Front Matter: Volume 12074

, "Front Matter: Volume 12074," Proc. SPIE 12074, 10th International Symposium on Advanced Optical Manufacturing and Testing Technologies: Novel Optoelectronic Functional Materials and Devices, 1207401 (13 December 2021); doi: 10.1117/12.2623712

SPIE.

Event: Tenth International Symposium on Advanced Optical Manufacturing and Testing Technologies (AOMATT 2021), 2021, Chengdu, China

PROCEEDINGS OF SPIE

*10th International Symposium on Advanced
Optical Manufacturing and Testing Technologies*

Novel Optoelectronic Functional Materials and Devices

Xiaoliang Ma
Mingbo Pu
Xiong Li
Zhuo Xu
Costas Fotakis
Xiangang Luo
Editors

14–17 June 2021
Chengdu, China

Organized by
IOE – Institute of Optics and Electronics, Chinese Academy of Sciences (China)

Sponsored by
COS – The Chinese Optical Society (China) • IOE – Institute of Optics and Electronics, Chinese Academy of Sciences (China)

Technical Cosponsor
SPIE

Supported by
Ministry of Science and Technology of China (China) • Chinese Academy of Sciences (China) • National Natural Science Foundation of China (China)

SPIE

Volume 12074

Proceedings of SPIE 0277-786X, V. 12074

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

AOMATT 2021: Novel Optoelectronic Functional Materials and Devices, edited by Xiaoliang Ma,
Mingbo Pu, Xiong Li, Zhuo Xu, Costas Fotakis, Xiangang Luo, Proc. of SPIE Vol. 12074,
1207401 • © 2021 SPIE • 0277-786X • doi: 10.1117/12.2623712

Proc. of SPIE Vol. 12074 1207401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *10th International Symposium on Advanced Optical Manufacturing and Testing Technologies: Novel Optoelectronic Functional Materials and Devices*, edited by Xiaoliang Ma, Mingbo Pu, Xiong Li, Zhuo Xu, Costas Fotakis, Xiangang Luo, Proc. of SPIE 12074, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

NOVEL OPTOELECTRONIC FUNCTIONAL MATERIALS AND DEVICES

12074 02	Modeling of ferrite thin-film structure using FDTD method in optoelectronic devices [12074-18]
12074 03	Research based on color uniformity of semiconductor laser [12074-16]
12074 04	Field enhancement of tapered focuser with spoof surface plasmon polaritons [12074-26]
12074 05	Spectral-domain asymptotics for electromagnetic scattering from a point-source excitation target coated with a uniaxial electric anisotropic medium based on physical optics [12074-40]
12074 06	Perovskite/silicon tandem solar cell: surface recombination analysis [12074-24]
12074 07	High-performance organic photodetector with optimized thick bulk-heterojunction for near-infrared sensing [12074-1]
12074 08	Crosstalk reduction of silicon waveguide array by high-reflection boundary [12074-17]
12074 09	Utilization of perylene diimide derivative doped tin oxide as an electron transport layer for performance enhancement of non-fullerene organic solar cell [12074-5]
12074 0A	Research on on-resistance of 4H-SiC photoconductive switch [12074-11]
12074 0B	Research on response property of 4H-SiC photoconductive switches with the same-side electrode structure [12074-10]
12074 0C	Enhanced photoresponse of nanostructured ZnO-based flexible photodetectors [12074-15]
12074 0D	Study of a metasurface-based multi-functional polarization converter for large incident angles [12074-12]
12074 0E	The material property and electron emission for NEA GaN vacuum electron source [12074-22]
12074 0F	Experiment and analysis of external optical pump modulation for the 0.3BaSrTiO₃-0.7NdAlO₃ ceramic's characteristics in terahertz range [12074-2]
12074 0G	Controllable power transfer in a double-channel magneto-optical photonic crystal waveguide [12074-6]
12074 0H	Suppressed J-V hysteresis in highly efficient inverted perovskite solar cells using small-molecule non-fullerene acceptor [12074-3]

- 12074 0I **Precise adjustment for neutral ternary semitransparent organic photovoltaics by mixing an insulating polymer** [12074-14]
- 12074 0J **Surface passivation of active layer by introducing sodium alginate for high-performance perovskite photodetectors** [12074-4]
- 12074 0K **Conjugated polymer film fabricated by in situ electro-chemical polymerization as effective interface modification material in organic solar cells** [12074-13]
- 12074 0L **Efficient FAPbI₃ perovskite solar cells using PMACl additives in two-step deposition method** [12074-8]
- 12074 0M **Characterization of Kepler structured microlens array scanners for 2D scanning** [12074-9]
- 12074 0N **Study on speckle problem in semiconductor laser display** [12074-20]
- 12074 0O **Surface impedance absorbing boundary condition used for the simulation of frequency selective surfaces** [12074-19]
