The International Society
for Optical Engineering

Proceedings of SPIE—The International Society for Optical Engineering, 9780819465481, v. 6435

SPIE is an international technical society dedicated to advancing engineering and scientific applications of optical, photonic, imaging, electronic, and optoelectronic technologies.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Contents

ix *Conference Committee*

SESSION 1 THEORY/MODELING I

- 643502 **The ratio of entropy to enthalpy for thermal transitions in biological cells, tissues, and materials, and its implications for biology (Invited Paper)** [6435-01]
S. Jacques, Oregon Health and Science Univ. (USA)
- 643504 **Comparative analysis of histological results of visible lesion thresholds for thermal and LIB induced skin damage at 1.3 μm and 1.5 μm** [6435-03]
J. J. Zohner, AFRL/HEDO (USA); D. J. Stolarski, Northrop Grumman (USA); G. M. Pocock, AFRL/HEDO (USA); J. R. Cowart, AFRL/HEDV (USA); C. D. Clark III, Northrop Grumman (USA); R. J. Thomas, AFRL/HEDO (USA); C. P. Cain, Northrop Grumman (USA); S. S. Kumru, B. A. Rockwell, AFRL/HEDO (USA)
- 643505 **Modeling of surface thermodynamics and damage thresholds in the IR and THz regime** [6435-04]
C. D. Clark III, Northrop Grumman (USA); R. J. Thomas, Air Force Research Lab. (USA); P. D. S. Maseberg, G. D. Buffington, L. J. Irvin, Fort Hays State Univ. (USA); J. Stolarski, B. A. Rockwell, Air Force Research Lab. (USA)

SESSION 2 THEORY/MODELING II

- 643506 **A thermal model of laser absorption** [6435-05]
D. G. Mixon, W. P. Roach, Air Force Research Lab. (USA)
- 643507 **Electromagnetic properties of tissue in the optical region** [6435-06]
K. M. Yaws, D. G. Mixon, W. P. Roach, Air Force Research Lab. (USA)
-

Pagination: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication.

SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

- 643509 **A scaling Monte Carlo method for diffuse reflectance computation from multi-layered media** [6435-08]

Q. Liu, N. Ramanujam, Duke Univ. (USA)

SESSION 3 THERMAL EFFECTS I

- 64350A **Propagation effects in the assessment of laser damage thresholds to the eye and skin (Invited Paper)** [6435-09]

R. J. Thomas, Air Force Research Lab. (USA); R. L. Vincelette, Air Force Research Lab. (USA); C. D. Clark III, Northrop Grumman (USA); J. Stolarski, Air Force Research Lab. (USA); L. J. Irvin, G. D. Buffington, Fort Hays State Univ. (USA)

- 64350B **Damage threshold of in vivo rabbit cornea by 2 μ m laser irradiation** [6435-10]

B. Chen, The Univ. of Texas at Austin (USA); J. Oliver, AFRL/HEDO (USA); S. Dutta, G. H. Rylander III, The Univ. of Texas at Austin (USA); S. L. Thomsen, Pathology Consultant (USA); A. J. Welch, The Univ. of Texas at Austin (USA)

- 64350C **Thermal lensing in the ocular media** [6435-11]

R. L. Vincelette, Air Force Research Lab. (USA) and The Univ. of Texas at Austin (USA); R. J. Thomas, B. A. Rockwell, Air Force Research Lab. (USA); A. J. Welch, The Univ. of Texas at Austin (USA)

- 64350D **An observation of ablation effect of soft biotissue by pulsed Er:YAG laser** [6435-12]

X. Zhang, S. Xie, Fujian Normal Univ. (China); Q. Ye, Fujian Medical Univ. (China); Z. Zhan, Fujian Normal Univ. (China)

- 64350E **CO₂ laser milling of hard tissue** [6435-13]

M. Werner, Ctr. of Advanced European Studies and Research (Germany) and Heinrich-Heine Univ. (Germany); M. Ivanenko, Ctr. of Advanced European Studies and Research (Germany); D. Harbecke, Ctr. of Advanced European Studies and Research (Germany) and Heinrich-Heine Univ. (Germany); M. Klasing, Ctr. of Advanced European Studies and Research (Germany); H. Steigerwald, Heinrich-Heine Univ. (Germany) and Rheinische Friedrich-Wilhelms-Univ. (Germany); P. Hering, Ctr. of Advanced European Studies and Research (Germany) and Heinrich-Heine Univ. (Germany)

SESSION 4 THERMAL EFFECTS II

- 64350F **Utility of birefringence changes due to collagen thermal denaturation rate process analysis: vessel wall temperature estimation for new short term heating balloon angioplasty** [6435-14]

K. Kaneko, N. Shimazaki, M. Gotoh, E. Nakatani, T. Arai, Keio Univ. (Japan)

- 64350G **Air leak seal for lung dissection plane with diode laser irradiation: an ex vivo study** [6435-15]

M. Gotoh, H. Tokunaga, K. Kaneko, T. Arai, Keio Univ. (Japan)

- 64350H **Thermal effect control for biomedical tissue by free-electron laser** [6435-16]

S. Yoshihashi-Suzuki, T. Kanai, K. Awazu, Osaka Univ. (Japan)

SESSION 5 IMAGING, SPECTROSCOPY, AND OPTICAL PROPERTIES

- 64350I **Reduced scattering coefficient determination by non-contact oblique angle illumination: methodological considerations** [6435-17]
T. Lindbergh, M. Larsson, I. Fredriksson, T. Strömberg, Linköping Univ. (Sweden)
- 64350J **Determination of light absorption, scattering, and anisotropy factor of a highly scattering medium using backscattered circularly polarized light** [6435-18]
M. Xu, Fairfield Univ. (USA); M. Alrubaiee, S. K. Gayen, R. R. Alfano, City College/CUNY (USA)
- 64350L **White-light oblique-incidence diffuse reflectance spectroscopy for classification of in-vivo pigmented skin lesions** [6435-20]
A. Garcia-Urbe, E. B. Smith, Texas A&M Univ. (USA); M. Duvic, The Univ. of Texas, M.D. Anderson Cancer Ctr. (USA); L. V. Wang, Washington Univ. in St. Louis (USA)
- 64350M **Multispectral angular domain optical tomography in scattering media with argon and diode laser sources** [6435-21]
P. K. Y. Chan, F. Vasefi, G. H. Chapman, B. Kaminska, N. Pfeiffer, Simon Fraser Univ. (Canada)

SESSION 6 LASER TISSUE INTERACTION I

- 64350O **Aqueous humor outflow effects of partial thickness channel created by a femtosecond laser in ex vivo human eyes** [6435-24]
D. Chai, G. Chaudhary, R. Kurtz, T. Juhasz, Univ. of California, Irvine (USA)
- 64350P **Development of ultrasound technique to detect and characterize laser-induced microbubbles** [6435-25]
A. B. Karpiouk, F. Bourgeois, S. R. Aglyamov, A. Ben-Yakar, S. Y. Emelianov, The Univ. of Texas at Austin (USA)
- 64350Q **Visible lesion laser thresholds in Cynomolgus (*Macaca fascicularis*) retina with a 1064-nm 12-ns pulsed laser** [6435-26]
J. W. Oliver, Air Force Research Lab. (USA); D. J. Stolarski, G. D. Noojin, H. M. Hodnett, M. L. Imholte, Northrop Grumman (USA); B. A. Rockwell, S. S. Kumru, Air Force Research Lab. (USA)

SESSION 7 LASER TISSUE INTERACTION II

- 64350R **Laser stimulation of auditory neurons at high-repetition rate** [6435-27]
A. D. Izzo, Northwestern Univ. (USA) and Feinberg Medical School, Northwestern Univ. (USA); P. Littlefield, Feinberg Medical School, Northwestern Univ. (USA); J. T. Walsh, Jr., Northwestern Univ. (USA); J. Webb, H. Ralph, M. Bendett, Aculight Corp. (USA); E. D. Jansen, Vanderbilt Univ. (USA); C.-P. Richter, Feinberg Medical School, Northwestern Univ. (USA)
- 64350S **Dynamic change of characteristics of (modified) fiber tips used with microsecond pulsed lasers in a liquid environment influencing the effectiveness and safety of treatment** [6435-28]
R. Verdaasdonk, J. Klaessens, R. de Roode, T. de Boorder, Univ. Medical Ctr. Utrecht (Netherlands); J. Blanken, Private Dental Clinic (Netherlands)

- 64350T **The use of planarians as in vivo animal model to study laser biomodulation effects** [6435-29]
E. Munin, N. M. R. Garcia, A. G. Braz, S. C. de Souza, L. P. Alves, Univ. do Vale do Paraíba (Brazil); M. A. C. Salgado, Univ. Estadual Paulista (Brazil); V. Pilla, Univ. do Vale do Paraíba (Brazil)
- 64350U **The new methods of treatment for age-related macular degeneration using the ultra-short pulsed laser** [6435-30]
Y. Iwamoto, K. Awazu, S. Suzuki, Osaka Univ. (Japan); T. Ohshima, M. Sawa, H. Sakaguchi, Y. Tano, Osaka Univ. Medical School (Japan); M. Ohji, Shiga Univ. of Medical Science (Japan)
- 64350V **Short and ultrashort laser pulse induced bubbles on transparent and scattering tissue models** [6435-31]
F. Pérez-Gutierrez, Univ. of California, Riverside (USA); R. Evans, S. Camacho-Lopez, Ctr. de Investigación Científica y de Educación Superior de Ensenada (Mexico); G. Aguilar, Univ. of California, Riverside (USA)

SESSION 8 LASER TISSUE INTERACTION III

- 64350W **Infrared laser damage thresholds for skin at wavelengths from 0.810 to 1.54 microns for femtosecond to microsecond pulse durations (Invited Paper)** [6435-32]
C. P. Cain, Northrop Grumman (USA); W. P. Roach, AFRL/HEDO (USA); D. J. Stolarski, G. D. Noojin, Northrop Grumman (USA); S. S. Kumru, AFRL/HEDO (USA); K. L. Stockton, Northrop Grumman (USA); J. J. Zohner, B. A. Rockwell, AFRL/HEDO (USA)
- 64350X **Theoretical and experimental bioeffects research for high-power terahertz electromagnetic energy** [6435-47]
J. McQuade, N. Jindra, S. Kumru, Air Force Research Lab. (USA); R. Seaman, A. Salazar, General Dynamics AES (USA); V. Villavicencio, C. D. Clark III, Northrop Grumman (USA); K. Yaws, J. Payne, R. Thomas, W. Roach, Air Force Research Lab. (USA)
- 64350Z **Non-ablative collagen remodeling initiated by different laser effects: a comparative study on mouse model** [6435-34]
H. Liu, Y. Dang, Z. Wang, Q. Ren, Shanghai Jiao Tong Univ. (China)

SESSION 9 CELLULAR EFFECTS I

- 643511 **Functional and cellular responses to laser injury in the rat snake retina (Invited Paper)** [6435-36]
R. D. Glickman, Univ. of Texas Health Science Ctr. at San Antonio (USA); W. R. Elliott III, Naval Health Research Ctr. (USA); N. Kumar, Univ. of Texas Health Science Ctr. at San Antonio (USA)
- 643512 **Live cell opto-injection by femtosecond laser pulses** [6435-38]
J. Baumgart, Laser Zentrum Hannover e.V. (Germany); W. Bintig, A. Ngezahayo, Leibniz Univ. (Germany); W. Ertmer, Univ. of Hannover (Germany); H. Lubatschowski, A. Heisterkamp, Laser Zentrum Hannover e.V. (Germany)

- 643513 **Enhanced angiogenesis in grafted skins by gene transfer of human hepatocyte growth factor using laser-induced stress waves** [6435-39]
M. Terakawa, Keio Univ. (Japan); S. Sato, D. Saitoh, National Defense Medical College Research Institute (Japan); H. Tsuda, National Defense Medical College (Japan); H. Ashida, National Defense Medical College Research Institute (Japan); H. Okano, Keio Univ. School of Medicine (Japan); M. Obara, Keio Univ. (Japan)
- 643515 **An in vitro model for retinal laser damage** [6435-41]
M. L. Denton, M. S. Foltz, K. J. Schuster, Northrop Grumman (USA); L. E. Estlack, Conceptual MindWorks, Inc. (USA); H. M. Hodnett, G. D. Noojin, Northrop Grumman (USA); R. J. Thomas, Air Force Research Lab. (USA)

SESSION 10 CELLULAR EFFECTS II

- 643518 **Laser-induced stress wave-assisted gene transfection: improved transfection efficiency with cationic liposome-modified plasmid DNA** [6435-44]
R. Otsuka, M. Terakawa, Keio Univ. (Japan); S. Sato, Y. Satoh, K. Takishima, H. Ashida, National Defense Medical College (Japan); M. Obara, Keio Univ. (Japan)

POSTER SESSION

- 64351B **A blue-violet laser irradiation stimulates bone nodule formation of mesenchymal stromal cells by the control of the circadian clock protein** [6435-37]
T. Kushibiki, K. Awazu, Osaka Univ. (Japan)

Author Index

Conference Committee

Symposium Chairs

James G. Fujimoto, Massachusetts Institute of Technology (USA)
R. Rox Anderson, Wellman Center for Photomedicine (USA),
Massachusetts General Hospital (USA), and Harvard School of Medicine
(USA)

Program Track Chair

Steven L. Jacques, Oregon Health and Science University (USA)
William P. Roach, Air Force Research Laboratory (USA)

Conference Chairs

Steven L. Jacques, Oregon Health and Science University (USA)
William P. Roach, Air Force Research Laboratory (USA)

Program Committee

Wei R. Chen, University of Central Oklahoma (USA)
Randolph D. Glickman, The University of Texas Health Science Center at
San Antonio (USA)
E. Duco Jansen, Vanderbilt University (USA)
Abraham Katzir, Tel Aviv University (Israel)
Jessica C. Ramella-Roman, The Catholic University of America (USA)
Robert J. Thomas, Air Force Research Laboratory (USA)
Alfred Vogel, Medizinisches Laserzentrum Lübeck GmbH (Germany) and
Universität zu Lübeck (Germany)
Lihong V. Wang, Washington University in St. Louis (USA)

Session Chairs

- 1 Theory/Modeling I
William P. Roach, Air Force Research Laboratory (USA)
- 2 Theory/Modeling II
William P. Roach, Air Force Research Laboratory (USA)
- 3 Thermal Effects I
E. Duco Jansen, Vanderbilt University (USA)
- 4 Thermal Effects II
E. Duco Jansen, Vanderbilt University (USA)

- 5 Imaging, Spectroscopy, and Optical Properties
Lihong V. Wang, Washington University in St. Louis (USA)
- 6 Laser Tissue Interaction I
Alfred Vogel, Medizinisches Laserzentrum Lübeck GmbH (Germany) and
Universität zu Lübeck (Germany)
- 7 Laser Tissue Interaction II
Robert J. Thomas, Air Force Research Laboratory (USA)
- 8 Laser Tissue Interaction III
Robert J. Thomas, Air Force Research Laboratory (USA)
- 9 Cellular Effects I
Jessica C. Ramella-Roman, The Catholic University of America (USA)
- 10 Cellular Effects II
Randolph D. Glickman, The University of Texas Health Science Center at
San Antonio (USA)
