PROCEEDINGS OF SPIE

Smart Materials IV

Nicolas H. Voelcker

Chair/Editor

11–13 December 2006

Adelaide, Australia

Sponsored and Published by

SPIE—The International Society for Optical Engineering

Cosponsored by

Australian Government Department of Defence, Defence Science and Technology
Organisation (Australia)

Office of Naval Research through the Global Office of Naval Research Science and
Technology (USA)

Air Force Office of Scientific Research through the Asian Office of Aerospace Research
and Development (USA and Japan)

COSNet-ARC Complex Open Systems Research Network (Australia)

Australian Research Council Nanotechnology Network (Australia)

Volume 6413

The International Society
for Optical Engineering

Proceedings of SPIE—The International Society for Optical Engineering, 9780819465214, v. 6413

SPIE is an international technical society dedicated to advancing engineering and scientific
applications of optical, photonic, imaging, electronic, and optoelectronic technologies.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Disclaimer: The support provided for the conference by the co-sponsors is not intended as an endorsement of the contents of anything in these proceedings. Specifically, DSTO support is not intended to express or imply endorsement by the Australian Commonwealth Government; AFOSR/AOARD support is not intended to express or imply endorsement by the U.S. Federal Government; ONR Global support is not intended to express or imply endorsement by the U.S. Federal Government; COSNet support is not intended to express or imply endorsement by the Australian Research Council (ARC) or the Australian Commonwealth Government; ARC Nanotech Network support is not intended to express or imply endorsement by the Australian Research Council (ARC) or the Australian Commonwealth Government.

COMPOSITE NANOMATERIALS

- 641302 **Anisotropic surface roughness enhances the bending response of ionic polymer-metal composite (IPMC) artificial muscles** [6413-02]
B. L. Stoimenov, RIKEN (Japan); J. M. Rossiter, RIKEN (Japan) and Univ. of Bristol (United Kingdom); T. Mukai, RIKEN (Japan)
- 641303 **Plasma modified carbon surfaces for supporting sensor architectures** [6413-03]
J. S. Quinton, A. Deslandes, A. Barlow, J. G. Shapter, Flinders Univ. (Australia)

NANOMATERIAL-BASED SENSORS

- 641304 **Three-dimensional network of ZnO tetrapods for use in gas sensing (Invited Paper)** [6413-04]
J.-J. Delaunay, K. Yanagisawa, T. Nishino, I. Yamada, The Univ. of Tokyo (Japan)
- 641305 **Modeling of active fiber composite for delamination sensing** [6413-05]
P. J. Guruprasad, Texas A&M Univ. (USA); A. K. Tamrakar, D. Harursampath, Indian Institute of Science, Bangalore (India)
- 641306 **Highly reliable advanced grid structures (HRAGS) for aircraft structures using multi-point FBG sensor** [6413-06]
H. Takeya, K. Sekine, M. Kume, T. Ozaki, Mitsubishi Electric Corp. (Japan); N. Takeda, The Univ. of Tokyo (Japan); N. Tajima, R&D Institute of Metals and Composites for Future Industries (Japan)

Pagination: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication.

SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

PIEZOELECTRICS

- 641308 **Low-temperature processing of lead zirconate titanate thin films by 28 GHz microwave irradiation for MEMS application** [6413-08]
Z. J. Wang, H. Kokawa, H. Takizawa, Tohoku Univ. (Japan); M. Ichiki, R. Maeda, National Institute of Advanced Industrial Science and Technology (Japan)
- 641309 **Analysis of constrained piezoelectric thin film sensor** [6413-09]
R. Ali, S. Gopalakrishnan, Indian Institute of Science, Bangalore (India)

BIONANOTECHNOLOGY I

- 64130B **Microarrays for the evaluation of cell-biomaterial surface interactions (Invited Paper)** [6413-11]
H. Thissen, CSIRO Molecular and Health Technologies (Australia) and CSIRO Food Futures Flagship (Australia); G. Johnson, G. McFarland, CSIRO Molecular and Health Technologies (Australia); B. C. H. Verbiest, CSIRO Molecular and Health Technologies (Australia) and Eindhoven Univ. of Technology (Netherlands); T. Gengenbach, CSIRO Molecular and Health Technologies (Australia); N. H. Voelcker, CSIRO Food Futures Flagship (Australia) and Flinders Univ. (Australia)
- 64130C **A platform for the advanced spatial and temporal control of biomolecules** [6413-12]
A. L. Hook, Flinders Univ. (Australia) and CSIRO Molecular and Health Technologies (Australia); H. Thissen, CSIRO Molecular and Health Technologies (Australia); J. P. Hayes, MiniFAB (Australia); N. H. Voelcker, Flinders Univ. (Australia)
- 64130D **Radio frequency controlled microvalve for biomedical applications** [6413-13]
D. W. Dissanayake, A. C. Tikka, S. F. Al-Sarawi, D. Abbott, Univ. of Adelaide (Australia)

BIONANOTECHNOLOGY II

- 64130E **Nanomechanical properties of supported lipid bilayers studied by force spectroscopy (Invited Paper)** [6413-14]
S. Garcia-Manyas, G. Oncins, F. Sanz, Univ. de Barcelona (Spain)
- 64130F **Hybrid organic-inorganic nanoparticles: controlled incorporation of gold nanoparticles into virus-like particles and application in surface-enhanced Raman spectroscopy** [6413-15]
M. Niebert, J. Riches, M. Howes, C. Ferguson, R. G. Parton, A. P. J. Middelberg, L. Rintoul, P. M. Fredericks, Queensland Univ. of Technology (Australia)

ACTIVE MATERIALS

- 64130G **Responsive interfaces grafted with polyelectrolyte or polyampholyte (Invited Paper)** [6413-16]
Y. Tran, S. Sanjuan, N. Pantoustier, P. Perrin, Lab. de Physico-chimie des Polymères et des Milieux Dispersés, ESPCI (France)

LASER-ASSISTED NANOFABRICATION

- 64130K **Three-dimensional deposition of silicon from silicate glass with dispersed metallic aluminum by a femtosecond laser (Invited Paper)** [6413-21]
K. Miura, Y. Shimotsuma, M. Sakakura, S. Kanehira, M. Hamabe, K. Hirao, Kyoto Univ. (Japan)
- 64130L **Laser interference deposition of silver nanoparticles on glass** [6413-22]
F. Funabiki, T. Yano, S. Shibata, Tokyo Institute of Technology (Japan)
- 64130M **Nano-sized modification of transparent materials using femtosecond laser irradiation** [6413-23]
S. Kanehira, K. Miura, K. Fujita, K. Hirao, Kyoto Univ. (Japan)

POSTER SESSION

- 64130O **Measurement of mechanically induced luminescence from microparticles** [6413-26]
T. Koga, K. Sakai, S. Maehara, N. Terasaki, Y. Imai, C. N. Xu, National Institute of Advanced Industrial Science and Technology (Japan)
- 64130P **Mechanical response of a low-temperature sintered body consisting of submicron gold particles** [6413-27]
T. Shibutani, Q. Yu, Y. Fujisawa, M. Shiratori, Yokohama National Univ. (Japan); K. Tsurumi, T. Ogashiwa, M. Miyairi, Tanaka Kikinzoku Kogyo K.K. (Japan)
- 64130Q **Silica nanostructure formation from synthetic R5 peptide** [6413-30]
I. Tajuddin, Haluoleo Univ. (Indonesia); N. Voelcker, J. Mitchell, Flinders Univ. (Australia)
- 64130R **Application of nanostructured biochips for efficient cell transfection microarrays** [6413-31]
Y. Akkamsetty, Flinders Univ. (Australia); A. L. Hook, Flinders Univ. (Australia) and CSIRO Molecular and Health Technologies (Australia); H. Thissen, CSIRO Molecular and Health Technologies (Australia); J. P. Hayes, MiniFAB (Australia); N. H. Voelcker, Flinders Univ. (Australia)
- 64130V **Fabrication of embedded conductive layer in polymer by plasma immersion ion implantation** [6413-36]
P. C. T. Ha, Z. J. Han, B. K. Tay, Nanyang Technological Univ. (Singapore)
- 64130X **Preparation of SMART wound dressings based on colloidal microgels and textile fibres** [6413-39]
V. J. Cornelius, N. Majcen, M. J. Snowden, J. C. Mitchell, Univ. of Greenwich (United Kingdom); B. Voncina, The Univ. of Maribor (Slovenia)
- 64130Y **The use of colloidal microgels for the controlled delivery of proteins and peptides** [6413-40]
V. J. Cornelius, M. J. Snowden, J. C. Mitchell, Univ. of Greenwich (United Kingdom)

- 64130Z **A novel surface modification approach for protein and cell microarrays** [6413-42]
M. D. Kurkuri, Flinders Univ. (Australia); C. Driever, CSIRO Molecular and Health Technologies (Australia); H. W. Thissen, CSIRO Molecular and Health Technologies (Australia) and CSIRO Food Futures Flagship (Australia); N. H. Voelcker, Flinders Univ. (Australia), CSIRO Molecular and Health Technologies (Australia), and CSIRO Food Futures Flagship (Australia)

Author Index

Conference Committee

Symposium Chairs

Joe G. Shapter, Flinders University of South Australia (Australia)
Vijay K. Varadan, University of Arkansas (USA)
Derek Abbott, The University of Adelaide (Australia)

Conference Chair

Nicolas H. Voelcker, Flinders University of South Australia (Australia)

Conference Cochairs

Alan R. Wilson, Defence Science and Technology Organisation (Australia)
Hans J. Griesser, University of South Australia (Australia)
Neville V. Richardson, University of St. Andrews (United Kingdom)
Fausto Sanz, Universitat de Barcelona (Spain)

Program Committee

Frank Caruso, The University of Melbourne (Australia)
Giuseppe Cavallaro, Commonwealth Scientific and Industrial Research Organisation (Australia)
Jason P. Hayes, MiniFAB Pty Ltd. (Australia)
Sunil Kumar, University of South Australia (Australia)
Max Lu, The University of Queensland (Australia)
David Mainwaring, Royal Melbourne Institute of Technology (Australia)
Thomas Maschmeyer, The University of Sydney (Australia)
Anton P. J. Middelberg, The University of Queensland (Australia)
Colin Raston, The University of Western Australia (Australia)
Helmut W. Thissen, Commonwealth Scientific and Industrial Research Organisation (Australia)
Wei-Bor Tsai, National Taiwan University (Taiwan)
Terence W. Turney, Commonwealth Scientific and Industrial Research Organisation (Australia)
Robert B. Yates, Gillette Management Inc. (United Kingdom)

Session Chairs

- 1 Composite Nanomaterials
Sunil Kumar, University of South Australia (Australia)
- 2 Nanomaterial-based Sensors
Alan R. Wilson, Defence Science and Technology Organisation (Australia)

- 3 Piezoelectrics
 Neville V. Richardson, University of St. Andrews (United Kingdom)
- 4 Bionanotechnology I
 Nicolas H. Voelcker, Flinders University of South Australia (Australia)
- 5 Bionanotechnology II
 Helmut W. Thissen, Commonwealth Scientific and Industrial Research
 Organisation (Australia)
- 6 Active Materials
 Neville V. Richardson, University of St. Andrews (United Kingdom)
- 7 Organic Thin Films
 Nicolas H. Voelcker, Flinders University of South Australia (Australia)
- 8 Laser-assisted Nanofabrication
 Jason P. Hayes, MiniFAB Pty Ltd. (Australia)

Introduction

The conference Smart Materials IV was part of the SPIE International Symposium on Smart Materials, Nano- and Micro-Smart Systems, held at Adelaide University, Adelaide, Australia, on 11–13 December 2006.

This multidisciplinary conference covered a wide range of topical smart materials issues including nanomaterial-based sensors, composite nanomaterials, stimuli-responsive materials, piezoelectrics, organic thin films, laser-assisted nanofabrication, electroactive polymers, surface modification, bio-inspired materials, and many more.

Our thanks go to the symposium chairs, first and foremost Associate Professor Joe Shapter, but certainly also Professor Vijay Varadan and Professor Derek Abbott, for bringing their organizational talents to bear to this thoughtfully arranged symposium. Special thanks go to the international program committee for their support in reviewing papers. We thank SPIE's technical programs and proceedings staff for their skillful organizing and editing work. We appreciated greatly the co-sponsorship by the Defence Science and Technology Organisation, the Office of Naval Research, and the Air Force Office of Scientific Research, as well as the Australian Nanotechnology Network and the Complex Open Systems Research Network of the Australian Research Council.

All manuscripts in this conference were peer-reviewed by two or more members of the international program committee. The manuscripts were judged on the basis of originality, substance, technical quality, and significance. The review outcomes have been provided to the authors.

Finally, our appreciation must go to the authors for sharing their work and ideas. The enthusiasm and interaction shown during the conference period among authors and attendees has rewarded us greatly.

Nicolas H. Voelcker
Alan Wilson
Neville Richardson
Fausto Sanz

Major Co-sponsor

Co-sponsors

ARC Complex Open Systems Research Network

We wish to thank the co-sponsors for their contribution to the success of the conference:

Defence Science and Technology Organisation (DSTO)

Air Force Office of Scientific Research, Asian Office of Aerospace Research and Development

Office of Naval Research Global

ARC Complex Open Systems Research Network

ARC Nanotechnology Network
