Volume 6620

Proceedings of SPIE, 0277-786X, v. 6620

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/07/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

xiii	<i>Introduction</i>

MULTILAYER RECORDING

6620 03	Progress in bit-wise volumetric optical storage using aluminum oxide single crystal media (Invited Paper) [6620-02] M. S. Akselrod, S. S. Orlov, G. M. Akselrod, G. J. Sykora, K. J. Dillin, T. H. Underwood, Landauer, Inc. (USA)
6620 04	New development of roll-type multilayered optical memory for high density data storage (Invited Paper) [6620-03] Y. Kawata, M. Miyamoto, Shizuoka Univ. (Japan); M. Nakabayashi, LINTEC Corp. (Japan)
6620 05	Readout-signal amplification by homodyne detection scheme (Best Paper Award) [6620-04] H. Mikami, T. Shimano, H. Kudo, J. Hashizume, H. Miyamoto, Hitachi, Ltd. (Japan)
6620 08	Multilayer optical disk and method of its management for preventing its illegal use [6620-17] A. M. Smolovich, Institute of Radioengineering and Electronics (Russia), Scientific-Technological Ctr. of Unique Instrumentation (Russia), and Univ. de Sonora (Mexico); M. A. Cervantes, V. Chernov, Univ. de Sonora (Mexico)
6620 0A	253GB recorded in two-photon 3D disk [6620-82] E. Walker, A. S. Dvornikov, K. Coblentz, S. Esener, P. Rentzepis, Call/Recall, Inc. (USA)

MICRO-HOLOGRAPHIC RECORDING

6620 0B	Drive system and readout characteristics of micro-reflector optical disc (Invited Paper) [6620-05] K. Saito, T. Horigome, H. Miyamoto, H. Yamatsu, N. Tanabe, K. Hayashi, G. Fujita, S. Kobayashi, T. Kudo, H. Uchiyama, Sony Corp. (Japan)
6620 0C	Localized recording approaches and phase metrology for holographic storage (Invited Paper) [6620-06] R. R. McLeod, M. W. Grabowski, Univ. of Colorado, Boulder (USA); M. R. Ayres, Univ. of Colorado, Boulder (USA) and InPhase Technologies, Inc. (USA); A. C. Sullivan, Univ. of Colorado, Boulder (USA)
6620 0F	Homodyne detection for Lippmann data storage [6620-19] G. Pauliat, G. Maire, C. Arnaud, F. Guattari, K. Contreras, G. Roosen, Univ. Paris-Sud, CNRS (France); S. Jradi, Lab. Charles Fabry, Institut d'Optique, CNRS, Univ. de Haute Alsace (France); C. Carré, FOTON, GET-ENST, Bretagne, UMR CNRS (France)

COMPONENTS AND TESTING

- 6620 OH **Compatible optical system for three optical disc systems (HD-DVD/DVD/CD)** [6620-10]
T. Kanai, M. Miyauchi, Y. Sugi, Y. Makino, T. Maruyama, Hitachi Maxell, Ltd. (Japan)
- 6620 OI **Micro actuated grating for multi-beam optical pickups** [6620-11]
C.-H. Lee, Y. Chiu, H.-P. D. Shieh, National Chiao Tung Univ. (Taiwan)
- 6620 OK **Multifunction actuator with novel structure for optical pick-up head** [6620-13]
C.-Y. Ke, Industrial Technology Research Institute (Taiwan); R.-S. Huang, National Tsing Hua Univ. (Taiwan)
- 6620 OL **High numerical-aperture microlens fabricated by focused ion beam milling** [6620-14]
Y. Chiu, C.-H. Huang, Y.-C. Hsu, National Chiao Tung Univ. (Taiwan)
- 6620 OM **An integrated software of optical system and media design** [6620-15]
K. G. Lim, Data Storage Institute (Singapore) and National Univ. of Singapore (Singapore); L. P. Shi, J. M. Li, X. S. Miao, W. L. Tan, H. X. Yang, Y. B. Lim, G. Q. Yuan, Data Storage Institute (Singapore); T. C. Chong, Data Storage Institute (Singapore) and National Univ. of Singapore (Singapore)
- 6620 ON **Modeling diffractive optical elements for optical data storage applications** [6620-16]
M. Mansuripur, College of Optical Sciences, The Univ. of Arizona (USA)
- 6620 OO **Focusing effect and performance analysis of flat metal slit array lens** [6620-54]
H. X. Yuan, B. X. Xu, T. C. Chong, Data Storage Institute (Singapore)

THERMALLY ASSISTED MAGNETIC RECORDING

- 6620 OP **Heat assisted magnetic recording with a fully integrated recording head (Invited Paper)** [6620-33]
M. A. Seigler, W. A. Challener, E. Gage, N. Gokemeijer, B. Lu, K. Pelhos, C. Peng, R. E. Rottmayer, X. Yang, H. Zhou, X. Zhu, T. Rausch, Seagate Research (USA)
- 6620 OR **90° bent metallic waveguide with a tapered C-shaped aperture for use in HAMR** [6620-35]
J. B. Leen, Stanford Univ. (USA); E. Cho, S.-D. Suh, Samsung Advanced Institute of Technology (South Korea); P. C. Hansen, Stanford Univ. (USA); J.-S. Sohn, S.-H. Choa, Samsung Advanced Institute of Technology (South Korea); L. Hesselink, Stanford Univ. (USA)
- 6620 OS **Study of the thermal effect on slider in heat assisted magnetic recording** [6620-36]
B. Xu, Q. Zhang, H. Yuan, J. Zhang, R. Ji, C. W. Chuah, S. B. M. Daud, Y. B. Lim, H. Wang, T. C. Chong, Data Storage Institute, A-Star (Singapore)

ADVANCED DRIVE SYSTEMS

- 6620 OU **Application-driven optical storage (Invited Paper)** [6620-37]
T. E. Schlesinger, T. Chen, Carnegie Mellon Univ. (USA)

- 6620 0V **Approach to high density more than 40GB per layer with Blu-ray disc format (Invited Paper)** [6620-38]
K. Lee, H. Zhao, I. Hwang, W. Hwang, H. Park, C. Chung, I. Park, Samsung Electronics Co., Ltd. (South Korea)
- 6620 0W **New DPD tracking servo method by signal processing for high-density ROM discs** [6620-39]
J. Shiraishi, T. Maruyama, Y. Takemoto, I. Ichimura, S. Kobayashi, Sony Corp. (Japan)
- 6620 0X **Effects of the high gain servo controller and the initial value compensation on optical disk drives** [6620-40]
Y. Urakawa, Y. Suzuki, Sony Corp. (Japan)
- 6620 0Y **A parallel architecture of interpolated timing recovery for high-speed data transfer rate and wide capture-range** [6620-41]
S. Higashino, S. Kobayashi, T. Yamagami, Sony Corp. (Japan)
- 6620 0Z **A new rate 8/12 run-length limited (2, 9) code for four-level read-only optical disc** [6620-18]
H. Hu, L. Pan, Y. Ni, Tsinghua Univ. (China)

SUPER RESOLUTION

- 6620 11 **Readout durability improvement of super-resolution near-field structure disc using germanium nitride interface layers** [6620-43]
T. Shima, Y. Yamakawa, J. Tominaga, National Institute of Advanced Industrial Science and Technology (Japan); J. Kim, Samsung Electronics Co., Ltd. (South Korea)
- 6620 13 **Stability enhancement of super-RENS high temperature readout signal** [6620-45]
J. Kim, J. Bae, I. Hwang, Y. Lee, N. Kim, C. Chung, I. Park, Samsung Electronics Co., Ltd. (South Korea); T. Shima, T. Nakano, J. Tominaga, National Institute of Advanced Industrial Science and Technology (Japan)
- 6620 14 **New materials for super resolution disc** [6620-46]
K. Kwak, S. Kim, C. Lee, K. Song, LG Electronics Institute of Technology (South Korea)
- 6620 17 **Super-resolution near-field optical disk with a thermal shield layer behind recording layer** [6620-28]
L. P. Shi, T. C. Chong, J. Y. Sze, J. M. Li, X. S. Miao, Data Storage Institute (Singapore); W. H. Lim, C. L. Gan, Nanyang Technological Univ. (Singapore)

HOLOGRAPHIC RECORDING

- 6620 1B **High-speed holographic read-only memory replication systems with two-wave and four-wave photorefractive amplifier** [6620-49]
T. Ito, A. Okamoto, N. Takahashi, T. Sano, Hokkaido Univ. (Japan)
- 6620 1D **Random phase 3D-shift multiplexing with spherical signal-reference waves in reflection geometry** [6620-51]
S. Solanki, X. Xu, M. Li, X. Liang, Data Storage Institute (Singapore); T.-C. Chong, Data Storage Institute (Singapore) and National Univ. of Singapore (Singapore)

- 6620 1H **Low angular distortion due to shrinkage after fixing in new holographic recording material** [6620-85]
Y. Usami, T. Sasaki, M. Kamo, S. Yamada, H. Suzuki, M. Yumoto, Fujifilm Corp. (Japan)
- 6620 1K **Effect of doping metal ion on holographic storage characteristics of PQ/poly(hydroxyethyl methacrylate-co-methyl methacrylate) hybrids** [6620-22]
W.-S. Cheng, W.-T. Whang, Y.-C. Chang, P.-L. Chen, Y.-N. Hsiao, S.-H. Lin, National Chiao Tung Univ. (Taiwan)
- 6620 1L **Laminated holographic recording medium based on photorefractive crystals** [6620-24]
M. Li, X. Xu, S. Solanki, X. Liang, Data Storage Institute (Singapore); T.-C. Chong, Data Storage Institute (Singapore) and National Univ. of Singapore (Singapore)
- 6620 1M **A novel angle servo for holographic data storage system** [6620-55]
N. Kim, K. Jung, K. Kim, P. Yoon, J. Park, Daewoo Electronics (South Korea); J. Park, Hanyang Univ. (South Korea)
- 6620 1N **Numerical calculation for volume holograms with the focus-shift multiplexing method** [6620-56]
M. Tanaka, K. Okada, Y. Nagasaka, A. Nakamura, K. Hirano, Y. Kurata, Sharp Corp. (Japan)
- 6620 1Q **Holographic grating evolution in photopolymer materials** [6620-59]
M. R. Gleeson, J. T. Sheridan, Univ. College Dublin (Ireland)
- 6620 1R **Asymmetric shift selectivity control and application for hologram position sensing in collinear holographic information storage system** [6620-60]
Y. Kaneko, TechnoConsulting, Inc. (Japan)

NEAR FIELD RECORDING

- 6620 1U **Opto-mechatronics issues in solid immersion lens based near-field recording (Invited Paper)** [6620-62]
N.-C. Park, Y.-J. Yoon, Y.-H. Lee, J.-G. Kim, W.-C. Kim, H. Choi, S. Lim, T.-M. Yang, M.-H. Choi, H. Yang, Y.-C. Rhim, Y.-P. Park, Yonsei Univ. (South Korea)
- 6620 1V **High-intensity bowtie nano-aperture vertical-cavity surface-emitting laser for ultrahigh-density near-field optical data storage (Best Student Paper Award)** [6620-63]
Z. Rao, L. Hesselink, J. S. Harris, Stanford Univ. (USA)
- 6620 1W **Readout characteristics of an advanced SIL system of high NA for the near field optical storage with cover layer media** [6620-64]
Y. S. Shin, J. U. Lee, J. M. Park, J. K. Seo, I. H. Choi, B. H. Min, LG Electronics (South Korea)
- 6620 1Z **Fabrication and testing of a GaP SIL with NA=2.64** [6620-67]
J. Zhang, M. Lang, T. D. Milster, T. Chen, E. Aspnes, College of Optical Sciences, Univ. of Arizona (USA); B. Bell, InPhase Technologies (USA)

HOLOGRAPHIC DRIVE AND CHANNEL DESIGN

- 6620 23 **Tolerances of a page-based holographic data storage system (Invited Paper)** [6620-70]
A. Hoskins, B. Sissom, F. Schlottau, E. Fotheringham, K. Curtis, InPhase Technologies, Inc. (USA)
- 6620 24 **Lens designs for page-based holographic storage systems** [6620-71]
Y. Takashima, S. Orlov, L. Hesselink, Stanford Univ. (USA)
- 6620 25 **Effects of 2-D interleaving and low density parity check (LDPC) codes on burst errors** [6620-72]
L. D. Ramamoorthy, B. V. K. V. Kumar, Carnegie Mellon Univ. (USA)
- 6620 26 **Error correcting sparse permutation channel codes for digital holographic data storage** [6620-78]
S. S. Orlov, Stanford Univ. (USA); K. V. Shcheglov, NASA Jet Propulsion Lab. (USA); H. Liu, S. I. Abarzhi, Illinois Institute of Technology (USA)

RECORDING MEDIA AND MASTERING TECHNOLOGY

- 6620 2A **Development of 40 GB dual-layer rewritable HD DVD media** [6620-74]
Y. Satoh, T. Nakai, S. Ashida, Toshiba Corp. (Japan)
- 6620 2B **High-speed HD DVD-R disc with organic dye** [6620-75]
K. Umezawa, S. Morita, K. Takazawa, N. Morishita, N. Nakamura, Toshiba Corp. (Japan)
- 6620 2C **XAFS study of phase-change recording material using actual media** [6620-76]
T. Nakai, M. Yoshiki, Y. Satoh, Toshiba Corp. (Japan)
- 6620 2D **Wet-etching characteristics of GeSbTe phase-change films for high-density media** [6620-77]
J.-H. Kim, J. Lim, J.-S. Lee, LG Elite (South Korea)
- 6620 2E **Ge/Al bilayer thin film for optical write-once media** [6620-31]
T. H. Wu, P. C. Kuo, National Taiwan Univ. (Taiwan); J.-P. Chen, Industrial Technology Research Institute (Taiwan); C.-Y. Wu, National Chiao Tung Univ. (Taiwan); P.-F. Yen, T.-R. Jeng, Industrial Technology Research Institute (Taiwan); D.-R. Huang, Hsinchu Science Park (Taiwan); S.-L. Ou, National Taiwan Univ. (Taiwan)
- 6620 2F **Nano-composite recording layers applied to write-once high-density optical data storage** [6620-32]
H.-C. Mai, T.-E. Hsieh, National Chiao-Tung Univ. (Taiwan)

Masud Mansuripur, College of Optical Sciences, University of Arizona (USA)

Holographic Recording

Bernard Bell, InPhase Technologies (USA)

Tsutomu Shimura, University of Tokyo (Japan)

Near Field Recording

No-Cheol Park, Yonsei University (South Korea)

Masataka Shinoda, Sony Corporation (Japan)

Holographic Drive and Channel Design

Kevin Curtis, InPhase Technologies (USA)

Atsushi Fukumoto, Sony Corporation (Japan)

Recording Media and Mastering Technology

Rie Kojima, Matsushita Electric Industrial Company, Ltd. (Japan)

Paul Wehrenberg, Apple Computer, Inc. (USA)

Postdeadline Session

Jooho Kim, Samsung Electronics Company, Ltd. (South Korea)

Tim Rausch, Seagate Technology, LLC (USA)

Introduction

The 2007 topical meeting on Optical Data Storage (ODS2007) was held on 20-23 May 2007 in Portland, Oregon. The number of attendees registered was 194. This was unfortunately the smallest attendance in the last seven years most likely due to the phase of development of the next generation DVD business such as Blu-ray Disc or HD-DVD which has been launched but has not yet matured. On the first day of the conference, four short courses were given on the timely topics of Bit-wise 3-D Memory, MEMS Technology for Optical Storage Systems, Advanced Media Technologies, and Holographic Storage: Advanced Media Systems. Over the following three days, 82 papers were presented in 14 technical sessions consisting of 57 oral presentations including 15 invited talks and 6 post deadline oral presentations and 25 poster presentations including 3 post deadline poster presentations. An evening panel session entitled "The influence of competitive technologies on the requirements and future role for optical data storage" included four presentations covering various applications and technologies as well as open discussion. Two newly established ODS Awards were presented for the first time: the Best Paper Award and the Best Student Paper Award. The former was given to Hideharu Mikami, Hitachi, Ltd. and the latter was given to Zhilong Rao of Stanford University.

This proceedings volume is organized into 14 sections corresponding to the technical sessions at the conference: "Multilayer Recording," "Micro-Holographic Recording," "Components and Testing," "Thermally Assisted Magnetic Recording," "Advanced Drive Systems," "Super Resolution," "Holographic Recording," "Near Field Recording," "Holographic Drive and Channel Design," and "Recording Media and Mastering Technology." Note that three holographic related sessions were held and more than one third of the papers presented were in holographic technologies.

The general chairs would like to thank program committee members, the advisory committee members, and the staff of the managing society (OSA) for their contributions to a successful conference. In particular, the general chairs would like to acknowledge the efforts of the program chairs, Tim Rauch of Seagate Research and Kimihiro Saito of Sony Corp., on organizing the excellent program and Barry Schechtman for helping to organize and chairing a very informative panel discussion.

We believe that this proceedings volume will be of great value in providing future direction to the optical data storage community.
