Volume 11864

Proceedings of SPIE 0277-786X, V. 11864

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Remote Sensing Technologies and Applications in Urban Environments VI, edited by Thilo Erbertseder,
Nektarios Chrysoulakis, Ying Zhang, Proc. of SPIE Vol. 11864, 1186401 · © 2021 SPIE
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2614840

Proc. of SPIE Vol. 11864 1186401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

URBAN AIR QUALITY AND CLIMATE I

- 11864 04 **RSLab Landsat land surface temperature application assessment with the new Landsat collection 2 in urban areas [11864-1]**
- 11864 06 **Urban air pollution exposure: an assessment exploiting world settlement footprint and land use data [11864-3]**

URBAN AIR QUALITY AND CLIMATE II

- 11864 08 **A new approach to the estimation of the nighttime land surface temperature [11864-5]**
- 11864 09 **Urban land surface temperature variations with LULC, NDVI and NDBI in semi-arid urban environments: case study of Gaborone City, Botswana (1989–2019) [11864-6]**
- 11864 0A **Comparing the aggregated health risk from air pollution calculated from different Earth observation resources [11864-7]**
- 11864 0B **Profiling the turbulence from spectral measurements in the urban atmosphere using UAVs [11864-8]**
- 11864 0C **Machine learning approach to estimate windows-to-wall ratio using drone imagery [11864-20]**

URBAN RESILIENCE AND PLANNING I

- 11864 0F **Mapping with LIDAR and structure-from-motion photogrammetry: accuracy assessment of point cloud over multiple platforms [11864-11]**

URBAN RESILIENCE AND PLANNING II

- 11864 0J **Crowd change detection from VHR images acquired by UAV via deep features exploitation [11864-15]**

- 11864 OL **Assessing tree decay in an urban park using PlanetScope images: the case of Cerro Almodóvar Park** [11864-17]
- 11864 OM **Change detection in urban built-up volume using deep learning based segmentation techniques** [11864-18]
