PROCEEDINGS OF SPIE

Vertical-Cavity Surface-Emitting Lasers XI

Kent D. Choquette
James K. Guenter
Chairs/Editors

24–25 January 2007
San Jose, California, USA

Sponsored and Published by
SPIE—The International Society for Optical Engineering

Proceedings of SPIE—The International Society for Optical Engineering, 9780819465979, v. 6484

SPIE is an international technical society dedicated to advancing engineering and scientific applications of optical, photonic, imaging, electronic, and optoelectronic technologies.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Contents

vii	Conference Committee
ix	Introduction

SESSION 1 COMMERCIAL VCSELS

- 648402 **Design and manufacturing of 10G GenX VCSELS at Emcore (Invited Paper)** [6484-01]
N.-Y. Li, D. Collins, S. Jatar, O. Lavrova, C. Helms, W. Luo, L. Liu, C. Liu, M. Qiu, K. Roff,
C. Wang, EMCORE Corp. (USA); C.-C. Yang, H.-K. Chiou, National Central Univ. (Taiwan)
- 648403 **VCSEL proliferation** [6484-02]
J. Tatum, Finisar Corp. (USA)
- 648404 **High output power 670nm VCSELS** [6484-03]
K. Johnson, M. Hibbs-Brenner, Vixar (USA)
- 648405 **A TCAD approach to robust ESD design in oxide-confined VCSELS** [6484-04]
H. Meier, R. Santschi, S. Odermatt, B. Witzigmann, ETH Zürich (Switzerland); S. Eitel, Bookham
Technology plc. (Switzerland); F. Nallet, G. Letay, Synopsys Switzerland, LLC (Switzerland)

SESSION 2 EMERGING VCSEL APPLICATIONS

- 648406 **VCSELS for atomic sensors (Invited Paper)** [6484-05]
D. K. Serkland, K. M. Geib, G. M. Peake, Sandia National Labs. (USA); R. Lutwak, A. Rashed,
Symmetricom, Inc. (USA); M. Varghese, G. Tepolt, Charles Stark Draper Lab. (USA);
M. Prouty, Geometrics, Inc. (USA)
- 648407 **New markets for VCSELS: pulsed operation of high-power devices** [6484-06]
M. Grabherr, M. Miller, D. Wiedenmann, R. Jäger, R. King, U-L-M Photonics GmbH
(Germany)

Pagination: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication.

SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

- 648408 **Heterogenous integrated waveguide-coupled VCSEL-based optical interconnects (Invited Paper)** [6484-07]
J. Cheng, K. Yang, K. M. Patel, T. J. Eustis, D. A. Louderback, X. J. Jin, C. Y. Chao, J. Schoengarth, M.-Y. Shih, P. S. Guilfoyle, OptiComp Corp. (USA)

SESSION 3 VCSEL INTEGRATION

- 648409 **Monolithic integration of VCSELS and MSM photodiodes for bidirectional multimode fiber communications (Invited Paper)** [6484-08]
R. Michalzick, M. Stach, F. Rinaldi, S. Lorch, Ulm Univ. (Germany)
- 64840A **Modulation properties of VCSEL with intracavity modulator** [6484-09]
J. van Eijsden, M. Yakimov, V. Tokranov, M. Varanasi, Univ. at Albany (USA); E. M. Mohammed, I. A. Young, Intel Corp. (USA); S. Oktyabrsky, Univ. at Albany (USA)
- 64840B **Demonstration of all optical logic gates by single/differential typed vertical cavity laser with depleted optical thyristor** [6484-10]
W.-K. Choi, D.-G. Kim, Y.-T. Moon, D.-G. Kim, H. Kim, T. K. Chung, Y.-W. Choi, Chung-Ang Univ. (South Korea); K. D. Choquette, Univ. of Illinois at Urbana-Champaign (USA); S. Lee, D.-H. Woo, Korea Institute of Science and Technology (South Korea)
- 64840C **Fabrication and characterization of individually addressable vertical-cavity surface-emitting laser arrays and integrated VCSEL/PIN detector arrays** [6484-11]
A. M. Kasten, A. V. Giannopoulos, C. Long, C. Chen, K. D. Choquette, Univ. of Illinois at Urbana-Champaign (USA)

SESSION 4 VCSEL MATERIALS AND STRUCTURES

- 64840E **Low-threshold current low-resistance 1.3 μm InAs-InGaAs quantum-dot VCSELS with fully doped DBRs grown by MBE** [6484-13]
H.-C. Yu, National Cheng Kung Univ. (Taiwan); J.-S. Wang, Chung Yuan Christian Univ. (Taiwan); Y.-K. Su, S.-J. Chang, National Cheng Kung Univ. (Taiwan); H.-C. Kuo, F.-I. Lai, Y. H. Chang, National Chiao Tung Univ. (Taiwan); H.-P. D. Yang, Industrial Technology Research Institute (Taiwan)
- 64840F **1.3 μm VCSELS: InGaAs/GaAs, GaInNAs/GaAs multiple quantum wells, and InAs/GaAs quantum dots — three candidates as active material** [6484-14]
P. Gilet, E. Pugeoise, L. Grenouillet, Ph. Grosse, N. Olivier, S. Poncet, A. Chelnokov, CEA-Léti MINATEC (France); J. M. Gérard, CEA-Grenoble DRFMC (France); R. Stevens, R. Hamelin, Intexys Photonics (France); M. Hammar, J. Berggren, P. Sundgren, Royal Institute of Technology (Sweden)
- 64840G **1.55 μm InP-based electrically pumped VCSELS: comparison of buried and implanted tunnel junctions as current confinement schemes for the realization of large diameter devices** [6484-15]
A. Bousseksou, S. Bouchoule, Lab. de Photonique et de Nanostructures, CNRS (France); M. El Kurdi, Institut d'Electronique Fondamentale, CNRS, Univ. Paris Sud (France); I. Sagnes, G. Beaudoin, Lab. de Photonique et de Nanostructures, CNRS (France); P. Crozat, Institut d'Electronique Fondamentale, CNRS, Univ. Paris Sud (France); J. Jacquet, Lab. Matériaux Optiques, Photonique et Systèmes (France)

- 64840I **Numerical simulation of temperature-dependence on distributed Bragg reflector (DBR) and performance analyses for proton-implant/oxide confined VCSEL: comparison with transmission matrix, matrix calculating methods, and Macleod model** [6484-20]
H.-M. Tsai, National Defense Univ. (Taiwan); S.-F. Tang, Chung-Shan Institute of Science and Technology (Taiwan); S.-T. Sua, T.-C. Chen, National Defense Univ. (Taiwan); C.-D. Chiang, Chung-Shan Institute of Science and Technology (Taiwan)

SESSION 5 VCSEL MODULATION

- 64840J **Progress and issues for high-speed vertical cavity surface emitting lasers (Invited Paper)** [6484-16]
K. L. Lear, Colorado State Univ. (USA); A. N. Al-Omari, Yarmouk Univ. (Jordan)
- 64840K **Characterization of 1.55 μm VCSELs using high-resolution and high-dynamic range measurements of the CW optical spectrum** [6484-17]
A. Villafranca, J. Lasobras, I. Garcés, Univ. of Zaragoza (Spain)
- 64840L **Single-mode proton-implanted photonic crystal VCSELs** [6484-18]
P. O. Leisher, C. Chen, D. F. Siriani, J. D. Sulkin, K. D. Choquette, Univ. of Illinois at Urbana-Champaign (USA)

Author Index

Conference Committee

Symposium Chair

Yakov Sidorin, Photineer Technology Group (USA)

Symposium Cochair

Ali Adibi, Georgia Institute of Technology (USA)

Program Track Chair

Daniel K. Johnstone, Virginia Commonwealth University (USA)

Conference Chairs

Kent D. Choquette, University of Illinois at Urbana-Champaign (USA)

James K. Guenter, Advanced Optical Components (USA)

Program Committee

Luke A. Graham, Picolight (USA)

Karlheinz H. Guldén, Avalon Photonics, Limited (Switzerland)

Hong Q. Hou, EMCORE Corporation (USA)

Kevin L. Lear, Colorado State University (USA)

Chun Lei, Intel Corporation (USA)

Duane A. Louderback, OptiComp Corporation (USA)

John G. McInerney, National University of Ireland, Cork (Ireland)

Ryan L. Naone, Intel Corporation (USA)

Krassimir P. Panayotov, Institute of Solid State Physics (Bulgaria)

Dieter Wiedenmann, U-L-M Photonics GmbH (Germany)

Session Chairs

- 1 Commercial VCSELS
Kent D. Choquette, University of Illinois at Urbana-Champaign (USA)
- 2 Emerging VCSEL Applications
James K. Guenter, Advanced Optical Components (USA)
- 3 VCSEL Integration
Kevin L. Lear, Colorado State University (USA)
- 4 VCSEL Materials and Structures
Darwin K. Serkland, Sandia National Laboratories (USA)

- 5 VCSEL Modulation
Rainer Michalzik, Universität Ulm (Germany)

Introduction

On January 24 and 25, 2007, the 11th Vertical Cavity Surface Emitting Lasers Conference was held as part of the SPIE Photonics West Symposium in San Jose, California. This proceedings volume contains the papers and reports written by the conference presenters who discussed their activities in 2006. The topics discussed included the continued development of commercial VCSEL products, new applications for VCSELs, and the renewed efforts to integrate VCSELs with other devices for new functionality.

Commercial VCSEL manufacture continues, where the milestone of greater than 100 million VCSELs deployed in the field was achieved in 2006. VCSELs for 10 Gb/s operation were discussed, with an emphasis on device reliability. Although data comm remains the dominant VCSEL application, other uses such as laser computer mice, atomic clocks, and high-power lasers for automotive or industrial sensing were proposed.

The papers presented at the 2007 VCSEL XI Conference included in these proceedings illustrate the present status of the continuing advancement of VCSEL optoelectronic technology.
