Volume 11868

Proceedings of SPIE 0277-786X, V. 11868

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Emerging Imaging and Sensing Technologies for Security and Defence VI, edited by Gerald S. Buller,
Richard C. Hollins, Robert A. Lamb, Martin Laurenzis, Proc. of SPIE Vol. 11868, 1186801
© 2021 SPIE · CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2614946

Proc. of SPIE Vol. 11868 1186801-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Emerging Imaging and Sensing Technologies for Security and Defence VI*, edited by Gerald S. Buller, Richard C. Hollins, Robert A. Lamb, Martin Laurenzis, Proc. of SPIE 11868, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ADVANCES IN IMAGING

- 11868 04 **Mid-infrared photon counting LIDAR using intra-cavity up-conversion (Invited Paper)** [11868-1]
- 11868 05 **Passive imaging of single photon flux: strategies for de-noising, motion blur reduction and super-resolution up-scaling** [11868-2]
- 11868 07 **Quantum lidar using stationary broadband light** [11868-4]

COMPONENTS FOR IMAGING

- 11868 09 **Detection and localization of near infrared lasers from atmospheric laser scattering (Invited Paper)** [11868-6]
- 11868 0A **A universal software framework for the assessment of compressed sensing algorithms** [11868-7]
- 11868 0C **Multispectral thermal camera using copper plasmonics** [11868-9]

QUANTUM TECHNOLOGIES

- 11868 0F **QCalc: a tool to compute classical and quantum communication rates over free-space optical channels** [11868-13]
- 11868 0G **GaN laser diodes for cold-atom quantum sensors and optical atomic clocks** [11868-14]
- 11868 0H **Practical security analysis against the Trojan-horse attacks on fiber-based phase-coding QKD system in the wide spectral range** [11868-15]
- 11868 0I **Random flip-flop: adding quantum randomness to digital circuits for improved cyber security, artificial intelligence and more** [11868-16]

MILLIMETRE WAVE AND TERAHERTZ SENSORS AND TECHNOLOGY

- 11868 0M **Close range ISAR imaging with target velocity determination for security screening applications** [11868-20]
- 11868 0N **Imaging resolution enhancement using terajet effect at 0.3 THz** [11868-21]

- 11868 0P **Indoor passive sensing for detecting hidden objects under clothing** [11868-23]
- 11868 0Q **Circularly polarized imaging for passive millimeter-wave security screening** [11868-24]
- 11868 0S **Terahertz-to-infrared converter based on the polyvinylchloride matrix with embedded gold nanoparticles** [11868-26]

OPTICAL MATERIALS AND BIOMATERIALS IN SECURITY AND DEFENCE SYSTEMS TECHNOLOGY

- 11868 0V **Infrared lenses using a novel infrared transmitting glass** [11868-29]

POSTER SESSION

- 11868 11 **Development of a methodology for the formation of surface systems with programmable nanostructure parameters for effective use in modern manufacturing** [11868-35]
- 11868 12 **A new method for determining surface roughness based on the improvement of the kinematics of the milling cutter movement during micro-cutting** [11868-36]
- 11868 13 **New method for detecting active infeed of cutting edge of end mills** [11868-37]
