SPIE

Volume 6714

Proceedings of SPIE, 0277-786X, v. 6714

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Adaptive Coded Aperture Imaging and Non-Imaging Sensors*, edited by David P. Casasent, Timothy Clark, Proceedings of SPIE Vol. 6714 (SPIE, Bellingham, WA, 2007) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/07/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v Conference Committee

SESSION 1 IMAGING AND NON-IMAGING SENSORS NEEDS

- 6714 02 **Challenges in the evolution of advanced imaging systems (Keynote Paper)** [6714-01]
K. Lewis, Sciovis Ltd. (United Kingdom) and QinetiQ (United Kingdom)
- 6714 03 **DARPA interest in diffractive sensors (Invited Paper)** [6714-02]
T. Clark, Defense Advanced Research Projects Agency (USA); E. Jaska, Independent Consultant (USA)

SESSION 2 IMAGING AND NON-IMAGING DIFFRACTIVE SYSTEM CONCEPTS

- 6714 05 **Coded apertures: past, present, and future application and design** [6714-04]
S. R. Gottesman, Northrop Grumman Corp. (USA)
- 6714 06 **Agile, detecting and discriminating, infrared electro-optical system (ADDIOS) application to coded aperture imaging and non-imaging sensor systems** [6714-05]
M. Gutin, Applied Science Innovations, Inc. (USA); S. Rogers, Air Force Research Lab. (USA); O. Gutin, X.-M. Wang, Applied Science Innovations, Inc. (USA); D. Warner, J. Gueits, Air Force Research Lab. (USA)
- 6714 07 **Large-scale optical lensless imaging with geometric fiber constructs** [6714-06]
A. F. Abouraddy, Y. Fink, Massachusetts Institute of Technology (USA)
- 6714 08 **An investigation of the potential for the use of a high resolution adaptive coded aperture system in the mid-wave infrared** [6714-07]
C. Slinger, QinetiQ (United Kingdom); M. Eismann, Air Force Research Lab. (USA); N. Gordon, K. Lewis, G. McDonald, M. McNie, D. Payne, K. Ridley, M. Strens, G. De Villiers, R. Wilson, QinetiQ (United Kingdom)
- 6714 09 **Beam steering and pointing with counter-rotating grisms** [6714-08]
C. B. Chen, Raytheon Co. (USA)

SESSION 3 DIFFRACTIVE IMAGING HARDWARE

- 6714 0B **Reconfigurable mask for adaptive coded aperture imaging (ACAI) based on an addressable MOEMS microshutter array** [6714-11]
M. E. McNie, D. J. Combes, G. W. Smith, N. Price, K. D. Ridley, K. M. Brunson, K. L. Lewis, C. W. Slinger, QinetiQ Ltd. (United Kingdom); S. Rogers, Air Force Research Labs. (USA)

- 6714 0C **Dynamic aperture optical arrays based on polymeric MEMS actuators for large scale coding elements with application in visible to MWIR** [6714-12]
S. Goodwin, J. Carlson, RTI International (USA); S. Rogers, Air Force Research Lab. (USA); J. Kim, C. Kim, D. Brady, Duke Univ. (USA); B. R. Stoner, RTI International (USA) and Duke Univ. (USA)
- 6714 0D **IR performance study of an adaptive coded aperture diffractive imaging system employing MEMS eyelid shutter technologies** [6714-13]
A. Mahalanobis, C. Reyner, H. Patel, T. Haberfelde, Lockheed Martin Missiles and Fire Control (USA); D. Brady, Duke Univ. (USA); M. Neifeld, Univ. of Arizona (USA); B. V. K. V. Kumar, Carnegie Mellon Univ. (USA); S. Rogers, Air Force Research Lab. (USA)
- 6714 0E **Eclipse SteerTech liquid lenslet beam steering technology** [6714-15]
R. T. Westfall, Eclipse Energy Systems, Inc. (USA); S. Rogers, Air Force Research Lab. (USA); K. C. Shannon III, Eclipse Energy Systems, Inc. (USA)

SESSION 4 IMAGING AND NON-IMAGING ALGORITHMS

- 6714 0F **System models for IR diffractive optical systems based on a coherence theoretic framework** [6714-16]
N. Subotic, Michigan Tech Research Institute (USA); M. Eismann, Air Force Research Lab. (USA); C. Roussi, Michigan Tech Research Institute (USA); J. Meola, Air Force Research Lab. (USA); B. Koziol, Michigan Tech Research Institute (USA)
- 6714 0H **Discrete adaptive zone light elements (DAZLE): a new approach to adaptive imaging (Invited Paper)** [6714-18]
R. L. Kellogg, Argon ST Inc. (USA); M. J. Escuti, North Carolina State Univ. (USA)

POSTER SESSION

- 6714 0J **Interferometric control of contact line, shape, and aberrations of liquid lenses** [6714-14]
I. Voitenko, R. Storm, R. Westfall, Eclipse Energy Systems, Inc. (USA); S. Rogers, Air Force Research Lab. (USA)

Conference Committee

Conference Chairs

David P. Casasent, Carnegie Mellon University (USA)

Timothy Clark, Defense Advanced Research Projects Agency (USA)

Program Committee

David J. Brady, Duke University (USA)

Michael T. Eismann, Air Force Research Laboratory (USA)

Stephen R. Gottesman, Northrop Grumman Corporation (USA)

Abhijit Mahalanobis, Lockheed Martin Missiles and Fire Control (USA)

Mark A. Neifeld, University of Arizona (USA)

Demetri Psaltis, California Institute of Technology (USA)

Stanley Rogers, Air Force Research Laboratory (USA)

Christopher W. Slinger, QinetiQ (United Kingdom)

Nikola S. Subotic, Michigan Tech Research Institute (USA)

Rebecca A. Wilson, QinetiQ (United Kingdom)

Session Chairs

- 1 Imaging and Non-Imaging Sensors Needs
 Timothy Clark, Defense Advanced Research Projects Agency (USA)
 David P. Casasent, Carnegie Mellon University (USA)
- 2 Imaging and Non-Imaging Diffractive System Concepts
 Stephen R. Gottesman, Northrop Grumman Corporation (USA)
- 3 Diffractive Imaging Hardware
 Stanley Rogers, Air Force Research Laboratory (USA)
- 4 Imaging and Non-Imaging Algorithms
 Nikola S. Subotic, Michigan Tech Research Institute (USA)
