Proc. of SPIE Vol. 11913 1191301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	Conference Committee
ix	Introduction

IMAGE TRANSFORMATION AND ANALYSIS

11913 02	RP-Unet: a Unet-based network with RNNPool enables computation-efficient polyp segmentation [11913-14]
11913 03	Research on infrared and visible image registration of substation equipment based on multi-scale Retinex and ASIFT features [11913-26]
11913 04	Infrared and visible image fusion algorithm for substation equipment based on NSCT and Siamese network [11913-28]
11913 05	Nonnegative matrix factorization of DCE-MRI for prostate cancer classification [11913-10]
11913 06	Single frame shadow segmentation based on image enhancement for video SAR [11913-9]
11913 07	Image classification based on self-attention convolutional neural network [11913-12]
11913 08	Quality perception and discrimination thresholds in quantised triangle meshes [11913-6]

DATA ANALYSIS AND MODEL CALCULATION

11913 09	Local Instrument with Geo-Tagging for Area Storm Surges (LIGTASS): a detection and monitoring system for marine vessels [11913-32]
11913 0A	Tensor-patch-based discriminative marginalized least squares regression for membranous nephropathy hyperspectral data classification [11913-17]
11913 0B	Flight trajectory prediction of point-conditioned time and altitudes [11913-15]
11913 0C	The sentiment analysis model with multi-head self-attention and Tree-LSTM [11913-11]
11913 0D	Improved error-correcting from extracted handwritings in Chinese [11913-4]
11913 0E	The generalized covariance union fusion approach for distributed sensors with different fields of view [11913-2]
11913 0F	Grading and profiling for export quality coffee beans using red green blue analysis, blob analysis, Hu's Moments, and back-propagation neural network [11913-30]

DIGITAL IMAGE PROCESSING AND APPLICATION

- 11913 OG **Contrastive learning for solar cell micro-crack detection** [11913-8]
- 11913 OH **Learning human-object interactions by attention aggregation** [11913-5]
- 11913 OI **Surface defect detection algorithm for printing roller based on global contrast and edge gradient** [11913-13]
- 11913 OJ **Detection of Wagyu beef sources with image classification using convolutional neural network** [11913-24]
- 11913 OK **Modified SLIC segmentation for medical hyperspectral cell images** [11913-16]
- 11913 OL **A new way of deep learning combined with street view images for air pollutant concentration prediction** [11913-29]
- 11913 OM **Color constancy using AlexNet convolutional neural network** [11913-1]
- 11913 ON **Mobile geo-tagging and cloud-based underwater garbage identification using convolutional neural network** [11913-31]

Conference Committee

International Advisory Committees

Tianzi Jiang (IEEE&IAPR Fellow), University of Chinese Academy of Sciences (China)
Yiu-ming Cheung (IEEE Fellow), Hong Kong Baptist University (China)
Wenbing Zhao, Cleveland State University (United States)

Conference Chairs

Haisheng Li (Dean), Beijing Technology and Business University (China)
Xudong Jiang (IEEE Fellow), Nanyang Technological University (Singapore)

Local Chair

Li Tan, Beijing Technology and Business University (China)

Program Chairs

Dianhui Mao, Beijing Technology and Business University (China)
Xiaoming Chen, Beijing Technology and Business University (China)
Tieling Chen, University of South Carolina Aiken (United States)
Pedro Furtado, Universidade de Coimbra (Portugal)

Program Co-Chairs

Hongqian Chen, Beijing Technology and Business University (China)
Yuchai Wan, Beijing Technology and Business University (China)
Qingsong Cai, Beijing Technology and Business University (China)
Xun Zhang, Beijing Technology and Business University (China)

Steering Committees

Zhenxiang Chen, University of Jinan (China)
Yinglei Song, Jiangsu University of Science and Technology (China)

Publicity Chairs

Masayuki Arai, Teikyo University (Japan)
Kin Choong Yow, University of Regina (Canada)

Publication Chair

Guojian Chen, Hainan University (China)

Local Organizing Committees

Tianbao Song, Beijing Technology and Business University (China)

Wan Li, Beijing Technology and Business University (China)

Jingbang Wu, Beijing Technology and Business University (China)

Technical Committees

Qiu Chen, Kogakuin University (Japan)

Jiande Sun, Shandong University (China)

Filippo Neri, Università degli Studi di Napoli Federico II (Italy)

Abdul Jalil, International Islamic University (Pakistan)

Jessie R. Balbin, Mapua University (Philippines)

Xiaoyan Wang, Shandong University of Traditional Chinese Medicine (China)

Zhenbing Zhao, North China Electric Power University (China)

Wanquan Liu, Curtin University (Australia)

Xuebo Zhang, Science and Technology on Underwater Acoustic Antagonizing Laboratory (China)

Luisito Lolong Lacatan, AMA University (Philippines)

Mohamed Arezki Mellal, M'Hamed Bougara University (Algeria)

B.S. Harish, JSS Science & Technology University (India)

Meng Lv, Beijing Institute of Technology (China)

Ying-Hao Yu, National Chung Cheng University (Taiwan, China)

M. Ali Akber Dewan, Athabasca University (Canada)

Emre Sümer, Başkent University (Turkey)

Hao Bai, Beijing Language and Culture University (China)

Xinglin Shen, National University of Defense Technology (China)

Alex Ong, Republic Polytechnic (Singapore)

Lei Meng, National University of Singapore (Singapore)

Luepol Pipanmaekaporn, King Mongkut's University of Technology North Bangkok (Thailand)

Fayyaz Ul Amir Afsar Minhas, University of Warwick (United Kingdom)

Jingjing Xiao, Xinqiao Hospital of Third Military Medical University (China)

Amik Singh, WhatsApp Inc. (United States)

Birjodh Tiwana, LinkedIn Inc. (United States)

Zain Anwar Ali, Beijing Normal University, Zhuhai (China)

Mayukha Pal, University of Hyderabad Campus (India)

Manish Khare, Dhirubhai Ambani Institute of Information and Communication Technology (DA-IICT) (India)

Session Chairs

- 1 Digital Image Analysis and Processing
Jessie R. Balbin, Mapua University (Philippines)
- 2 Computer Science and Image Application Technology
Yang Yang, China Electric Power Research Institute (China)

Introduction

The Sixth International Workshop on Pattern Recognition (IWPR 2021) welcomed researchers, scientists, engineers, technologists, professionals from university, industry, and regulators from government as well as technology providers to join our event that was held 25-27 June 2021. Due to the Covid-19 pandemic and the imposed restrictions on travel, the organizing committee had to make a tough decision and convert IWPR 2021 into a fully virtual conference for the safety and well-being of all participants.

IWPR provided opportunities for discussions about methods, technologies, systems, and best practices in the different areas of pattern recognition from different places around the world. This conference provided opportunities for the delegates to exchange new ideas and application experiences face-to-face, virtually, to establish business cases or research relations, and to find global partners for future collaboration.

The technical program committee of IWPR 2021 has assembled an excellent program comprised of four excellent keynote speeches and one invited speech from renowned scientists from the world, two parallel technical oral sessions of 24 oral presentations in total. A total of 22 papers were selected from contributions after a rigorous review process, reflecting a rejection rate of more than 50%.

On behalf of the organizing committee, I wish to thank the keynote speakers and authors of selected papers for their outstanding contributions. I would also like to thank members of the organizing committee, all reviewers, and volunteers for their great efforts. Without their contributions, dedication, and commitment, we would not have achieved so much. We sincerely hope that all conference participants found IWPR beneficial and fruitful for their professional development.

Xudong Jiang

Nanyang Technological University, Singapore
General Chair, IWPR 2021
