Projection Displays XII

Ming H. Wu
Hoang Y. Lin
Chairs/Editors

24–25 January 2007
San Jose, California, USA

Sponsored by
SPIE—The International Society for Optical Engineering
Optical Research Associates (USA)

Published by
SPIE—The International Society for Optical Engineering

Volume 6489

Proceedings of SPIE—The International Society for Optical Engineering, 9780819466020, v. 6489
SPIE is an international technical society dedicated to advancing engineering and scientific applications of optical, photonic, imaging, electronic, and optoelectronic technologies.
## Contents

### SESSION 1  LIGHT SOURCE AND THE SCREEN TECHNOLOGIES I

<table>
<thead>

**Pagination:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication.

SPIE uses a six-digit CID article numbering system in which:
- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-22, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.
SESSION 3  CRITICAL COMPONENTS AND NOVEL PROJECTION TECHNOLOGIES I

648909  DVimage spatial light modulator: a new real-time interface for the Texas Instruments Discovery 3000 DMD chipset [6489-08]
S. Saggese, T. Thomas, Apogen Technologies (USA)

64890B  Design of a polarized head-mounted projection display using FLCOS microdisplays [6489-10]
R. Zhang, H. Hua, College of Optical Sciences, The Univ. of Arizona (USA)

SESSION 4  CRITICAL COMPONENTS AND NOVEL PROJECTION TECHNOLOGIES II

64890C  Dynamic optics for projection displays [6489-11]
F. Shevlin, N. Descharmes, X. Yueqiang, C. Davies, Dyoptika Ltd. (Ireland)

64890D  Tilt compensated MOEMS projector as input device [6489-12]
H. Grüger, A. Heberer, C. Gerwig, P. Nauber, M. Schollies, H. Lakner, Fraunhofer IPMS (Germany)

64890E  LED based full color stereoscopic projection system [6489-13]
L. Bogaert, Y. Meuret, B. Van Giel, H. Thienpont, Vrije Univ. Brussel (Belgium)

RELEVANT APPLICATIONS

64890G  Micro-displacement measurements with moiré patterns of fresnel zone plates films [6489-15]
M. Pérez-Cortés, Univ. Autónoma de Yucatán (Mexico); M. Ortiz-Gutiérrez, Univ. Michoacana de San Nicolás de Hidalgo (Mexico); J. C. Ibarra, Univ. de Guadalajara (Mexico); A. Olivares-Pérez, Instituto Nacional de Astrofísica, Óptica y Electrónica (Mexico); J. Becerra-Macías, Digital Optical Quantum Electronics (Mexico)

64890I  Computer simulation of spatial light modulators with micro-optical elements [6489-17]
M. A. Golub, M. Aloni, G. Manor, Explay Ltd. (Israel)

64890J  Pseudoscopic-free and multi-view 3D displays using invisible area generated by polarized slit barrier [6489-18]
K. Uchida, K. Sakamoto, Shimane Univ. (Japan)

64890K  Modulating method of linear and circular polarized illuminations for field-lens 3D display [6489-19]
K. Sakamoto, H. Morimoto, Shimane Univ. (Japan)

POSTER SESSION

64890N  Floating-image display based on the combination of two-lens system and the stereoscopic polarization-multiplexing display [6489-16]
G. Baasantseren, N. Kim, D. D. Do, Y. T. Lim, J. S. Yoon, T. H. Park, Chungbuk National Univ. (South Korea)

Author Index
Conference Committee

Symposium Chair

Yakov Sidorin, Photineer Technology Group (USA)

Symposium Cochair

Ali Adibi, Georgia Institute of Technology (USA)

Program Track Chairs

Liang-Chy Chien, Kent State University (USA)
Ming H. Wu, Hamamatsu Corporation (USA)

Conference Chairs

Ming H. Wu, Hamamatsu Corporation (USA)
Hoang Y. Lin, National Taiwan University (Taiwan)

Program Committee

David Armitage, Consultant (USA)
Patrick Candry, Barco Projection Systems (Belgium)
Dah Yu Cheng, Cheng Technology & Services (USA)
Stephen K. Eckhardt, 3M Company (USA)
Fang Chuan Ho, Delta Electronics, Inc. (Taiwan)
Larry J. Hornbeck, Texas Instruments Inc. (USA)
Robert J. Martinsen, nLight Corporation (USA)
Mark D. Peterson, InFocus Corporation (USA)
Ting-Chung Poon, Virginia Polytechnic Institute and State University (USA)
