PROCEEDINGS OF SPIE

Saratov Fall Meeting 2006

Laser Physics and Photonics, Spectroscopy and Molecular Modeling VII

Vladimir L. Derbov
Leonid A. Melnikov
Lev M. Babkov
Editors

26-29 September 2006
Saratov, Russia

Organized by

Saratov State University (Russia) • Research-Educational Institute of Optics and Biophotonics at SSU (Russia)
Institute of Precision Mechanics and Control, RAS (Russia) • Research-Educational Center on Nonlinear Dynamics
and Biophysics of CRDF and Ministry of Education and Science RF (REC-006) (Russia) • Volga Region Center of New
Information Technologies (Russia) • Saratov Railway Clinic Hospital (Russia)

In Cooperation with

Russian Academy of Natural Sciences, Saratov Regional Division • Russian Society for Photobiology • Saratov
Science Center of the Russian Academy of Sciences

Sponsored by

Russian Foundation for Basic Research • U.S. Civilian Research and Development Foundation for the Independent
States of the Former Soviet Union (CRDF) (Russia) • SPIE Russia Chapter • Saratov State University SPIE Student
Chapter (Russia) • Russian Academy of Science • British Degrees in Russia Program, British Council (Russia) • Almus
Ltd. (Russia)

**The International Society
for Optical Engineering**

Proceedings of SPIE, 0277-786X, v. 6537

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/07/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii	Conference Workshop Committee
ix	Introduction

PLENARY LECTURE

6537 02	Optically pumped alkali lasers (Plenary Paper) [6537-01] B. V. Zhdanov, T. Ehrenreich, R. J. Knize, Air Force Academy (USA)
---------	---

NONLINEAR OPTICS

6537 03	New method for analysis of temporal dynamics of medium spectrum under the action of terahertz pulse [6537-02] V. A. Trofimov, S. A. Varentsova, Lomonosov Moscow State Univ. (Russia)
6537 04	Influence of the resonant self-action and nonstationary coherent effects on the characteristics of a frequency-modulated laser beam [6537-03] V. L. Derbov, V. V. Serov, Saratov State Univ. (Russia); I. L. Plastun, A. V. Trofimov, Saratov State Technical Univ. (Russia)

MATTER IN STRONG ELECTROMAGNETIC FIELDS

6537 05	Coherent effects in free-bound transitions in hydrogen/antihydrogen atom under the action of ultra-short strong-field laser pulse [6537-04] M. V. Ryabinina, L. A. Melnikov, Saratov State Univ. (Russia)
6537 06	Application of Kantorovich method for calculations of a hydrogen atom photoionization in a strong magnetic field [6537-05] O. Chuluunbaatar, A. A. Gusev, Joint Institute for Nuclear Research (Russia); V. L. Derbov, Saratov State Univ. (Russia); M. S. Kaschiev, Institute of Mathematics and Informatics (Bulgaria); V. V. Serov, Saratov State Univ. (Russia); T. V. Tupikova, S. I. Vinitky, Joint Institute for Nuclear Research (Russia)
6537 07	Nonperturbative kinetics of electron-hole excitations in strong electric field [6537-06] A. V. Friesen, A. V. Prozorkevich, S. A. Smolyansky, Saratov State Univ. (Russia); M. Bonitz, Christian-Albrechts-Univ. zu Kiel (Germany)
6537 08	Observable effects caused by vacuum pair creation in the field of high-power optical lasers [6537-07] D. B. Blaschke, Univ. of Wroclaw (Poland), Joint Institute for Nuclear Research (Russia), and Univ. of Rostock (Germany); A. V. Filatov, I. A. Egorova, A. V. Prozorkevich, S. A. Smolyansky, Saratov State Univ. (Russia)

OPTICAL MICROSTRUCTURED FIBERS AND BAND-GAP STRUCTURES

- 6537 09 **Tunneling of femtosecond pulse in PC band gap** [6537-08]
V. A. Trofimov, E. B. Tereshin, Lomonosov Moscow State Univ. (Russia)
- 6537 0A **Mode gain in microstructure optical fibers** [6537-09]
A. S. Soloviev, A. I. Konyukhov, L. A. Melnikov, S. A. Akishin, Saratov State Univ. (Russia)
- 6537 0B **Waveguiding in photonic crystal fibers and photonic crystal structures** [6537-10]
Ju. A. Mazhirina, L. A. Melnikov, Saratov State Univ. (Russia); V. S. Shevandin, Research Institute for Optical Materials (Russia)
- 6537 0C **Spatial characteristics of radiation of 1D photonic crystal laser** [6537-11]
O. N. Kozina, Institute of Radio-Engineering and Electronics (Russia); L. A. Melnikov, Saratov State Univ. (Russia)
- 6537 0D **Anisotropic photonic crystals and tunable photonic bandgap fibers** [6537-12]
I. A. Khromova, L. A. Melnikov, Saratov State Univ. (Russia)

ELECTRODYNAMICS OF LASER OPTICAL SYSTEMS

- 6537 0E **Analysis of the wave diffraction on a polygon dielectric grating placed on a dielectric substrate, by integral equation method** [6537-13]
I. S. Nefedov, Helsinki Univ. of Technology (Finland); A. S. Soloviev, Saratov State Univ. (Russia)
- 6537 0F **Waves in active and dissipative flat-layered periodic and pseudo-periodic structures** [6537-14]
M. V. Davidovich, J. V. Stephuk, I. V. Shilin, Saratov State Univ. (Russia)
- 6537 0G **Electromagnetic energy density and velocity in media with anomalous positive dispersion** [6537-15]
M. V. Davidovich, Saratov State Univ. (Russia)

QUANTUM OPTICS

- 6537 0H **Analytical solution for entanglement and dissipative dynamics of two identical two-level atoms in cavity** [6537-16]
A. V. Gorokhov, I. E. Sinaisky, Samara State Univ. (Russia)
- 6537 0I **The dynamics of the two two-level atoms with atom dissipation** [6537-17]
E. K. Bashkirov, M. S. Rusakova, Samara State Univ. (Russia)
- 6537 0J **The entropy and entangled states in a Ξ -type three-level atom interacting with two-mode field** [6537-18]
E. K. Bashkirov, M. S. Rusakova, Samara State Univ. (Russia)

SPECTROSCOPY AND MOLECULAR MODELING

- 6537 OK **On the possibility of precise calculations of the contribution to the fine energy shifts of hydrogen-like atoms due to the motion of the nucleus** [6537-19]
O. A. Boikova, N. A. Boikova, S. V. Kleshchevskaya, Y. N. Tyukhtyaev, Saratov State Univ. (Russia)
- 6537 OL **Molecular dynamics of arachidic acid monolayers** [6537-20]
E. G. Gluhovskoy, D. N. Bratashov, Saratov State Univ. (Russia)
- 6537 OM **Double ionization of hydrogen molecule by fast electron impact: calculation using exact wave functions of two-center continuum** [6537-21]
V. V. Serov, V. L. Derbov, V. I. Lobanov, Saratov State Univ. (Russia); S. I. Vinitzky, Joint Institute for Nuclear Research (Russia)
- 6537 ON **Laser excitation of localized wave packets of Rydberg states** [6537-22]
N. I. Teper, Saratov State Social and Economical Univ. (Russia); V. L. Derbov, Saratov State Univ. (Russia)
- 6537 OO **Vibrational spectra and structural-dynamical models of the 2-, 3- and 4-biphenylmethanols** [6537-23]
L. M. Babkov, Saratov State Univ. (Russia); J. Baran, Institute of Low Temperature and Structure Research (Poland); N. A. Davydova, Institute of Physics (Ukraine); K. E. Uspenskiy, Saratov State Univ. (Russia)
- 6537 OP **Near surface layer structure models and IR spectra of the heterogenic bicomponent nano-systems on the base of titanium dioxide** [6537-24]
L. M. Babkov, Saratov State Univ. (Russia); T. V. Bezrodnaya, G. A. Puchkovskaya, V. V. Shimanovskaya, Institute of Physics (Ukraine); K. E. Uspenskiy, Saratov State Univ. (Russia)
- 6537 OQ **Laser-stimulated radiative recombination of antihydrogen in a magnetic field in the presence of Doppler broadening** [6537-25]
V. V. Serov, V. L. Derbov, V. I. Lobanov, Saratov State Univ. (Russia); O. Chuluunbaatar, A. A. Gusev, S. I. Vinitzky, Joint Institute for Nuclear Research (Russia)

ADDITIONAL PAPER FROM SESSION 2: MATTER IN STRONG ELECTROMAGNETIC FIELDS

- 6537 OR **Investigation of radiation characteristics of laser plasma on a surface of metal targets** [6537-26]
B. V. Anikeev, E. V. Khaydukov, V. N. Khramov, A. V. Sevost'yanov, R. Sh. Zatrudina, Volgograd State Univ. (Russia)
- Formal letter writing**
S. V. Eremina, O. I. Moskalenko, Saratov State Univ. (Russia)

Vladimir L. Derbov, Saratov State University (Russia)

Secretary

Andrey I. Konukhov, Saratov State University (Russia)

International Program Committee Chair

Vladimir L. Derbov, Saratov State University (Russia)

International Program Committee

Alexander P. Kuznetsov, Institute of Radio-Engineering (Russia)
Leonid A. Melnikov, Saratov State University (Russia)
Marian Marciniak, National Institute of Telecommunications (Poland)
Alexander P. Nizovtsev, Institute of Physics (Belarus)
William A. Beck, MicroSound Systems (USA)
Aleksey M. Zheltikov, Lomonosov Moscow State University (Russia)
Vladimir P. Ryabukho, Saratov State University (Russia)
Alexander V. Gorokhov, Samara State University (Russia)
Yuri V. Popov, Lomonosov Moscow State University (Russia)
Bogos B. Joulakian, University of Metz (France)
Sergue I. Vinitsky, Joint Institute for Nuclear Research (Russia)

Introduction

This SPIE proceedings volume contains original contributions presented at the Workshops on Laser Physics and Photonics VIII, Spectroscopy and Molecular Modeling VII in the framework of International School for Young Scientists and Students on Optics, Laser Physics, and Biophysics at the Saratov Fall Meeting 2006. The Workshop and School were held in Saratov, Russia, in September 2006. The main topics of the Workshop and School included wide spectrum of the modern problems of fundamental and applied optics and photonics, including frontier research in laser physics, electrodynamics, photonic crystals, nonlinear optics, spectroscopy, and quantum optics.

Many of presented and discussed materials were the result of international collaboration between Russian universities, particularly Saratov State University, in with international programs such as INTAS, and others, as well as direct scientific and educational contacts with U.S., European, and Asian universities. The meeting featured the participation of many young scientists and students from Saratov State University, Saratov State Technical University, Moscow State University, and other Russian universities and institutions of the Russian Academy of Science.

These Proceedings include selected oral and poster presentations, divided into the following subsections:

- Nonlinear Optics
- Matter in Strong Electromagnetic Fields
- Optical Microstructured Fibers and Band-Gap Structures
- Electrodynamics of Laser Optical Systems
- Quantum Optics
- Spectroscopy and Molecular Modeling

Scientific collaboration is not possible without efficient communication. English has now become an international scientific language. That is why a special session devoted to English as a communicative tool in the scientific community was included into the program of the meeting. A selected talk delivered at this session is presented in the last section of this volume.

We hope that this volume will contribute to the development of optical technologies and that it will be useful for scientists, engineers, and students.

We would like to thank all authors for their contributions to this volume. We are grateful to all of the sponsoring organizations and foundations that supported this meeting very effectively, especially to the Nonlinear Dynamics and Biophysics Research and Educational Center of Saratov State University, and SPIE Russia Chapter. We also would like to thank all the organizers of the meeting.

Leonid A. Melnikov
Vladimir L. Derbov
Lev M. Babkov
