Contents

vii	Conference Committee
ix	Introduction

SESSION 1 LAB-ON-A-CHIP I

- 646502 **Methods and instruments for continuous-flow PCR on a chip (Invited Paper)** [6465-01]
C. Gärtner, microfluidic ChipShop GmbH (Germany); R. Klemm, Fraunhofer Institute for Applied Optics and Precision Mechanics (Germany); H. Becker, microfluidic ChipShop GmbH (Germany)
- 646503 **Micro-devices for rapid continuous separation of suspensions for use in micro-total-analysis-systems (μ TAS)** [6465-02]
I. Gregoratto, C. J. McNeil, M. W. Reeks, Newcastle Univ. (United Kingdom)
- 646504 **Thermal gradient PCR in a continuous-flow microchip** [6465-03]
N. Crews, C. Wittwer, B. Gale, Univ. of Utah (USA)
- 646505 **A hyper-step DNA computing system based on surface plasmon resonance** [6465-34]
T.-Y. Chang, National Taiwan Univ. (Taiwan); C.-H. Lin, National Sun Yat-Sen Univ. (Taiwan); C.-N. Yang, I-Shou Univ. (Taiwan); C.-W. Lin, National Taiwan Univ. (Taiwan)

SESSION 2 MICROFLUIDICS I

- 646506 **Diffusion dynamics in microfluidic dye lasers** [6465-06]
M. Gersborg-Hansen, S. Balslev, N. A. Mortensen, A. Kristensen, Technical Univ. of Denmark (Denmark)
- 646507 **A novel electrolysis-bubble-actuated micropump** [6465-07]
C.-M. Cheng, C.-H. Liu, National Tsing-Hua Univ. (Taiwan)

Pagination: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication.

SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

- 646508 **Using a CD-like microfluidic platform for uniform calcium alginate drug carrier generation** [6465-08]
M.-K. Liu, K.-S. Huang, National Cheng Kung Univ. (Taiwan); J.-Y. Chang, Industrial Technology Research Institute (Taiwan); C.-H. Wu, National Chiao Tung Univ. (Taiwan); Y.-C. Lin, National Cheng Kung Univ. (Taiwan)
- 646509 **Set-up of a biological monitoring module realized in LTCC technology** [6465-09]
W. Smetana, B. Balluch, G. Stangl, Vienna Univ. of Technology (Austria); E. Gaubitzer, M. Edetsberger, G. Köhler, Univ. of Vienna (Austria)
- 64650A **A simple planar micromixer with low-pressure drop for disposable lab-on-a-chip (LOC) systems** [6465-29]
A. A. S. Bhagat, E. T. K. Peterson, I. Papautsky, Univ. of Cincinnati (USA)
- 64650B **Fabrication of a microfluidic system with integrated electrochemical pump and valves** [6465-39]
D. E. Lee, S. Soper, W. Wang, Louisiana State Univ. (USA)

SESSION 3 **SENSORS**

- 64650C **Assembly and testing of microparticle and microcapsule smart tattoo materials (Invited Paper)** [6465-10]
M. J. McShane, Texas A&M Univ. (USA)
- 64650D **An integrated microsystem for multiplex processing of encoded silicon microbeads** [6465-11]
D. Hoffmann, M. Curtin, M. Loughran, Univ. College Cork (Ireland)
- 64650E **Lasing droplets in a microfluidic T-junction device with integrated optics** [6465-12]
M. Tanyeri, R. Perron, I. M. Kennedy, Univ. of California, Davis (USA)
- 64650F **Hybrid microfluidic systems: combining a polymer microfluidic toolbox with biosensors** [6465-13]
C. Gärtner, S. Kirsch, B. Anton, H. Becker, microfluidic ChipShop GmbH (Germany)
- 64650G **Specific immobilization of human immunoglobulin G on gold-coated silicon microcantilever array** [6465-28]
S. K. Vashist, Univ. of Genoa (Italy); R. Tewari, Panjab Univ. (India); R. P. Bajpai, L. M. Bharadwaj, Central Scientific Instruments Organisation (India); R. Raiteri, Univ. of Genoa (Italy)
- 64650H **Fabrication and characterization of SiO₂ microcantilever for high sensitive moisture sensor** [6465-37]
Q. Chen, J. Fang, H.-F. Ji, K. Varahraman, Louisiana Tech Univ. (USA)

SESSION 4 **LAB-ON-A-CHIP II**

- 64650I **Nanoparticle analysis using microscale field flow fractionation (Invited Paper)** [6465-14]
B. K. Gale, H. J. Sant, Univ. of Utah (USA)

- 64650J **Three-dimensional integrated circuits for lab-on-chip dielectrophoresis of nanometer scale particles** [6465-15]
S. J. Dickerson, A. J. Noyola, S. P. Levitan, D. M. Chiarulli, Univ. of Pittsburgh (USA)
- 64650K **Integration of red VCSEL in a versatile microchip for encoding and subsequent detection of encoded beads** [6465-16]
D. Hoffmann, J. Justice, B. Corbett, M. Loughran, Univ. College Cork (Ireland)
- 64650L **Water-soluble (MUA-coated) quantum dots: physicochemical characterization and application** [6465-38]
C.-H. Yang, I-Shou Univ. (Taiwan); K.-S. Huang, S.-J. Lee, K.-C. Lin, Y.-C. Lin, National Cheng Kung Univ. (Taiwan)
- 64650M **Cross-polarization scheme for fluorescence detection for biochip and biomedical applications** [6465-44]
A. Pais, H. Mu, E. Peterson, A. Banerjee, I. Papautsky, D. Klotzkin, Univ. of Cincinnati (USA)

SESSION 5 FABRICATION TECHNOLOGIES

- 64650N **Creation of embedded structures in SU-8** [6465-19]
J. M. Dykes, D. K. Poon, J. Wang, D. Sameoto, J. T. K. Tsui, C. Choo, G. H. Chapman, A. M. Parameswaren, B. L. Gray, Simon Fraser Univ. (Canada)
- 64650O **Two-photon polymerization for fabrication of biomedical devices** [6465-20]
A. Ovsianikov, Laser Zentrum Hannover e.V. (Germany); A. Doraiswamy, R. Narayan, Univ. of North Carolina (USA); B. N. Chichkov, Laser Zentrum Hannover e.V. (Germany)
- 64650P **Mechanically assembled polymer interconnects with dead volume analysis for microfluidic systems** [6465-21]
S. Jaffer, B. L. Gray, Simon Fraser Univ. (Canada)
- 64650Q **Structural and electrical properties of conductive polymeric aligned nanofibers via electrospinning** [6465-30]
J. H. Lee, J. Castracane, A. Gadre, Univ. at Albany, SUNY (USA)
- 64650R **Optimization of COC hot embossing with soft PDMS tools** [6465-32]
K. Zhou, I. Papautsky, Univ. of Cincinnati (USA)
- 64650S **Initial investigation of SU-8 photopolymer as a material for noninvasive endothelial cell research platforms** [6465-35]
S. Westwood, Simon Fraser Univ. (Canada); A. Gojova, B. Kuo, A. I. Barakat, Univ. of California, Davis (USA); B. L. Gray, Simon Fraser Univ. (Canada)

SESSION 6 MICROFLUIDICS II

- 64650T **Concepts for micropneumatic and microhydraulic logic gates (Invited Paper)** [6465-22]
A. K. Henning, Aquarian Microsystems (USA)

- 64650U **A microfluidic MEMS sensor for the measurement of density and viscosity at high pressure** [6465-23]
C. Harrison, A. Fornari, H. Chen, S. Ryu, Schlumberger-Doll Research (USA); A. Goodwin, K. Hsu, Sugar Land Product Ctr. (USA); F. Marty, B. Mercier, École Supérieure d'Ingénieurs en Électronique et Électrotechnique (France)
- 64650V **Visualization of turbid two-fluid flows inside microfluidic conduits** [6465-24]
Y.-C. Ahn, W. Jung, Univ. of California, Irvine (USA); D. S. Kim, Chung-Ang Univ. (South Korea); S.-J. Lee, D.-W. Cho, Pohang Univ. of Science and Technology (South Korea); T. G. Kang, Eindhoven Univ. of Technology (Netherlands); T. H. Kwon, Pohang Univ. of Science and Technology (South Korea); Z. Chen, Univ. of California, Irvine (USA)
- 64650W **Numerical simulation of transient nonlinear behaviors of electric-sensitive hydrogel membrane under an external electric field** [6465-25]
Z. Yuan, Univ. of Florida (USA) and National Univ. of Singapore (Singapore); L. Yin, H. Jiang, Univ. of Florida (USA)
- 64650X **Stochastic time-of-flight flow rate measurement for microfluidic applications** [6465-26]
D. E. Angelescu, J. Jundt, Schlumberger-Doll Research (USA); J. Durivault, T. Desbarbieux, École Polytechnique (France); B. Mercier, Groupe ESIEE (France)
- 64650Y **Simple passive micromixer using recombinant multiple flow streams** [6465-33]
J. S. Shim, I. Nikcevic, M. J. Rust, A. A. S. Bhagat, W. R. Heineman, C. J. Seliskar, C. H. Ahn, I. Papautsky, Univ. of Cincinnati (USA)
- 64650Z **Numerical simulations and analysis of a micropump actuated by traveling plane waves** [6465-36]
A. F. Tabak, S. Yeşilyurt, Sabanci Univ. (Turkey)

Author Index

Conference Committee

Symposium Chair

Rajeshuni Ramesham, Jet Propulsion Laboratory (USA)

Symposium Cochair

Albert K. Henning, Aquarian Microsystems, Inc. (USA))

Conference Chairs

Ian Papautsky, University of Cincinnati (USA)

Wanjun Wang, Louisiana State University (USA)

Cochair

Claude Vauchier, CEA-LETI (France)

Program Committee

Holger Becker, microfluidic ChipShop GmbH (Germany)

Hyoungh J. Cho, University of Central Florida (USA)

Jin-Woo Choi, Louisiana State University (USA)

Bruce K. Gale, University of Utah (USA)

Yu-Cheng Lin, National Cheng Kung University (Taiwan)

Anne Pepin, CNRS/LPN (France)

Albert van den Berg, Universiteit Twente (Netherlands)

Bernhard H. Weigl, MicroPlumbers Microsciences LLC (USA)

Session Chairs

- 1 Lab-on-a-Chip I
Wanjun Wang, Louisiana State University (USA)
- 2 Microfluidics I
Claude Vauchier, CEA-LETI (France)
- 3 Sensors
Ian Papautsky, University of Cincinnati (USA)
- 4 Lab-on-a-Chip II
Yves Fouillet, Laboratory d'Electronique de Technologie de l'Information (France)

- 5 Fabrication Technologies
 Bruce K. Gale, University of Utah (USA)
- 6 Microfluidics II
 Holger Becker, microfluidic ChipShop GmbH (Germany)

Introduction

Welcome to San Jose, California, USA, and the 2007 *Microfluidics, BioMEMS and Medical Microsystems V* Conference, part of the MOEMS-MEMS Micro and Nanofabrication Symposium at SPIE Photonics West. The focus of this conference is to facilitate a technical forum to showcase and discuss recent advances in microfluidics, biomedical microelectromechanical systems (BioMEMS) and medical microsystems.

Application of microfabrication technologies to life sciences is perhaps one of the most exciting developments in the MEMS area in the recent years. In addition to many microfluidic devices, such as pumps, mixers, valves, and a variety of novel electrochemical or optical sensors, many different types of lab-on-a-chip (LOC) systems have been developed. Microfluidic devices and LOCs have generated interest in many application fields of chemistry, life sciences, medicine, and environmental engineering, due to numerous advantages over the existing macroscale systems including compact size, disposability, higher speed and throughput of analyses, increased functionality, and decreased sample volumes.

We are pleased with our conference program that includes six invited speakers, who are leaders in their respective field of research. These speakers represent both academia and industry in the USA and Europe: Holger Becker (microfluidic ChipShop, Germany), Yves Fouillet (CEA-LETI, France), Michael McShane (Texas A&M University, USA), Bruce Gale (University of Utah, USA), John Pong (Nanonex, USA), and Albert Henning (Aquarian Microsystems, USA). The technical program is organized into six sessions: Lab-on-a-Chip (I & II), Microfluidics (I & II), Fabrication Technologies, and Sensors. This year we also have a burgeoning poster session full of high-quality presentations. The selected papers discuss new research on various aspects of microfluidics and BioMEMS, including applications of LOCs to DNA amplification and analysis; biosensors; microfluidic devices for pumping, mixing, and valving; polymer fabrication technologies for micro and nano fluidics; and optical detection in LOCs. These papers represent a short glimpse into the current technology, and hopefully offer a preview of where BioMEMS and LOC technologies are heading.

We would like to thank all of the contributing authors. It is their participation and hard work that ultimately will make this meeting a success. We are also grateful to SPIE for their continuing support of this meeting. We hope that you find the meeting exciting, stimulating, and enjoyable.

Ian Papautsky
