Preface

Part One

IMAGING AND NON-IMAGING OPTICS

- 2 ***Diffractive Optics - State of the Art (invited),***
J. Turunen, Finland; F. Wyrowski, Germany
- 5 ***Near-Field Optics and Photon Force (invited),***
S. Kawata, Japan
- 9 ***Multiple Aperture Imaging System for Lithography,***
R. Volkel, H. P. Herzig, R. Dandliker, Switzerland
- 11 ***Catadioptric Systems for Sub-Quarter Micron Lithography,***
K. H. Lee, H. B. Chung, D. H. Kim, H. J. Yoo, Korea
- 13 ***Modification of the Resolution Limits of the Photolithographic Process due to Nonlinear Optical Propagation Effects in the Resist Layers,***
A. Erdmann, Germany
- 15 ***Fabrication of 0.15 μm SOI p-MOSFETs using Synchrotron Radiation X-ray Lithography,***
S. S. Choi, Y. J. Jeon, J.-S. Lyu, H. J. Yoo, Korea; E. D. Fabrizio, L. Grella, M. Gentili, Italy
- 17 ***Analysis of X-ray Interferometers for Phase Distribution Measurement,***
T. Nakano, H. Hagino, H. Kikuta, K. Iwata, Japan
- 19 ***Excited States and Photoprocesses in the Series Lasers Active Molecules,***
A. E. Obukhov, Russia
- 21 ***Simple "photosculpture" Techniques for Making Arrays of Lenses with Controlled Aberration,***
MC Hutley, U. K.
- 23 ***UV Induced Organic Polymer Micro-Lens Array,***
H. Sato, R. Ohmori, S. Hayakawa, I. Seo, Japan
- 25 ***Optical Imaging and Transforming by Using Planar Integrated Optics,***
S. H. Song, E.-H. Lee, S. T. Park, P. S. Kim, Korea
- 27 ***F-Theta Mirror Scanning Optics,***
H. Atsumi, N. Sakuma, Japan
- 29 ***Combined Structures for High Efficiency Diffractive Optical Elements,***
L. L. Wang, D. Columbus, T. Tschudi, Germany
- 31 ***Electromagnetic Diffraction in High Aperture Optical Systems,***
CJR. Sheppard, Australia; P. Torok, U. K.
- 33 ***Behavior of Digital Hologram When They are Represented in Finite Gray Levels on a TV Monitor,***
J. L. Juarez-P., A. Olivares-P., L. R. Berriel-V, Mexico
- 35 ***Holographic Nonspatial Filter for Laser Beams: 2D Selection,***
Yu. L. Korzinin, I. V. Semenova, N. O. Reinhand, Russia; J. E. Ludman, J. R. Riccobono, U.S.A.

17th Congress of the International Commission for Optics: Optics for Science and New Technology,
edited by Joon-Sung Chang, Jai-Hyung Lee, ChangHee Nam, Proc. of SPIE Vol. 2778, 277801
(1996) 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2298883

SPIE Vol. 2778 Optics for Science and New Technology (1996) /

Proc. of SPIE Vol. 2778 277801-1

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

- 37 ***Manufacturing a Multicolored Line Drawing Hologram Using Galvanometer Scanners,***
K. Kimura, M. Ono, Japan
- 38 ***Neutron Optical Elements Produced by Holographic Technique,***
U. Schellhorn, R. A. Rupp, Germany
- 40 ***The Lippmann Hologram Contact Duplicator with Galvanometer Scanners,***
T. Uematsu, M. Ono, K. Kimura, T. Toda, H. Kawano, K. Ohnuma, Y. Yasuda, Japan
- 42 ***Criteria of Image Performance for High-Precision Imaging of Sharp-Edged 2-Dimensional Objects,***
J. Schlichting, K. Winkler, B. Schimmel, Germany
- 44 ***Fluorescence Imaging System(FIS): Function and Use in the Assessment of Vegetation,***
M. S. Kim, C. S. T. Daughtry, E. W. Chappelle, J. E. McMurtry, L. A. Corp, U.S.A.
- 46 ***Billinear Systems in Image Processing: Space (in)Variant Point Spread Intensity Function with Additive Noise,***
L. R. Berriel-Valdos, R. Pamos-Lopez, Mexico
- 48 ***Specular-Optical Autostereoscopic Displays,***
S. A. Benton, P. Christie, U. S. A.
- 49 ***Rainbow Hologram Recording on Photothermoplastic Media,***
L. M. Panasyuk, I. V. Chapurin, A. B. Kiritsa, Moldova
- 51 ***Birefringence Sheet Polarizer Suitable for Different Wavelength,***
Y. Chen, S. Liu, D. Li, China; N. K. Bao, P. S. Chung, Hong Kong
- 53 ***Design of Narrowband High Reflector,***
Y. Lin, M. Tan, China
- 55 ***Methylen-Blue Sensitized Dichromated Gelatin Holograms, a Study of Optimum Coating and Processing Parameters,***
H. Madjidi-Zolbanin, N. P. Shabestari, R. Karimi, Iran
- 57 ***Critical Light Reflection from Curved Liquid Surface and Application for Measuring Contact Angle,***
M. R. Cai, Y. Z. Li, G. F. Chen, China
- 59 ***Design of a Flight Simulator Used in Training Pilots,***
L. Li, L. An, Y. Wang, China
- 61 ***The Effect of Exposure Quantity as a Catalyst on the Development Reaction in the Fabrication of Holographic Phase Diffraction Grating,***
B. H. Yun, E. S. Kim, N. Kim, Korea
- 63 ***Edge Image Processing: An Analysis of Modified Heaviside Functions as Degraded Edge Generators,***
M. L. Calvo, A. Manzanares, M. Chevalier, Spain; V. Lakshminarayanan, U. S. A.
- 65 ***Merit Functions of CCD Cameras Based on Edge Image Processing,***
A. Simon, E. Shaw, M. L. Calvo, Spain
- 67 ***General Conception of a Gaussian Light Beam,***
W. D. Joo, M. S. Jung, S. A. Rodionov, Russia
- 69 ***Characterization of Aliased Fresnel Hologram by Pixel Phase Error Function,***
R. Silvennoinen, J. Rasanen, M. Honkanen, Finland; J. Uozumi, T. Asakura, Japan
- 71 ***Design of a Viewing Lens for Virtual Reality,***
Y. Wang, X. Yuan, D. He, H. Hua, L. Li, China

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

- 73 ***Influence of Amplitude Variation on Read-Out Signal in Optical Disc,***
S. J. Park, S. H. Sim, C. S. Chung, Korea
- 75 ***Stray Light Suppression Baffle with Radial Leaves,***
M. Shen, S. Liao, W. Ma, China
- 77 ***Reproducial Properties of Referenceless Recording of Near-Field Diffraction Pattern,***
P. V. Polyanskii, G. V. Polyanskaya, Ukraine
- 79 ***Optical Imaging of Small Structures in Optical Lithography. High Focal Depth with Optical Filters,***
R. Hild, Germany; J. C. Escalera, M. J. Yzuel, Spain; G. Nitzsche, U. Altenburger, Germany
- 81 ***High-Efficiency Second-Harmonic Generation of Copper Vapor Laser and its Application in Sub-Micron Photolithography,***
H. Ren, P. Liang, Q. Shen, R. Ye, H. Huang, D. Lu, L. Du, China
- 83 ***Aberration Properties of Diffractive Triplets,***
H. Ichikawa, Japan
- 85 ***Control of Reconstruction Wavelength of Dichromated Gelatin Holographic Filter,***
M. H. Jeong, Korea
- 87 ***Power Spectral Analysis for Evaluating Optical Near-Field Images of 20 nm Gold Particles,***
R. U. Maheswari, H. Kadono, M. Ohtsu, Japan
- 89 ***Objects Displacements Measuring Using Gabor Functions,***
J. Woznicki, M. Zapendowski, Poland
- 91 ***Chalcogenide Inorganic Resists: Poperties and Applications in Holography, Optoelectronics, Microlithography,***
A. V. Stronski, Ukraine
- 93 ***Specular-Optical Autostereoscopic Displays,***
S. A. Benton, P. Christie, U. S. A.
- 94 ***Lens Design Using Genetic Algorithm in the Stage of Optimization,***
S. Vazquez-Montiel, A. Comejo-Rodriguez, Mexico
- 96 ***Photon Tunneling Scanning Image Separating Method,***
S. Wu, China
- 98 ***A New Super-Resolution Optics with Thick Double-Concave-Cone Lens for Optical Disc Memories,***
K. Kono, Y. Mitarai, T. Minemoto, Japan
- 100 ***Computer Simulations of an Autostereoscopic Lenticular Lens System,***
B.-R. Lee, Y. H. Lee, S.-K. Kim, Korea
- 102 ***Image Formation in the Near-Field Scanning Optical Microscope,***
H. Furukawa, S. Kawata, Japan
- 104 ***Imaging With A Kilometer-Long Focal Depth,***
S. W. Li, T. Aruga, Japan
- 106 ***Influence of Polarization on the Propagation of an Asymmetrical Converging Light Beam,***
N. D. Kundikova, F. V. Podgornov, L. F. Rogacheva, B. Ya. Zel'dovich, Russia
- 108 ***Near-Field Optical Microscope with Ultrasonic Resonance Regulation and its Application to Quantum Confined System,***
X. Zhu, G. S. Huang, H. T. Zhou, B. Zhang, Z. Z. Gan, China

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

- 109 **Gaussian Pupil for Superresolution at Soft X-ray Wavelength,**
Y. R. Song, M. H. Lee, S. S. Lee, Korea
- 111 **Model for Analyzing Visual Images of Non-Lambertian Objects Observed through a Light-Scattering Medium,**
V. V. Barun, Belarus
- 113 **Deformation of the Speckle Pattern under Optical Magnus Effect,**
I. V. Kataevskaya, N. D. Kundikova, B. Ya. Zel'dovich, Russia
- 115 **Using of Vitreous Chalcogenide Semiconductors in Microelectronic Fabrication,**
L. M. Panasyuk, I. V. Chapurin, V. M. Ishimov, S. G. Sidorina, Moldova
- 117 **Adiabatical Quarter Wave Plate,**
M. Ya. Darscht, N. D. Kundikova, B. Ya. Zel'dovich, Russia
- 119 **Equipment for Real Time MTF Testing of Copier and Fax Lenses,**
H. M. Cho, Y. W. Lee, Y. B. Chung, I. W. Lee, T. H. Kim, O. S. Choe, Korea
- 121 **Generation of Light Waves with the Single Screw Dislocation in the Wavefront,**
M. Ya. Darsht, I. V. Kataevskaya, N. D. Kundikova, B. Ya. Zel'dovich, Russia
- 123 **New Mobile Scanning Aerosol-Ozone Lidar Maket-2,**
S. S. Khmelevtsov, Yu. G. Kaufman, V. A. Korshunov, Russia; J. Leonelli, U. S. A.
- 125 **Nonperturbative Theory of Cavity-Controlled Spontaneous Emission of Two Level Atom in Microcavity,**
V. F. Cheltsov, Russia

OPTICAL TECHNOLOGY AND SURFACE CHARACTERIZATION

- 128 **GRIN Optics, Fourier Optics and Optical Connections (invited),**
C. Gomez-Reino, C. Bao, M. V. Perez, Espana
- 132 **Improving Soliton Transmission by Filters and Optical Phase Conjugation (invited),**
S. Chi, J.-C. Dung, S. Wen, China
- 135 **Erbium-doped Fiber Amplifiers for a New Era of Optical Communications (invited),**
E. Desurvire, France
- 137 **Pulsed Laser Deposition in a Chemically Reactive Environment (invited),**
I. N. Mihailescu, E. Gyorgy, V. S. Tedorescu, G. Marin, R. Alexandrescu, Romania; A. Luches, A. Perrone, M. Martino, Italy; J. Hermann, C. Leborgne, France
- 141 **Optical Surface Topography Measurements and Characterization (invited),**
H. J. Tiziani, Germany
- 143 **Imaging with Reflection Near-Field Optical Microscope in Light of Evanescent Dipole Radiation,**
M. Xiao, J. Siqueiros, Mexico
- 145 **Assembly and Adjustment of a Lithographic Lens,**
U. Kruger, B. Schimmel, I. Balogh, L. Korner, J. Schlichting, Germany
- 147 **LC Vision for the Materials Testing,**
M. G. Tomilin, B. S. Gurevich, Russia
- 149 **Transmission of Directly Modulated 10Gb/s Signals over 340km of Non-Dispersion Shifted Fiber by Mid-Span Spectral Inversion,**
S.-S. Lee, C.-H. Lee, Korea

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

- 151 ***Simulation and Optimization of the Stokes Parameter Receiver for Optical Transmission,***
J. Kim, Korea; M.-K. Liu, J. Kim, U. S. A.; J. Lee, S. Gil, Korea
- 153 ***Substrate Mode Hologram for High Efficient Aberration-Free Coupling between Collimated and Uncollimated Beams,***
P. Cheben, T. B. Davila, A. N. Peral, M. L. Calvo, Spain
- 155 ***Hydrostatic Pressure Effects in Weakly Twisted Anisotropic Media: An Analogy between Highly Birefringent Fibers and Chiral Nematic Liquid Crystals,***
T. R. Wolinski, Poland
- 157 ***Image Reproduction of Bragg Gratings,***
H. R. Lee, D. R. Lyons, U. S. A.
- 159 ***A Calibration Method of the System Error Used for CCD MTF Measurement,***
C. Han, X. Zhang, Z. Liu, China
- 161 ***Design of Quasioptical Diffractive Millimeter Wave Antenna,***
Z. Lu, Z. Fan, J. Liao, J. Zhang, F. Chen, China
- 163 ***Plasma Ion Assisted Deposition: A Novel Technique for the Production of Optical Coatings,***
K. Matl, A. Zoller, R. Gotzelmann, Germany
- 165 ***Three-Dimensional Microfabrication with Two-Photon Absorbed Photopolymerization,***
S. Maruo, O. Nakamura, S. Kawata, Japan
- 167 ***Advanced Concepts of Laser Beam Integration by Beamlet Shaping,***
E. W. Kreutz, T. Henning, L. Unnebrink, M. Scholl, Germany
- 171 ***Deposition and Analysis of Carbon and Silicon Clusters Generated by Laser-Induced Gas Phase Reaction,***
M. Ehbret, H. Ferkel, F. Husken, L. Holz, Germany; Yu. N. Polivanov, V. V. Smirnov, O. M. Stelmakh, Russia
- 173 ***Photoisomerization Dynamics of Isolated and Surface-Adsorbed Stilbene Molecule: Comparative Study,***
S. Yu. Kotkov, B. A. Grishanin, V. N. Zadkov, Russia
- 175 ***Simultaneous Inspection of Surface Roughness and Flatness by Computer-Generated Hologram,***
R. Silvennoinen, J. Rasanen, K. E. Peiponen, Finland
- 177 ***Measuring Complex Index and Surface Profile through Phase-Shifting Interferometric Techniques and Maximum-Likelihood Estimation Theory,***
E. W. Rogala, H. H. Barrett, U. S. A.
- 179 ***Non-Destructive Contactless Tools for Semiconductor Wafer Inspection,***
O. V. Astafiev, V. P. Kalinushkin, Russia
- 181 ***An Intelligent System for the Measurement of Surface Microstructure,***
Z. Ding, G. Wang, Z. Wang, China
- 183 ***Optical Gabor Transform in Surface Reconstruction,***
M. Friedmann, J. Shamir, Israel
- 185 ***Characterization of Silica-Based Waveguide Layers for Integrated Optics Application,***
H. J. Lee, Y. T. Lee, S. H. Youn, J. K. Sim, T. G. Choy, Korea

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

- 187 ***New Type of Auto Oscillations under the Interaction of Laser Radiation with an Absorbing Liquid,***
A. V. Levin, Russia
- 189 ***Measurement of Grain Boundary Sliding in Copper by Two-Beam Interferometry,***
A. Ayensu, Ghana
- 191 ***Measuring Small Angle with Talbot Effective,***
C. Wang, X. Wu, C. Han, China
- 192 ***Method for Defect Selection in Grinding Sapphire Wafers,***
O. V. Astafiev, V. P. Kalinushkin, Russia
- 193 ***Diffraction Optics Produced by Holography and RIE,***
L. Cescato, L. L. Soares, C. R. A. Lima, M. A. R. Alves, E. S. Braga, Brazil
- 195 ***A CMOS-Compatible pin Photodiode with Variable Photosensitivity for Optical Interconnection,***
J. W. Park, S. J. Kim, Korea
- 197 ***Nondestructive Testing for Microscopic Structure on the Surface and the Interior of Transmission Material,***
G. Wang, Z. Ding, Z. Fan, R. Gao, F. Gan, China
- 199 ***Integral Polygaussian Model for Non-Gaussian Rough Surfaces,***
M. Ya. Litvak, V. I. Malyugin, Russia
- 201 ***New Conception in Microoptics Aspherisation: Laser Shaping and Polishing,***
V. P. Veiko, V. A. Chuiko, E. B. Jakovlev, A. K. Kromin, S. A. Rodionov, E. A. Shakhno, A. T. Shakola, Russia
- 203 ***Application of Photomultiplier Tube in the Velocity Measurement of Unsteady High-Supersonic Fluid Field by means of Laser Plasma Method,***
Wang Y., Li H. Z., Guo J. G., China
- 205 ***Determination of the Interfacial Refractive Index in Ion-Exchange Glass Films,***
M. B. Pereira, F. Horowitz, Brazil
- 207 ***Quantitative Analysis of White Light Fringes in Differential Interference Microscope,***
S. Toyooka, M. Kataguchi, N. Hayasaka, F. Kobayashi, Japan
- 209 ***Optical Properties of SiO_xN_y Thin Films Prepared by Ion Beam Assisted Deposition,***
H. J. Cho, I. G. You, C. K. Hwangbo, Korea
- 211 ***Optical Heterodyne Detection Processes for Obtaining First-Order Correlation and Power Spectrum of Optical Amplitude Fluctuations,***
A. Ono, S. Tanaka, Y. Ohtsuka, Japan
- 213 ***Design and Testing of a Rau-Detector for Examination of Semiconductor Devices in a Scanning Laser Microscope,***
M. Kienle, J. Neumann, J. Otto, E. Plies, Germany
- 215 ***1-to-25 Optical Fanout Module for Optoelectronics Interconnects,***
D.-C. Su, J.-T. Chang, Y.-T. Huang, Hsinchu, China
- 217 ***Efficiency of Transmission Inclined Surface-Relief Holographic Gratings for Backplane Interconnects,***
M. Milner, I. Aubrecht, I. Koudela, Czech
- 219 ***Speckle Smoothing Using Polarization Control Plate made of Liquid Crystal,***
K. Sueda, K. Tsubakimoto, N. Miyana, M. Nakatsuka, Japan

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

- 221 **80 Picosecond Scanning Optical Delay Line by Using a Helicoid-Shaped Reflective Mirror,**
C.-L. Wang, K.-H. Lin, K.-S. Liu, W.-H. Huang, J.-M. Shieh, C.-L. Pan, Hsinchu, China
- 223 **Analysis of Ultimate Transmission Capacity of Optical Communication Systems,**
W. Wang, S. s. Jian, China
- 225 **A New Technique for Measuring Radius of Curvature Using Half-Aperture Bidirectional Shearing Interferometer,**
Y. W. Lee, H. M. Cho, D. J. Shin, Y. B. Chung, I. W. Lee, Korea
- 227 **Study on Optical Efficiency of Alternating-Current Thin-Film Electroluminescent Devices,**
Zhang J., Gu P., Liu X., Tang J., China
- 229 **Optical Manipulation of Microparticles Using Diffractive Optical Elements,**
Y. Hayasaki, S. Sumi, K. Mutoh, S. Suzuki, M. Itoh, T. Yatagai, N. Nishida, Japan
- 231 **In Situ Monitoring of Surface Oxidation by Laser Speckle Correlation,**
M. Muramatsu, J. A. Ribeiro, A. Mizukami, Brazil; T. Eiju, Japan
- 233 **Soliton Propagation in a System with Bandwidth-Limited and Nonlinear Gain,**
M. F. S. Ferreira, Portugal
- 235 **Phase Shifting Algorithms for Nonsinusoidal Signals Compensating Nonlinear Phase-Shift Errors and their Susceptibility to Random Noise,**
K. Hibino, Japan; B. F. Oreb, D. I. Farrant, K. G. Larkin, Australia
- 237 **Experiment-Theory Agreement for Light Scattering by a Cylinder On a Substrate Including Burying Effects,**
J. M. Saiz, P. J. Valle, F. Gonzalez, E. M. Ortiz, F. Moreno, Spain
- 239 **Determination of the Metallic Particle Size on Flat Substrates by means of Light Scattering Experiments,**
F. Gonzalez, J. M. Saiz, P. J. Valle, E. M. Ortiz, F. Moreno, Spain
- 241 **Water Adsorption on the Polished Stainless Steel Surface Studied by Ellipsometry,**
H. Nham, D.-J. Bae, Korea
- 243 **Optical Microlithographic Phase-Shifting Mask Technology,**
F. Boru, S. Guoliang, S. Feng, Q. Long, C. Baoqin, China; C. Zheng, U.K.
- 245 **Spectral Correlations in White Light Scattering by Non-Gaussian Rough Surfaces,**
M. Ya. Litvak, V. I. Malyugin, Russia
- 247 **Layer-by-Layer Digital Reconstruction of 3D Field by Electronic Holography,**
Hao. Z., Cheng. D., Wang S., Feng S., Wang G., China
- 249 **Optical Evaluation of the Fractality of Rough Surfaces Using Array Illumination,**
N. Wada, J. Uozuni, T. Asakura, Japan
- 251 **Laser Confocal Microscopy Study of Impacts from a CO₂ Industrial Laser to Select Optimal Modal Distribution,**
Creus M. F., Alvarez, Guillermo A. M., Meilan P. F., Garavaglia M., Gallego-Lluesma E., Argentina
- 253 **Corrosion Resistance of Laser Cut Hipoeutectoid Carbon Steels,**
Alvarez, Guillermo A. M., Gallego-Lluesma E., Fernandez A., Rosales B., Argentina
- 255 **Polynomial Fitting for the Conventional Hartmann Test Using a Threshold Accepting Algorithm,**
C. I. Robledo-Sanchez, G. Camacho-Basilio, A. Cornejo-Rodriguez, Mexico

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

- 257 *Theoretical and Experimental Results in the Imaging of Optically Thick Objects in Scanning Microscopy*,
J. F. Aguilar, D. M. Gale, Mexico
- 259 *Optical Image Transmission through an Optical Fiber by Spectral Coding*,
V. I. Bobrinev, Russia; H.-W. Jeon, J.-Y. Son, Korea
- 261 *Profilometry of a Plane Reflecting Surface Using a Confocal Scanning Optical Microscope*,
D. M. Gale, J. F. Aguilar, Mexico
- 263 *Optical Computer Tomography as a Tool for Nondestructive Inspection and Testing*,
Berezhna S. Yu., Berezhnyi I. V., Vlokh O. G., Ukraine
- 265 *Transmission Properties of a Multilayer Polarizer Filter Realized with Quasiperiodic Code*,
M. Bertolotti, P. Masciulli, Italy; K. P. Panajotov, Bulgaria; C. Sibilia, Italy
- 267 *Surface Hardening of Ohns Steel Using Pulsed and CW Lasers*,
A. Ramalingam, B. J. Kalaiselvi, C. Karthikeyan, R. Ramanathan, S. Sridharan, P. K. Palanisamy, V. Masilamani, India
- 269 *Wavefront Correction of Laser Beam Using a Deformable Mirror with a Large Aperture*,
G. Y. Yoon, T. Jitsuno, M. Nakatsuka, Y. Kato, Japan
- 271 *Remote Node for Uni-Directional Self-Healing Ring Network*,
S. Y. Park, C. S. Park, Korea
- 273 *Examination of Photodoping Phenomenon by In-Situ Ellipsometric Observation*,
J. Lee, Korea; T. Ogawa, M. Wakaki, Y. Miyanishi, S. Kawabata, Japan
- 275 *Waveguiding Properties of As₂S₃ Optical Waveguide doped with Ag by Photodoping Technique*,
T. Ogawa, M. Wakaki, S. Tatum, Y. Miyanishi, Japan; J. Lee, Korea
- 277 *Fabrication of Infrared Interferometer and its Application for Characterization of Ge*,
M. Wakaki, H. Mukai, T. Ogawa, Y. Maejima, M. Mondo, Japan

OPTICAL PHYSICS

- 280 *Spin-orbit Interaction of a Photon: Mutual Influence of Polarization and Propagation (invited)*,
N. B. Baranova, M. A. Bolshtyansky, N. D. Kundikova, V. S. Liberman, A. Yu. Savchenko, B. Ya. Zel'dovich, Russia
- 283 *Optical Pressure on a Dielectric Film Caused by the Evanescent Field of a Gaussian Beam (invited)*,
S. Chang, J. T. Kim, J. H. Jo, S. S. Lee, Korea
- 285 *Theory of Self-Focusing Media, Grin and Holographic Elements (invited)*,
A. L. Mikaelian, Russia
- 286 *Inverse Scattering for Rough Surfaces*,
CJR Sheppard, Australia; JC Quartel, U. K.
- 288 *Phase Retardation between s-and p-Polarized Component Waves of Light Scattered from Copper Rough Surface*,
Y. Sawada, K. Oka, Y. Ohtsuka, Japan
- 290 *Generalization of the Van Cittert-Zernike Theorem to Scattering Sources and the Relevant Inverse Problem*,
A. M. Zarubin, Germany

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

- 292 ***Weak Localization of Light Backscattered Multiply from Fractal Media,***
K. Ishii, T. Iwai, J. Uozumi, T. Asakura, Japan
- 294 ***Dynamic Programming: An Alternative Approach to Light Propagation in Arbitrary Optical Media,***
M. L. Calvo, Spain; V. Lakshminarayanan, U. S. A.
- 296 ***Multiple Scattering of Light by Red Blood Cells,***
A. G. Borovoi, E. I. Naats, Russia
- 298 ***Total Absorption of Light at Uniaxial Gratings,***
M. L. Gigli, R. A. Depine, Argentina
- 300 ***Experimental Verification of a Model for Two-Wave Mixing with Nonplanar Waves in Sillenites,***
A. Kiessling, R. Kowarschik, K. H. Ringhofer, Germany
- 302 ***Self-Imaging with Finite Effective Apertures,***
R. Piestun, Y. Y. Schechner, J. Shamir, Israel
- 304 ***The Conversion Efficiency of Photovoltaic Converters with Pulsed Lasers,***
K. C. Woo, J. H. Kwon, Korea; N. W. Jalufka, U. S. A.
- 306 ***Electron Energy Spectra States of Cadmium and Zinc Diphosphides,***
I. Fekeshgazi, G. Grischenko, P. Romanyk, I. Tychina, A. Vakaruk, Ukraine
- 307 ***High Resolution 3d Laser Interferometer with Reduced Linearity Error,***
B. Hils, M. Hafner, W. Martienssen, Germany
- 309 ***Measurements of Correlation-Induced Spectral Changes by Use of a Wave-Front Folded Interferometer,***
M. Kamada, S. Tanaka, Y. Ohtsuka, Japan
- 311 ***Radiation Efficiency and Radiometry of Twisted Gaussian Fields,***
A. T. Friberg, Germany
- 313 ***Polarization Anisotropy in Near-Field Intensity Patterns Scattered Multiply from Dense Random Media,***
T. Iwai, K. Ishii, H. Furukawa, M. Dogariu, T. Asakura, Japan
- 315 ***Time-Resolved Measurements of the Size and Two-Dimensional Motion of Small Particles Using an Image Sensor,***
Y. Harada, T. Asakura, Japan
- 317 ***Correlation Requirements for Displacement Analysis by ESPI Experimental and FEM Analytical Methods,***
R. Rodriguez-Vera, H. J. Puga, Mexico
- 319 ***Wigner Distribution Function of a Circular Light Source,***
M. J. Bastiaans, Netherlands
- 321 ***Some Peculiarities of Passage of Light Through Dispersion Layers with a High Concentration of Dispersion Material,***
Loiko V. A, Ivanov A. P, Dick V. P, Belarus
- 323 ***Dynamic Scattering of Strongly Focused Coherent Beam from Random Medium: a New Type of Manifestation of the Doppler Effect,***
S. S. Ul'yanov, Russia
- 325 ***Evolution of the Stokes Parameters in Optically Anisotropic Media,***
C. Brosseau, France

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

- 327 **Phase Stepping in Digital Grating-Shear Speckle Pattern Interferometry,**
R. Torroba, R. Henao, H. Rabal, Argentina,
- 329 **Photonic Interpretation of Refractive Index,**
H. Kaatuzian, A. Adibi, Iran
- 333 **Exact Solution of the Pulsed Beam Propagation in Homogeneous Dispersive Media,**
Z. Wang, Z. Xu, China
- 335 **Light Scattering from Liquid-Air Interface Deformed by Optical Force of a Totally Reflected Gaussian Beam,**
J. T. Kim†, J. H. Jo, S. Chang, Korea
- 337 **Superslow Optical Relaxation Induced by FM Laser Field in I_2 ,**
H.-R. Xia, H.-J. Jiang, Y. Zhang, J.-H. Zhu, S.-W. Fang, L.-E. Ding, China
- 339 **Lateral Vibrations Measurement of Powdery Clay Sample Using Speckle Photography,**
P. K. Buah-Bassuah, E. Ampem-Lassen, Ghana
- 341 **Infrared Vibrational Modes and Raman Scattering in $CuAlS_2$, $CuAlSe_2$ and $CuAl_xGa_{1-x}Se_2$ Crystals,**
A. M. Andriesh, N. N. Syrbu, M. S. Yovu, V. E. Tazlavan, Moldova
- 343 **Far Infrared Optical Study of $CdInGaS_4$, $HgInGaS_4$ and $CdIn_2S_4Se_2$ Crystals,**
N. N. Syrbu, S. I. Radautsan, R. V. Cretu, V. E. Tezlevan, N. A. Moldoveanu, Moldova

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

NON-LINEAR OPTICS AND QUANTUM OPTICS

- 740 ***Theoretical Study of Photonic Band Gap Structures (invited)***,
D. Maystre, G. Tayeb, D. Felbacq, France
- 744 ***Nonclassical Properties of Nonlinear Light Beam Interactions (invited)***,
J. Perina, Czech Republic
- 748 ***Quantum Computation (invited)***,
A. Ekert, U. K.
- 752 ***Resonant and Nonresonant Ultrafast Processes in Semiconductor Doped Glasses (invited)***,
C. H. B. Cruz, Brazil
- 756 ***New Photorefractive Ferroelectric for Red and Near Infrared: Tin Hypothiodiphosphate (invited)***,
S. Odoulov, A. Shumelyuk, Ukraine; U. Hellwig, R. Rupp, Germany; G. Brost, U. S. A.
- 758 ***Lasing Image and Spectrum of Two Merging Ink doped Liquid Microdroplets (invited)***,
H. -J. Moon, G. -H. Kim, J. -H. Lee, J. -S. Chang, Korea
- 760 ***Lasing without Inversion: Progress and Prospect (invited)***,
O. Kocharovskaya, Russia
- 762 ***2 λ -CARS Thermometry of Hydrogen***,
W. Clauß, Germany; D. N. Kozlov, R. L. Pykhov, V. V. Smimov, O. M. Stel'makh, K. A. Vereschagin, Russia
- 764 ***Vacuum Effect and Classical Information on Measured Amplitude and Phase***,
J. W. Noh, K. Kim, Korea
- 766 ***Two Photon Cooperative Absorption and Radiation of Nonclassical Light***,
N. A. Enaki, M. A. Macovei, Moldova
- 767 ***The Use of Phase Conjugation in Scanning Laser Microscopy***,
O. Nakamura, K. Fujita, Y. Kawata, S. Kawata, Japan
- 769 ***A Polarizing Interferometer with Wide Range Varying Dispersion due to Pancharatnam's Geometrical Phase***,
B. Hils, E. Frins, W. Dultz, W. Martienssen, Germany
- 771 ***Gain and Pump-to-Probe Intensity Ratio Dependencies of Response Times in Photorefractive Two-Beam Coupling***,
Y. Tomita, S. Matsushima, Japan
- 773 ***Local Field Effect in the Second Harmonic Generation Spectra of Si Surfaces***,
B. S. Mendoza, W. L. Mochan, Mexico
- 775 ***Single Mode Optical Parametric Oscillator***,
F. Huisken, M. Kaloudis, J. Marquez, Germany; Yu. L. Chuzavkov, S. N. Orlov, V. A. Maslov, Yu. N. Polivanov, V. V. Smimov, Russia
- 777 ***Generation of High-Repetition Rate Visible fs-Pulses by Dispersive Frequency Doubling in Lithium Triborate***,
G. C. Cho, Z. G. Lu, G. Lupke, H. Kurz, Germany
- 779 ***Coherent Tunable THz-Wave Generation from LiNbO₃ Optical Parametric Oscillator Using a Monolithic Grating Coupler***,
K. Kawase, M. Sato, T. Taniuchi, H. Ito, Japan
- 781 ***Phase Conjugator with Femtosecond Pulses***,
H.-F. Yau, P.-J. Wang, E.-Y. Pan, J. Chen, Taipei, China

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

- 783 ***Interferometric Measurement of Femtosecond Pulse Modulation via Cascaded Second-Order Nonlinear Optical Process,***
C. M. Kim, C. S Yoon, D. Kim, Korea
- 785 ***Applications of Bacteriorhodopsin Films for Optical Modulation and Logic Operations,***
D. V. G. L. N. Rao, F. J. Aranda, D. N. Rao, Z. Chen, J. A. Akkara, D. L. Kaplan, M. Nakashima, U. S. A.
- 786 ***Full Optical Characterization of Highly Nonlinear Organic Material, 3-Methyl-4-Methoxy-4'-Nitrostilbene(MMONS),***
H.-K. Hong, C. S. Yoon, Korea; T. Xia, E. W. V. Stryland, U. S. A.
- 788 ***First Hyperpolarizabilities of Weak Organic Acids,***
P. C. Ray, P. K. Das, India
- 790 ***Recent Progress in Quadratically Enhanced Optical Nonlinear Langmuir-Blodgett Multilayers,***
S. Ma, X. Lu, L. Liu, G. Wang, W. Wang, China
- 792 ***First Experimental Observation of Spatial Solitons in Polymer Waveguides,***
U. Bartuch, U. Peschel, Th. Gabler, R. Waldhausl, H.-H. Horhold, Germany
- 794 ***Terahertz Radiation and Ultrafast Carrier Dynamics in Semi-Insulating GaAs,***
W. Li, H. Wenguang, China
- 796 ***Anisotropy of Nonlinear Absorption in a V^{+} :YAG Crystal,***
N. N. Il'ichev, A. V. Kir'yanov, P. P. Pashinin, V. A. Sandulenko, A. V. Sandulenko, S. M. Shpuga, Russia
- 798 ***Laser Beam Self-Channeling in a Photorefractive Waveguide,***
A. A. Kamshilin, E. Raita, Finland
- 800 ***Diffraction Ring Pattern and Z-Scan Measurement of Amorphous As_2S_3 Thin Film,***
Y. J. Sohn, Y. L. Lee, C. H. Kwak, O. S. Choe, Korea
- 802 ***Two Orthogonally Polarized Optical Solitons in Fiber Media with all Higher Order Effects,***
P. K. Palanisamy, K. Nakkeeran, India; K. Porsezian, Germany; S. Seshadri, India
- 804 ***Preparation and Properties of a Complex Crystal for Nonlinear Optical Applications: Cadmium Mercury Thiocyanate,***
M. Jiang, D. Yuan, M. Liu, D. Xu, China
- 805 ***Polarisation Characteristics of Two-Photon Absorption in $LiF:F_2^-$ Crystal at Wavelength $1.06\ \mu m$,***
T. T. Basiev, N. N. Il'ichev, A. V. Kir'yanov, P. P. Pashinin, S. M. Shpuga, Russia
- 806 ***Controlling Quasiperiodicity in a Q-Switched Nd: YAG Laser,***
J.-M. Kim, K.-S. Kim, C.-J. Kim, C.-M. Kim, Korea
- 808 ***Multi-Conical Emission at Light Counter-Propagation in a Resonant Medium,***
A. A. Afanas'ev, B. A. Samson, Belarus
- 810 ***Properties of Displaced Idealized Cat State,***
Z.-F. Hu, China
- 812 ***Attractive Interactions of Vector Dark Solitons,***
G.-H. Kim, H.-J. Moon, Y.-S. Lim, J.-H. Lee, J.-S. Chang, Korea
- 814 ***Influence of Laser Radiation on the Absorption of Weak Electromagnetic Wave by Free Electrons in Semiconductor Superlattices,***
N. Q. Bau, C. Navy, G. M. Shmelev, Vietnam
- 816 ***Nonlinear Refractive Index Measurement by Modulation of Probe Beam Interference Pattern in a Sample,***
M. T. Tavassoli, H. R. Khalesifard, Iran

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

- 818 ***A Simple Atom Trap Using Frequency Modulated Diode Laser,***
W. Jhe, K. I. Lee, J. A. Kim, H. R. Noh, Korea
- 820 ***Generation of Optical Harmonics of Nd:glass and YAG Laser Radiation in Crystalline, Gaseous, Ionic and Plasma Media,***
R. A. Ganeev, I. A. Kulagin, I. A. Begishev, V. I. Redkorechev, T. Usmanov, Uzbekistan
- 822 ***The dc Magnetic Fields Generated by Ultraintense Short Laser Pulse,***
G. Zeng, Z. Xu, B. Shen, W. Zhang, W. Yu, China
- 824 ***Phase-Matching Wavelength Tuning of a Quasi-Phase-Matched Lithium Tantalate Waveguide by Annealing,***
S.-Y. Yi, S.-Y. Shin, Y.-S. Jin, Y.-S. Son, Korea
- 826 ***Low-Temperature Laser-Produced Plasma as a Nonlinear Media for Frequency Conversion,***
R. A. Ganeev, V. I. Redkorechev, T. Usmanov, Uzbekistan
- 828 ***Enhanced Doubling of GaAlAs Diode Laser in LiIO₃ Crystal,***
K. H. Jeong, W. J. Joo, C. H. Oh, P. S. Kim, Korea
- 830 ***Sensibilization Process in Laser Crystals with Colour Centers Induced by γ Radiation,***
S. Kaczmarek, Z. Mierczyk, K. Kopczynski, Poland; A. Matkowski, D. Sugak, Ukraine
- 832 ***Determination of Spectroscopic Parameters of Non-linear Absorbers by Bleaching-Effect Dynamics Analysis,***
Z. Mierczyk, Poland
- 834 ***Subpicosecond Microwave Pulse Generation and Measurement,***
G. Xiao, D. Kim, Korea; Y. Liu, Y. Zhang, H. He, China
- 836 ***Steady-State Intensity of Lasing With or Without Inversion in a Simple Three-level Atomic System,***
S.-Q. Gong, Z.-Z. Xu, China
- 838 ***Fabry-Perot Interferometer for the Characterization of the Linear Electro-optic Effect in Polymeric Films,***
J. H. Kim, H. J. Chang, S. H. Han, J. W. Wu, Korea
- 840 ***The Generation of Tunable Coherent VUV/XUV Radiation by Nonresonant Four-Wave Sum-Mixing,***
S. Taoheng, China
- 842 ***Measurement of the Linear Electro-Optic Effect by Reflection Method in Mach-Zehnder Interferometer,***
M. J. Shin, H. R. Cho, S. H. Han, J. W. Wu, Korea
- 844 ***The Relation Between Above Threshold Ionization(ATI) and High Order Harmonic Generation(HOFG),***
X. Li, Z. Xu, S. Hu, S. Han, W. Zhang, China
- 846 ***Theoretical Study on Photon Tunneling Time in a Frustrated Total Internal Reflection Structure,***
B. Lee, W. Lee, Korea
- 848 ***The One-Dimension-Short-Range-Potential Model of High Order Harmonic Generation(HOFG),***
X. Li, Z. Xu, S. Hu, S. Han, China
- 850 ***Intensity Squeezing in Semiconductor Lasers,***
T. Zhang, Z. Hou, J. Wang, C. Xie, K. Peng, China
- 852 ***Chaos, Phase Singularities and Spatial-Temporal Complexity in Stimulated Brillouin Scattering with Weakly External Feedback,***
D. S. Lim, Korea; D. Yu, W. Lu, P. Ripley, R. G. Harrison, U. K.
- 854 ***Exact Solution of Coupled Wave Equations in Degenerate Four-Wave Mixing,***
M. H. Farzad, M. T. Tavassoly, Iran

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

- 856 **Improvement of Spatial Beam Profiles in Beam Combination using SBS Mirrors,**
Y. S. Shin, H. S. Kim, K. Y. Um, J. R. Park, J. O. Byun, H. S. Park, H. J. Kong, Korea
- 858 **Theory of the Optical Radiation Propagation in a DFB-structure with Linearly Changing Period,**
A. A. Afanas'ev, Belarus
- 860 **Stimulated Raman Scattering of Femtosecond Terawatt UV Pulses,**
P. M. Mikheev, M. S. Djidjoev, V. T. Platonenko, A. B. Savel'ev, Russia
- 862 **Four-Pass Amplifier System With A Stimulated Brillouin Scattering Mirror,**
J. R. Park, H. S. Kim, K. Y. Um, J. Y. Lee, H. S. Park, H. J. Kong, Korea
- 864 **Preferred Values and Dispersions of Phase of Any Order for I-photon Kerr States,**
V. Perinova, A. Luks, Czech
- 866 **Growth Mechanism and Optical Properties of A New Nitroaromatic Compound,**
K. I. Seo, S. C. Mathur, C. W. Lowe, U. S. A
- 868 **Nd:Glass Laser with a Phase Conjugating Mirror Based on SBS,**
H. S. Kim, K. Y. Um, J. R. Park, Y. S. Shin, J. Y. Lee, J. O. Byun, K. H. Han, H. S. Park, H. J. Kong, Korea
- 870 **Experimental Investigation of the Beam Coupling Coefficient Distribution Along a Thin Slab of Photorefractive BTO,**
A. Garcia-Weidner, A. V. Khomenko, Mexico; A. A. Kamshilin, Finland
- 872 **Ultra-Fast Nonlinear Optical Properties of Glass Containing Rhodamine B,**
S. Xi, L. Li, China
- 874 **Diffraction Efficiency in Methylene Blue Sensitized Dichromated Gelatin Hologram,**
Y. S. Im, C. H. Kwak, O. S. Choe, Korea
- 876 **Femtosecond Degenerate Four-Wave Mixing in 350 μ m Undoped and n-type InP due to Virtual Third-order Polarization,**
S. Yu, J. H. Chu, J. I. Lee, D. Kim, Y. H. Yee, D. S. Kim, J. H. Lee, Korea
- 878 **Optical Rectification in Absorption Bands of Optically Active Liquids: Application to a Three-Level Model,**
S. Wozniak, Poland
- 880 **Phase Conjugate Interferometry Using a Polymer Film Doped with Two Kinds Dyes,**
T. Takeda, M. Murakami, H. Fujiwara, Japan
- 882 **The Spectral Perturbation Method,**
V. A. Vysloukh, J. J. Sanchez-Mondragon E. Marti-Panameno, Mexico
- 884 **Light-Hole and Heavy-Hole Exciton Dynamics in GaAs/AlGaAs Multiple Quantum Wells,**
J. I. Lee, J. H. Chu, S. Yu, E.-J. Shin, D. Kim, G. Ihm, Korea
- 886 **Micromaser with Atomic Coherence,**
C. A. Arancibia-Bulnes, H. Moya-Cessa, Mexico
- 888 **Interrelation Between Non-linear Optical Properties and Structure-Topological Order in Ternary Ge-As-S Glasses,**
I. Fekeshgazi, K. May, V. Mitsa, V. Roman, A. Vakaruk, Ukraine
- 889 **Phase Hologram Formation Dynamics for Dichromated Gelatin Film,**
Y. L. Lee, Y. S. Im, Y. J. Sohn, C. H. Kwak, O. S. Choe, Korea
- 891 **Nonclassical Spatial Properties of Light Propagation in a $X^{(2)}$ Materials,**
M. D. Angelis, C. Sibilia, M. Bertolotti, Italy; R. Horak, J. Perina, Czech

ICO-XVII

OPTICS FOR SCIENCE AND NEW TECHNOLOGY

PRESIDENT'S MESSAGE

On behalf of the International Commission for Optics (ICO) I should like to welcome you to ICO-17: Optics for Science and New Technology.

We are pleased that ICO-17 is being hosted by Korea, after venues in Canada, Germany, and Hungary, to mention only the previous three ICO Conferences. This Conference and General Assembly is held every three years and is undoubtedly the highlight among all ICO events.

A total of 616 papers (32 of them invited) will be presented. This makes this Congress one of the most tightly packed of the last years. The Authors come from 32 different territories, thus endowing this Conference with a truly international character.

Among the invited papers there will be at least four by the ICO Prize and Galileo Galilei Medal winners of the last three years. ICO-Prize is a well established award for researchers under 40 who have made an outstanding contribution to Optics. The Galileo Galilei Medal was first awarded in 1994, and is intended for scientists who have contributed to Optics in difficult conditions. The Prizes and Galileo Medals for 1994, 1995 and 1996 will be presented at the Opening Ceremony.

At ICO-17 the General Assembly of the International Commission for Optics, that is the triennial business meeting, will also take place, where all important decisions will be taken and a new Bureau elected, for the running of ICO affairs during the next three years. Date and location of ICO-18 will also be decided. In addition to delegates from member territories, observers are also welcome both from member territories and, especially, from those countries which do not yet belong to ICO and are interested in knowing our activity. At present the number of territory members is 43, one of which being an associate.

At ICO-17 you will be able to examine, in addition to its two predecessors, copies of the new ICO-Book: "Trends in Optics; Research Devices and Applications", the third of a series that ICO publishes, every three years. The distinguishing feature of these books is their wide range of short, readable and partly speculative articles, with the purpose of promoting knowledge of recent developments in the field of optics. All royalties are given to ICO, to help ICO activities, especially those in favour of optics in developing countries.

The International Commission for Optics is very grateful to all the Sponsors, Organizations and dedicated individuals, who have contributed to the complex organization of such an important international event. I should like to thank particularly professor Sang Soo Lee, my co-chair of the Organizing Committee, who was chiefly responsible for the organization of the Conference, and the ICO Territorial Committee of Korea.

ICO is an essential forum, both for the promotion of optics, and for mutual understanding between scientists from all over the world. In this spirit I hope that all attendees will enjoy exchange of scientific information and have the pleasure of seeing old friends and making new ones. I also hope that this encounter with an ancient civilization and tradition will be enriching especially for those of us coming from very different cultural backgrounds.

Anna Consortini
President 1993-1996
ICO

ICO-XVII

OPTICS FOR SCIENCE AND
NEW TECHNOLOGY

PREFACE

Distinguished scientists, dear colleagues and friends,

It gives me a great pleasure to give all participants in ICO XVII Taejon, Korea my very sincere greeting. It is a very important occasion to all of us to hear of many achievements made in the last few years in optical science and engineering and to exchange opinions and appraise their accomplishments in research and development. The participants have come from nearly 40 countries all over the world and about six hundred papers are presented. This is the greatest occasion to Korean optical community as it is the largest event she has ever had in this country.

Optics today is diversified fast to nearly all fields of science, technology and medicine. Fundamental aspects in optics do also grow fast, and in the coming 21st century we should be living with optics. At the same time, we have a number of great challenges for the bright optical world in the coming century. I am sure those challenges can be overcome by our devotion and concentration and the future world will become much brighter.

This year, ICO inaugurates the Galileo Galilei Award to be given to the optical scientist/engineer working in the adverse environment in the developing world. The Award is realized by the effort of our President A. Consortini supported by the Italian Society for Optics and Photonics(SIOF). This award is to encourage further development of optics in the developing countries and has an important significance to the global optics community.

Dear colleagues, Korea is a small and lamentably divided country. The people are traditionally kind and friendly. Koreans enjoy steady 5000 years of history, and I strongly suggest our colleagues to take a look at some of our old tradition and culture while you stay in Korea with us.

Before closing, I want to thank all of you once again for your participating in the ICO XVII, Taejon, Korea and hope you feel at home definitely. Any shortcoming may be cleared up immediately to make your stay in Korea most comfortable and fruitful.

Best wishes,

Sang Soo Lee

Co-chair ICO XVII, Taejon, Korea
