Volume 11869

Proceedings of SPIE 0277-786X, V. 11869

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Counterterrorism, Crime Fighting, Forensics, and Surveillance Technologies V, edited by
H. Bouma, R. Prabhu, R. J. Stokes, Y. Yitzhaky, Proc. of SPIE Vol. 11869, 1186901
© 2021 SPIE · CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2614949

Proc. of SPIE Vol. 11869 1186901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

CBRNE AND SPECTROSCOPY

- 11869 04 **Gold nanostars on porous silicon for sensing picric acid, malachite green using SERS** [11869-1]
- 11869 05 **Preconcentration of vapors of low-volatile explosives for ion mobility spectrometry** [11869-2]
- 11869 06 **Photon counting mode for advanced real-time detection of bioaerosols** [11869-3]
- 11869 07 **Detection of trace mm- and sub-mm particles of organic substances using THz imaging with spectral resolution** [11869-4]
- 11869 08 **Detection and identification of hazardous narcotics and new psychoactive substances (NPS)** [11869-5]
- 11869 0A **Chemical detection of explosives in soil for locating buried landmines** [11869-7]
- 11869 0B **Portable aerosol sampler with liquid phase for collection of biopathogens at subzero temperatures** [11869-8]

COUNTERTERRORISM AND BORDER SECURITY

- 11869 0C **Prospecting for images intelligence to combat international illicit trafficking across Brazilian borders** [11869-9]
- 11869 0F **Cross-agency information exchange and international cooperation framework in the context of EU integrated border crossing security management** [11869-12]
- 11869 0G **Authentication of travel and breeder documents** [11869-13]

AI AND SURVEILLANCE

- 11869 0H **A method for behaviour recognition based on long short-term memory (LSTM) and splines** [11869-14]
- 11869 0I **A comparison of deep saliency map generators on multispectral data in object detection** [11869-15]
- 11869 0J **Video-based fusion of multiple detectors to counter terrorism** [11869-16]

- 11869 OK **Deep learning-based video analysis pipeline for person detection and re-identification in aerial imagery** [11869-17]
- 11869 OL **Closed-set thermal face recognition via the synthesis approach** [11869-18]

POSTER SESSION

- 11869 OM **Final results of NATO SET-237 "Printed Standards for Stand-off Detection" and future developments** [11869-19]
