Proceedings of SPIE—The International Society for Optical Engineering, 9780819466464, v. 6525

SPIE is an international technical society dedicated to advancing engineering and scientific applications of optical, photonic, imaging, electronic, and optoelectronic technologies.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

xv	Symposium Committee
xvii	Introduction

SESSION 1 ENERGY HARVESTING I

- 652502 **Harvesting of electrical energy from a backpack using piezoelectric shoulder straps** [6525-01]
H. A. Sodano, J. Granstrom, J. Feenstra, Michigan Technological Univ. (USA); K. Farinholt, NanoSonic, Inc. (USA)
- 652503 **Energy harvesting using optimized piezoelectric microcantilevers** [6525-02]
M. J. Parsons, A. Elalfy, A. Lumsdaine, The Univ. of Tennessee (USA)
- 652504 **Design method for piezoelectric bending generators in energy harvesting systems** [6525-03]
B. Richter, J. Twiefel, T. Sattel, J. Wallaschek, Heinz Nixdorf Institute (Germany)

SESSION 2 ENERGY HARVESTING II

- 652507 **Analysis of PMN-PT and PZT circular diaphragm energy harvesters for use in implantable medical devices** [6525-06]
C. Mo, SangJu National Univ. (South Korea); L. J. Radziemski, Piezo Energy Technologies, LLC (USA); W. W. Clark, Univ. of Pittsburgh (USA)
- 652508 **Adaptive vibration energy harvesting** [6525-07]
S. Behrens, J. Ward, CSIRO Energy Technology (Australia); J. Davidson, James Cook Univ. (Australia)
- 652509 **A comparison between the standard and SSHI interfaces used in piezoelectric power harvesting** [6525-08]
Y. C. Shu, I. C. Lien, National Taiwan Univ. (Taiwan)

Pagination: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication.

SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

SESSION 3 MAGNETO-RHEOLOGICAL SYSTEMS

- 65250A **Agglomeration of magnetorheological fluid mass to an immersed vibrating electromagnet** [6525-09]
A. N. Vavreck, J. E. Black, The Pennsylvania State Univ. (USA)
- 65250B **Alternative power source for magneto-rheological dampers** [6525-10]
J.-H. Koo, E. Ritchie, Miami Univ. (USA); S.-W. Cho, Univ. of Western Ontario (Canada)
- 65250C **Study of a magneto-rheological grease (MRG) clutch** [6525-11]
F. Gordaninejad, B. M. Kavlicoglu, X. Wang, Univ. of Nevada, Reno (USA)
- 65250D **Rheological behavior of magneto-rheological grease (MRG)** [6525-12]
H. Sahin, F. Gordaninejad, X. Wang, A. Fuchs, Univ. of Nevada, Reno (USA)
- 65250F **Structural optimization of clutch activated by magnetorheological fluid** [6525-15]
Y. Liu, W. Meng, Z. Huang, Y. Sun, Harbin Institute of Technology (China)
- 65250G **Study of a magneto-rheological grease (MRG) damper** [6525-89]
F. Gordaninejad, M. Miller, X. Wang, H. Sahin, A. Fuchs, Univ. of Nevada, Reno (USA)

SESSION 4 SMART AEROSPACE SYSTEMS

- 65250H **Symbiotic structures to significantly enhance space missions** [6525-16]
A. D. Williams, Air Force Research Lab. (USA); M. Diaz-Aguado, Univ. of Texas, Austin (USA);
B. J. Arritt, Air Force Research Lab. (USA)
- 65250I **Hybrid acoustically layered foam (HALF) foam for improved low-frequency acoustic mitigation for launch fairings** [6525-17]
A. D. Williams, Air Force Research Lab. (USA); D. J. Domme, Virginia Tech (USA);
E. V. Ardelean, Science Applications International Corp. (USA); B. K. Henderson, Air Force Research Lab. (USA)
- 65250J **Development of a SMA hybrid composite jet engine chevron concept** [6525-18]
T. L. Turner, R. H. Cabell, R. J. Cano, R. J. Silcox, NASA Langley Research Ctr. (USA)

SESSION 5 BIOLOGY-INSPIRED AND RELATED SYSTEMS I

- 65250K **Ornithopter flight stabilization** [6525-19]
J. M. Dietl, E. Garcia, Cornell Univ. (USA)
- 65250L **Evolutionary flight and enabling smart actuator devices** [6525-20]
J. Manzo, E. Garcia, Cornell Univ. (USA)
- 65250M **Post-buckled precompressed (PBP) subsonic micro flight control actuators and surfaces** [6525-21]
R. Barrett, R. Vos, The Univ. of Kansas (USA); R. De Breuker, Technical Univ. of Delft (Netherlands)
- 65250N **Insect cyborgs: a new frontier in flight control systems** [6525-22]
T. Reissman, J. H. Crawford, E. Garcia, Cornell Univ. (USA)

- 65250O **Perching aerodynamics and trajectory optimization** [6525-23]
A. Wickenheiser, E. Garcia, Cornell Univ. (USA)

SESSION 6 BIOLOGY-INSPIRED AND RELATED SYSTEMS II

- 65250P **Chemoelectrical energy conversion of adenosine triphosphate** [6525-24]
V. B. Sundaresan, S. A. Sarles, D. J. Leo, Virginia Tech (USA)
- 65250Q **Force control of ER fluid based haptic device in virtual environment** [6525-25]
Y.-M. Han, P.-S. Kang, M.-S. Seong, S.-B. Choi, Inha Univ. (South Korea)
- 65250R **Experimental parametric study of a biomimetic fish robot actuated by piezoelectric actuators** [6525-26]
T. Wiguna, H. C. Park, S. Heo, N. S. Goo, Konkuk Univ. (South Korea)
- 65250T **A small and fast piezo-actuated legged robot** [6525-28]
A. A. Yumaryanto, J. An, S. Lee, Konkuk Univ. (South Korea)

SESSION 7 SHAPE MEMORY MATERIALS AND APPLICATIONS

- 65250U **Effects of density and cell morphologies on the shape memory effect of a porous shape memory polymer** [6525-29]
S. Simkevitz, H. Naguib, Univ. of Toronto (Canada)
- 65250V **Microscale damping using thin film active materials** [6525-30]
C. A. Kerrigan, Univ. of California Los Angeles (USA); K. K. Ho, Fortis Technologies, Inc. (USA); K. P. Mohanchandra, G. P. Carman, Univ. of California Los Angeles (USA)
- 65250W **Design optimization of shape memory alloy active structures using the R-phase transformation** [6525-31]
M. Langelaar, F. van Keulen, Delft Univ. of Technology (Netherlands)

SESSION 8 DAMPING AND ISOLATION I

- 65250Y **Nonlinear dynamics and chaos in a shape memory alloy pseudoelastic oscillator** [6525-34]
L. G. Machado, D. C. Lagoudas, Texas A&M Univ. (USA); M. A. Savi, Univ. Federal do Rio de Janeiro (Brazil)
- 65250Z **On semi-active enhancement of the dissipation provided by piezoelectric films** [6525-35]
U. A. Korde, M. A. Wickersham, T. J. Zelfer, L. Kjerengtroen, South Dakota School of Mines and Technology (USA); C. H. M. Jenkins, Montana State Univ. (USA)
- 652510 **Generation of quasi-resonance by variable damping** [6525-36]
D. Iba, A. Masuda, A. Sone, Kyoto Institute of Technology (Japan)

SESSION 9 DAMPING AND ISOLATION II

- 652511 **On the effect of electrical uncertainties on resonant piezoelectric shunting** [6525-37]
M. Porfiri, Polytechnic Univ. (USA); U. Andreaus, Univ. degli studi di Roma La Sapienza (Italy)

- 652512 **Optimal piezoelectric switching technique for vibration damping** [6525-38]
M. Neubauer, Institute of Dynamics and Vibrations (Germany); R. Oleskiewicz, Koszalin Univ. of Technology (Poland)
- 652513 **Shear thickening fluids as a tunable damping element: experimental results and modeling** [6525-39]
C. Fischer, École Polytechnique Fédérale de Lausanne (Switzerland); A. Bennani, Univ. de Claude Bernard Lyon I/INRETS (France); C. J. G. Plummer, V. Michaud, P.-E. Bourban, École Polytechnique Fédérale de Lausanne (Switzerland); E. Jacquelin, Univ. de Claude Bernard Lyon I/INRETS (France); J.-A. E. Manson, École Polytechnique Fédérale de Lausanne (Switzerland)
- 652514 **A simple model for the prediction of the discrete stiffness states of a homogeneous electrostatically tunable multi-layer beam** [6525-40]
A. Bergamini, R. Christen, M. Motavalli, Empa Swiss Federal Labs. for Materials Testing and Research (Switzerland)
- 652515 **Passive vibration damping with magnetostrictive composite material** [6525-41]
J. R. Maly, CSA Engineering, Inc. (USA); G. P. Carmen, Univ. of California Los Angeles (USA); J. C. Goodding, CSA Engineering, Inc. (USA); C. A. Kerrigan, Univ. of California Los Angeles (USA); K. K. Ho, Fortis Technologies, Inc. (USA)

SESSION 10 AUTONOMOUS MATERIALS I

- 652517 **Fluidic flexible matrix composites for autonomous structural tailoring** [6525-43]
Y. Shan, A. Lotfi, Pennsylvania State Univ. (USA); M. Philen, Virginia Polytechnic Institute and State Univ. (USA); S. Li, C. E. Bakis, C. D. Rahn, K. W. Wang, Pennsylvania State Univ. (USA)
- 652518 **Microfluidic systems for reconfigurable RF surfaces and systems** [6525-44]
T. Larry, M. L. VanBlaricum, Toyon Research Corp. (USA)

SESSION 11 AUTONOMOUS MATERIALS II

- 652519 **Controlling nanoparticle aggregation in colloidal microwave absorbers via interface chemistry** [6525-45]
B. A. Larsen, M. A. Haag, M. H. B. Stowell, Univ. of Colorado, Boulder (USA); D. C. Walther, A. P. Pisano, Univ. of California, Berkeley (USA); C. R. Stoldt, Univ. of Colorado, Boulder (USA)
- 65251A **Circulatory system for unmanned air vehicles** [6525-46]
A. Nagar, SRI International (USA); E. Anderson, CSA Engineering Inc. (USA); P. Rao, S. Narang, Shakti Technologies, Inc. (USA)
- 65251C **Full-scale flight tests of aircraft morphing structures using SMA actuators** [6525-48]
J. H. Mabe, Boeing Phantom Works Seattle (USA); F. T. Calkins, Boeing Commercial Airplane Co. (USA); R. T. Ruggeri, Boeing Phantom Works Seattle (USA)

SESSION 12 CONTROLLED SYSTEMS I

- 65251E **Piezoelectric-hydraulic pump based band brake actuation system for automotive transmission control** [6525-50]
G.-W. Kim, K. W. Wang, The Pennsylvania State Univ. (USA)
- 65251F **Effectiveness enhancement of a cycloidal wind turbine by individual active control of blade motion** [6525-51]
I. S. Hwang, Y. H. Lee, S. J. Kim, Seoul National Univ. (South Korea)
- 65251G **Analysis of the vibration localization phenomenon in rotationally periodic structures using a homogenized model** [6525-52]
P. Bisegna, Univ. of Rome Tor Vergata (Italy); G. Caruso, ITC-CNR (Italy)
- 65251H **Work of PZT ceramics sounder for sound source artificial larynx** [6525-54]
Y. Sugio, R. Kanetake, A. Tanaka, K. Ooe, Ritsumeikan Univ. (Japan)
- 65251I **Beams with controllable flexural stiffness** [6525-55]
F. Gandhi, The Pennsylvania State Univ. (USA); S.-G. Kang, Korea Advanced Institute of Science and Technology (South Korea)

SESSION 13 CONTROLLED SYSTEMS II

- 65251J **Modal analysis of stepped piezoelectric beams** [6525-56]
M. Porfiri, Polytechnic Univ. (USA); C. Maurini, J. Pouget, Institut Jean Le Rond d'Alembert, CNRS, Univ. Pierre et Marie Curie (France)
- 65251K **System integration of the Utah electrode array using a biocompatible flip chip under bump metallization scheme** [6525-59]
R. Bhandari, S. Negi, L. Rieth, Univ. of Utah (USA); M. Toepper, Fraunhofer Institute for Reliability and Micro Integration IZM (Germany); S. Kim, Univ. of Utah (USA); M. Klein, H. Oppermann, Fraunhofer Institute for Reliability and Micro Integration IZM (Germany); R. A. Normann, F. Solzbacher, Univ. of Utah (USA)
- 65251L **Smart vortex generator transformed by change in ambient temperature and aerodynamic force** [6525-60]
T. Ikeda, S. Masuda, T. Ueda, Nagoya Univ. (Japan)
- 65251M **Design and numerical evaluation of an innovative multi-directional shape memory alloy damper** [6525-61]
W. Ren, Dalian Univ. of Technology (China) and Hebei Univ. of Technology (China); H. Li, Dalian Univ. of Technology (China); G. Song, Univ. of Houston (USA)
- 65251Q **Optimal excitation of a cylindrical shell by piezoelectric actuators** [6525-84]
L. Zhang, Y. Yang, Nanyang Technological Univ. (Singapore)

SESSION 14 SMART DEVICES AND SYSTEMS

- 65251R **Adaptive and controllable compliant systems with embedded actuators and sensors** [6525-62]
B. Trease, S. Kota, The Univ. of Michigan (USA)

- 65251S **Metal Rubber sheet and fabric materials and devices** [6525-63]
J. H. Lalli, A. Hill, N. Demirci, M. Homer, R. O. Claus, NanoSonic, Inc. (USA)
- 65251T **Test/analysis comparison of piezoelectric patch local behavior for vibroacoustic active control application** [6525-64]
C. Florens, ONERA (France) and École Centrale Paris (France); E. Balmes, École Centrale Paris (France); F. Clero, ONERA (France)
- 65251U **A new designing concept for multifunctional structural material systems** [6525-86]
H. Asanuma, T. Nakata, T. Chiba, Chiba Univ. (Japan)

SESSION 15 **SENSORS, ACTUATORS, AND DEVICES**

- 65251W **Zero-power shock sensors using bistable compliant mechanisms** [6525-65]
B. J. Hansen, C. J. Carron, A. R. Hawkins, S. M. Schultz, Brigham Young Univ. (USA)
- 65251X **Electric field sensor based on core-replaced optical D-fiber** [6525-66]
E. K. Johnson, J. M. Kvavle, R. H. Selfridge, S. M. Schultz, Brigham Young Univ. (USA); R. Forber, W. Wang, D. Zang, IPITEK (USA)
- 65251Y **Analysis, construction, and testing of a large displacement bistable piezoelectric actuator** [6525-67]
J. Monreal, Royal Military Academy (Belgium); G. Giannopoulos, J. Vantomme, Royal Military Academy (Belgium) and Vrije Univ. Brussel (Belgium)
- 65251Z **Active mounts for marine application: the BMBF research project "Active aggregate mounts to reduce structure vibrations and structure-borne sound transmission"** [6525-68]
M. Matthias, A. Friedmann, T. Koch, T. Drögemüller, Fraunhofer Institute for Structural Durability and System Reliability LBF (Germany)

SESSION 16 **ACTIVE CONTROL I**

- 652520 **Studies on small circular membrane mirrors with electrostatic actuation and closed loop control** [6525-70]
U. A. Korde, M. A. Wickersham, J. J. Farke, M. E. Hofacker, South Dakota School of Mines and Technology (USA)
- 652521 **Integral control of collocated smart structures** [6525-71]
S. S. Aphale, A. J. Fleming, S. O. Reza Moheimani, Univ. of Newcastle (Australia)
- 652522 **Performance evaluation of a new type of jetting dispenser using piezoelectric actuator** [6525-73]
M.-K. Choi, B.-Y. Yun, Q.-H. Nguyen, S.-B. Choi, S.-M. Hong, Inha Univ. (South Korea)
- 652523 **Autonomous-decentralized smart structural control scheme: variable slip-force level damper control with microprocessor** [6525-74]
A. Nishitani, Waseda Univ. (Japan); Y. Nitta, Ashikaga Institute of Technology (Japan); N. Miyoshi, Obayashi Corp. (Japan)

SESSION 17 ACTIVE CONTROL II

- 652525 **Adaptive positive position feedback for energy absorption in acoustic cavities** [6525-75]
M. A. Creasy, D. J. Leo, Virginia Tech (USA); K. M. Farinholt, NanoSonic, Inc. (USA)
- 652526 **Broadband noise and vibration reduction for lightweight chassis design using smart structure technologies** [6525-76]
L. Messner, M. Gusenbauer, T. Rittenschober, PROFACTOR Production Research GmbH (Austria)
- 652527 **Vibration suppression of hull structure using macro fiber composite actuators and sensors** [6525-77]
J. W. Sohn, H. S. Kim, C.-J. Kim, S. H. Ha, S.-B. Choi, Inha Univ. (South Korea)
- 652528 **Nonlinear modeling of piezoelectric layered beams** [6525-78]
M. Saghafi, Sharif Univ. of Technology (Iran); N. Jalili, Clemson Univ. (USA); A. Meghdari, Sharif Univ. of Technology (Iran)
- 652529 **Modeling of piezo-flexural nanopositioning systems subjected to rate-varying inputs** [6525-79]
S. Bashash, N. Jalili, Clemson Univ. (USA)
- 65252A **Negative capacitance shunts for vibration control and suppression of reactive input power on rectangular panels** [6525-80]
K. A. Cunefare, The Georgia Institute of Technology (USA)
- 65252B **Fuzzy control for nonlinear structure with semi-active friction damper** [6525-81]
D.-H. Zhao, H.-N. Li, Dalian Univ. of Technology (China)
- 65252C **In-plane vibration of membrane strips and sheets with piezoelectric actuation and sensing** [6525-82]
U. A. Korde, South Dakota School of Mines and Technology (USA); E. A. Petersen, Univ. of Nebraska (USA); D. Daugaard, Dell Rapids Public High School (USA)

*Revolutionary transitions of GE technology in NDE prognostics and health monitoring
(Plenary Presentation)*

E. Hindle, T. Patton, GE Aviation (USA); T. Batzinger, GE Global Research Ctr. (USA)

Introduction

New conference 6525, Active and Passive Smart Structures and Integrated Systems, was merged from two previous conferences, Damping and Isolation, and Smart Structures and Integrated Systems, at the conclusion of the last symposium. The latter conference started in 1993 with the title Smart Structures and Intelligent Systems, as one of five sub-conferences of the North American Conference (NAC) on SSM, sponsored by SPIE. The former joined NAC as the sub-conference on Passive Damping in 1994. Because of their long history, the major focus of the two conferences was mostly on the aerospace, mechanical, and transportation systems and structures. The majority of the topics in the call for papers for the new conference have, therefore, been related to macro-structures and the traditional and conventional areas of active and passive systems. Although it is important that the macro-structures research — associated strongly with the basic infrastructures of our society — remains strong, it is even more critical to introduce new topics into this conference by proactively including the emerging areas related to active and passive systems, such as micro- and nano-systems. We support the strong promotion and inclusion of topics associated with these areas, and other emerging technologies, in future conferences.

Another important focus area is the nature- and biology-inspired integrated systems, such as bionics (or biomimicry). Emerging in 1950s, this discipline is currently highly researched, with the primary aim of applying solutions, methods, and systems found in nature to the study and design of engineering systems. The nature and biological systems are smart and integrated, and ecologically sound in sustaining lives and preserving natural resources. Today, one of our main concerns is to prevent environmental destruction. To preserve the environment, we need to look more into nature and biology. Nature has evolved for more than 300 million years, while our modern science and technology have developed for less than 300 years. The more humble we are, the more we may learn from the nature and biology.

To reduce the redundancy between SSM and NDE, which had independently developed until last March, we decided to unify the two and reduce fourteen conferences into ten. We are now working on promoting the integration of sessions and topics that are synergistically associated, across various conferences at the symposium. We believe that ultimately this will benefit the attendees of the symposium by providing them with a more holistic exposure to the topics of interest to them. Along this line, Dr. Donald Leo, conference cochair, and Dr. Les Lee of the Air Force Office of Scientific Research, organized the sessions on Autonomous Materials I and II Wednesday morning in this conference 6525 and the sessions on Autonomous Materials Workshops I and II Wednesday afternoon in conference 6526 on Behavior and Mechanics of Multifunctional and Composite Materials. This was a new attempt to work

together beyond the domain of each conference. This symposium is a showcase for multidisciplinary and newly emerging research and technologies. It is necessary to continue to work together toward this direction for the benefit of the symposium. We encourage further collaboration and discussion among the chairs and cochairs of the symposium conferences, in order to move us further toward a well-integrated and unified symposium.
