Proceedings of SPIE—The International Society for Optical Engineering, 9780819466921, v. 6570

SPIE is an international technical society dedicated to advancing engineering and scientific applications of optical, photonic, imaging, electronic, and optoelectronic technologies.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

vii	Conference Committee
ix	Introduction

SESSION 1 INTRUSION/INTRUDER DETECTION

- 657002 **Bot armies as threats to network security** [6570-29]
S. B. Banks, Calculated Insight (USA); M. R. Stytz, Institute for Defense Analyses (USA)
- 657003 **Defending against internet worms using a phase space method from chaos theory** [6570-01]
J. Hu, J. Gao, Univ. of Florida (USA); N. S. Rao, Oak Ridge National Lab. (USA)
- 657004 **Analysis and visualization of large complex attack graphs for networks security** [6570-02]
H. Chen, Super Quality Solutions, Inc. (USA); G. Chen, Intelligent Automation Inc. (USA);
E. Blasch, Air Force Research Lab. (USA); M. Kruger, Office of Naval Research (USA); I. Sityar,
Alion Science and Technology (USA)
- 657005 **Summary of results on optimal camera placement for boundary monitoring** [6570-03]
R. J. Holt, City Univ. of New York (USA); H. Man, R. Martini, I. Mukherjee, R. Netravali,
J. Wang, Stevens Institute of Technology (USA)
- 657006 **Evaluation of data mining techniques for suspicious network activity classification using honeypots data** [6570-04]
A. Grégio, Brazilian Institute for Space Research (Brazil) and Renato Archer Research Ctr.
(Brazil); R. Santos, Brazilian Institute for Space Research (Brazil); A. Montes, Renato Archer
Research Ctr. (Brazil)
- 657007 **Selection of intrusion detection system threshold bounds for effective sensor fusion** [6570-05]
C. Thomas, N. Balakrishnan, Indian Institute of Science, Bangalore (India)

Pagination: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication.

SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

SESSION 2 DATA MINING

- 657008 **Mining unknown patterns in data when the features are correlated** [6570-07]
R. S. Lynch, Jr., Naval Undersea Warfare Ctr. (USA); P. K. Willett, Univ. of Connecticut (USA)
- 657009 **Image information mining from geospatial archives based on a combination of the wavelet transform and Fourier phase descriptor** [6570-08]
V. P. Shah, N. H. Younan, S. S. Durbha, R. L. King, Mississippi State Univ. (USA) and GeoResources Institute (USA)
- 65700A **Genetic program based data mining of fuzzy decision trees and methods of improving convergence and reducing bloat** [6570-10]
J. F. Smith III, T. H. Nguyen, Naval Research Lab. (USA)

SESSION 3 APPLICATIONS

- 65700B **Enabling distributed simulation multilevel security using virtual machine and virtual private network technology** [6570-27]
M. R. Stytz, Institute for Defense Analyses (USA); S. B. Banks, Calculated Insight (USA)
- 65700C **Maximising information recovery from rank-order codes** [6570-13]
B. Sen, S. Furber, Univ. of Manchester (United Kingdom)
- 65700D **Development of a model for assessing the impact of information assurance functionality on secure messaging system performance** [6570-14]
S. V. Belur, J. Gloster, Van Dyke Technology Group (USA)
- 65700E **Cluster analysis of temporal trajectories of hospital laboratory examinations** [6570-15]
S. Hirano, S. Tsumoto, Shimane Univ. (Japan)
- 65700F **Discovery of exacerbating cases in chronic hepatitis based on cluster analysis of time-series platelet count data** [6570-16]
S. Hirano, S. Tsumoto, Shimane Univ. (Japan)
- 65700G **Supporting online learning with games** [6570-23]
J. Yao, D. Kim, J. P. Herbert, Univ. of Regina (Canada)

SESSION 4 MISCELLANEOUS METHODS, TOPICS, AND ISSUES

- 65700H **AutoCorrel II: a neural network event correlation approach** [6570-17]
M. G. Dondo, P. Mason, DRDC-Ottawa (Canada); N. Japkowicz, R. Smith, Univ. of Ottawa (Canada)
- 65700I **New metrics for blog mining** [6570-18]
B. Ulicny, K. Baclawski, VISTology, Inc. (USA); A. Magnus, Air Force Office of Scientific Research (USA)
- 65700J **Adaptive Gram-Schmidt orthogonalization for the projection-slice synthetic discriminant function filter** [6570-19]
V. R. Riasati, Boeing Satellite Systems (USA); D. Grishin, Science Applications International Corp. (USA)

- 65700K **Semantic search via concept annealing** [6570-20]
K. A. Dunkelberger, Northrop Grumman Corp. (USA)
- 65700L **Three-way aspect model (TWAPM) and co-training for image retrieval** [6570-21]
A. Doloc-Mihu, V. V. Raghavan, Univ. of Louisiana at Lafayette (USA)
- 65700M **A flexible self-learning model based on granular computing** [6570-22]
T. Wei, Y. Wu, Y. Li, Chongqing Univ. of Posts and Telecommunications (China)

POSTER SESSION

- 65700N **Selecting materialized views using random algorithm** [6570-25]
L. Zhou, Harbin Institute of Technology (China), Capital Normal Univ. (China), and Harbin Univ. of Science and Technology (China); Z. Hao, Harbin Institute of Technology (China), Harbin Univ. of Science and Technology (China), and Qiqihar Univ. (China); C. Liu, Capital Normal Univ. (China)

Author Index

Conference Committee

Symposium Chair

John C. Carrano, Luminex Corporation (USA)

Symposium Cochair

Larry B. Stotts, DARPA (USA)

Program Track Chair

Belur V. Dasarathy, Consultant, Information Fusion Technologies (USA)

Conference Chair

Belur V. Dasarathy, Consultant, Information Fusion Technologies (USA)

Program Committee

Thomas G. L. Allen, Air Force Research Laboratory (USA)

Sheila B. Banks, Calculated Insight (USA)

Jonathan A. Gloster, The Van Dyke Technology Group, Inc. (USA)

Robert S. Lynch, Jr., Naval Undersea Warfare Center (USA)

Martin R. Stytz, Institute for Defense Analyses (USA)

Shusaku Tsumoto, Shimane University (Japan)

JingTao Yao, University of Regina (Canada)

Session Chairs

- 1 Intrusion/Intruder Detection
Jonathan A. Gloster, The Van Dyke Technology Group, Inc. (USA)
Belur V. Dasarathy, Consultant, Information Fusion Technologies (USA)
- 2 Data Mining
Robert S. Lynch, Jr., Naval Undersea Warfare Center (USA)
Thomas G. L. Allen, Air Force Research Laboratory (USA)
- 3 Applications
Jonathan A. Gloster, The Van Dyke Technology Group, Inc. (USA)
John J. Salerno, Jr., Air Force Research Laboratory (USA)
- 4 Miscellaneous Methods, Topics, and Issues
Martin R. Stytz, Institute for Defense Analyses (USA)
Shusaku Tsumoto, Shimane University (Japan)

Introduction

This is the ninth offering in our series on data mining and knowledge discovery, which has been evolving over the years and has been expanded in terms of its scope giving recognition to the dynamic nature of the information technology arena. The title was revised two years back to the current one: Data Mining, Intrusion Detection, Information Assurance, and Data Networks Security, to better reflect this expanded scope. We have thus far published over 300 papers under this series. As in prior years, this conference is being presented along with the conference on Information Fusion under the common IT track. This is intended to recognize, exploit, and nurture the natural synergy between the two fields. The fact that the two conferences are run in sequence, rather than in parallel, facilitates cross participation between the two research groups. As has been our practice from the very beginning, we have pushed hard to ensure that the printed proceedings are available on-site for both of these conferences. This aids in better appreciation of the oral presentations and promotes rapid dissemination of the new developments in these areas. Admittedly, this is in contrast to the policy of post-conference proceedings publication followed by the majority of SPIE conferences. This minimizes the risk of authors not showing up to make their promised presentations or making presentations that have not yet attained the necessary maturity or completeness by the time of the conference. This is evident from the fact that initially we had 30 abstract submissions accepted and has since whittled down by about 30% through filtering brought on by the stringent qualifying requirements of the on-site proceedings publication process.

As has been the practice over the past few years, the variation in the size of these proceedings, in terms of the number of papers offered over the years, is illustrated in Figure 1. We regret to note that there has been a significant downturn as compared to past few years perhaps due to growing number of conferences around the world that are wholly dedicated to data mining. It is necessary for us to emphasize the intrusion detection and network security aspects in the future and find ways to reinvigorate the interest in this conference to ensure its sustainability within the SPIE context. Accordingly, ideas on how to further expand the appeal of this conference are hereby being actively sought by the organizers from the conference participants as well as the readership of these proceedings at large.

The conference has a total of 22 presentations this year. The papers published here in these proceedings are grouped into the following seven regular sessions followed by a poster session that address miscellaneous issues.

- Intrusion/Intruder Detection
- Data Mining
- Applications
- Miscellaneous Topics

As in prior years, the global span of the conference is reflected in the authorship of the papers which are from seven different countries namely, Brazil, Canada, China, India, Japan, U.K., and of course, the USA. This has noticeably contracted in recent years by the international travel climate, both in terms of economics as well as visa issues and indeed is the main cause for the downturn in the total number of papers.

Figure 1. Number of papers published over the years in this series

We plan on continuing this series in the coming year and hope to see a growth through revamping the scope of the conference. All those interested in active participation in planning and conference program development process are requested to contact me at fusion_consultant@yahoo.com as early as possible, preferably before April 30th, 2007. Further details regarding the call for papers and schedule for the next year will be made available in due course on the Internet at SPIE (<http://www.spie.org>) as well as my home page (<http://belur.no-ip.com>). I would like to take this opportunity to acknowledge the authors for letting us showcase their work and thereby contribute to the success of this conference. I also would like to express my thanks to the members of my program committee and the session chairs for their cooperation and support. Lastly, thanks are also due to the SPIE staff for their help in putting together the conference program and proceedings.

कायेन वाचा मनसेन्द्रियैर्वा
बुध्यात्मनावा प्रकृते स्वभावात्
करोमि यद्यत् सकलं परस्मै
श्रीमन्नारायणायेति समर्पयामि

"kaayena vaachaa manasendriyaiirvaa
budhyaatmanaavaa prakR^ite svabhaavaat
karomi yadyat sakalaM parasmai
shriiman naaraayaNaayeti samarpayaami"

Be it with my body, or with my mind
With words, or organs of any kind,
With my intellect, or with my soul,
Or by force of Nature pushing me to my goal,
Whatever it is, with all these I do,
Oh! Supreme Lord! I surrender to you.

Wishing you all a safe trip back home!
