of SPIE 11857, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

BATHYMETRY, SHALLOW WATERS AND SUSPENDED SEDIMENTS

- 11857 02 Case study of UAS videography for depth inversion within a shallow water surf zone along the Texas Gulf Coast (Invited Paper) [11857-1]
- 11857 03 Satellite-derived bathymetry for shallow coastal waters in Cyprus [11857-2]
- 11857 05 Remote sensing of suspended particulate matter: case studies of the Sulak (Caspian Sea) and the Mzymta (Black Sea) mouth areas [11857-4]

OIL, FLUORESCENCE AND HYPERSPECTRAL SENSING

- 11857 07 Deep learning based automatic detection of offshore oil slicks using SAR data and contextual information [11857-6]
- 11857 08 Advancements to Monte-Carlo modeling of the underwater light field using synthetic water surface slopes and synthetic bottom reflectance signatures [11857-7]

WATER QUALITY AND BIO-OPTICAL SENSING AND MODELLING

- 11857 09 The long-term effect of brine discharge on the Arabian Gulf waters (Invited Paper) [11857-9]
- 11857 0A Long-term observations of chlorophyll-a concentration in Lake Honghu using multi-source remote sensing data [11857-10]

WATER BOTTOM AND SURFACE WAVE SENSING

- 11857 0E On the use of suborbital drone imaging and in-situ calibrations of the water surface for characterization of water waves: a space-time imaging approach (Invited Paper) [11857-14]

SCATTERING AND MULTISPECTRAL SENSING

- 11857 0L A WorldView-3 multispectral glint correction methodology and relation to hyperspectral signatures in space coast Florida waters [11857-21]
- 11857 0M A study of relation between non-Bragg microwave radar backscattering and decimeter-scale wind waves [11857-22]

POSTER SESSION

- 11857 0N Usage of SAR and VIS data for monitoring of the surface oil pollution in the off-shore oil-producing area of the Caspian Sea [11857-23]
- 11857 0O Manifestation of the Oka-Volga confluence zone during the ice melting in radar and optical satellite images [11857-25]
- 11857 0P Investigation of the possibility of ecological monitoring of inland water reservoirs using an automatic radar system [11857-26]
- 11857 0Q An empirical radar backscatter model at co-polarized and cross-polarized x-band under high-wind conditions [11857-27]
- 11857 0R Wind stress retrieval in tropical cyclones from collocated GPS-dropsonde data and cross-polarization Sentinel-1 IW mode [11857-28]
- 11857 0S The multisensory approach to hydrophysical measurements of the ocean surface layer [11857-29]
- 11857 0U Wave tank modeling of the damping of gravity waves due to ice floes in application to ocean remote sensing [11857-31]
- 11857 0V Elastic properties of inhomogeneous surfactant films in application to ocean remote sensing [11857-32]
