Front Matter: Volume 11916

, "Front Matter: Volume 11916," Proc. SPIE 11916, 27th International Symposium on Atmospheric and Ocean Optics, Atmospheric Physics, 1191601 (15 December 2021); doi: 10.1117/12.2622342

SPIE.

Event: 27th International Symposium on Atmospheric and Ocean Optics, Atmospheric Physics, 2021, Moscow, Russian Federation

PROCEEDINGS OF SPIE

27th International Symposium on Atmospheric and Ocean Optics, Atmospheric Physics

**Gennadii G. Matvienko
Oleg A. Romanovskii**
Editors

**5–9 July 2021
Moscow, Russian Federation**

Organized by

V.E. Zuev Institute of Atmospheric Optics SB RAS (Russian Federation)
A.M. Obukhov Institute of Atmospheric Physics RAS (Russian Federation)
M.A. Sadosky Institute of Geosphere Dynamics RAS (Russian Federation)
Institute of Solar-Terrestrial Physics SB RAS (Russian Federation)
V.M. Matrosov Institute for System Dynamics and Control Theory SB RAS (Russian Federation)

Sponsored by

V.E. Zuev Institute of Atmospheric Optics SB RAS (Russian Federation)
Siberian Branch of Russian Academy of Sciences (Russian Federation)
"Atmosphere" an Open Access Journal by MDPI (Switzerland)
SOLAR LASER SYSTEM (Belarus)
Photonics Journal (Russian Federation)

Volume 11916

Part One of Three Parts

Proceedings of SPIE 0277-786X, V. 11916

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

27th International Symposium on Atmospheric and Ocean Optics, Atmospheric Physics,
edited by Gennadii G. Matvienko, Oleg A. Romanovskii, Proc. of SPIE Vol. 11916,
1191601 · © 2021 SPIE · 0277-786X · doi: 10.1117/12.2622342

Proc. of SPIE Vol. 11916 1191601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

Part One

MOLECULAR SPECTROSCOPY AND ATMOSPHERIC RADIATIVE PROCESSES

- 11916 02 **Contribution of new water vapor lines to the atmospheric absorption of ultraviolet radiation**
[11916-88]
- 11916 03 **Intensity of reflected solar radiation in the presence of optically anisotropic crystal clouds:
results of preliminary calculations** [11916-145]
- 11916 04 **Impact of H₂O continual absorption on upward and downward fluxes of longwave radiation in
the atmospheric transparency windows** [11916-146]
- 11916 05 **Calculation of vibrational levels of H₂XO (where X=11,...,26)** [11916-152]
- 11916 06 **Systematization of published scientific graphics, representing continuum absorption of dioxide
carbon: publications of 1956-1990** [11916-163]
- 11916 07 **Depolarization ratio of the ν_1 Raman band of methane at different environment** [11916-216]
- 11916 08 **Method for fast modeling ν_2 Raman band of methane** [11916-218]
- 11916 09 **Effects of atmospheric transformations of the organic fraction of biomass burning aerosol on
the radiative forcing: a box model analysis** [11916-232]
- 11916 0A **Measurements of the O₂-broadening and shifting parameters of the H₂¹⁷O- spectral lines in the
(111)-(000) band** [11916-304]
- 11916 0B **Mechanism of ozone depletion in the presence of oxygen atoms** [11916-307]
- 11916 0C **Dunham coefficients for the excited electronic state A²Σ⁺ of the ¹⁶OH molecule** [11916-332]

OPTICAL RADIATION PROPOGATION IN THE ATMOSPHERE AND OCEAN

- 11916 0D **Comparative analysis of optical turbulence at the Fuxian Lake Observatory and Baikal
astrophysical observatory** [11916-8]
- 11916 0E **Registration of ring laser beams in the atmosphere surface layer (calculations)** [11916-24]
- 11916 0F **Registration of ring laser beams in the atmosphere surface layer (field experiment)** [11916-25]

11916 OG	Computer simulations of light focusing with a Fresnel mesowavelength zone plate [11916-26]
11916 OH	Operation concept and computer simulation of the wave process in a highly sensitive nanophotonic pressure microsensor [11916-32]
11916 OI	Regional OLCI algorithm for the spectral diffuse attenuation coefficient in Lake Baikal [11916-39]
11916 OJ	Passive athermalization of optical systems for thermal devices [11916-40]
11916 OK	Polychromatic laser guide star: it is necessary for tilt correction? [11916-46]
11916 OL	Wavelengths in the UV range optimal for atmospheric optical communication on scattered radiation in the daytime and at night [11916-47]
11916 OM	Statistics and analysis of high-altitude wind above 6-m Big Telescope Alt-azimuthal site [11916-54]
11916 ON	Effect of broken cloudiness on the reconstruction of the reflection coefficients of the earth surface areas observed through gaps in the cloudy field [11916-78]
11916 OO	Analysis of the main processes during the propagation of high-power femtosecond laser pulses on the basis of the diffraction-ray tube method [11916-89]
11916 OP	Interpretation of experimental data on multiple filamentation of high-power femtosecond laser pulses in air based on the diffraction-ray model of single filamentation [11916-90]
11916 OQ	Reconstruction of the structure of a supersonic unexpanded jet based on laser sensing data [11916-102]
11916 OR	Experimental studies of the distortions of displacement of the laser beam radiated from the surface of a model body in a supersonic flow [11916-103]
11916 OS	Temporal variability of the vertical structure of the sea temperature field and its relationship with atmospheric processes according to observation data [11916-113]
11916 OT	Experimental estimation of the error probabilities in the channel of atmospheric optical communication on scattered radiation in the UV wavelength range in the daytime from measurements in 2020 [11916-118]
11916 OU	Registration of the given vortex in an array of randomly placed singular points [11916-129]
11916 OV	Energy characteristics of resonator-free generation in nanodisperse active media under irradiation by nano- and femtosecond laser pulses [11916-133]
11916 OW	A tip-tilt closed-loop adaptive optical system controlled by the high-speed microcontroller [11916-142]
11916 OX	Focusing of multi-channel laser radiation through the optically inhomogeneous medium: phasing on the system output and in the target-in-the-loop technique [11916-148]

11916 0Y	Deviations of spectral characteristics of atmospheric turbulence from the Kolmogorov-Obukhov theory [11916-153]
11916 0Z	2018-2019 measurement data for the characteristics of the Monin-Obukhov similarity theory in the mountain boundary layer of the atmosphere [11916-172]
11916 10	Compensation of vortex laser beam distortions in turbulent atmosphere [11916-173]
11916 11	Non-coplanar bistatic optical communication systems: field and laboratory experiments [11916-174]
11916 12	Laser beam phase correction in the adaptive optics system with finite spatial resolution [11916-188]
11916 13	Determination of the adaptive mirror's parameters for the phase correction of laser beam passed through an airway [11916-190]
11916 14	The absorption coefficient of supercooled clouds in the millimeter band [11916-191]
11916 15	The estimated effect of ice 0 on scattering of microwave radiation by cold aerosol [11916-194]
11916 16	Locating the sections of ice hummocks on freshwater ice cover by infrared and microwave radiometric measurements [11916-195]
11916 17	Observation of astronomical objects by using an adaptive optical system with Rayleigh laser guide star [11916-196]
11916 18	Wave scattering in a randomly inhomogeneous reflecting layer [11916-202]
11916 19	Noncoherent Bessel-Gaussian beam during propagating in turbulent atmosphere [11916-212]
11916 1A	Propagation of a noncoherent Laguerre-Gaussian beam [11916-213]
11916 1B	Coherence of counter-propagating beams in a confidential communication system based on generation of cryptographic keys at the expense of atmospheric turbulence [11916-214]
11916 1C	Experimental studies of the response of liquid with fluorophore microparticles in interaction with femtosecond laser radiation [11916-221]
11916 1D	Influence of the electron collisions effective frequency on the characteristics of normal waves of radio band in the oblique propagation in the magnetoactive ionosphere [11916-224]
11916 1E	Correction of random wavefront aberrations in coaxial scheme with large transmitting and small receiving apertures [11916-255]
11916 1F	Features of the form of spectral functions of intensity fluctuations of a probing laser beam at different speeds of swirling a vortex flame [11916-266]
11916 1G	Remote sensing of the sea bottom [11916-280]

- 11916 1H **Analysis of laboratory turbulence by spectral methods** [11916-290]
- 11916 1I **Investigation of properties of the stacked-actuator deformable mirror made of the piezoceramic combs** [11916-313]
- 11916 1J **Slab radiance factor calculating methods** [11916-321]
- 11916 1K **The effect of pressure pulsation on diffusion combustion** [11916-325]
- 11916 1L **Laser beam focusing through a moderately scattering medium using LCOS-SLM** [11916-337]
- 11916 1M **Testing of the passive method for real-time crosswind speed retrieval** [11916-339]

OPTICAL INVESTIGATION OF ATMOSPHERE AND OCEAN

- 11916 1N **Detection of trinitrotoluene in the open atmosphere by differential reception and scattering** [11916-5]
- 11916 1O **Two-channel catadioptric system of the navigation video camera of the unmanned miniature drones** [11916-12]
- 11916 1P **Determination of the main factors affecting the chemical composition of precipitation in the Southern Baikal region** [11916-15]
- 11916 1Q **Multivariate statistical analysis of the chemical composition of the snow in the industrial cities of the Southern Baikal region** [11916-16]
- 11916 1R **Polycyclic aromatic hydrocarbons and PM₁₀ solid particles above the water area of Lake Baikal in the summer of 2020** [11916-17]
- 11916 1S **PAHs and meteorological parameters in the atmosphere of the Southern Baikal region from 2019 to 2021** [11916-18]
- 11916 1T **Mobile 3.4- μ m differential absorption lidar system for remote sensing of the atmospheric methane** [11916-19]
- 11916 1U **Algorithm of controlling the quality and retrieval of data from measurements of aerosol and black carbon concentrations in marine expeditions** [11916-20]
- 11916 1V **Comparison of measurements of black carbon concentrations in aerosol, using two aethalometry methods** [11916-21]
- 11916 1W **Testing the MaexPro model on compliance of experimental data** [11916-23]
- 11916 1X **Variations in black carbon concentrations in European sector of the Arctic Ocean and seas of the North Atlantic** [11916-30]
- 11916 1Y **Hydrooptical airborne polarization lidar returns from inhomogeneous water depth** [11916-31]

- 11916 1Z **Spectrophotometric study of turbid media in natural bodies of water** [11916-33]
- 11916 20 **Comparison of the parameters of condensation activity of submicron aerosol obtained by means of an optical counter and an integral nephelometer** [11916-34]
- 11916 21 **Aspects of a technique for calculating the Hanel parameters of condensation activity of submicron particles based on the data of an optical counter** [11916-35]
- 11916 22 **Diurnal variability of the parameters of condensation activity of submicron aerosol according to the data of an optical counter and an integral nephelometer** [11916-36]
- 11916 23 **Seasonal variability of the particulate backscatter spectral slope in the photosynthesis layer of the Black Sea based on measurements of the Bulgarian Bio-Argo float** [11916-38]
- 11916 24 **Backward-trajectory analysis of a link between the meteorological optical range and long-range air transport** [11916-41]
- 11916 25 **Statistical characteristics of sea ice concentration in Vilkitsky Strait during summer-autumn navigation in 1996-2020** [11916-42]
- 11916 26 **Measurements of aerosol characteristics in three expeditions on board RV "Akademik Mstislav Keldysh": from the Baltic to Barents Sea** [11916-45]
- 11916 27 **Long-term trends and interannual variations of the NO₂ contents in the troposphere and stratosphere of the western Moscow region according to results of remote spectrometric measurements of the vertical NO₂ profile** [11916-49]
- 11916 28 **Comparison of the results of ground-based and satellite (OMI) measurements of the NO₂ contents in the stratosphere and troposphere over Zvenigorod: sensitivity to cloud cover and tropospheric pollution** [11916-50]
- 11916 29 **Interaction of integrated aerosol content in the stratosphere and total ozone content** [11916-51]
- 11916 2A **State of stratospheric aerosol layer over Tomsk using measurements at Siberian Lidar Station** [11916-52]
- 11916 2B **Preliminary estimates of CO₂ sources determining possibilities with spaceborne lidar** [11916-58]
- 11916 2C **Consistent intra-centennial variations of length of day, global mean sea surface temperature, and global mean sea level** [11916-59]
- 11916 2D **Temperature and concentration profiles around two aerosol drops with arbitrary radii in the optical radiation field** [11916-60]
- 11916 2E **Variations in the concentrations of elements, carbon-containing particles and in carbon isotope composition in the Arctic aerosols at the Ice Base "Cape Baranov"** [11916-66]
- 11916 2F **The total index of snow cover pollution in some industrial cities of the Southern Pribaikalye** [11916-68]

- 11916 2G **Snow cover as a factor of impact on the chemical composition of the Pereemnaya River water (South-Eastern coast of Baikal)** [11916-69]
- 11916 2H **Atmospheric depositions in Irkutsk in 2019-2020** [11916-72]
- 11916 2I **Measurement of atmospheric temperature in the range of 40-90 km at the Siberian lidar station using molecular scattering signal** [11916-73]
- 11916 2J **Disturbance of the stratosphere over Tomsk in winter 2017-2018 using lidar and satellite (Aura MLS) observations** [11916-75]
- 11916 2K **Estimates of interrelations in variations of aerosol characteristics in high-latitude regions of ocean** [11916-77]
- 11916 2L **Development and modernization of a lidar system for atmospheric gas analysis in the near infrared region** [11916-79]
- 11916 2M **Inter-annual variations of the aerosol optical depth of the atmosphere at the Mirny Antarctic Observatory** [11916-80]
- 11916 2N **Validation of spectral model for assessment of primary production in the Black Sea** [11916-82]
- 11916 2O **Lunar multichannel diode laser spectrometer DLS-L for in-situ study of samples pyrolytically evolved from regolith onboard Luna-27 mission** [11916-83]
- 11916 2P **Aerosol elemental composition in high-mountain landscape: Caucasian Mineral Waters region** [11916-84]
- 11916 2Q **Comparative assessment of the productivity of marine ecosystems based on measuring the intensity of bioluminescent glow** [11916-93]
- 11916 2R **Diurnal behavior of scattering phase function at 1.2 and 20 degrees in different type of aerosol weather** [11916-94]
- 11916 2S **Trends and variations in total ozone over the North Caucasus** [11916-95]
- 11916 2T **Studies of the stratospheric aerosol at two wavelengths 355, 532 nm: extraction results of distribution functions parameters from experimental data** [11916-101]
- 11916 2U **Lidar investigations of the annual dynamics of background stratospheric aerosol over Tomsk** [11916-104]
- 11916 2V **Lidar complex of small lidar station of IAO SB RAS** [11916-105]
- 11916 2W **Construction of a thermodynamical model of the middle atmosphere of Western Siberia from the results of lidar monitoring** [11916-106]
- 11916 2X **Infrared remote LIDAR-based gas sensor for atmosphere anthropogenic pollution monitoring** [11916-111]

- 11916 2Y **Model of spectral course of aerosol attenuation coefficient for meteorological range of visibility more 15 km** [11916-114]
- 11916 2Z **Methods and device for in situ microorganisms' bioluminescence monitoring in aquatic environment** [11916-121]
- 11916 30 **The waters' optical structure in the coastal zone features formation in conditions of multifactor natural and anthropogenic components' influence (on example of Sevastopol seaside)** [11916-122]

Part Two

- 11916 31 **Analysing laser reflection method capabilities to monitor forestland condition and species composition** [11916-123]
- 11916 32 **The large-scale upwelling influence on the coastal urbanized area waters' quality according to hydro-optical observations** [11916-124]
- 11916 33 **Experimental study of the spectral characteristics of plants fluorescence and reflectance in stress conditions** [11916-125]
- 11916 34 **Estimation of wind turbulence parameters from spectra of the vertical wind velocity measured by a pulsed coherent Doppler lidar** [11916-131]
- 11916 35 **Lidar observation of aerosol from Siberian forest fire events in the stratosphere over Tomsk in August 2019** [11916-132]
- 11916 36 **Characteristics of light field in Black Sea waters in spring 2019** [11916-136]
- 11916 37 **Spectral relations of the beam attenuation coefficient with the Secchi depth in the coastal waters of the Southern coast of Crimea** [11916-137]
- 11916 38 **Characteristics of some discs of trees from the site of explosion of the Tunguska bolide** [11916-138]
- 11916 39 **Estimation of cloud base height using monoscopic method** [11916-149]
- 11916 3A **Dynamics of skin conductance at a weak low-frequency pulsed acoustic or IR exposure in children with pulmonary tuberculosis** [11916-150]
- 11916 3B **Seismoacoustic effects of strong earthquakes** [11916-157]
- 11916 3C **Analysis of correlations between scattering coefficient of submicron aerosol and mass concentration of soot according to airborne measurements in 2000–2018** [11916-166]
- 11916 3D **Determination of the elemental composition of aerosol by the method of laser-induced breakdown** [11916-167]
- 11916 3E **Variability of the frequency spectrum of a pulse signal under exposure to optical radiation** [11916-171]

- 11916 3F **Assessment of the influence of optical radiation on the functional state of a human organism by heart rate variability** [11916-176]
- 11916 3G **Interannual variability of the wind field on the Black Sea north western shelf and its impact on river plume formation for decade 2011-2020** [11916-179]
- 11916 3H **Estimation of the spatial resolution influence on the retrieval error of ozone profiles at the Siberian Lidar Station** [11916-182]
- 11916 3I **Photosynthetically active radiation distribution in the *Zostera noltii* Hornemann canopy at various solar altitudes** [11916-199]
- 11916 3J **Features of relationship between the biooptical parameters' distributions and hydrological water structure in the northern Black Sea in winter 2020** [11916-200]
- 11916 3K **Optical and biological research of fluorescence fields in the Black Sea in autumn 2020** [11916-204]
- 11916 3L **Umov effect applications to lidar sounding: the case of AERONET data** [11916-206]
- 11916 3M **Measurement of the mechanical turbulence in the atmospheric boundary layer by the BSE-lidar** [11916-210]
- 11916 3N **Vegetation transformation territory of the Russian Far East on the basis of long-term satellite fire monitoring** [11916-223]
- 11916 3O **Diurnal variation of the effective height of the aerosol layer according to results of inversion of spectral extinction of light in the near-surface layer and in the atmospheric column in Tomsk** [11916-243]
- 11916 3P **Seasonal variability of the correlations between the mass concentrations of submicron aerosol and black carbon at the Aerosol Station (Tomsk) and in the Fonovaya Observatory in 2014-2020** [11916-244]
- 11916 3Q **Light scattering matrix for atmospheric ice aggregates of cirrus clouds within geometrical optics approximation** [11916-247]
- 11916 3R **Estimation of the height of the mixing layer from the altitude-time distributions of the dissipation rate of turbulent energy and the Richardson number** [11916-249]
- 11916 3S **The optical properties of atmospheric ice crystals of arbitrary shape by the set of 500 particles** [11916-250]
- 11916 3T **Impact of IGW on the spectra of turbulent fluctuations of vertical velocity measured by a Doppler lidar** [11916-253]
- 11916 3U **Atmospheric studies of the aerosol scattering coefficient and wind speed using an automatic nephelometer** [11916-254]
- 11916 3V **Azimuthal symmetry in the phase matrix for randomly oriented particles of irregular shape** [11916-258]

- 11916 3W **Verification the Umov effect on large irregular particles [11916-260]**
- 11916 3X **Machine learning approach for the ground level aerosol concentration analysis [11916-265]**
- 11916 3Y **Mapping aerosol pollution over the city using a scanning lidar [11916-267]**
- 11916 3Z **Relation between the aerosol condensation activity with different size fractions of the aerosol dry matter [11916-270]**
- 11916 40 **Study of the role of particles of different size in the aerosol condensation activity by the method of diffusion selection [11916-277]**
- 11916 41 **Lidar-pyranometer investigation of specular high-level clouds [11916-282]**
- 11916 42 **Optical characteristics anomalous of the west Black sea coastal waters during the spring-summer period of the 2020 year [11916-285]**
- 11916 43 **Estimation of the turbulent parameters of the atmospheric surface layer in the Baikal coastal zone using data from sonic meteorological stations and passive optical measurements [11916-287]**
- 11916 44 **Study of coarse aerosol using an adapted FAN nephelometer [11916-289]**
- 11916 45 **Influence of dust transfers on aerosol asymmetry factor over the Black Sea region according to AERONET data [11916-291]**
- 11916 46 **Measurement of the precipitable water by remote sensing and ground-based methods over the Black Sea region [11916-293]**
- 11916 47 **Complex studies of the features of the spatio-temporal distribution of aerosol-gas impurities of the atmosphere over Lake Baikal in summer period [11916-294]**
- 11916 48 **The application of modified Levenberg-Marquardt method for greenhouse gases retrieval in the Earth's atmosphere from high-resolution IR spectra [11916-295]**
- 11916 49 **Retrieval of tropospheric aerosol parameters from the data of lidar sensing [11916-296]**
- 11916 4A **Relationship between the concentration of fine particulate matter and aerosol optical depth in the Middle Urals [11916-297]**
- 11916 4B **Microphysical characteristics of the surface aerosol of the background zone in various meteorological conditions [11916-300]**
- 11916 4C **Effect of air humidity on transformation of the spectral structure of the aerosol extinction of visible and IR radiation [11916-303]**
- 11916 4D **Dynamics of aerosol absorption characteristics in smoke combustion of forest biomass burning at the large aerosol chamber at the stages of generation and aging in time [11916-310]**

- 11916 4E **On the correlation of interferometric and subsatellite measurements of the height of coniferous forest based on the data of Tandem-X and Alos PalsAR** [11916-316]
- 11916 4F **Methane in the atmosphere and surface water of Lake Baikal** [11916-318]
- 11916 4G **Light scattering on atmospheric ice crystals of irregular shape** [11916-323]
- 11916 4H **Vertical profiles of aerosol and absorbing matter over settlements in the north of Russia** [11916-324]
- 11916 4I **Mathematical modeling of wood ignition as a result of a point source** [11916-328]
- 11916 4J **Sensing of the sea surface in the Russian Arctic sector by lidar from airplane** [11916-334]
- 11916 4K **Light scattering by atmospheric ice crystals of regular and arbitrary shape within the framework of the physical optics method for the problems of interpreting data from ground-based and space-based lidars** [11916-335]
- 11916 4L **Spectral and depolarization ratios for atmospheric ice particles of hexagonal and arbitrary shape within the framework of the physical optics and discrete dipoles** [11916-336]
- 11916 4M **Study of the convergence of the numerical solution of the light scattering problem by atmospheric ice crystals within the physical optics method** [11916-338]
- 11916 4N **Optimization of the molecular scattering signal registration system at the Siberian lidar station for the photon counting mode** [11916-340]

PHYSICS OF THE TROPOSPHERE

- 11916 4O **Study of diurnal cloud transformations over Western Siberia using MODIS and VIIRS satellite data** [11916-7]
- 11916 4P **Total vapor content of the atmosphere and characteristics of cloud coverage and wind in the area of the St. Petersburg airport** [11916-11]
- 11916 4Q **Effect of total vapor content on aircraft icing on the data of radiometric measurements in the area of Pulkovo airport** [11916-13]
- 11916 4R **Atmospheric boundary layer monitoring complex** [11916-14]
- 11916 4S **Simulation of the dynamics of the altitude distribution of radon isotopes in the surface atmosphere according to near-surface aerophysical and radon observations** [11916-28]
- 11916 4T **Comparative analysis of temperature profiles between atmosphere radiosonde data and ERA-interim reanalysis in Central Yakutia** [11916-29]
- 11916 4U **Seasonal dynamics of the surface atmosphere of the Baikal region** [11916-37]

- 11916 4V **Large-scale atmospheric circulation patterns favoring sea ice concentration extremes in the Northern Sea Route straits in June-November of 1979-2017** [11916-44]
- 11916 4W **Variability characteristics of the surface air temperature and atmospheric precipitation in Bashkiria in 1939-2019** [11916-53]
- 11916 4X **Dynamics of the kinetic energy in the atmospheric boundary layer retrieved from the data of minisodar measurements** [11916-55]
- 11916 4Y **Reconstruction of the North Atlantic Oscillation variability and its response to anthropogenic forcing using data-driven stochastic models based on artificial neural networks** [11916-56]
- 11916 4Z **Connection between long-term mid-latitude atmosphere variability and interannual climate modes** [11916-57]
- 11916 50 **Errors in determining pseudo-coordinates during magnetic storms as a possible characteristic of the disturbed state of the ionosphere and the propagation conditions of the GPS signal** [11916-61]
- 11916 51 **Geomagnetic disturbances caused by the fall of Chelyabinsk (February 15, 2013) and Lipetsk (June 21, 2018) bolides** [11916-62]
- 11916 52 **Microbaric variations in atmospheric pressure during magnetic storms** [11916-63]
- 11916 53 **Variations of the electric field and current in the near-surface atmosphere during magnetic storms** [11916-64]
- 11916 54 **Variability of aerosol elemental composition in the atmosphere at Ice Base "Baranov Cape": 2017-2019 results** [11916-65]
- 11916 55 **Remote response of electrical characteristics of the atmosphere to strong earthquakes** [11916-67]
- 11916 56 **The role of paleogeographic events in the evolution and current state of the East Siberian Shelf permafrost** [11916-70]
- 11916 57 **Impact of climate change on methane emissions in the Arctic Seas** [11916-71]
- 11916 58 **Method for correction of air temperature and Earth's underlying surface in model calculations of methane content in atmosphere** [11916-76]
- 11916 59 **Atmospheric conditions affecting the composition of near-surface aerosol in Moscow and its suburb in the spring of 2020** [11916-86]
- 11916 5A **Modern changes in average monthly temperature of the atmospheric boundary layer over the Siberian region** [11916-87]
- 11916 5B **Long-term changes in average annual temperature within the atmospheric boundary layer over Siberia** [11916-91]
- 11916 5C **Average seasonal air temperature trends in the atmospheric boundary layer over the Siberian region** [11916-92]

- 11916 5D **"Cold lens" above an urban heat island in the atmospheric boundary layer** [11916-96]
- 11916 5E **Urban heat island in the atmospheric boundary layer** [11916-97]
- 11916 5F **Statistics of air temperature inversions in the atmospheric boundary layer** [11916-98]
- 11916 5G **Brunt–Vaisala frequencies in the atmospheric boundary layer** [11916-99]
- 11916 5H **Distribution and transformation of air pollution in the atmospheric boundary layer of the southern basin of lake Baikal, potential risks for the lake ecosystem** [11916-108]
- 11916 5I **GPR survey of the ice crossing** [11916-112]
- 11916 5J **Periodicity of dry phenomena on the South coast of Crimea** [11916-115]
- 11916 5K **Study of the chaotic behaviour of temperature time series processes** [11916-127]
- 11916 5L **Correlation-regression analysis of meteorological data from ultrasonic weather stations** [11916-130]
- 11916 5M **Multichannel recording of the hydroelectrodynamical phenomena on the shoreline of Lake Baikal** [11916-134]
- 11916 5N **Influence of the averaging period on the characteristics of wind vector components retrieved from minisodar measurements** [11916-135]
- 11916 5O **Variations of natural electrical potentials in the permafrost during 2017-2021 at Yakutsk** [11916-139]
- 11916 5P **Modeling of the long-term annual and seasonal runoff in the Lena river basin** [11916-151]
- 11916 5Q **Manifestation of strong atmospheric phenomena in geophysical fields** [11916-156]
- 11916 5R **Severe weather phenomena research with the WRF model** [11916-162]
- 11916 5S **The manifestations of seismicity in the natural electromagnetic field of VLF range in the Baikal natural territory** [11916-165]
- 11916 5T **Models of surface impedance of the LW-MW of the marine radio path with the change in ice thickness on basis of spatial Fourier series** [11916-169]
- 11916 5U **Surface impedance of the layered medium "dry sand - watered sea sand" in the VLF-VHF range** [11916-170]
- 11916 5V **Numerical simulation of extreme weather phenomena using high-resolution mesoscale meteorological models** [11916-175]

- 11916 5W **Study of transboundary aerosol transport from Aral-Caspian arid region to the south of Western Siberia in 2015-2016** [11916-178]

Part Three

- 11916 5X **Investigation of the exchange processes of small gaseous impurities (the flux and rate of the dry deposition) between the atmosphere and different types of vegetation in the South-Eastern coast of Lake Baikal** [11916-181]
- 11916 5Y **Transport of microparticles as stated by observation data in the open mining pit** [11916-183]
- 11916 5Z **Impact of restrictions during the coronavirus pandemic on air pollution in Moscow** [11916-184]
- 11916 60 **Propagation of LF-MF radio waves over ice paths with space change of surface impedance** [11916-186]
- 11916 61 **Spatial distribution of aerosol and gas impurities on the waters of Lake Baikal** [11916-187]
- 11916 62 **Lightning activity in the north of Yakutia in 2009-2020** [11916-201]
- 11916 63 **Nonparametric adaptive identification algorithms in problems of acoustic sounding of the atmosphere** [11916-203]
- 11916 64 **The variability of the integrated water vapor of the atmosphere during precipitation periods** [11916-205]
- 11916 65 **Changes in the temperature field anomalies over Siberia during different circulation epochs** [11916-208]
- 11916 66 **Modern features of the wind regime near the tropopause in the southern areas of Irkutsk region** [11916-227]
- 11916 67 **Research of climate dynamics in the area of the high-altitude station of Mondy** [11916-228]
- 11916 68 **Mongolian cyclones in a changing climate** [11916-229]
- 11916 69 **Remote detection of rare-earth metal deposits by secondary microwave radiation** [11916-230]
- 11916 6A **Estimation of gas and aerosol concentrations with data of measurements in southern Baikal** [11916-231]
- 11916 6B **The effect of temperature inhomogeneity on the concentration of impurities in a street canyon** [11916-233]
- 11916 6C **Sensitivity analysis of the physical parameterizations in the WRF model on the prediction accuracy of meteorological parameters** [11916-236]
- 11916 6D **Small-scale circulation in regional climate model: the hydrostatic approximation influence** [11916-237]

- 11916 6E **Results of the study of the dispersed composition of atmospheric aerosol in the Baikal region** [11916-238]
- 11916 6F **A new approach to simulating the impact of turbulence on electric processes in mesoscale numerical weather prediction models** [11916-239]
- 11916 6G **Assessment of the Arctic Oscillation influence on the formation of the Arctic Ocean circulation regimes for the last decades** [11916-240]
- 11916 6H **Estimation of the integral scales of atmospheric turbulence with UAV** [11916-245]
- 11916 6I **Transformation of the conditions triggering flash flood-producing rains in southern areas of the Angara and Baikal Regions** [11916-246]
- 11916 6J **The role of Arctic ice reduction in the formation of climatic trends** [11916-256]
- 11916 6K **Mathematical modeling for estimating the distribution of impurities in the Barguzin Bay of Lake Baikal** [11916-259]
- 11916 6L **Special features of the optical and microphysical characteristics of cirrus and their effect on the solar radiation transfer** [11916-261]
- 11916 6M **Application of mesoscale models for numerical investigation of urban air quality at calm wind conditions** [11916-264]
- 11916 6N **Methane emission by petroleum industry in Western Siberia according to satellite observations** [11916-268]
- 11916 6O **Relation of climate change in the Arctic with the frequency of extreme wind gusts in the south of Western Siberia in the winter period of 2000-2021** [11916-271]
- 11916 6P **Spatial and temporal variability of convective instability in the south of Western Siberia, determined on the basis of the total totals index (ERA5 reanalysis)** [11916-274]
- 11916 6Q **Characteristics of thunderstorm centers during the development of mesoscale convective systems over the south of Western Siberia** [11916-275]
- 11916 6R **Analysis of the dynamics of the boundary layer of the atmosphere during the passage of mesoscale convective systems on the example of the city of Tomsk** [11916-276]
- 11916 6S **Short-term variability of logarithmic concentration gradient on desertified area** [11916-278]
- 11916 6T **Some meteorological effects of forest canopy in an atmospheric finite element model** [11916-281]
- 11916 6U **Correlation between the mass concentrations of suspended particles PM_{10} and $PM_{2.5}$ and aerosol optical depth in the coastal zone of Lake Baikal** [11916-283]
- 11916 6V **Relations between NDVI and air temperature in the areas of meteorological stations of the West Siberian Plain** [11916-284]

- 11916 6W **Variations of the surface electric field during the passage of the MCC on the example of Tomsk** [11916-286]
- 11916 6X **Study of seasonal trend in the difference between radiosonde and microwave soundings of tropospheric temperature** [11916-314]
- 11916 6Y **Climatic variability forecast based on feedback relations** [11916-320]
- 11916 6Z **Modeling of atmospheric air quality in the Tomsk using WRF/CAMx complex** [11916-322]
- 11916 70 **Estimation of the response of The Earth's climatic system to the growth of carbon dioxide gas content in the atmosphere** [11916-329]
-
- 11916 71 **Regional and global lightning activity effect on the composition and properties of the upper troposphere/lower stratosphere** [11916-331]
- 11916 72 **Moscow urban heat island and air pollution during extreme weather in winter 2020-2021** [11916-333]

PHYSICS OF THE MIDDLE AND UPPER ATMOSPHERE

- 11916 73 **Studies of the state and dynamics of the mid-latitude ionosphere according to the data of the radiophysical complex in the Geophysical Observatory Mikhnevo (Invited Paper)** [11916-272]
- 11916 74 **Sensitivity of polar stratospheric clouds to the Arctic polar vortex weakening in the lower stratosphere in midwinter** [11916-1]
- 11916 75 **Large volcanic eruptions with the possible injection of aerosols into the stratosphere from 1800 to 2020** [11916-2]
- 11916 76 **Influence of increased activity of planetary waves on the Arctic polar vortex dynamics in winter 2018/2019** [11916-3]
- 11916 77 **Influence of the subtropical stratosphere on the Antarctic polar vortex during spring 2019** [11916-4]
- 11916 78 **The dynamics of a partial ring current in the main phase of magnetic storm during ICME and CIR events** [11916-27]
- 11916 79 **Determination of ionospheric parameters from data of sounding with continuous chirp signal** [11916-74]
- 11916 7A **Near-Earth plasma diagnostics under multipath propagation conditions** [11916-81]
- 11916 7B **Fluctuations of the doppler frequency shift of a decameter radio signal reflected from the upper atmosphere** [11916-100]
- 11916 7C **Lidar investigations of the dynamics of thermal regime of the stratosphere over Tomsk in 2020** [11916-107]

- 11916 7D **High-latitude atmospheric emissions during November 9, 2017 IPDP event** [11916-109]
- 11916 7E **Studying effects of winter sudden stratospheric warmings from observations at middle and high latitudes** [11916-110]
- 11916 7F **Tendencies of long-term variations in ozone content and UV radiation by observation data at different latitudes** [11916-119]
- 11916 7G **Manifestation of El-Niño South oscillation in interannual and seasonal variability of air temperature anomalies at the South coast of Crimea** [11916-120]
- 11916 7H **Excitation of 630.0 nm emission [OI] caused by the Soyuz rocket launch from the Vostochny cosmodrome** [11916-126]
- 11916 7I **Estimated effect of ionospheric longitudinal horizontal electron density gradients on ionospheric delay of gnss signals** [11916-128]
- 11916 7J **Modeling parameters of a perturbation source in an Active Geophysical Rocket Experiment in the ionosphere** [11916-141]
- 11916 7K **Mathematical model for studying the effects of solar eclipses on the Earth's ionosphere** [11916-143]
- 11916 7L **Comparison of the SAR arc, STEVE and Picket fence dynamics registered at the Maimaga subauroral station on March 1, 2017** [11916-144]
- 11916 7M **Impact of solar activity on atmospheric circulation and oceanic surface currents** [11916-147]
- 11916 7N **Synchronous variations of acoustic and electric fields during the passage of the solar terminator and the operation of heating stands** [11916-154]
- 11916 7O **Determination of the high-speed plasma jet injection parameters in the "Fluxus" experiments** [11916-164]
- 11916 7P **Influence of electronic emissions on the state of the lower ionosphere and amplitude characteristics of VLF radio signals** [11916-177]
- 11916 7Q **Infrasound from the aurora borealis** [11916-185]
- 11916 7R **Spectra of tides and planetary waves from the data of ionosonde measurements near Saint Petersburg** [11916-189]
- 11916 7S **Estimation of variations in the thermosphere parameters during a magnetic storm from satellite measurements of thermospheric density** [11916-197]
- 11916 7T **Automated determination of the dates of sudden stratospheric warming** [11916-198]
- 11916 7U **High frequency fluctuations in an active ionospheric experiment** [11916-207]

11916 7V	The numerical simulation of ELF-LF propagation in the Earth-ionosphere waveguide under WACCM-X results [11916-209]
11916 7W	Seasonal Schumann Resonance variations according to magnetic field measurements at Mikhnevo observatory [11916-219]
11916 7X	Sudden phase anomalies of VLF radio transmitters signals (11.9 kHz) of RSDN-20 system registered in Yakutsk during 2009-2017 [11916-220]
11916 7Y	Ionospheric response to Falcon Heavy launching according to data of GPS receivers [11916-222]
11916 7Z	Polar winter mesospheric ozone depletion during energetic electron precipitation [11916-225]
11916 80	Response of the upper atmosphere to irradiance increase after the solar flare on 6 September 2017 [11916-226]
11916 81	The terminator influence on the amplitude of VLF stations' signals registered at the geophysical observatory «Mikhnevo» [11916-234]
11916 82	Airglow intensity of atomic oxygen 557.7 nm according to satellite and ground-based observations over Eastern Siberia [11916-235]
11916 83	Estimation of the influence of geomagnetic activity on ionospheric electronic density scintillations at different latitudes [11916-241]
11916 84	Impact of atmospheric circulation on climate changes under quiet conditions and during geomagnetic disturbances [11916-248]
11916 85	Wave ionospheric disturbance registered during the magnetic storm on April 20, 2018 [11916-252]
11916 86	Dependence between amplitude and frequency characteristics of HF-signals on the background of solar x-ray flares [11916-262]
11916 87	Investigation of solar thermal tides using model data [11916-263]
11916 88	Atmospheric precursors to Baikal earthquakes [11916-273]
11916 89	Concentration distribution of electrons in the lower and upper ionosphere during the X-class solar flare 10.06.2014 [11916-279]
11916 8A	Anisotropy of ionospheric effects of earthquake in New Zealand on November 13, 2016 [11916-292]
11916 8B	Estimation of the dynamics of electron concentration by different plasma-chemical models of the lower ionosphere [11916-298]
11916 8C	Ionospheric slant total electron content determination from multi-frequency GNSS signals carrier-phase measurements [11916-301]

- 11916 8D **Analysis of air temperature in the lower troposphere with stratospheric circulation relationship**
[11916-312]
- 11916 8E **Change in the ionospheric parameters during f series of x-ray flares on September 6-10, 2017**
[11916-315]
- 11916 8F **Daytime ozone photochemical equilibrium and its application for retrieving the O and H
distributions at the altitudes of the mesosphere-lower thermosphere** [11916-317]
-
- 11916 8G **Photochemical equilibrium of odd oxygen and hydrogen families at the mesospheric altitudes**
[11916-319]
- 11916 8H **Resonance scattering as possible reason for detection of imaginary aerosol formations in the
upper mesosphere** [11916-327]

DIGITAL PLATFORMS FOR SUPPORT OF ATMOSPHERIC AND OCEAN RESEARCH

- 11916 8I **Digital monitoring of extreme natural phenomena and anthropogenic emissions in the
atmosphere of the Baikal natural territory** [11916-6]
- 11916 8J **Development of a system for detecting traveling ionospheric disturbances based on GNSS
data** [11916-22]
- 11916 8K **Software and hardware system for monitoring and control of the optical-physical state of the
atmosphere: part 1: panoramic optical station** [11916-159]
- 11916 8L **Software and hardware system for monitoring and control of the optical-physical state of the
atmosphere: part 2: methods and algorithms for data processing** [11916-160]
- 11916 8M **Computer simulation of plant sensitivity to changes in natural conditions** [11916-211]
- 11916 8N **The impact of phosphorus on phytoplankton growth in Barguzin Bay of Lake Baikal** [11916-215]
- 11916 8O **Uncertainty-function-based continuation framework in data assimilation algorithms for
atmospheric chemistry models** [11916-257]
- 11916 8P **Pulse coherent Doppler lidar signal processing on FPGA: implementation of the method of
accumulation of a real autocorrelation function** [11916-269]
- 11916 8Q **Sentinel-2 data classifications for the Baikal natural area** [11916-302]
- 11916 8R **Service-oriented environment for modelling of the air pollution impact on population health**
[11916-305]
- 11916 8S **Construction of nearshore underwater terrain model by coastline detection on open satellite
images for different water levels** [11916-306]
- 11916 8T **Use of computer vision in assessment of air quality in city transportation system** [11916-311]
