, "Front Matter: Volume 11895," Proc. SPIE 11895, Optical Design and Testing XI, 1189501 (10 November 2021); doi: 10.1117/12.2619286

SPIE.

Event: SPIE/COS Photonics Asia, 2021, Nantong, Jiangsu, China

PROCEEDINGS OF SPIE

Optical Design and Testing XI

Yongtian Wang
Tina E. Kidger
Osamu Matoba
Rengmao Wu
Editors

10–12 October 2021
Nantong, China

Sponsored by
SPIE
COS—Chinese Optical Society

Cooperating Organizations

Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China) • Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China) • Beijing University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of Science and Technology (China) • University of Shanghai for Science and Technology (China) • Capital Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong University (China) • China Jiliang University (China) • Shanghai Institute of Optics and Fine Mechanics, CAS (China) • Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China) • Institute of Semiconductors, CAS (China) • Institute of Optics and Electronics, CAS (China) • Institute of Physics, CAS (China) • Shanghai Institute of Technical Physics, CAS (China) • China Instrument and Control Society (China) • The Optical Society of Japan (Japan) • Optical Society of Korea (Korea, Republic of) • Australia and New Zealand Optical Society (Australia) • Optics and Photonics Society of Singapore (Singapore) • European Optical Society

Supporting Organizations

China Association for Science and Technology (CAST) (China) • Department of Information of National Nature Science Foundation, China (NSFC) (China)

Volume 11895

Proceedings of SPIE 0277-786X, V. 11895

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical Design and Testing XI, edited by Yongtian Wang, Tina E. Kidger,
Osamu Matoba, Rengmao Wu, Proc. of SPIE Vol. 11895, 1189501
© 2021 SPIE · 0277-786X · doi: 10.1117/12.2619286

Proc. of SPIE Vol. 11895 1189501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Design and Testing XI*, edited by Yongtian Wang, Tina E. Kidger, Osamu Matoba, Rengmao Wu, Proc. of SPIE 11895, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SESSION 1 FABRICATION AND TESTING

- 11895 04 **Deep-learning-based deflectometry for simultaneous multi-surface measurement of freeform refractive optics (Invited Paper)** [11895-3]
- 11895 05 **3D printing active variable curvature mirror research for zoom imaging** [11895-4]

SESSION 2 ADVANCED OPTICAL SYSTEMS

- 11895 06 **Iterative freeform lens design for extended light source (Invited Paper)** [11895-5]
- 11895 07 **Optical design of freeform lenses for illuminating hard-to-reach areas** [11895-6]
- 11895 08 **A modified chromatic confocal system for spectral reflectance measurement** [11895-7]
- 11895 09 **Compact transmission imaging spectrometer based on metasurface** [11895-8]

SESSION 3 NOVEL IMAGING/LIGHTING TECHNIQUES

- 11895 0B **Variable curvature mirror-based focus adjusting without moving elements designed for large aperture space-borne optical camera** [11895-10]
- 11895 0C **Design and verification of a large-field hyperspectral imaging system** [11895-11]
- 11895 0D **Optical design of a novel Wynne-Offner snapshot hyperspectral imaging system** [11895-12]
- 11895 0F **Freeform imaging system design with multiple reflection surfaces (Invited Paper)** [11895-14]

SESSION 4 COMPUTATIONAL IMAGING

- 11895 0H **Experimental research on wave-front coded imaging technique applied to large aperture space-borne optical camera** [11895-16]
- 11895 0I **Design of a light field microscope with uniform spatial resolution across an extended 3D volume** [11895-17]

SESSION 5 OPTICAL SYSTEM DESIGNS I

- 11895 OK **Calculating aberration fields of freeform imaging optics with field dependent footprints**
[11895-19]
- 11895 OL **Lightweight diffractive telescope** [11895-20]
- 11895 OM **Research on the design of Kepler refractive shaping system with the long working focal depth**
[11895-21]
- 11895 ON **Optical design of a cascade airborne spectral imaging system with wide FOV and compactness** [11895-22]

SESSION 6 OPTICAL SYSTEM DESIGNS II

- 11895 OP **Optical time of flight and an autofocus system using a variable focal length lens** [11895-24]
- 11895 OR **Design of a high-resolution high-magnification MWIR continuous zoom lens system** [11895-26]
- 11895 OT **Adaptation of algorithms for efficient execution on GPUs** [11895-29]

POSTER SESSION

- 11895 OU **Design of athermalized wide-angle low-distortion lens using freeform surface** [11895-30]
- 11895 OV **Methods to improve multiple configurations** [11895-32]
- 11895 OW **Adaptive liquid lens actuated by dielectric elastomer with transparent conductive droplet**
[11895-33]
- 11895 OX **Automatic design of machine vision lens based on improved genetic algorithm and damped least squares** [11895-34]
- 11895 OY **Stray light analysis and optical design improvement of visible light detection camera on space platform** [11895-35]
- 11895 OZ **Numbers of stable equilibrium points of beams in vacuum optical tweezers based on Mento Carlo method** [11895-36]
- 11895 10 **A new approach for tolerance sensitivity reduction in lens optimization by controlling the first order derivatives of real ray height on pupil** [11895-37]
- 11895 11 **3D-printing-based microfluidic device for fast light scattering imaging of single cells** [11895-38]

- 11895 12 **Research on a simple long-focus optical modality using optical/image co-design method**
[11895-39]
- 11895 13 **Time filtering method to detect asymmetry and mitigate time asynchronization of two-way fiber
time transfer technique** [11895-40]
- 11895 16 **Design of linear dispersion spectral confocal objective lens with wide measurement range**
[11895-43]
- 11895 18 **A real-time processing system for dual-channel six-degree-of-freedom grating ruler based on
FPGA** [11895-45]
- 11895 1A **A broadband athermal waveguide with low anomalous dispersion** [11895-48]
- 11895 1B **Diffraction method for estimation of positioning errors that occurred during the writing of
computer-generated holograms** [11895-28]
- 11895 1C **Gold/zinc oxide nanoparticles functionalized tapered SMF-MMF-SMF-based sensor probe for
uric acid detection** [11895-31]
- 11895 1D **Sectorized variable duty cycle f/1 diffractive transmission sphere for compensation of negative
diffractive effects** [11895-49]
- 11895 1E **Development of microscope lenses with uniform separation of optical illumination** [11895-50]
- 11895 1F **The luminance value calculation in a gradient refractive index media** [11895-51]
- 11895 1G **Optical design of microscope objectives with low magnification** [11895-52]
- 11895 1H **Use of the photon mapping methods for the optical systems stray light analysis** [11895-53]
- 11895 1I **Optical design with non-rotationally symmetric field mapping for infrared search and track
system** [11895-54]
- 11895 1J **Development of methods for the formation and control of a given distribution of the photoresist
thickness for conformal correctors fabrication** [11895-55]
