Part One of Two Parts

The International Society
for Optical Engineering

Proceedings of SPIE—The International Society for Optical Engineering, 9780819467270, v. 6595

SPIE is an international technical society dedicated to advancing engineering and scientific applications of optical, photonic, imaging, electronic, and optoelectronic technologies.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

xix	Introduction

Part One

KEYNOTE PAPERS

- 659502 **Quantum electronics 50th jubilee (Keynote Paper)** [6595-95]
O. N. Krokhin, P.N. Lebedev Physical Institute (Russia)
- 659503 **Optic fiber Bragg grating based sensing technologies and their applications in structural health monitoring (Keynote Paper)** [6595-164]
J. Ou, Harbin Institute of Technology (China) and Dalian Univ. of Technology (China);
Z. Zhou, Harbin Institute of Technology (China)

SESSION 1 INTERACTION OF LASER RADIATION WITH MATTER AND NONLINEAR OPTICS

- 659504 **Influence of energy-transfer up-conversion on diode-end-pumped Q-switched Tm,Ho:YLF lasers** [6595-01]
X. Zhang, Harbin Engineering Univ. (China) and Harbin Institute of Technology (China);
J. Cui, L. Li, S. Yu, Harbin Engineering Univ. (China); Y. Ju, Y. Wang, Harbin Institute of Technology (China)
- 659505 **Evaluation and testing of semiconductor laser reliability in optic system** [6595-02]
W. Tang, X. Fan, H. Sun, Harbin Institute of Technology (China)
- 659506 **Temporal characteristics of output pulses in Brillouin fiber-optical ring laser** [6595-03]
Y. Lü, X. Chong, L. He, Harbin Engineering Univ. (China) and Harbin Institute of Science and Technology (China)
-

Pagination: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication.

SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

- 659507 **Theoretical study of transient thermal nonlinear refraction induced by nonlinear optical absorption** [6595-04]
W. Jiao, X. Zhang, Y. Wang, Y. Song, Harbin Institute of Technology (China)
- 659508 **Third-order nonlinear optical properties and optical limiting property of metallonaphthalocyanine** [6595-05]
C. He, Heilongjiang Univ. (China) and Harbin Institute of Technology (China); W. Duan, Y. Wu, Heilongjiang Univ. (China); Y. Wang, X. Zhang, Y. Song, Harbin Institute of Technology (China)
- 659509 **Nonlinear errors of passive homodyne polarized laser interferometer** [6595-06]
J. Yang, B. Wu, Z. Liu, L. Yuan, Harbin Engineering Univ. (China)
- 65950A **Interaction of partially coherent laser radiation with matter** [6595-07]
A. N. Starodub, S. I. Fedotov, A. A. Kozhevnikova, B. V. Kruglov, S. V. Mal'kova, M. V. Osipov, V. N. Puzyrev, A. T. Sahakyan, B. L. Vasin, O. F. Yakushev, P.N. Lebedev Physical Institute (Russia)
- 65950B **Resonator-enhanced low-power all-optical switch with a nonlinear ratio-variable coupler** [6595-08]
L. Li, Harbin Engineering Univ. (China) and Harbin Institute of Technology (China); J. Li, Harbin Institute of Technology (China); X. Zhang, Harbin Engineering Univ. (China); L. Chen, Harbin Institute of Technology (China)
- 65950C **Large aperture nonlinear elements from KDP and DKDP crystals: making and using** [6595-09]
A. A. Babin, Institute of Applied Physics (Russia)
- 65950D **Realizing all-optical full-adder logic operation with photorefractive crystal phase conjugation** [6595-10]
X. Fan, College of Second Aviation (China); G. Lv, Z. Jiang, H. Wang, Y. Yu, Heilongjiang Univ. (China)
- 65950E **Conoscopic methods of optic crystal research** [6595-96]
A. V. Syuy, V. I. Stroganov, V. V. Krishtop, Far Eastern State Transport Univ. (Russia); V. V. Lihtin, Komsomolsk-on-Amur State Technical Univ. (Russia)
- 65950F **Distribution of light pulses from several oscillations in an untuned nonlinear medium** [6595-148]
M. I. Voitjk, G. V. Kostina, A. I. Livashvili, Far Eastern State Transport Univ. (Russia)
- 65950G **Experimental and theoretical research of propagation of the double-circle laser beam in Kerr-medium** [6595-97]
C. Shen, F. Chen, China Jiliang Univ. (China); B. Yin, R. Miao, Shanxi Normal Univ. (China)
- 65950H **Optimization of discharge circuit of the TEA CO₂ laser with two discharge channels** [6595-149]
X. Y. Hu, L. Zhang, D. Ren, Y. Qu, W. Zhao, B. Song, Harbin Institute of Technology (China)
- 65950I **A novel all-fiber self-organization coherent erbium-doped fiber laser** [6595-98]
X. J. Jia, F. N. Liu, S. G. Fu, J. Zhang, Y. G. Liu, Z. C. Guo, S. Z. Yuan, G. Y. Kai, X. Y. Dong, Institute of Modern Optics, Nankai Univ. (China)

- 65950J **Analytical descriptions of damage threshold of dielectric materials irradiated by femtosecond pulses** [6595-99]
G. Zhao, Q. Hao, W. Qi, J. Chen, J. Zhang, Sichuan Univ. (China)
- 65950K **Thermal behavior of thin metal films irradiated by ultra-short pulse laser** [6595-100]
Q. Hao, G. Zhao, W. Qi, Sichuan Univ. (China)
- 65950L **An improvement on the 4f coherent imaging system for measuring the nonlinear refraction** [6595-150]
Y. Li, X. Zhang, Harbin Institute of Technology (China); Y. Wang, Suzhou Univ. (China); Y. Song, Harbin Institute of Technology (China)
- 65950M **Laser generation and reception of acoustic ultrasonic waves in solids** [6595-151]
V. I. Arkhipov, P. V. Bazylev, V. A. Lugovoy, Dalstandart, RSRI (Russia)
- 65950N **Hologram image storage in the methyl-red doped nematic liquid crystal films** [6595-101]
K. Gu, H. Gao, D. Gong, Z. Zhou, Harbin Institute of Technology (China)
- 65950O **Influence of the Mollow triplet on the spectrum of the scattered radiation by a multiatom system** [6595-152]
B. B. Averbukh, Tihooceansky State Univ. (Russia)

SESSION 2 MICROELECTRONIC AND NANOELECTRONIC STRUCTURES FOR OPTOELECTRONICS

- 65950P **Effect of In ions on photorefractive properties in Fe:In:LiNbO₃ crystals** [6595-11]
T. Zhang, T. Geng, W.-M. Sun, Harbin Engineering Univ. (China)
- 65950Q **Transmission characteristic of photonic crystals coupler** [6595-12]
C. Guan, D. Xie, L. Yuan, Harbin Engineering Univ. (China)
- 65950R **Experimental study on femtosecond laser micromaching of grooves in spring steel** [6595-13]
L. Qi, X. Wu, Y. Wang, Harbin Institute of Technology (China)
- 65950S **Formation of azimuthally and radially polarized Bessel light beams in one-dimensional photonic crystals having photorefractive properties** [6595-14]
S. Kurilkina, V. Belyi, N. Kazak, Institute of Physics (Belarus); S. Shandarov, Tomsk State Univ. of Control Systems and Radioelectronics (Russia); P. Ropot, Institute of Physics (Belarus)
- 65950T **Nanosecond reverse saturable absorption in metal cluster *cis*-Cp*₂Mo₂S₄Cu₂I₂[(CH₂Cl)₂] solution** [6595-15]
J. Yang, J. Gu, Suzhou Univ. (China); G. Shi, Y. Li, Harbin Institute of Technology (China); Y. Song, Z. Ren, J. Lang, Suzhou Univ. (China)
- 65950U **Study on trap states in polyvinylcarbazole by thermally stimulated current spectrum** [6595-16]
L. He, X. Wang, W. Zhang, X. Wang, Harbin Univ. of Science and Technology (China)
- 65950V **Temperature influence on all-optical poling of glasses** [6595-17]
V. A. Smirnov, L. I. Vostrikova, I. A. Ishimov, Institute of Semiconductor Physics (Russia)

- 65950W **Study on holographic image storage and reconstruction in azo-dye-doped liquid-crystal films** [6595-18]
H. Gao, Z. Zhou, Harbin Institute of Technology (China)
- 65950X **New self-developed holographic media-dichromated gelatin with isopropanol** [6595-19]
A. N. Malov, A. V. Neupokoeva, Irkutsk Higher Military Aviation Engineer School (Russia)
- 65950Y **Temperature dependences of optical absorption and its light-induced changes in sillenite crystals** [6595-20]
S. M. Shandarov, L. E. Polyakova, A. E. Mandel, M. G. Kisteneva, J. Vidal, Tomsk State Univ. of Control Systems and Radioelectronics (Russia); Yu. F. Kargin, A. V. Egorysheva, N.S. Kurnakov Institute of General and Inorganic Chemistry (Russia)
- 65950Z **The influence of forms and sizes of heterogeneous systems on the band bending in AgBr-Agl** [6595-21]
A. V. Khanef, A. S. Poplavnoi, B. A. Sechkarev, L. V. Sotnikova, Kemerovo State Univ. (Russia)
- 659510 **A new type of dynamic infrared image modulator based on the MEMS technique** [6595-22]
F. Sun, C. Li, Harbin Institute of Technology (China); W. Jiang, S. Zhang, D. Wu, Y. Shi, Heilongjiang Bada Universal Semiconductor Inc. (China)
- 659511 **Electro-mechanical properties of carbon black filled EP/PI conductive films** [6595-23]
X. Ji, H. Li, J. Ou, Harbin Institute of Technology (China)
- 659512 **Atomic motion in the thermal field of dissipative matter near the surface of material** [6595-102]
B. B. Averbukh, I. B. Averbukh, Tihooceansky State Univ. (Russia)
- 659513 **Microring resonator-coupled Mach-Zehnder interferometer as trigger pulse generator, optical differentiator, and integrator** [6595-103]
L. Li, Harbin Engineering Univ. (China) and Harbin Institute of Technology (China); X. Zhang, P. Sun, Harbin Engineering Univ. (China); L. Chen, Harbin Institute of Technology (China)
- 659514 **Influence of composition ratio on the nonlinear optical properties of $\text{AgGa}_{1-x}\text{In}_x\text{Se}_2$ and $\text{Hg}_{1-x}\text{Cd}_x\text{Ga}_2\text{S}_4$** [6595-104]
G. Ji, T. Shen, J. Huang, B. Zhao, Harbin Univ. of Science and Technology (China); Yu. M. Andreev, Institute for Monitoring of Climatic and Ecological Systems (Russia); V. V. Atuchin, Institute of Semiconductor Physics (Russia); G. Lanskiy, Institute for Monitoring of Climatic and Ecological Systems (Russia)
- 659515 **Waveguiding in air with left-handed material** [6595-105]
D. Xie, C. Guan, L. Yuan, Harbin Engineering Univ. (China)
- 659516 **Optical limiting properties and nonlinearity of a novel cubane-like shaped Mo/S/Cu cluster polymer** [6595-106]
J. Xu, N. Liu, J. Fang, Y. Song, J. Lang, J. Yang, Z. Ren, Suzhou Univ. (China)
- 659517 **Pulse LDA-pumped passively Q-switched mode locked Nd:YVO₄ laser with a GaAs saturable absorber** [6595-153]
X. Liu, R. Fu, Institute of Modern Optics, Nankai Univ. (China)

- 659518 **Research of photoprocesses in compositions of the polymer-semiconductor** [6595-154]
D. S. Shtarev, I. Ju. Prosanov, Far Eastern State Univ. of Means of Communication (Russia);
A. A. Tsiganenko, St. Petersburg State Univ. (Russia)
- 659519 **Highly birefringent index-guiding photonic crystal fibers with two big circular holes in elliptical-air-hole cladding** [6595-107]
Y. Yue, G. Kai, Z. Wang, L. Jin, T. Sun, Y. Lu, C. Zhang, Y. Li, J. Liu, Y. Liu, S. Yuan, X. Dong,
Institute of Modern Optics, Nankai Univ. (China)
- 65951A **Polarization characteristics of the large-mode-area fiber amplifier applied in coherent combination** [6595-108]
Z. Guo, Institute of Modern Optics, Nankai Univ. (China) and Inner Mongolia Normal Univ. (China); S. Fu, Y. Liu, X. Jia, L. Si, Y. Jin, S. Yuan, X. Dong, Institute of Modern Optics, Nankai Univ. (China)
- 65951B **Goos-Hänchen shift in anisotropic left-handed materials** [6595-109]
Y. Jiang, Y. Zhang, Y. Fu, C. Hou, Z. Zhou, X. Sun, Harbin Institute of Technology (China)
- 65951C **Cumulative UV-monitoring using chemically modified ZnO or TiO₂ layers** [6595-110]
I. Prosanov, Far Eastern Transport Univ. (Russia); P. Bogdanoff, S. Fiechter, H. Tributsch, Hahn-Meitner-Institut (Germany)

SESSION 3 COHERENT OPTICS AND OPTIC METHODS FOR MEASUREMENT AND INFORMATION PROCESSING

- 65951D **Algorithm study of phase diverse speckle corrective technique** [6595-24]
A. Zhang, T. Wang, Z. Li, J. Zhang, B. Liang, Harbin Institute of Technology (China)
- 65951E **Successive elimination motion estimation algorithm based on multi-resolution** [6595-25]
B. Zhang, Y. Zhao, Z. Zhong, Harbin Institute of Technology (China)
- 65951F **Recording of incoherent reflective volume Fourier holograms for optical correlators** [6595-26]
V. G. Rodin, S. N. Starikov, Moscow Engineering Physics Institute (Russia)
- 65951G **Study on memories of temporal lobes and the principles of lateralization using near infrared spectroscopy** [6595-27]
K. Kamakura, Kokushikan Univ. (Japan)
- 65951H **Detection algorithm for space dim moving object** [6595-28]
H.-B. Pan, W. Zhang, M.-Y. Cong, Harbin Institute of Technology (China)
- 65951I **Estimation and optical diagnostics of combustion with high temperature air** [6595-29]
K. Kishimoto, Kokushikan Univ. (Japan)
- 65951J **Simulation and experimental research on spherical dome by 3D laser-forming of square feet** [6595-30]
L. Yang, Y. Wang, Harbin Institute of Technology (China)
- 65951K **ICF laser target alignment sensor calibration system** [6595-31]
L. Bao, Z. Zhang, G. Liu, B. Liu, Z. Pu, Harbin Institute of Technology (China)

- 65951L **Correlation method of processing single fiber multimode interferometer (SFMI) signals using a charge coupled device** [6595-32]
Yu. N. Kulchin, O. B. Vitrik, A. D. Lantsov, Institute for Automation and Control Processes (Russia)
- 65951M **Example of using small falling weight deflectometer (FWD) for Earth structures and low cost road pavement in Japan** [6595-33]
H. Shibata, Y. Tanaka, I. Ono, Kokushikan Univ. (Japan); T. Okano, Tokyosokkikenkyujo Co., Ltd. (Japan)
- 65951N **Application of modified Kohnen's network to optimization problems** [6595-34]
T. Shimizu, Kokushikan Univ. (Japan)
- 65951O **The application of data fusion in optical theodolite coordinate measurement system** [6595-35]
Z. Tong, W. Tang, Harbin Institute of Technology (China)
- 65951P **A novel ultrasonic phased array inspection system to NDT for offshore platform structures** [6595-36]
H. Wang, B. Shan, X. Wang, J. Ou, Harbin Institute of Technology (China)
- 65951Q **LPCC invariant correlation filters: variants of application** [6595-37]
S. Yu. Shelestov, Moscow Academy of Employment Market and Information Technologies (Russia); A. V. Shevchuk, S. I. Sirotkin, R. S. Starikov, Moscow Engineering Physics Institute (Russia)
- 65951R **Optoelectronic vector-matrix processors: technical limitations** [6595-38]
R. S. Starikov, Moscow Engineering Physics Institute (Russia)
- 65951S **Analysis of the nonlinear mechanisms of light absorption in transparent materials under the ultrashort pulse laser action** [6595-39]
I. N. Zavestovskaya, P.N. Lebedev Physical Institute (Russia); P. G. Eliseev, P.N. Lebedev Physical Institute (Russia) and Ctr. for High Technology Materials, Univ. of New Mexico (USA); O. N. Krokhin, P.N. Lebedev Physical Institute (Russia)
- 65951T **Computer holography by means of the laser diodes** [6595-40]
A. N. Borodin, Irkutsk Air Force Engineering Higher School, Military Institute (Russia); V. V. Ilchenko, Technical Univ. of Munich (Germany); A. N. Malov, A. V. Sychevskiy, Irkutsk Air Force Engineering Higher School, Military Institute (Russia)
- 65951U **Image segmentation algorithms using the model of the system with abruptly changing random structure** [6595-41]
A. N. Malov, B. M. Mironov, Irkutsk Air Force Engineering Higher School, Military Institute (Russia)
- 65951V **Digital Foucault knife as a phase manipulation in the Walsh-Hadamard image transformations** [6595-42]
A. V. Bronnikov, A. N. Malov, A. N. Onackiy, Irkutsk Air Force Engineering Higher School, Military Institute (Russia)

- 65951W **Experimental modeling of high accuracy measurement of circular and radial harmonics** [6595-43]
N. N. Evtikhiev, S. N. Litovchenko, A. V. Shevchuk, R. S. Starikov, E. Yu. Zlokazov, Moscow Engineering Physics Institute (Russia)
- 65951X **Research on frame capture of high speed and image storage** [6595-44]
D. Hao, H. Ju, Harbin Institute of Technology (China)
- 65951Y **Development of automated inspection system for highway surface distress** [6595-45]
X. Hou, H. Wang, Q. Wang, Z. Wang, Harbin Institute of Technology (China)
- 65951Z **Adaptive photodetectors for vibration monitoring** [6595-46]
I. A. Sokolov, M. A. Bryushinin, V. V. Kulikov, A.F. Ioffe Physico-Technical Institute (Russia); K. T. V. Grattan, City Univ. (United Kingdom); A. S. Abyzov, A. V. Rybka, L. N. Davydov, V. V. Slezov, Kharkov Institute of Physics and Technology (Ukraine)
- 659520 **The analysis of the thermal effects arising at interaction of laser radiation with the multilayered biomaterial by using Monte Carlo method** [6595-47]
A. Yu. Setejkin, I. V. Krasnikov, Amur State Univ. (Russia)
- 659521 **A study on building a wireless acceleration sensor network for global monitoring on the cable-stayed bridge of Songhua River** [6595-48]
Y. Yu, Harbin Institute of Technology (China) and Tsinghua Unigroup Ltd. (China); J. Ou, Harbin Institute of Technology (China)
- 659522 **The application of ultrasonic phased array system to the inspection of fillet weld of flat plate** [6595-49]
B. Shan, H. Wang, X. Wang, Z. Duan, Harbin Institute of Technology (China); J. Ou, Harbin Institute of Technology (China) and Dalian Univ. of Technology (China)
- 659523 **A star tracking algorithm suitable for star sensor** [6595-50]
B. Li, Y. Zhang, H. Li, C. Wang, Harbin Institute of Technology (China)
- 659524 **The backscattering property experiment research of wake bubbles** [6595-111]
L. Su, W. Zhang, D. Ren, X. Hu, Harbin Institute of Technology (China)
- 659525 **Experimental research on water-jet guided laser processing** [6595-112]
L. Li, Y. Wang, L. Yang, J. Chu, Harbin Institute of Technology (China)
- 659526 **Theoretical analysis of multiprobe confocal 3D detection system** [6595-113]
H. Li, Z. Pu, Harbin Institute of Technology (China)
- 659527 **Approach to retina optical coherence tomography image processing** [6595-114]
J. Yuan, Harbin Engineering Univ. (China); R. Liu, Eye Hospital, First Affiliated Hospital of Harbin Medical Univ. (China); G. Xuan, Second Affiliated Hospital of Harbin Medical Univ. (China); J. Yang, L. Yuan, Harbin Engineering Univ. (China)
- 659528 **Experimental research on power spectrum processing in joint transform correlator image recognition** [6595-155]
W. Sun, Y. Yang, Harbin Engineering Univ. (China)
- 659529 **Grain effect on imaging of spatial optical system** [6595-115]
D. Wu, Y. Zhou, S. Guo, Harbin Institute of Technology (China)

- 65952A **Neural-like optoelectronic processing system** [6595-116]
N. A. Rybalchenko, I. V. Denisov, V. A. Sedov, I. K. Vernigora, Maritime State Univ. (Russia)
- 65952B **PZT active health monitoring for fatigue accumulative damage of concrete beam containing nano-particles for pavement** [6595-117]
M. Zhang, H. Li, J. Ou, Harbin Institute of Technology (China)
- 65952C **High resolution interrogation technique based on linear photodiode array spectrometer for fiber Bragg grating sensors** [6595-118]
S. Zhang, Y. Liu, F. Li, Institute of Semiconductors (China)
- 65952D **Introduction of a four-step modulation used in PGC method** [6595-119]
Y. Liu, M. Zhang, Y. Liao, Tsinghua Univ. (China)
- 65952E **Analysis and application for a new type of optical fiber interferometer with three-beam system** [6595-120]
K. Yin, L. Wang, T. Ding, M. Zhang, Y. Liao, Tsinghua Univ. (China)
- 65952F **Method of surface roughness measurement based on interferometry** [6595-121]
X. F. Zhang, Z. P. Wang, Y. E. Zhang, L. H. Wang, Y. M. Zhang, Harbin Engineering Univ. (China)

Part Two

SESSION 4 OPTICAL FIBER SENSORS AND THEIR APPLICATIONS

- 65952G **Stabilized fiber optic sensor for remote measuring angle of inclination** [6595-51]
Y. N. Kulchin, O. B. Vitrik, A. V. Dyshlyuk, Institute for Automation and Control Processes (Russia)
- 65952H **An optical voltage sensor based on the theory of Fabry-Perot interferometer** [6595-52]
Y. Liu, H. Zhao, X. Yu, Harbin Univ. of Science and Technology (China)
- 65952I **All-fiber system based on Fabry-Perot sensor for partial discharges in transformer oil** [6595-53]
M. Li, H. Zhao, Harbin Univ. of Science and Technology (China)
- 65952J **Study of FBG sensing demodulation in AC voltage sensing with CWDM** [6595-54]
J. Zhang, Harbin Univ. of Science and Technology (China) and Harbin Normal Univ. (China); H. Zhao, Y. Xiong, Z. Zhang, Harbin Univ. of Science and Technology (China)
- 65952K **A fiber Bragg grating strain sensor based on ASE light source demodulation technology** [6595-55]
Y. Xiong, Harbin Univ. of Science and Technology (China); Z. Yang, Harbin Normal Univ. (China); H. Zhao, Harbin Univ. of Science and Technology (China); J. Zhang, Harbin Normal Univ. (China); M. Xiao, Harbin Univ. of Science and Technology (China)
- 65952L **Fiber Bragg grating sensors array based on optical frequency domain reflectometry technology** [6595-56]
Y. Xiong, L. He, T. Chen, X. Wang, W. Yang, Harbin Univ. of Science and Technology (China)

- 65952M **Temperature-insensitive strain sensor based on the measurement of reflected bandwidth from tapered fiber grating by a scanning FBG** [6595-57]
X. Yang, Q. Zhang, Harbin Institute of Technology (China); Y. Yu, Jilin Univ. (China); S. Sun, Harbin Institute of Technology (China)
- 65952N **Research on temperature independent FBG obliquity sensor** [6595-58]
Y. Cao, X. Ma, W. Fang, Tianjin Univ. of Technology (China); G. Kai, X. Dong, Institute of Modern Optics, Nankai Univ. (China)
- 65952O **Laser interferometer used for nanometer vibration measurements** [6595-59]
J. Sun, J. Yang, Z. Liu, L. Yuan, Harbin Engineering Univ. (China)
- 65952P **A portable interrogation system based on the linear InGaAs photodiode array and volume phase grating** [6595-60]
G. Li, J. Zhang, B. Liu, S. Yuan, G. Kai, X. Dong, Institute of Modern Optics, Nankai Univ. (China)
- 65952Q **Multiparameters measurement by using a four-core fiber** [6595-61]

Introduction

Global introduction of automated control systems into industry and the ever-increasing expansion of fundamental and applied scientific research horizons require various measuring devices that are suitable for real-time monitoring of physical fields, objects, and processes and are capable of being effectively integrated into sophisticated information and measuring systems (IMS). This dictates the need for new approaches to both the organization of the measurement process, and to devising of advanced high-speed IMS, as well as creating new technologies for the design and manufacture of measuring equipment having the ability to endow IMS with such fundamental properties as adaptivity, integration, self-verification, and self-correction capacities.

Modern measuring techniques and devices make wide use of optical, electric, magnetodynamic, piezoelectric, and other sensors. Recent progress in the fiber optic communication technology, both in Russia and abroad, gave birth to a fundamentally new metrology realm: fiber optic sensors (FOS). These sensors are highly advantageous when compared to conventional measuring techniques. The merits of these sensors include high sensitivity and operation speed; electromagnetic noise immunity; small size and weight; combination of measuring and communication function in a single element. There is also great potential of coupling with modern communication and computer systems to create essential prerequisites for the development of radically new distributed and branched multifunction information and measuring systems.

One of the most successful and promising application areas of fiber optic sensors is the measurement of deformation parameters where FOS have already enabled quite a few advanced and currently commercially available systems for structural health monitoring (SHM) of buildings, bridges, high-rise towers, ships, air- and spacecrafts. The rapid advancement of FOS in the field of structural health monitoring stems from the progress in a diversity of scientific areas concerned with opto and microelectronics. Among them the following are particularly worthy of note: investigations on new high-efficiency (including non-linear optical) schemes of fiber-guided light modulation by measured physical field parameters, researches on new methods of optical signal processing, exploration of novel micro- and nano-electronic structures for optoelectronics, development of new types of optical fiber sensors and further extending their application potential. The most recent results in the above mentioned fields have become the central focus of attention at the APCOM 2006 conference.

We would like to express our sincere gratitude to the organizers and sponsors of the conference as well as to all the participants.
