SPIE

Volume 6669

Proceedings of SPIE, 0277-786X, v. 6669

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/07/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE
Digital Library

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

ix	Conference Committee
xi	Introduction

SESSION 1 LED I

- 6669 03 **Vertical GaN based light emitting diodes on metal alloy substrate boosts high power LED performance** [6669-02]
T. Doan, C. Tran, SemiLEDs Corp. (USA); C. Chu, C. Chen, W. H. Liu, J. Chu, K. Yen, H. Chen, F. Fan, Semi-Photonics (Taiwan)
- 6669 05 **Improving the performance of mixed-color white LED systems by using scattered photon extraction technique** [6669-59]
H. Wu, N. Narendran, Y. Gu, A. Bierman, Rensselaer Polytechnic Institute (USA)

SESSION 2 APPLICATION

- 6669 07 **Efficient calculation of luminance variation of a luminaire that uses LED light sources** [6669-06]
P. Goldstein, Dialight Corp. (USA)
- 6669 09 **Direct LED backlight for large area LCD TVs: brightness analysis** [6669-08]
C.-C. Sun, National Central Univ. (Taiwan); I. Moreno, National Central Univ. (Taiwan) and Univ. Autonoma de Zacatecas (Mexico); S.-H. Chung, W.-T. Chien, C.-T. Hsieh, T.-H. Yang, National Central Univ. (Taiwan)

SESSION 3 SOURCE PERFORMANCE I

- 6669 0B **Performance and trends of high power light emitting diodes** [6669-11]
S. Bierhuizen, M. Krames, Philips Lumileds Lighting Co. (USA); G. Harbers, Xicato Inc. (USA); G. Weijers, Philips Lighting ADL (Netherlands)
- 6669 0C **Peak wavelength shifts and opponent color theory** [6669-12]
I. Ashdown, M. Salisbury, Philips Lighting (Canada)
- 6669 0D **Uniform color space based on color matching** [6669-13]
S.-F. Liao, T.-H. Yang, C.-C. Lee, National Central Univ. (Taiwan)
- 6669 0E **Achieving high CRI from warm to super white** [6669-14]
E. Bailey, Transducin Optics LLC (USA); E. S. Tormey, Lamina Ceramics Inc. (USA)

SESSION 4 LED II

- 6669 OI **Photoluminescence dynamics and structural investigation of InGaN/GaN multiple quantum well light emitting diodes grown by metalorganic chemical vapor deposition** [6669-18]
Z. S. Lee, Z. C. Feng, National Taiwan Univ. (Taiwan); A. G. Li, ShenZhen Fangda GuoKe Optronics Technical Co. Ltd. (China); H. L. Tsai, J. R. Yang, Y. F. Chen, National Taiwan Univ. (Taiwan); N. Li, I. T. Ferguson, Georgia Institute of Technology (USA); W. Lu, Fisk Univ. (USA)

SESSION 5 OLEDs AND SOLID STATE LIGHTING: JOINT SESSION WITH CONFERENCE 6655, ORGANIC LIGHT EMITTING MATERIALS AND DEVICES XI

- 6669 OJ **InGaN based high efficiency LED (Invited Paper)** [6669-15]
E.-H. Park, S.-K. Jeon, C.-T. Kim, D.-H. Kim, J.-S. Park, EpiValley Co., Ltd. (South Korea)

SESSION 6 PHOSPHORS

- 6669 OL **Enhanced performance of solid state lighting phosphors (Invited Paper)** [6669-22]
H. Menkara, B. K. Wagner, C. J. Summers, PhosphorTech Corp. (USA)
- 6669 ON **A precise optical model of phosphor-based multi-chip white LEDs** [6669-24]
W.-T. Chien, T.-X. Lee, S.-X. Ma, C.-C. Sun, National Central Univ. (Taiwan); I. Moreno, National Central Univ. (Taiwan) and Univ. Autonoma de Zacatecas (Mexico)
- 6669 OO **Silicate phosphors and white LED technology: improvements and opportunities** [6669-25]
C. Sommer, F. P. Wenzl, Joanneum Research Forschungsges mbH (Austria); P. Hartmann, P. Pachler, M. Schweighart, TridonicAtco Optoelectronics GmbH (Austria); G. Leising, Joanneum Research Forschungsges mbH (Austria) and Graz Univ. of Technology (Austria); S. Tasch, TridonicAtco Optoelectronics GmbH (Austria)
- 6669 OP **Materials design and properties of nitride phosphors for LEDs** [6669-26]
P. Schmidt, A. Tuecks, J. Meyer, H. Bechtel, D. Wiechert, Philips Research Europe Aachen (Germany); R. Mueller-Mach, G. Mueller, Philips Lumileds Lighting Co. (USA); W. Schnick, Munich Univ. (Germany)

SESSION 7 SOURCE PERFORMANCE II

- 6669 OR **Efficiency improvements of white-light CdSe nanocrystal-based LEDs** [6669-28]
J. D. Gosnell, M. A. Schreuder, S. J. Rosenthal, S. M. Weiss, Vanderbilt Univ. (USA)
- 6669 OT **Large, thin, flexible, and low-cost light emitting surfaces** [6669-30]
B. A. Salter, M. P. C. M. Krijn, Philips Research Labs. (Netherlands)
- 6669 OU **Investigation of thermal management technique in blue LED airport taxiway fixtures** [6669-31]
Y. Gu, A. Baker, N. Narendran, Rensselaer Polytechnic Institute (USA)

SESSION 8 LED III

- 6669 0V **Studies and issues of thin-GaN LED process (Invited Paper)** [6669-32]
P. H. Chen, C. L. Lin, Y. S. Lin, P. K. Chou, C. Y. Liu, National Central Univ. (Taiwan)
- 6669 0X **Growth of InGaN with high indium content on ZnO based sacrificial substrates** [6669-34]
N. Li, S.-J. Wang, E.-H. Park, Georgia Institute of Technology (USA); Z. C. Feng, National Taiwan Univ. (Taiwan); A. Valencia, J. Nause, CERMET, Inc. (USA); C. Summers, I. Ferguson, Georgia Institute of Technology (USA)
- 6669 0Y **Psychophysical evaluations of various color rendering from LED-based architectural lighting** [6669-58]
M. Thompson, Osram Sylvania (USA); U.-M. O'Reilly, Massachusetts Institute of Technology (USA); R. Levin, Osram Sylvania (USA)

SESSION 9 CHARACTERIZATION

- 6669 0Z **Thermal management methods for compact high power LED arrays (Invited Paper)** [6669-37]
A. Christensen, M. Ha, S. Graham, Georgia Institute of Technology (USA)
- 6669 10 **EpiEL: electroluminescence directly on LED epiwafers** [6669-38]
M. X. Ma, H. J. Jia, MaxMile Technologies, LLC (USA)
- 6669 11 **Is the thermal resistance coefficient of high-power LEDs constant?** [6669-39]
L. Jayasinghe, T. Dong, N. Narendran, Rensselaer Polytechnic Institute (USA)
- 6669 12 **Adapting radio technology to LED feedback systems** [6669-40]
M. Salsbury, I. Ashdown, Philips Lighting (Canada)
- 6669 13 **Thermal stability analysis of high brightness LED during high temperature and electrical aging** [6669-41]
L.-R. Trevisanello, M. Meneghini, Univ. of Padova (Italy); G. Mura, Univ. of Cagliari (Italy); C. Sanna, S. Buso, G. Spiazzi, Univ. of Padova (Italy); M. Vanzi, Univ. of Cagliari (Italy); G. Meneghesso, E. Zanoni, Univ. of Padova (Italy)

SESSION 10 SOURCE PERFORMANCE III

- 6669 14 **Improving LED extraction efficiency through surface patterning (Invited Paper)** [6669-42]
M. D. B. Charlton, Univ. of Southampton (United Kingdom) and Mesophotonics Ltd. (United Kingdom); T. Lee, M. E. Zoorob, Mesophotonics Ltd. (United Kingdom); P. A. Shields, W. N. Wang, Univ. of Bath (United Kingdom)
- 6669 16 **Use of nanofibers in high-efficiency solid-state lighting** [6669-44]
J. L. Davis, H. J. Walls, L. Han, T. A. Walker, J. A. Tufts, A. Andradý, D. Ensor, RTI International (USA)
- 6669 17 **Narrow beam RGB array optic** [6669-45]
E. Bailey, Transducin Optics LLC (USA) and Lamina Ceramics Inc. (USA)

- 6669 18 **Pseudorandom pulse code modulation of LEDs** [6669-46]
I. Toma, B. Bjeljac, I. Ashdown, Philips Lighting (Canada)

SESSION 11 MODELING

- 6669 19 **A comprehensive model to predict solid state lighting performance** [6669-47]
M. Salsbury, I. Ashdown, Philips Lighting (Canada)
- 6669 1A **Modeling of non-Lambertian sources in lighting applications** [6669-48]
M. Bennahmias, Physical Optics Corp. (USA); E. Arik, K. Yu, D. Voloshenko, Luminit (USA);
K. Chua, R. Pradhan, T. Forrester, T. Jansson, Physical Optics Corp. (USA)
- 6669 1B **Algorithm to illustrate context using dynamic lighting effects** [6669-49]
R. M. John, T. Balasubramanian, National Institute of Technology, Tiruchirappalli (India)
- 6669 1C **An electrical model of InGaN based high power light emitting diodes with self-heating effect** [6669-50]
B. Li, Foshan Univ. (China); Y. Feng, Shenzhen Univ. (China); Y. Liu, Foshan Univ. (China)

POSTER SESSION

- 6669 1F **Description of caustic structures in non-linear media: envelope of characteristic trajectories for the non-linear Schrödinger equation** [6669-52]
J. C. Juarez-Morales, G. Martinez-Niconoff, J. Munoz-Lopez, Instituto Nacional de Astrofísica, Óptica y Electrónica (Mexico)
- 6669 1G **Structural and optical properties of Si/ β -FeSi₂/Si heterostructures fabricated by Fe ion implantation and Si MBE** [6669-53]
N. G. Galkin, E. A. Chusovitin, D. L. Goroshko, Institute for Automation and Control Processes (Russia); R. M. Bayazitov, R. I. Batalov, Kazan Physical-Technical Institute (Russia);
T. S. Shamirzaev, A. K. Gutakovskiy, K. S. Zhuravlev, A. V. Latyshev, Institute of Semiconductor Physics (Russia)
- 6669 1H **Investigation of material properties for zincblende AlGaIn alloys applied in UV LEDs** [6669-54]
B.-T. Liou, Hsiuping Institute of Technology (Taiwan); C.-I. Liu, Soochow Univ. (Taiwan);
Y.-K. Kuo, National Changhua Univ. of Education (Taiwan)
- 6669 1I **Effect of spontaneous and piezoelectric polarization on the optical characteristics of blue light-emitting diodes** [6669-55]
Y.-K. Kuo, S.-H. Yen, M.-C. Tsai, National Changhua Univ. of Education (Taiwan); B.-T. Liou, Hsiuping Institute of Technology (Taiwan)
- 6669 1J **Simulation of deep ultraviolet light-emitting diodes** [6669-56]
Y.-K. Kuo, S.-H. Yen, National Changhua Univ. of Education (Taiwan); Y.-W. Wang, National Chiayi Univ. (Taiwan)

- 6669 1K **Enhancement of light extraction of GaN light-emitting diode using opals layer** [6669-60]
B. Zhang, Huazhong Univ. of Science and Technology (China); Z. Zhou, Huazhong Univ. of
Science and Technology (China) and Georgia Institute of Technology (USA); N. Li,
I. T. Ferguson, Georgia Institute of Technology (USA)

Michael R. Krames, Philips Lumileds Lighting Company (USA)
Yung-Sheng Liu, Industrial Technology Research Institute (Taiwan) and
National Tsing Hua University (Taiwan)
Shuji Nakamura, University of California, Santa Barbara (USA)
Eun-Hyun Park, EpiValley Company, Ltd. (South Korea)
Seong-Ju Park, Gwangju Institute of Science and Technology (South
Korea)
Yoon-Soo Park, Rensselaer Polytechnic Institute (USA)
Robert V. Steele, Strategies Unlimited (USA)
Brent K. Wagner, Georgia Institute of Technology (USA) and
PhosphorTech Corporation (USA)
Chih-Chung Yang, National Taiwan University (Taiwan)

Session Chairs

- 1 LED I
Ian T. Ferguson, Georgia Institute of Technology (USA)
- 2 Application
Nathan F. Gardner, Philips Lumileds Lighting Company (USA)

- 3 Source Performance I
Eun-Hyun Park, EpiValley Company, Ltd. (South Korea)
- 4 LED II
Tsunemasa Taguchi, Yamaguchi University (Japan)
- 5 OLEDs and Solid State Lighting: Joint Session with Conference 6655,
Organic Light Emitting Materials and Devices XI
Ian T. Ferguson, Georgia Institute of Technology (USA)
- 6 Phosphors
Ian T. Ferguson, Georgia Institute of Technology (USA)
- 7 Source Performance II
Wang N. Wang, University of Bath (United Kingdom)
- 8 LED III
Ian E. Ashdown, Philips Lighting Company (Canada)
- 9 Characterization
Jeff Nause, Cermet, Inc. (USA)
- 10 Source Performance III
Cheng-Yi Liu, National Central University (Taiwan)
- 11 Modeling
Nadarajah Narendran, Rensselaer Polytechnic Institute (USA)

Introduction

The seventh conference on Solid State Lighting, part of the SPIE Annual Meeting, took place from 27–29 August 2007 in San Diego, California.

Contained in these proceedings are the 39 submitted papers of invited and contributing presenters in this conference. The topics covered by these papers range from semiconductor fabrication and characterization to solid state lighting systems development. They are representative of an unmistakable progression from academic research to industrial commercialization, fulfilling a promise that began with the first solid state lighting conference in 2001. At the same time, they also demonstrate that much exciting work remains to be done in the field.

The conference chairs would like to thank SPIE for hosting this meeting, as well as the program committee members, the authors, and the session chairs for making this meeting a technical success, and for providing valued and timely research on solid state lighting.
